

## Appendix 8A. Tables of military expenditure

PETTER STÅLENHEIM, DAMIEN FRUCHART,  
WUYI OMITOOGUN and CATALINA PERDOMO\*

Table 8A.1 presents military expenditure by region, by certain international organizations and by income group for the period 1996–2005 in US dollars at constant 2003 prices and exchange rates, and also for 2005 in current US dollars. Military expenditure by individual countries is presented in table 8A.2 in local currency and at current prices for the period 1996–2005 and in table 8A.3 in US dollars at constant 2003 prices and exchange rates for the period 1996–2005 and for 2005 in current US dollars. Table 8A.4 presents military expenditure for the period 1996–2004 as a percentage of countries' gross domestic product. Sources and methods are explained in appendix 8C. Notes and explanations of the conventions used appear below table 8A.4.

Military expenditure data from different editions of the SIPRI Yearbook should not be combined because of data revision between editions. Revision can be significant; for example, when a better time series becomes available the entire SIPRI series is revised accordingly. Revisions in constant dollar series can also originate in significant revisions in the economic statistics of the International Monetary Fund that are used for these calculations. When data are presented in local currency but not in US dollars or as a share of GDP, this is owing to a lack of economic data.

\* Contribution of military expenditure data, estimates and advice are gratefully acknowledged from Julian Cooper (Centre for Russian and East European Studies, University of Birmingham), David Darchiashvili (Center for Civil–Military Relations and Security Studies, Tbilisi), Dimitar Dimitrov (University of National and World Economy, Sofia), Paul Dunne (University of the West of England, Bristol), Armen Kouyoumdjian (Country Risk Strategist, Valparaiso), Pavan Kumar Nair (India Together, Pune), Elina Noor (Institute of Strategic and International Studies, Kuala Lumpur), Tamara Pataria (Caucasus Institute for Peace, Democracy and Development, Tbilisi), Jamie Polanco (Ministry of National Defence, Bogotá), Thomas Scheetz (Lincoln University College, Buenos Aires), Ron Smith (Birkbeck College, London) and Ozren Zunec (University of Zagreb).

SIPRI Intern Anna Ritter assisted with the preparation of this appendix.

## 326 MILITARY SPENDING AND ARMAMENTS, 2005

**Table 8A.1.** Military expenditure by region, by international organization and by income group, in constant US dollars for 1996–2005 and current US dollars for 2005

Figures are in US\$ b., at constant 2003 prices and exchange rates except in the right-most column, marked \*, where they are in current US\$ b. Figures do not always add up to totals because of the conventions of rounding.

( ) = Total based on country data accounting for less than 90% of the regional total; . . . = Available data account for less than 60% of the regional total;  
 ASEAN = Association of Southeast Asian Nations; CIS = Commonwealth of Independent States; NATO = North Atlantic Treaty Organization; OECD = Organisation for Economic Co-operation and Development; OPEC = Organization of the Petroleum Exporting Countries; OSCE = Organization for Security and Co-operation in Europe.

The world total and the totals for regions, organizations and income groups in table 8A.1 are estimates, based on data in table 8A.3. When military expenditure data for a country are missing for a few years, estimates are made, most often on the assumption that the rate of change in that country's military expenditure is the same as that for the region to which it belongs. When no estimates can be made, countries are excluded from the totals. The countries excluded from all totals in table 8A.1 are Angola, Benin, Cuba, Equatorial Guinea, Haiti, Iraq, Myanmar, Qatar, Somalia, Trinidad and Tobago and Viet Nam.

Totals for geographical regions add up to the world total and sub-regional totals add up to regional totals. Totals for regions and income groups cover the same groups of countries for all years, while totals for organizations cover only the member countries in the year given.

The country coverage of income groups is based on figures of 2003 gross national income (GNI) per capita as calculated in World Bank, *World Development Report 2005: A Better Investment Climate for Everyone* (Oxford University Press: New York, 2004), URL <<http://econ.worldbank.org/wdr/>>.

( ) = Uncertain figure; [ ] = SIPRI estimate; | = Change of multiple of currency; † = Figures for these countries do not include military pensions; ‡ = Figures for these countries are for recurrent spending only; § = Figures for these countries are for the adopted budget rather than actual expenditure.

<sup>1</sup> Figures for Morocco for 1998–2003 are for adopted budget rather than for actual expenditure.

<sup>2</sup> The figures for Angola should be seen in the context of highly uncertain economic statistics due to the impact of conflict on the Angolan economy. Figures are for Defence, Public Order and Security.

<sup>3</sup> The figures for the Central African Republic are for current expenditure only. Investment expenditure for 2005 amounted to 775 000 CFA francs.

