^b In cases where the deal value was not available in US dollars, currency conversion has been made using the International Monetary Fund average exchange rate for the calendar month in which the transaction was made. Companies do not always disclose the values of transactions.

^c Where deal values are not known, the acquired company's annual revenue is listed where known (either actual revenue for 2006 or expected revenue for 2007). Where revenue is not available in US dollars, currency conversion has been made using the International Monetary Fund average exchange rate for the appropriate year. Where information is not available for either the deal value or the acquired company's revenue, the acquired company's number of employees

is shown, where known. Within each regional category, acquisitions are listed first in order of deal size where known, then in order of the acquired company's revenue where known. Where only employee numbers are known, the acquisitions are listed according to a conservative estimate of the likely range of revenues of the acquired company.
