

Appendix 4A. Tables of military expenditure

ELISABETH SKÖNS, EVAMARIA LOOSE-WEINTRAUB, WUYI OMITOOGUN and PETTER STÅLENHEIM¹

Sources and methods are explained in appendix 4C. Notes and explanations of the conventions used appear below table 4A.4. Data in this appendix should not be combined with those in previous SIPRI Yearbooks because of revision.²

Table 4A.1. Military expenditure by region, in constant US dollars, 1991–2000

Figures are in US \$b., at constant 1998 prices and exchange rates. Figures do not always add up to totals because of the conventions of rounding.³

Region	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000

Notes:

The world total and the totals for regions, organizations and income groups in table 4A.1 are estimates, based on data in table 4A.3. When military expenditure data for a country are missing for a few years, estimates are made, most often on the assumption that the rate of change in that country's military expenditure is the same as that for the region to which it belongs. When no estimates can be made, countries are excluded from the totals. The countries excluded from all totals in table 4A.1 are: Afghanistan, the Republic of Congo, the Democratic Republic of the Congo (DRC), Iraq, Libya, Somalia and Yugoslavia.

Totals for geographical regions add up to the world total and subregional totals add up to regional totals.
Totals for regions and income groups cover the same groups of countries for all years, while totals for organizations cover only the member countries in the year given.

The country coverage of income groups is based on figures of 1998 GNP per capita as calculated by the World Bank and presented in its *World Development Report 1999/2000* (International Bank for Reconstruction and Development and Oxford University Press: Washington, DC, Sep. 1999).

Africa: Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Congo (Republic of), Congo (Democratic Republic of the, DRC), Côte d'Ivoire, Djibouti, Equatorial Guinea, Eritrea, Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Libya, Madagascar, Malawi, Mali, Mauritania, Mauritius, Morocco, Mozambique, Namibia, Niger, Nigeria, Rwanda, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, Sudan, Swaziland, Tanzania, Togo, Tunisia, Uganda, Zambia, Zimbabwe.

North Africa: Algeria, Libya, Morocco, Tunisia.

Sub-Saharan Africa: Angola, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Congo (Rep. of), Congo (DRC), Côte d'Ivoire, Djibouti, Equatorial Guinea, Eritrea, Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Morocco, Mozambique, Namibia, Niger, Nigeria, Rwanda, Senegal, Sudan, Swaziland, Tanzania, Togo, Uganda, Zambia, Zimbabwe.

Americas: Argentina, Belize, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Ecuador, El Salvador, Guatemala, Guyana, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Uruguay, USA, Venezuela.

North America: Canada, USA.

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, Panama.

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Guyana, Paraguay, Peru, Uruguay, Venezuela.

Asia and Oceania: Afghanistan, Australia, Bangladesh, Brunei, Cambodia, China, Fiji, India, Indonesia, Japan, Kazakhstan (1992–), New Zealand, North Korea, South Korea, Kyrgyzstan (1992–), Laos, Malaysia, Mongolia, Myanmar (Burma), Nepal, Pakistan, Papua New Guinea, Philippines, Singapore, Sri Lanka, Taiwan, Tajikistan (1992–), Thailand, Turkmenistan (1992–), Uzbekistan (1992–), Viet Nam.

Central Asia: Kazakhstan (1992–) Kyrgyzstan (1992–), Tajikistan (1992–), Turkmenistan (1992–), Uzbekistan (1992–).

East Asia: Brunei, Cambodia, China, India, Indonesia, Japan, North Korea, Laos, Malaysia, Myanmar (Burma), Philippines, Singapore, Taiwan, Thailand, Viet Nam.

