

# Annex A. Arms control and disarmament agreements

This annex lists multi- and bilateral treaties, conventions, protocols and agreements relating to arms control and disarmament. Unless otherwise stated, the status of agreements and of their parties and signatories is as of 1 January 2017.

## Notes

1. The agreements are divided into universal treaties (i.e. multilateral treaties open to all states; section I), regional treaties (i.e. multilateral treaties open to states of a particular region; section II) and bilateral treaties (section III). Within each section, the agreements are listed in the order of the date on which they were adopted, signed or opened for signature (multilateral agreements) or signed (bilateral agreements). The date on which they entered into force and the depositary for multilateral treaties are also given.

2. The main source of information is the lists of signatories and parties provided by the depositaries of the treaties. In lists of parties and signatories, states whose name appears in italics ratified, acceded or succeeded to, or signed the agreement during 2016.

3. States and organizations listed as parties have ratified, acceded to or succeeded to the agreements. Former non-self-governing territories, upon attaining statehood, sometimes make general statements of continuity to all agreements concluded by the former governing power. This annex lists as parties only those new states that have made an uncontested declaration on continuity or have notified the depositary of their succession. The Russian Federation continues the international obligations of the Soviet Union. Serbia continues the international obligations of the State Union of Serbia and Montenegro.

4. Unless stated otherwise, the multilateral agreements listed in this annex are open to all states or to all states in the respective zone (or region) for signature, ratification, accession or succession. Not all the signatories and parties are United Nations members. Taiwan, while not recognized as a sovereign state by many countries, is listed as a party to the agreements that it has ratified.

5. Where possible, the location (in a printed publication or online) of an accurate copy of the treaty text is given. This may be provided by a treaty depositary, an agency or secretariat connected with the treaty, or in the *United Nations Treaty Series* (available online at <<http://treaties.un.org/>>).

## I. Universal treaties

### **Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare (1925 Geneva Protocol)**

*Signed at Geneva on 17 June 1925; entered into force on 8 February 1928; depositary French Government*

The protocol prohibits the use in war of asphyxiating, poisonous or other gases and of bacteriological methods of warfare. The protocol remains a fundamental basis of the international prohibition against chemical and biological warfare, and its principles, objectives and obligations are explicitly supported by the 1972 Biological and Toxin Weapons Convention and the 1993 Chemical Weapons Convention.

*Parties (141):* Afghanistan, Albania, Algeria, Angola, Antigua and Barbuda, Argentina, Australia, Austria, Bahrain, Bangladesh, Barbados, Belgium, Benin, Bhutan, Bolivia, Brazil, Bulgaria, Burkina Faso, Cabo Verde, Cambodia, Cameroon, Canada, Central African Republic, Chile, China, Colombia, Costa Rica, Côte d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Estonia, Ethiopia, Fiji, Finland, France, Gambia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea-Bissau, Holy See, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kenya, Korea (North), Korea (South), Kuwait, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Liechtenstein, Lithuania, Luxembourg, Macedonia (Former Yugoslav Republic of), Madagascar, Malawi, Malaysia, Maldives, Malta, Mauritius, Mexico, Moldova, Monaco, Mongolia, Morocco, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Pakistan, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Saudi Arabia, Senegal, Serbia, Sierra Leone, Slovakia, Slovenia, Solomon Islands, South Africa, Spain, Sri Lanka, Sudan, Swaziland, Sweden, Switzerland, Syria, Taiwan, Tanzania, Thailand, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Uganda, UK, Ukraine, Uruguay, USA, Venezuela, Viet Nam, Yemen

*Note:* On joining the protocol, some states entered reservations which upheld their right to employ chemical or biological weapons against non-parties to the protocol, against coalitions which included non-parties or in response to the use of these weapons by a violating party. Many of these states have withdrawn these reservations, particularly after the conclusion of the 1972 Biological and Toxin Weapons Convention and the 1993 Chemical Weapons Convention since the reservations are incompatible with their obligation under the conventions.

In addition to these, 'explicit', reservations, a number of states that made a declaration of succession to the protocol on gaining independence inherited 'implicit' reservations from their respective predecessor states. For example, these implicit reservations apply to the states that gained independence from France and the UK before the latter states withdrew or amended their reservations. States that acceded (rather than succeeded) to the protocol did not inherit reservations in this way.