<sup>4</sup> Until 1997 the Democratic Republic of the Congo (DRC) was known as Zaire.

<sup>5</sup> Figures for Eritrea in 1995 include expenditure for demobilization. Eritrea changed currency during the period. All figures have been converted to the most recent currency.

<sup>6</sup> The figure for Ethiopia in 1999 includes an allocation of 1 billion birr in addition to the original defence budget. Figures for 2002–2005 are for adopted budget.

<sup>7</sup> An armed conflict broke out in Guinea-Bissau in 1998, which led to a substantial increase in defence expenditure, especially in 2000/2001. According to the International Monetary Fund (IMF), the increase was financed by a credit from the banking system, as well as by promissory notes. Guinea-Bissau changed currency during the period. All figures have been converted to the most recent currency.

<sup>8</sup> Figures for Madagascar include expenditure for the gendarmerie and the National Police. Madagascar changed currency during the period. All figures have been converted to the most recent currency.

<sup>9</sup> Figures for Mozambique include expenditure for the demobilization of government and RENAMO soldiers and the formation of a new unified army. The demobilization process ended in 1998/99. Figures are for security and public order from 1999.

<sup>10</sup> Figures for Namibia in 1999 refer to the budget of the Ministry of Defence only. In addition to this the 1999 budget of the Ministry of Finance includes a contingency provision of N\$104 million for the Namibian military presence in the DRC. The figure for 2002 includes a supplementary allocation of N\$78.5 million.

<sup>11</sup> Figures for Nigeria before 1999 are understated because of the military's use of a favourable specific dollar exchange rate.

<sup>12</sup> The figure for Rwanda for 1998 is the official defence budget. According to the IMF there are additional sources of funding for military activities, both within budget and extra-budgetary. Alternative estimates put Rwanda's military expenditure at twice the official figure.

<sup>13</sup> Figures for Senegal do not include expenditure for paramilitary forces, which in 1998 amounted to 21 100 million CFA francs.

<sup>14</sup> Sudan changed currency during the period. All figures have been converted to the most recent currency.

<sup>15</sup> Figures for Tanzania from 2003–2004 are for defence and security.

<sup>16</sup> Figures for Zambia are uncertain, especially those for constant dollars and share of GDP, because of very high inflation and several changes in the currency.

<sup>17</sup> The figure for Zimbabwe in 1999 includes a supplementary allocation of ZW\$1 800 million.

<sup>18</sup> Costa Rica has no armed forces. Expenditure for paramilitary forces, border guard, and maritime and air surveillance is less than 0.05% of GDP.

<sup>19</sup> Figures for Honduras do not include military pensions or arms imports.

<sup>20</sup> The Panamanian defence forces were disbanded in 1990 and replaced by the National Guard, consisting of the national police and the air and maritime services.

<sup>21</sup> Figures for the USA are for financial years (1 Oct.–30 Sep.) rather than calendar years.

<sup>22</sup> Figures for Chile are for adopted budget. They include direct transfers from the state-owned copper company Corporacion Nacional del Cobre (CODELCO) for military purchases. In 2004–2005 these transfers increased owing to rising copper prices. In June 2005 copper export revenues, at \$1.53 billion, were 55% higher than in June 2004.

<sup>23</sup> Figures for Colombia in 2002–2004 includes a special allocation of 2.6 billion pesos from a war tax decree of 12 Aug. 2002.

<sup>24</sup> Ecuador changed currency from the sucre to the US dollar on 13 Mar. 2000, at a rate of \$1 to 25 00 sucres. Current price figures for 1996–2000 represent the dollar value of military expenditure at the market exchange rate for that year. Figures for 2002–2004 are for the adopted budget.

<sup>25</sup> The figure for Peru in 2005 does not include the transfer of 20% of gas production revenues from the state-owned company CAMISEA for the armed forces and national police.

<sup>26</sup> For the Central Asian countries purchasing power parity (PPP) rates were used for conversion to constant dollars up to and including the 2002 edition of the SIPRI Yearbook.

<sup>27</sup> The coverage of the series for Turkmenistan varies over time due to classification changes in the Turkmenistan system of public accounts. PPP rates were used for converting local currency figures to constant dollars up to and including the 2002 edition of the SIPRI Yearbook.

<sup>28</sup> Figures for Brunei are current expenditure on the Royal Brunei Armed Forces.

<sup>29</sup> Figures for Cambodia are for defence and security, including the regular police force.

<sup>30</sup> Figures for China are for estimated total military expenditure. On the estimates in local currency and share of GDP for the period 1989–98 see Wang, S., 'The military expenditure of China, 1989–98', *SIPRI Yearbook 1999: Armaments, Disarmament and International Security* (Oxford University Press: Oxford, 1999), pp. 334–49. The estimates for the years 1999–2002 are based on the percentage change in official military expenditure and on the assumption of a gradual decrease in the commercial earnings of the People's Liberation Army.