South Asia: Afghanistan, Bangladesh, India, Nepal, Pakistan, Sri Lanka.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

Europe: Albania, Armenia (1992–), Austria, Azerbaijan (1992–), Belarus (1992–), Belgium, Bosnia and Herzegovina (1992–), Bulgaria, Croatia (1992–), Cyprus, Czechoslovakia (–1992), Czech Republic (1993–), Denmark, Estonia, Finland, France, Georgia (1992–), Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Macedonia (1992–), Malta, Moldova (1992–), Netherlands, Norway, Poland, Portugal, Romania, Russia (1992–), Slovakia (1993–), Slovenia (1992–), Spain, Sweden, Switzerland, UK, Ukraine (1992–), USSR (–1991), USSR (1992–), USSR (–1991), Yugoslavia (Serbia and Montenegro, 1992–).

Central and Eastern Europe: Albania, Armenia (1992–), Azerbaijan (1992–), Belarus (1992–), Bosnia and Herzegovina (1992–), Bulgaria, Croatia (1992–), Czechoslovakia (–1992), Czech Republic (–1993), Estonia, Georgia, Latvia, Lithuania, Macedonia (1992–), Moldova (1992–), Poland, Romania, Russia (1992–), Slovakia (1993–), Slovenia (1992–), Ukraine (1992–), USSR (–1991), Yugoslavia (1992–).

Western Europe: Austria, Belgium, Cyprus, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK.

Middle East: Bahrain, Egypt, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen. *Association of South-East Asian Nations (ASEAN):* Brunei, Cambodia (1999–), Indonesia, Laos (1997–), Malaysia, Myanmar (Burma) (1997–), the Philippines, Singapore, Thailand, Viet Nam (1995–).

Organization for Security and Co-operation in Europe (OSCE): Albania, Armenia (1992–), Austria, Azerbaijan (1992–), Belarus (1992–), Belgium, Bosnia and Herzegovina (1992–), Bulgaria, Canada, Croatia (1992–), Cyprus, Czech Republic (1993–), Denmark, Estonia, Finland, France, Georgia (1992–), Germany, Greece, Hungary, Iceland, Ireland, Italy, Kazakhstan (1992–), Kyrgyzstan (1992–), Latvia, Lithuania, Luxembourg, Macedonia (1995–), Malta, Moldova (1992–), Netherlands, Norway, Poland, Portugal, Romania, Russia (1992–), Slovakia (1993–), Slovenia (1992–), Spain, Sweden, Switzerland, Tajikistan (1992–), Turkey, Turkmenistan (1992–), UK, Ukraine (1992–), USA, USSR (–1991), Uzbekistan (1992–), Yugoslavia (2000–).

Commonwealth of Independent States (CIS): Armenia, Azerbaijan, Belarus, Georgia (1993–), Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, USSR (–1991), Uzbekistan.

CIS Europe: Armenia, Azerbaijan, Belarus, Georgia (1993–), Moldova, Russia, Ukraine, USSR (–1991).

CIS Asia: Kazakhstan (1992–), Kyrgyzstan (1992–), Tajikistan (1992–), Turkmenistan (1992–), Uzbekistan (1992–).

European Union (EU): Austria (1995–), Belgium, Denmark, Finland (1995–), France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden (1995–), UK.

NATO: Belgium, Canada, Czech Republic (1999–), Denmark, France, Germany, Greece, Hungary (1999–), Iceland, Italy, Luxembourg, Netherlands, Norway, Poland (1999–), Portugal, Spain, Turkey, UK, USA.

NATO Europe: Belgium, Czech Republic (1999–), Denmark, France, Germany, Greece, Hungary (1999–), Iceland, Italy, Luxembourg, Netherlands, Norway, Poland (1999–), Portugal, Spain, UK.

Organization of Petroleum-Exporting Countries (OPEC): Algeria, Ecuador (–1992), Gabon (–1995), Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates and Venezuela.

Organisation for Economic Co-operation and Development (OECD): Australia, Austria, Belgium, Canada, Czech Republic (1995–), Denmark, Finland, France, Germany, Greece, Hungary (1996–), Iceland, Ireland, Italy, Japan, South Korea (1996–), Luxembourg, Mexico (1994–), Netherlands, New Zealand, Norway, Poland (1996–), Portugal, Slovak Rep. (2000–), Spain, Sweden, Switzerland, Turkey, UK, USA, USSR (–1991).