*Signed at Washington, DC, on 1 December 1959; entered into force on 23 June 1961; depositary US Government*

The treaty declares the Antarctic an area to be used exclusively for peaceful purposes. It prohibits any measure of a military nature in the Antarctic, such as the establishment of military bases and fortifications, and the carrying out of military manoeuvres or the testing of any type of weapon. The treaty bans any nuclear explosion as well as the disposal of radioactive waste material in Antarctica. The treaty provides a right of on-site inspection of all stations and installations in Antarctica to ensure compliance with its provisions.

*Opened for signature at London, Moscow and Washington, DC, on 1 July 1968; entered into force on 5 March 1970; depositaries British, Russian and US governments*

The treaty prohibits the transfer by a nuclear weapon state—defined in the treaty as those which have manufactured and exploded a nuclear weapon or other nuclear explosive device prior to 1 January 1967—to any recipient whatsoever of nuclear weapons or other nuclear explosive devices or of control over them, as well as the assistance, encouragement or inducement of any non-nuclear weapon state to manufacture or otherwise acquire such weapons or devices. It also prohibits the receipt by non-nuclear weapon states from any transferor whatso-

ever, as well as the manufacture or other acquisition by those states, of nuclear weapons or other nuclear explosive devices.

The parties undertake to facilitate the exchange of equipment, materials and scientific and technological information for the peaceful uses of nuclear energy and to ensure that potential benefits from peaceful applications of nuclear explosions will be made available to non-nuclear weapon parties to the treaty. They also undertake to pursue negotiations in good faith on effective measures relating to cessation of the nuclear arms race at an early date and to nuclear disarmament, and on a treaty on general and complete disarmament.

Non-nuclear weapon states undertake to conclude safeguard agreements with the International Atomic Energy Agency (IAEA) with a view to preventing diversion of nuclear energy from peaceful uses to nuclear weapons or other nuclear explosive devices. A Model Protocol Additional to the Safeguards Agreements, strengthening the measures, was approved in 1997; additional safeguards protocols are signed by states individually with the IAEA.

A Review and Extension Conference, convened in 1995 in accordance with the treaty, decided that the treaty should remain in force indefinitely.

*Opened for signature at London, Moscow and Washington, DC, on 10 April 1972; entered into force on 26 March 1975; depositaries British, Russian and US governments*

The convention prohibits the development, production, stockpiling or acquisition by other means or retention of microbial or other biological agents or toxins whatever their origin or method of production of types and in quantities that have no justification of prophylactic, protective or other peaceful purposes, as well as weapons, equipment or means of delivery designed to use such agents or toxins for hostile purposes or in armed conflict. The destruction of the agents, toxins, weapons, equipment and means of delivery in the possession of the parties, or their diversion to peaceful purposes, should be effected not later than nine months after the entry into force of the convention for each country.

The parties hold annual political and technical meetings to strengthen implementation of the convention. A three-person Implementation Support Unit (ISU), based in Geneva, supports the parties in implementing the treaty, including facilitating the collection and distribution of annual confidence-building measures and supporting their efforts to achieve universal membership.

### **Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on their Destruction (Chemical Weapons Convention, CWC)**

*Opened for signature at Paris on 13 January 1993; entered into force on 29 April 1997; depositary UN Secretary-General*

The convention prohibits the development, production, acquisition, transfer, stockpiling and use of chemical weapons. The CWC regime consists of four 'pillars': disarmament, non-proliferation, assistance and protection against chemical weapons, and international cooperation on the peaceful uses of chemistry.

Each party undertook to destroy its chemical weapon stockpiles by 29 April 2012. Of the seven parties that had declared stocks of chemical weapons by that date, three had destroyed them while Iraq, Libya, Russia and the USA continue to destroy their stocks. Syria's declared chemical weapons stockpile was confirmed destroyed in 2016. Old and abandoned chemical weapons will continue to be destroyed as they are uncovered from, for example, former battlefields.

