

Military expenditure by region in constant US dollars, 1988–2010

Figures are in US\$ b., at constant 2009 prices and exchange rates, except for the last figure which is in US\$ b. at 2010 prices and exchange rates. All world totals and most regional totals include estimates for at least one country. Figures do not always add up to totals because of the conventional rounding. Figures in round brackets indicate that more than 10% of the total figure consists of estimates for countries for which data is missing. The symbol ". ." indicates that data is unavailable, or that the world or regional estimate is considered too uncertain to be reliable.

NB: Many of the figures given here differ from those published in the SIPRI Yearbook 2011.

This is because the figures shown here exclude a number of countries included in the Yearbook estimates to make meaningful estimates for the whole period 1988-2010. The excluded countries are: Afghanistan, The estimates both here and in the Yearbook also exclude the following countries: Cuba, Equatorial Guinea, Yemen (South), Yugoslavia (former) and Zimbabwe. This is due either to data being missing for too many or to an absence of economic data to enable conversion to constant (2009) US\$.