Table 4A.2. Military expenditure by region and country, in local currency, 1991–2000
Figures are in local currency, current prices.

Conventions:

- Uncertain figure.
- SIPRI estimate.
- Change of multiple.

Notes:

¹ Contributions of military expenditure data, estimates and advice are gratefully acknowledged from Julian Cooper (Centre for Russian and East European Studies, University of Birmingham), Dimitar Dimitrov (University of National and World Economy, Sofia), Paul Dunne (Middlesex University, London), Jean-Paul Hébert (Centre Interdisciplinaire de Recherches sur la Paix et d'Etudes Stratégiques, CIRPES, Paris), Ivan Hostnik (Centre for Strategic Studies, Slovenia), Guy Lamb (Centre for Conflict Resolution, Cape Town), Reuven Pedatzur (Tel Aviv University), Leonid Polyakov (Ukraine Centre for Economic & Political Studies, Kiev), Thomas Scheetz (Buenos Aires), Ron Smith (Birkbeck College, London), Shaoguang Wang (Chinese University of Hong Kong) and Ozren Zunec (University of Zagreb).

² Military expenditure data from different volumes of the SIPRI Yearbook should not be combined because of data revision between volumes. Revision can be significant; e.g., when a better time series becomes available, the entire SIPRI series is revised accordingly.

³ Figures in constant dollars are converted using the market exchange rate for all countries except Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, North Korea, Russia, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. For these countries conversion to dollars has been done using the purchasing power parity (PPP) rates from *World Development Indicators 2000* (International Bank for Reconstruction and Development: Washington, DC, Mar. 2000).

⁴ The figure for Angola should be seen in the context of highly uncertain economic statistics because of the impact of war on the Angolan economy.

⁵ Formerly Zaire.

⁶ Eritrea became independent from Ethiopia in May 1993. Figures for 1995 include expenditure for demobilization.

⁷ Figures in local currency are in Communauté financière africaine (CFA) francs. Up to and including the *SIPRI Yearbook 1998*, data were expressed in pesos. The peso was replaced in 1997 at the rate of 65 pesos per CFA franc.

⁸ The figure for Liberian military expenditure in 1999 is for security, which represents 13% of total expenditure of L\$2.6 billion.

⁹ Figures include expenditure for the gendarmerie and the National Police.

¹⁰ Figures include expenditure for the demobilization of government and RENAMO soldiers and the formation of a new unified army from 1994 onwards.

¹¹ Namibia became independent on 21 Mar. 1990. During the period 1990/91–1992/93 military construction accounted for more than half of Namibian military expenditure. Figures for 1999 refer to the budget of the Ministry of Defence only. In addition to this the 1999 budget of the Ministry of Finance includes a contingency provision of 104 million ND for the Namibian military presence in the Democratic Republic of the Congo (DRC).

¹² Figures for Nigeria before 1999 are understated because of the use by the military of a favourable specific dollar exchange rate.

¹³ Figures for Rwanda in 1997 do not include demobilization allowance of 1.0 billion francs. The figure for 1998 is the official defence budget. According to the International Monetary Fund (IMF) there are additional sources of funding for military activities, both within budget and extra-budgetary. Alternative estimates put Rwanda's military expenditure at twice the official figure.

¹⁴ Figures for Senegal do not include expenditure for paramilitary forces, which in 1998 amounted to 21 100 million francs.

¹⁵ Sudan changed its currency from pounds to dinars on 1 Sep. 1999, at the rate of one dinar to 10 pounds.

¹⁶ Figures for Zambia are uncertain, especially in constant dollars and GDP shares, because of very rapid inflation and several changes in the currency.

¹⁷ The figure for Zimbabwe in 1999 includes a supplementary allocation of 1800 million ZD.

¹⁸ Figures are official figures from the Costa Rican Ministry for Internal Security.

¹⁹ This state has changed currency during the period. All figures have been converted to the most recent currency.

