Parliamentary answer given by the Secretary of State for Foreign and Commonwealth Affairs on 8 July 2002	502

Foreword

Since 1997 the Government has taken great strides to make our defence exports licensing system one of the most rigorous and open in the world. This Annual Report, the sixth of its kind, is a symbol of our commitment to transparency. It contains details of licensing decisions in 2002 together with information on exports, a summary of recent policy developments and information on the Government's licence processing performance.

Our defence industry and its export sales make a real contribution to Britain's wider security and defence interests and are a vital part of our industrial base. This sector accounts for 3% of our total manufacturing output, supporting hundreds of thousands of jobs in over 11,000 companies across the UK. The UK's armed forces are among the most effective in the world. Their reputation rests in part on the quality of the men and women at every level serving in our forces. But it also depends on the equipment supplied by a thriving national defence industry.

The Government is committed to a responsible arms export policy which does not fuel conflict. On 24 July 2002, the Export Control Act received Royal Assent. This legislation is the most comprehensive overhaul of strategic export controls for over 60 years. For the first time a licence will be required for arms trafficking and brokering activities in military equipment which take place wholly or partly in the UK. Full extra territorial controls will be introduced on UK persons whose activities facilitate the supply of military equipment to embargoed destinations, and the export of torture equipment or long-range missiles to any destination. The Export Control Act will also be used to introduce new controls on the transfer abroad of military technology by electronic means and the transfer of technology by any means or the provision of technical assistance overseas which is or may be intended for use in connection with a weapons of mass destruction programme.

The Consolidated EU and National Arms Export Licensing Criteria, against which all applications to export are already assessed, will form the basis for decisions on trafficking and brokering licences. Our commitment to prevent the export of equipment which might be used for external aggression or internal repression applies equally to goods whose export from an overseas destination are brokered from the United Kingdom. New controls will also be introduced on the electronic transfer abroad of military technology where the physical export of the same goods is already controlled.

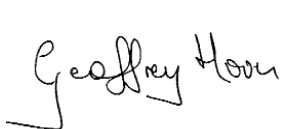

Criterion eight of the Consolidated EU and National Arms Export Licensing Criteria supports the Government's objectives of promoting sustainable development in poorer countries. We recently reviewed our procedures to ensure that such considerations are most effectively applied in assessing applications for exports to these countries.

These new measures underline our commitment to strengthen and modernise our national export controls. But we know that only through international co-operation can we achieve our overall aims. In countering the proliferation of Weapons of Mass Destruction, the Government plays an active role in the Nuclear Suppliers Group, the Australia Group (which covers chemical and biological weapons) and the Missile Technology Control Regime, amongst others. Our work in these regimes is complemented by initiatives on conventional weapons in the Wassenaar Arrangement and elsewhere. We recently hosted a conference on Small Arms and Light Weapons which we hope will contribute to more responsible export controls on these weapons by all states.

The imminent enlargement of the European Union will give us more partners in the drive to implement a responsible Europe-wide export control policy. We congratulate the ten accession countries on the progress they have made towards the effective implementation of the EU Code of Conduct on Arms Exports.

We want our export licensing system to be not only as effective and transparent as the best in the world, but also as efficient. Whilst export licence processing times have fallen significantly over the last year, we continue to strive for improvements.

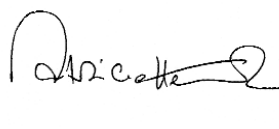

We hope readers will be able to use this report to hold the Government to account. We commend it to both Parliament and the public.

Section I

Policy Issues Relating to Strategic Export Controls

This section of the Report sets out the main developments in export control policy since the last Annual Report on Strategic Export Controls, which was published in July 2002.

1.1 DOMESTIC POLICY

Implementation of the Export Control Act 2002

The Export Control Bill was introduced to Parliament in summer 2001 and received Royal Assent on 24 July 2002, becoming the Export Control Act 2002 ¹.

The Act will give the Government a number of new powers which will allow the UK's export control regime to be one of the most comprehensive and effective in the world. It is an enabling Act and as such will come into force when the powers given under the primary legislation are implemented through secondary legislation. As envisaged in last year's Annual Report, the Government held a 3-month public consultation to consider the views of interested parties on the detail of this secondary legislation. A consultation document was published on 30 January 2003 containing: a partial Regulatory Impact Assessment; a description of current Export Controls; details of previous consultations in this area; Government criteria on consultations; and the draft secondary legislation itself ².

As set out in the Consultation document, the Government intends to introduce three Statutory Instruments to implement the powers in the Act.

The Draft Export of Goods Transfer of Technology and Provision of Technical Assistance Order consolidates and rationalises the existing controls on the physical export of military goods and technology and the physical export and electronic transfer of dual-use goods and technology. It also provides for new controls on the transfer of military technology by electronic means, the transfer, by any means, of technology intended for use in connection with weapons of mass destruction (WMD) or a related missile programme and the provision of technical assistance in relation to

WMD. The new control on the electronic transfer of military technology will apply to technology whose physical export abroad is already controlled. The new WMD control will apply to anyone in the UK or a UK person anywhere in the world who communicates technology which the provider knows, or has been informed by Government, is or might be intended for use outside the EU in connection with WMD, or missiles capable of delivering WMD.