The treaty prohibits the manufacture or acquisition of any nuclear explosive device, as well as possession or control over such device by the parties anywhere inside or outside the zone defined in an annex. The parties also undertake not to supply nuclear material or equipment, unless subject to IAEA safeguards, and to prevent in their territories the stationing as well as the testing of any nuclear explosive device and undertake not to dump, and to prevent the dumping of, radioactive waste and other radioactive matter at sea anywhere within the zone. ### **Treaty on Conventional Armed Forces in Europe (CFE Treaty)**

*Original treaty signed at Paris on 19 November 1990; entered into force on 9 November 1992; depositary Dutch Government*

The treaty sets ceilings on five categories of treaty-limited equipment (TLE)—battle tanks, armoured combat vehicles, artillery of at least 100-mm calibre, combat aircraft and attack helicopters—in an area stretching from the Atlantic Ocean to the Ural Mountains (the Atlantic-to-the-Urals, ATTU).

The treaty was negotiated and signed by the member states of the Warsaw Treaty Organization and NATO within the framework of the Conference on Security and Co-operation in Europe (from 1995 the Organization for Security

and Co-operation in Europe, OSCE).

The **1992 Tashkent Agreement**, adopted by the former Soviet republics with territories within the ATTU area of application (with the exception of Estonia, Latvia and Lithuania) and the **1992 Oslo Document** (Final Document of the Extraordinary Conference of the States Parties to the CFE Treaty) introduced modifications to the treaty required because of the emergence of new states after the break-up of the USSR.

*Parties (30):* Armenia, Azerbaijan, Belarus, Belgium<sup>2</sup>, Bulgaria<sup>2</sup>, Canada<sup>2</sup>, Czech Republic<sup>2</sup>, Denmark<sup>2</sup>, France, Georgia, Germany<sup>2</sup>, Greece, Hungary<sup>2</sup>, Iceland<sup>2</sup>, Italy<sup>2</sup>, Kazakhstan, Luxembourg<sup>2</sup>, Moldova<sup>2</sup>, Netherlands<sup>2</sup>, Norway, Poland, Portugal<sup>2</sup>, Romania, Russia<sup>1</sup>, Slovakia<sup>2</sup>, Spain, Turkey<sup>2</sup>, UK<sup>2</sup>, Ukraine, USA<sup>2</sup>

<sup>1</sup> On 14 July 2007 Russia declared its intention to suspend its participation in the CFE Treaty and associated documents and agreements, which took effect on 12 Dec. 2007. In Mar. 2015, Russia announced that it had taken the decision to completely halt its participation in the Treaty.

<sup>2</sup> In Nov.–Dec. 2011, these countries notified the depositary that they will cease to perform their obligations under the treaty with regard to Russia.

The first review conference of the CFE Treaty adopted the **1996 Flank Document**, which reorganized the flank areas geographically and numerically, allowing Russia and Ukraine to deploy TLE in a less constraining manner.

### **Concluding Act of the Negotiation on Personnel Strength of Conventional Armed Forces in Europe (CFE-1A Agreement)**

*Signed by the parties to the CFE Treaty at Helsinki on 10 July 1992; entered into force simultaneously with the CFE Treaty; depositary Dutch Government*

The politically binding agreement sets ceilings on the number of personnel of the conventional land-based armed forces of the parties within the ATTU area.

### **Agreement on Adaptation of the Treaty on Conventional Armed Forces in Europe**

*Signed by the parties to the CFE Treaty at Helsinki on 19 November 1999; not in force; depositary Dutch Government*

The agreement would replace the CFE Treaty bloc-to-bloc military balance with regional balance, establish individual state limits on TLE holdings, and provide for a new structure of limitations and new military flexibility mechanisms, flank sub-limits and enhanced transparency. It would open the CFE regime to all other European states. It will enter into force when it has been ratified by all of the signatories. The 1999 Final Act, with annexes, contains politically binding arrangements with regard to Georgia, Moldova and Central Europe and to withdrawals of armed forces from foreign territories.

## **Agreement on Sub-Regional Arms Control (Florence Agreement)**

*Adopted at Florence and entered into force on 14 June 1996*

The agreement was negotiated under the auspices of the OSCE in accordance with the mandate in Article IV of Annex 1-B of the 1995 General Framework Agreement for Peace in Bosnia and Herzegovina (Dayton Agreement). It sets numerical ceilings on armaments of the former warring parties. Five categories of heavy conventional weapons are included: battle tanks, armoured combat vehicles, heavy artillery (75 mm and above), combat aircraft and attack helicopters. The limits were reached by 31 October 1997; by that date 6580 weapon

items, or 46 per cent of pre-June 1996 holdings, had been destroyed. By 1 January 2010, a further 2650 items had been destroyed voluntarily.