²⁰ The Panamanian defence forces were disbanded in 1990 and replaced by the national guard, consisting of the national police and the air and maritime services.

²¹ Figures are for fiscal year rather than for calendar year.

²² Figures are uncertain because of very rapid inflation and a change in the currency. All figures have been converted to the most recent currency.

²³ The figure for Brazil in 2000 is for the adopted budget and is likely to be significantly revised downwards, since actual defence expenditure is usually much lower than budgeted.

²⁴ Figures for Chile are based on estimates by the IMF of military expenditures which include military pensions and direct transfers from the Corporación del Cobre (CODELCO) for military purchases.

²⁵ Became independent after the breakup of the Soviet Union in Dec. 1991. Figures are converted to dollars using the PPP.

²⁶ Turkmenistan became independent after the breakup of the Soviet Union in Dec. 1991. Figures are converted to dollars using the PPP. The coverage of this series is not consistent over time due to classification changes in the Turkmenistan system of public accounts.

²⁷ Figures for Brunei are current expenditure on the Royal Brunei Armed Forces.

²⁸ Figures for China are for estimated total military expenditures. On the estimates in local currency and share of GDP, see Wang, S., 'The military expenditure of China, 1989-98', *SIPRI Yearbook 1999: Armaments, Disarmament and International Security* (Oxford University Press: Oxford, 1999), pp. 334-49. Dollar figures are converted using the market exchange rate.

²⁹ Figures for North Korea are converted to dollars using the PPP. Figures in the table for constant dollars are in current prices and 1998 exchange rate.

³⁰ Figures for Nepal do not include expenditures on paramilitary forces, which in fiscal year 1998/99 amounted to 3315 million taka.

³¹ Bosnia and Herzegovina declared its independence from the former Yugoslavia in Mar. 1992 and was recognized by the European Community and the USA in Apr. 1992. The local currency since Jan. 1998 is the convertible mark, set at 1 convertible mark = 1 Deutsche Mark. Figures in US\$ are at 1998 prices and exchange rates.

³² Croatia declared its independence from the former Yugoslavia in June 1991 and was recognized by the European Community in Jan. 1992 and by the United Nations in May 1992.

³³ The Czech Republic was formed on 1 Jan. 1993 after the breakup of Czechoslovakia.

³⁴ Czechoslovakia was divided into the Czech Republic and the Republic of Slovakia on 1 Jan. 1993. Figures in the table for constant dollars are in current prices and 1990 exchange rate.

³⁵ Estonia became independent in Sep. 1991. Figures do not include expenditures for paramilitary forces.

³⁶ Georgia became independent after the breakup of the Soviet Union in Dec. 1991. Figures are converted to dollars using the PPP. Figures probably do not include the significant amounts of military aid received from Turkey.

³⁷ Latvia became independent in Sep. 1991. Figures do not include: (a) allocations for military pensions paid by Russia, which averaged 27 million lats per year over the three years 1996–98; or (b) expenditure on paramilitary forces, which amounted to 98.5 million lats in 1999.

³⁸ Lithuania became independent in Sep. 1991.

³⁹ Macedonia declared its independence from the former Yugoslavia in Nov. 1992 and was admitted to the United Nations in Apr. 1993.

⁴⁰ For sources and methods of the military expenditure figures for the USSR and Russia, see Cooper, J., 'The military expenditure of the USSR and the Russian Federation, 1987–97', *SIPRI Yearbook 1998: Armaments, Disarmament and International Security* (Oxford University Press: Oxford, 1998), pp. 243–59. Dollar figures are converted using the PPP.

⁴¹ The Slovak Republic was formed on 1 Jan. 1993 after the breakup of Czechoslovakia. Figures do not include expenditure on paramilitary forces. These amounted to 400 million korunas in 1998 and 458 million in 1999.

⁴² Slovenia declared its independence from the former Yugoslavia in June 1991 and was recognized by the European Community in Jan. 1992 and by the United Nations in May 1992. Figures have been revised according to the NATO definition, as provided to SIPRI by Slovenia for the years 1997–99.