<sup>31</sup> Figures for Japan are for adopted budget, include the Special Action Committee on Okinawa (SACO) and exclude military pensions.

<sup>32</sup> Dollar figures for North Korea are in current dollars owing to the lack of reliable consumer price index data.

<sup>33</sup> The figures for South Korea do not include military pensions, arms imports or paramilitary forces.

<sup>34</sup> Figures for Myanmar are not presented in constant US dollar terms owing to the extreme variation in stated exchange rates between the kyat and the US dollar.

<sup>35</sup> Figures for India include expenditure on paramilitary forces of the Border Security Force, Central Reserve Police Force, Assam Rifles and Indo-Tibetan Border Police, but exclude spending for military nuclear activities.

<sup>36</sup> Figures for Sri Lanka are for current expenditure only. A special allocation in 2000 of Rs28 billion for war-related expenditure is therefore not fully reflected in the official figure.

<sup>37</sup> Figures for Albania for 2001–2003 are for the adopted budget. The figures for 2004 and 2005 are projections made by the Albanian authorities. Figures for Albania do not include expenditure on paramilitary forces.

<sup>38</sup> The figures for Bosnia and Herzegovina include expenditure on both the Army of the Federation of Bosnia and Herzegovina and the Army of the Republika Srpska. The former is divided into 2 components, Bosniac and Croat. The local currency since Jan. 1998 has been the convertible mark, set at 1 convertible mark = 1 Deutsche Mark.

<sup>39</sup> Figures for Croatia exclude military pensions of 448 million kunas for 2000, 428 million kunas for 2001, 433 million kunas for 2002 and 430 million kunas for 2003.

<sup>40</sup> Figures for the Czech Republic up to 2000 do not include military pensions.

<sup>41</sup> Figures for Georgia in 2002–2005 are for budgeted expenditure. During the period 1997–2001 the implementation rate for the defence budget fluctuated between 56% and 90%. The budget figure for 2003 is believed to be an underestimation of actual spending due to the political turmoil during the year.

<sup>42</sup> Figures for Latvia do not include: allocations for military pensions paid by Russia, which averaged 27 million lats per year over the 3 years 1996–98; or expenditure on paramilitary forces, which amounted to 98.5 million lats in 1999.

<sup>43</sup> Figures for Moldova exclude expenditure on military pensions and paramilitary forces. Adding all military items in the budget would give total military expenditure for 2003 of 361 million lei instead of 109 million lei and 432 million lei instead of 113 million lei in 2004.

<sup>44</sup> Romania changed currency during the period. All figures have been converted to the most recent currency.

<sup>45</sup> For sources and methods of the military expenditure figures for Russia see Cooper, J., 'The military expenditure of the USSR and the Russian Federation, 1987–97', *SIPRI Yearbook 1998: Armaments, Disarmament and International Security* (Oxford University Press: Oxford, 1998), pp. 243–59. Up to and including *SIPRI Yearbook 2002*, PPP rates were used for Russia for converting local currency figures to constant dollars.

<sup>46</sup> Figures for Spain do not include a major part of government military research and development expenditure, which is financed by the Ministry of Industry.

<sup>47</sup> Sweden changed its accounting system in 2001, giving rise to a series break between 2000 and 2001. This break means that the decrease in military expenditure between 2000 and 2001 is overestimated by 1.4 percentage points.

<sup>48</sup> Figures for Turkey are in new Turkish lira. The Turkish lira was redenominated in 2005 at the rate of 1 new Turkish lira = 1 million Turkish lira.

<sup>49</sup> The series for the UK has a break between 2000 and 2001 because in 2001 the UK changed its accounting system for defence expenditure from a 'cash basis' to a 'resource basis'. It is not clear what impact this change had on the trend in UK military expenditure.

<sup>50</sup> Figures for Ukraine are for the adopted budget for the Ministry of Defence, military pensions and paramilitary forces. Actual expenditure is reportedly 95–99% of budgeted figures for 1996–99.

<sup>51</sup> Figures for Egypt include military aid from the USA of approximately \$1.3 billion annually.

<sup>52</sup> Figures for Iran include expenditure on public order and safety.

<sup>53</sup> Figures for Israel include military aid from the USA of approximately \$2 billion annually.

<sup>54</sup> Figures for Jordan are expenditure on defence and security.

<sup>55</sup> Figures for Oman are for current expenditure on defence and national security.

<sup>56</sup> Figures for Saudi Arabia are for defence and security.

<sup>57</sup> Figures for the UAE exclude the local military expenditure of each of the 7 emirates that form the United Arab Emirates.