The implementation of the agreement is monitored and assisted by the OSCE's Personal Representative of the Chairman-in-Office and the Contact Group (France, Germany, Italy, Russia, the UK and the USA) and supported by other OSCE states. Under a two-phase action plan agreed in November 2009, responsibility for the implementation of the agreement was transferred to the parties on 5 December 2014, following the signing of a new set of amendments to the agreement.

**Vienna Document 2011 on Confidence- and Security-Building Measures**

*Adopted by the participating states of the Organization for Security and Co-operation in Europe at Vienna on 30 November 2011; entered into force on 1 December 2011*

The Vienna Document 2011 builds on the 1986 Stockholm Document on Confidence- and Security-Building Measures (CSBMs) and Disarmament in Europe and previous Vienna Documents (1990, 1992, 1994 and 1999). The Vienna Document 1990 provided for annual exchange of military information, military budget exchange, risk reduction procedures, a communication network and an annual CSBM implementation assessment. The Vienna Document 1992 and the Vienna Document 1994 extended the area of application and introduced new mechanisms and parameters for military activities, defence planning and military contacts. The Vienna Document 1999 introduced regional measures aimed at increasing transparency and confidence in a bilateral, multilateral and regional context and some improvements, in particular regarding the constraining measures.

The Vienna Document 2011 incorporated revisions on such matters as the timing of verification activities and demonstrations of new types of weapon and equipment system, and established a procedure for updating the Vienna Document every five years.

### III. Bilateral treaties

#### **Treaty on the Limitation of Anti-Ballistic Missile Systems (ABM Treaty)**

*Signed by the USA and the USSR at Moscow on 26 May 1972; entered into force on 3 October 1972; not in force from 13 June 2002*

The parties—Russia and the USA—undertook not to build nationwide defences against ballistic missile attack and to limit the development and deployment of permitted strategic missile defences. The treaty prohibited the parties from giving air defence missiles, radars or launchers the technical ability to counter strategic ballistic missiles and from testing them in a strategic ABM mode.

The **1974 Protocol** to the ABM Treaty introduced further numerical restrictions on permitted ballistic missile defences.

In 1997, Belarus, Kazakhstan, Russia, Ukraine and the USA signed a memorandum of understanding designating Belarus, Kazakhstan and Ukraine as parties to the treaty along with Russia as successor states of the USSR and a set of Agreed Statements specifying the demarcation line between strategic missile defences (which are not permitted under the treaty) and non-strategic or theatre missile defences (which are permitted under the treaty). The set of 1997 agreements on anti-missile defence were ratified by Russia in April 2000, but because the USA did not ratify them they did not enter into force. On 13 December 2001 the USA announced its withdrawal from the treaty, which came into effect on 13 June 2002.

*Treaty and protocol texts:* *United Nations Treaty Series*, vol. 944 (1974)

#### **Treaty on the Limitation of Underground Nuclear Weapon Tests (Threshold Test-Ban Treaty, TTBT)**

*Signed by the USA and the USSR at Moscow on 3 July 1974; entered into force on 11 December 1990*

The parties—Russia and the USA—undertake not to carry out any underground nuclear weapon test having a yield exceeding 150 kilotons. The 1974 verification protocol was replaced in 1990 with a new protocol.

*Treaty and protocol texts:* *United Nations Treaty Series*, vol. 1714 (1993)

### **Treaty on Underground Nuclear Explosions for Peaceful Purposes (Peaceful Nuclear Explosions Treaty, PNET)**

*Signed by the USA and the USSR at Moscow and Washington, DC, on 28 May 1976; entered into force on 11 December 1990*

The parties—Russia and the USA—undertake not to carry out any individual underground nuclear explosion for peaceful purposes having a yield exceeding 150 kilotons or any group explosion having an aggregate yield exceeding 150 kilotons; and not to carry out any group explosion having an aggregate yield exceeding 1500 kilotons unless the individual explosions in the group could be identified and measured by agreed verification procedures. The 1976 verification protocol was replaced in 1990 with a new protocol.