⁴³ Figures for Spain do not include a major part of government military research and development expenditure financed by the Ministry of Industry. Approximately 111.7 billion pesetas in 1998, 163.1 billion pesetas in 1999 and 159.4 billion pesetas in 2000.

⁴⁴ Ukraine became independent after the breakup of the Soviet Union in Dec. 1991. Figures are converted to dollars using the PPP. Figures are for the adopted budget and include 'national defence' and some other defence items. Actual expenditure is reportedly 95–99% of budget for the years 1996–99 and about 80–90% of budget for 1994–95.

⁴⁵ Serbia and Montenegro announced the creation of the Federal Republic of Yugoslavia in Apr. 1992. Figures do not include revenues from the special defence tax introduced in 1998.

⁴⁶ Figures for the UAE exclude local military expenditure by each of the 7 emirates that form the United Arab Emirates.

Source: SIPRI military expenditure database.

Appendix 4B. Tables of NATO military expenditure

Table 4B.1. NATO distribution of military expenditure by category, 1991–2000

Figures are in US \$m. at 1998 prices and exchange rates. Figures in italics are percentage changes from previous year.

Note: The figures in constant dollars in this table are based on the data provided by NATO showing percentage shares of equipment in total military expenditure, applied to the figures for total expenditure in table 4A.3. France does not return figures giving this breakdown to NATO.

Sources: NATO, *Financial and Economic Data Relating to NATO Defence: Defence Expenditures of NATO Countries (1980–2000)*, Press release M–DPC–2 (2000)107, 5 Dec. 2000, URL <<http://www.nato.int/docu/pr/2000/p00-107e.htm>>; and NATO Press releases M–DPC–2 (1999)152 (2 Dec. 1999); M–DPC–2(97)147 (2 Dec. 1997); M–DPC–2(96)168 (17 Dec. 1996); M–DPC–2(95)115 (29 Nov. 1995); and M–DPC–2(93)76 (8 Dec. 1993).

Table 4B.2. Military equipment expenditure of France, 1991–2000

Figures are in US \$m. at 1998 prices and exchange rates. Figures in italics are percentage changes from previous year.

Item	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000
Equipment	17 794	17 465	16 157	15 858	13 166	13 465	12 971	11 685	11 636	12 386
Equipment change	-5.2	-1.8	-7.5	-1.9	-17.0	2.3	-3.7	-9.9	-0.4	6.4

Note: This table was compiled on the basis of domestic data on equipment expenditure as presented in the French defence budget. These figures refer to actual expenditures. Equipment expenditure includes all items covered by titles V and VI of the French defence budget (i.e., research and development, prototype construction, procurement of finished equipment, infrastructure and technical and industrial investments, and investment subsidies). This equipment expenditure is not comparable to the equipment expenditure as defined by NATO and presented in table 4B.1. For example, maintenance of equipment and purchases of munitions, which fall under operating costs according to the NATO definition, are included in titles V and VI of the French budget. French equipment expenditure in 1996, according to the NATO definition, has been estimated as 20 per cent lower than the figure given above. The data in this table should therefore not be compared with the NATO data in table 4B.1.

Appendix 4C. Sources and methods for military expenditure data

This appendix describes the sources and methods for the SIPRI military expenditure data as provided in the tables in appendix 4A and on the SIPRI Internet site, URL <<http://projects.sipri.se/milex.html>>. For a more comprehensive overview of the conceptual problems and sources of uncertainty involved in all sets of military expenditure data, the reader is referred to other sources.¹ A major revision of the SIPRI military expenditure series has been made during recent years to improve its consistency over time. Thus the revised series, for the period beginning in 1988, cannot always be combined with the SIPRI series for earlier years, 1950–87. There is also a continuous revision and updating of the data, in particular for the most recent years, as data for budget allocations are replaced by data for actual expenditures. The base year for the constant dollar series has been changed from 1995 to 1998 in this volume.

I. Purpose of the data

The main purpose of the data on military expenditure is to provide an easily identifiable measure of the scale of resources absorbed by the military. Military expenditure is an input measure which is not directly related to the ‘output’, of military activities, such as military capability or military security. Long-term trends in military expenditure and sudden changes in trend may be signs of a change in military output, but such interpretations should be made with caution.

Military expenditure data as measured in constant dollars (table 4A.3) are an indicator of the trend in the volume of resources used for military activities with the purpose of allowing comparisons over time for individual countries and comparisons between countries. The share of gross domestic product (GDP, see table 4A.4) is an indicator of the proportion of national resources used for military activities, and therefore of the economic burden imposed on the national economy.

II. Coverage of the data

The military expenditure tables in appendix 4A cover 159 countries, including most countries with a population exceeding 1 million. The time coverage in this Yearbook is the 10-year period 1991–2000. Consistent SIPRI data are available from 1988 onwards for all countries. These are not always consistent with the SIPRI series for the period 1950–87.

Definition of military expenditure

The definition of military expenditure adopted by SIPRI, based on the NATO definition, is used as a guideline. Where possible, SIPRI military expenditure data include all current and capital expenditure on: (a) the armed forces, including peace-keeping forces; (b) defence ministries and other government agencies engaged in defence projects; (c) paramilitary forces, when judged to be trained and equipped for military operations; and (d) military space activities. Such expenditures should include: (a) military and civil personnel, including retirement pensions of military personnel and social services for personnel; (b) operations and maintenance; (c) procurement; (d) military research and development; and (e) military aid (in the military expenditure of the donor country). Excluded are civil defence and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion and weapon destruction.

In practice it is not possible to apply this definition for all countries, since this would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. In many cases SIPRI is confined to using the national data provided, regardless of definition. Priority is then given to the choice of a uniform time series for each country to achieve consistency over time, rather than to adjusting the figures for single years according to a common definition. In cases where it is impossible to use the same source and definition for all years, the percentage change between years in the deviant source is applied to the existing series in order to make the trend as correct as possible. Such figures are shown in square brackets. In the light of these difficulties, military expenditure data are not suitable for close comparison between individual countries and are more appropriately used for comparisons over time.

III. Methods

Estimation

SIPRI data reflect the official data reported by governments. As a general rule, SIPRI assumes national data to be accurate until there is evidence to the contrary. Estimates are made primarily when the coverage of official data does not correspond to the SIPRI definition or when there is no consistent time series available. In the first case, estimates are made on the basis of an analysis of official government budget and expenditure accounts. The most comprehensive estimates, those for China and Russia, have been presented in detail in previous Yearbooks.² In the second case, differing time series are linked together. In order not to introduce assumptions into the military expenditure statistics, estimates are always based on empirical evidence and never based on assumptions or extrapolations. Thus, no estimates are made for countries which do not release any official data, and these countries are displayed without figures. SIPRI estimates are presented in square brackets in the tables (these are most often used when two different series are linked together). Round brackets are

² Cooper, J., 'The military expenditure of the USSR and the Russian Federation, 1987–97', *SIPRI Yearbook 1998: Armaments, Disarmament and International Security* (Oxford University Press: Oxford, 1998), pp. 243–59; and Wang, S., 'The military expenditure of China, 1989–98', *SIPRI Yearbook 1999: Armaments, Disarmament and International Security* (Oxford University Press: Oxford, 1999), pp. 334–49.

used when data are uncertain for other reasons, such as the reliability of the source or the economic context.

Data for the most recent years include two types of estimate which apply to all countries: (a) figures for the most recent year(s) are for adopted budget, budget estimates or revised estimates, and are thus more often than not revised in subsequent years; and (b) the deflator used for the last year in the series is an estimate based on a limited number of months or as provided by the International Monetary Fund (IMF). Unless exceptional uncertainty is involved in these estimates, they are not bracketed.