*Treaty and protocol texts: United Nations Treaty Series, vol. 1714 (1993)*

### **Treaty on the Elimination of Intermediate-Range and Shorter-Range Missiles (INF Treaty)**

*Signed by the USA and the USSR at Washington, DC, on 8 December 1987; entered into force on 1 June 1988*

The treaty obligated the original parties—the USA and the USSR—to destroy all ground-launched ballistic and cruise missiles with a range of 500–5500 kilometres (intermediate-range, 1000–5500 km; and shorter-range, 500–1000 km) and their launchers by 1 June 1991. A total of 2692 missiles were eliminated by May 1991. In 1994 treaty membership was expanded to include Belarus, Kazakhstan and Ukraine. For 10 years after 1 June 1991 on-site inspections were conducted to verify compliance. The use of surveillance satellites for data collection continued after the end of on-site inspections on 31 May 2001.

*Treaty text: United Nations Treaty Series, vol. 1657 (1991)*

### **Treaty on the Reduction and Limitation of Strategic Offensive Arms (START I)**

*Signed by the USA and the USSR at Moscow on 31 July 1991; entered into force on 5 December 1994; expired on 5 December 2009*

The treaty obligated the original parties—the USA and the USSR—to make phased reductions in their offensive strategic nuclear forces over a seven-year period. It set numerical limits on deployed strategic nuclear delivery vehicles (SNDVs)—intercontinental ballistic missiles (ICBMs), submarine-launched ballistic missiles (SLBMs) and heavy bombers—and the nuclear warheads they carry. In the Protocol to Facilitate the Implementation of START (**1992 Lisbon Protocol**), which entered into force on 5 December 1994, Belarus, Kazakhstan and Ukraine also assumed the obligations of the former USSR under the treaty.

*Treaty and protocol texts: US Department of State, <<http://www.state.gov/t/avc/trty/146007.htm>>*

### **Treaty on Further Reduction and Limitation of Strategic Offensive Arms (START II)**

*Signed by Russia and the USA at Moscow on 3 January 1993; not in force*

The treaty obligated the parties to eliminate their MIRVed ICBMs and reduce the number of their deployed strategic nuclear warheads to no more than 3000–3500 each (of which no more than 1750 may be deployed on SLBMs) by 1 January 2003. On 26 September 1997 the two parties signed a *Protocol* to the treaty providing for the extension until the end of 2007 of the period of implementation of the treaty.

*Note:* START II was ratified by the US Senate and the Russian Parliament, but the two signatories never exchanged the instruments of ratification. The treaty thus never entered into force. On 14 June 2002, as a response to the taking effect on 13 June of the USA's withdrawal from the ABM Treaty, Russia declared that it would no longer be bound by START II.

*Treaty and protocol texts:* US Department of State, <<http://www.state.gov/t/avc/trty/102887.htm>>

### **Treaty on Strategic Offensive Reductions (SORT, Moscow Treaty)**

*Signed by Russia and the USA at Moscow on 24 May 2002; entered into force on 1 June 2003; not in force from 5 February 2011*

The treaty obligated the parties to reduce the number of their operationally deployed strategic nuclear warheads so that the aggregate numbers did not exceed 1700–2200 for each party by 31 December 2012. The treaty was superseded by New START on 5 February 2011.

*Treaty text:* *United Nations Treaty Series*, vol. 2350 (2005)

### **Treaty on Measures for the Further Reduction and Limitation of Strategic Offensive Arms (New START, Prague Treaty)**

*Signed by Russia and the USA at Prague on 8 April 2010; entered into force on 5 February 2011*

The treaty obligates the parties—Russia and the USA—to each reduce their number of (a) deployed ICBMs, SLBMs and heavy bombers to 700; (b) warheads on deployed ICBMs and SLBMs and warheads counted for deployed heavy bombers to 1550; and (c) deployed and non-deployed ICBM launchers, SLBM launchers and heavy bombers to 800. The reductions must be achieved by 5 February 2018; a Bilateral Consultative Commission resolves questions about compliance and other implementation issues. A protocol to the treaty contains verifications mechanisms.

The treaty follows on from START I and supersedes SORT. It will remain in force for 10 years unless superseded earlier by a subsequent agreement.