The world total and the totals for regions, organizations and income groups in table 4A.1 are estimates because data are not always available for all countries in all years. These estimates are most often made on the assumption that the rate of change in an individual country for which data are missing is the same as for the average in the region to which it belongs. When no estimate can be made, countries are excluded from the totals.

Calculations

The SIPRI military expenditure figures are presented on a calendar-year basis, with a few exceptions. The exceptions are Canada, the UK and the USA, for which NATO statistics report data on a fiscal-year basis. Calendar-year data are calculated on the assumption of an even rate of expenditure throughout the fiscal year. The ratio of military expenditure to GDP is calculated in domestic currency at current prices and for calendar years.

The original data are provided in local currency at current prices (as presented in table 4A.2). In order to enable comparisons between countries and over time, these are converted to US dollars at constant prices (table 4A.3). The deflator used for conversion from current to constant prices is the consumer price index (CPI) of the country concerned. This choice of deflator is connected to the purpose of the SIPRI data—that they should be an indicator of resource use on an opportunity cost basis.³

For most countries the conversion to dollars is done using the average market exchange rate (MER), but for some countries purchasing power parity (PPP) rates are used. The PPP dollar rate of a country's currency is defined as the number of units of the country's currency required to buy the same amount of goods and services in the domestic market as \$1 would buy in the United States.⁴ While MERs are based on price ratios in foreign transactions only, the PPPs are based on price comparisons for the entire economy. For economies with a low degree of foreign exposure, PPP rates thus reflect the price ratios of the entire economy more accurately than MERs. This is the case for some countries in transition and for North Korea, and SIPRI therefore uses PPP rates for these countries (see the footnotes to appendix 4A). The same applies to many developing countries, and PPP rates would thus be a more appropriate exchange rate for them as well. However, the lack of good PPP data imposes the use of MERs for conversion to constant dollars for developing countries. For a discussion of the advantages and disadvantages of the use of PPP rates and the impact of using PPP rates instead of MERs, see the *SIPRI Yearbook 1999*.⁵

³ A military-specific deflator would be the more appropriate choice if the objective were to measure the purchasing power in terms of the amount of military personnel, goods and services that could be bought for the monetary allocations for military purposes.

⁴ *World Bank Atlas 1998* (International Bank for Reconstruction and Development/World Bank: Washington, DC, Mar. 1998), p. 58.

⁵ 'Sources and methods for military expenditure data', *SIPRI Yearbook 1999* (note 2), pp. 330–33.

In this Yearbook the data in constant US dollars are presented to base year 1998. The change from the base year 1995 (as used in the *SIPRI Yearbook 2000*) has had an impact on the comparison between countries because different national currencies move against the dollar in different ways. The shift of base year has also had a significant impact on regional shares in the world total. Thus, while the share of Asia in world military expenditure in 1999 is 17.8 per cent when expressed at constant 1995 prices and exchange rates, it is 15.2 per cent with 1998 as the base year.

Total military expenditure figures are calculated for three country groupings—geographical region, membership in international organizations and income per capita. The coverage of these groupings is provided in the notes to table 4A.1.

IV. Sources

The sources for military expenditure data are, in order of priority: (a) primary sources, that is, official data provided by national governments, either in their official publications or in response to questionnaires; (b) secondary sources which quote primary data; and (c) other secondary sources.

The first category consists of national budget documents, defence white papers and public finance statistics as well as responses to a SIPRI questionnaire which is sent out annually to ministries of finance and of defence, central banks and national statistical offices of the countries in the SIPRI database. It also includes government responses to questionnaires about military expenditure sent out by the United Nations and the Organization for Security and Co-operation in Europe (OSCE).

The second category includes international statistics, such as those of NATO and the IMF. Data for NATO countries are taken from NATO defence expenditure statistics published in a number of NATO sources. Data for many developing countries are taken from the IMF's *Government Financial Statistics Yearbook*, which provides a defence line for most of its member countries. This category also includes publications of other organizations which provide proper references to the primary sources used. The three main sources in this category are the *Europa Yearbook* (Europa Publications Ltd, London), the *Country Reports* of the Economist Intelligence Unit (London), and the *Country Reports* by IMF staff.

The third category of sources consists of specialist journals and newspapers.

The main sources for economic data are the publications of the IMF: *International Financial Statistics*, *World Economic Outlook* and *Staff Country Reports*. The source for most PPP rates is *World Development Indicators* (International Bank for Reconstruction and Development).

Official reporting of data on military expenditure

SIPRI sends out annual requests to the governments of most countries in the world to provide official data on their military expenditure according to a standardized format. Similar requests are sent out by other organizations. Table 4C presents the response rates during the year 2000 for three of the major efforts in this field—those of SIPRI, NATO and the United Nations.

The SIPRI questionnaire asks governments to report their military expenditure for the most recent five years. The exceptions are the very small countries, mostly small islands in the Pacific and Caribbean, which are assumed not to have any defence forces of significant size. The NATO member states are also exempted, because for

these countries SIPRI uses the data compiled by the NATO Economics Directorate and published in a standardized format. In 2000 the SIPRI questionnaire was sent to 146 countries out of a total of 159 covered in the SIPRI database (table 4C, columns 1 and 2). Of these countries 34 provided data on their military expenditure (column 3).

NATO had 19 member states in 2000, 3 of which are new member states in Central and Eastern Europe, and one of which (Iceland) does not have national defence forces and therefore does not provide data. The UN General Assembly calls annually upon all its 189 member states (table 4C, column 5) to 'report their military expenditure for the latest fiscal year for which data are available, using, preferably and to the extent possible, the reporting instrument as recommended in its resolution 35/142B' of 12 December 1980.⁶ The UN received 32 replies in year 2000 (table 4C, column 6).

The aggregate number of countries which provided data to at least one of these three organizations during year 2000 is 60 (table 4C, column 7). This means that about one-third of the countries covered in the SIPRI military expenditure database did report their military expenditure according to a standardized format. A geographical analysis of the response rates shows that the regions with the highest response rates are Europe and South America. Excluding the NATO countries, which are obliged to report to NATO, the rest of Western Europe had a response rate of 6 out of 7. The response rate for countries in Central and Eastern Europe was almost identical (11 out of 15) after exclusion of the Commonwealth of Independent States (CIS) countries. In South America 7 out of 11 countries reported their military expenditure. In the South American region availability of military budgets varies substantially. While countries like Bolivia, Brazil, Chile and Colombia have replied regularly to SIPRI questionnaires, and Paraguay did for the first time in 2000, others such as Argentina, Ecuador, Peru, Uruguay and Venezuela have not provided data to SIPRI for several years. Peru, for example, cites security reasons for not revealing the breakdown of its military expenditures.

In most other regions response rates were very low. Except for Mexico, none of the Central American countries has returned the SIPRI questionnaire or provided official documents on its military expenditure. Among the member states of the CIS none reported to SIPRI in 2000 and only two to the UN—Moldova and Uzbekistan.

Of 16 East Asian countries only 3 reported—South Korea, Taiwan and Thailand. Two South Asian countries reported—Nepal and Pakistan—and 3 in the Middle East—Jordan, Lebanon and Turkey.

Among African countries the response rate is extremely low: 7 out of 50 African states reported to either SIPRI or the UN in 2000—Botswana, Burundi, Madagascar, Mauritius, Senegal, the Seychelles and South Africa. The reasons for the low availability of primary data on military expenditure in many African countries have been explored in a recent SIPRI study, which showed that it is not always due to a desire to hide the data, but more often to a combination of a lack of demand for the data and a proper channel for publishing such documents. Bureaucratic bottlenecks and an absence of a proper channel of communication between the relevant government ministries (of finance, defence and information) make it more difficult for the ministries to complete standardized questionnaires on military expenditure. In many instances, none of them expressly accepts responsibility for making such information available, preferring instead to ask for permission from a higher authority. In the absence of a policy on such issues, the higher authority does not