The Draft Trade in Controlled Goods (Control) Order and the Draft [Embargoed Destination] (Sanctions) Control Order provide for controls on trade in long range missiles, torture equipment and other military and paramilitary equipment, and on trade to embargoed destinations of goods covered by the embargo. The trade controls apply to activities connected to trade between one overseas country and another. In the case of long range missiles, equipment used in torture and trade to embargoed destinations, the controls will apply to activities in the UK and to the activities of UK persons anywhere else in the world. The controls will also apply to any acts that facilitate the supply or delivery of goods between overseas countries. The other trade controls on military and paramilitary equipment will apply to activities that take place (or part of which take place) in the UK.

Licences granted and refused under the Government's ability to control trade in controlled goods, and in relation to intangible transfers and technical assistance, will be included in future editions of this Report.

The Act also sets restrictions on the reasons for which export controls can be introduced and obliges the Government to publish guidance about the general principles that the Government must follow when exercising its licensing powers. The Act makes clear that the Guidance for export and transfer controls will consist of the Consolidated EU and National Arms Export Licensing Criteria and any other guidance that the Government may subsequently issue. The same Criteria will also form the basis for decisions on licence applications under the new controls on trade. Furthermore, the

¹ <http://www.legislation.hms.gov.uk/acts/acts2002/20020028.htm>

² <http://www.dti.gov.uk/export.control/legislation/exportcontrolconsult.htm>

Act makes the publication of Annual Reports a statutory requirement, institutionalising transparency in the field of export controls. The 2004 Annual Report on Strategic Export Controls is therefore likely to be the first such statutory report made by the Government.

The final date for responses to the consultation was 30 April 2003. A large number of replies were received, from companies, trade associations, non-governmental organisations and other interested parties. The Government will fully consider all of these responses when finalising the draft secondary legislation. The Government intends to lay draft legislation before Parliament for approval by negative resolution.

Incorporation policy

On 8 July 2002 the Government made a statement to Parliament on the way it considers applications for export licences for the supply of military equipment for incorporation into final products where it is known they are for onward export (see Annex G). The statement responded to increasing globalisation of the defence industry, and the associated increasingly complex supply chains that can result in goods being manufactured in, and from components sourced in, several different countries. In export licensing terms, this means that many licence applications are for goods for incorporation in defence equipment in a second country, which may then be exported further.

We also recognised that the Consolidated EU and National Arms Export Licensing Criteria does not provide specific guidance on what approach should be adopted in these “incorporation” cases. Moreover, discussions with our EU partners suggested that many recognised the need to adopt a special approach in these cases.

With these factors in mind, we decided to clarify the Government’s position in such cases. We will continue to assess applications for goods which it is understood will be incorporated into products for onward export on a case-by-case basis against the Consolidated EU and National Arms Export

Licensing Criteria, whilst at the same time having regard to, inter alia, the following factors:

- (a) the export control policies and effectiveness of the export control system of the incorporating country;
- (b) the importance of the UK’s defence and security relationship with the incorporating country;
- (c) the materiality and significance of the UK-origin goods in relation to the goods into which they are to be incorporated, and in relation to any end-use of the finished products which might give rise to concern;
- (d) the ease with which the UK-origin goods, or significant parts of them, could be removed from the goods into which they are to be incorporated; and
- (e) the standing of the entity to which the goods are to be exported.

Sustainable Development

The Secretary of State for Trade and Industry announced clear procedures for assessing export licence applications against criterion eight of the Consolidated EU and National Arms Export Licensing Criteria on 1 August 2002 (in a written response to a Parliamentary Question)³.

Criterion eight relates to the “compatibility of the arms exports with the technical and economic capacity of the recipient country, taking into account the desirability that states should achieve their legitimate needs of security and defence with the least diversion for armaments of human and economic resource”. This includes an assessment of the impact of the proposed export on the sustainable development of the recipient country. The Department for International Development (DFID) has lead responsibility in Whitehall for giving advice against this criterion.

Export licence applications for exports to the poorest countries⁴ are circulated by DTI, as a matter of course, to DFID. In addition, DFID may

³ <http://www.nds.coi.gov.uk/coi/coipress.nsf/4eb388ccc4bff3e880256bf4003360fb/6375b17019a384ee80256c080031141d>

⁴ Defined as those countries that are eligible for concessional loans from the International Development Association (currently 81 countries) as listed on: <http://www.dti.gov.uk/export.control/policy/criterion8.htm>

request to see applications pertaining to other countries – and other Government Departments may assess any export licence application against criterion eight, or refer it to DFID for assessment.

The following indicators are taken into consideration: relative levels of military and social expenditure and level of military spending as a percentage of GNP; aid dependency compared with the regional average; state of public finances; balance of payments; external debt sustainability; economic and social development, i.e. GNP/capita and Human Development Index; the status of any IMF- or World Bank - sponsored economic reform programme. The indicators take account of both the conditions prevailing in the importing country and the potential impact of the export. They are designed to help assess whether the proposed export would seriously hamper its sustainable development as defined in criterion eight.

1.2 INTERNATIONAL POLICY

The European Union Code of Conduct on Arms Exports

Over the last year we have continued to work with our EU partners to further our common interpretation of the EU Code of Conduct. A report of these activities up to December 2002 is set out in the Fourth Annual Report of the Code. This document contains a useful compendium of Member States' agreed practices within the framework of the Code, as well as a table giving country-by-country breakdowns of each Member State's exports. The Government pressed strongly for this level of transparency in the Annual Report, which is a major advance on previous years.

The first section of the Fourth Annual Review is attached to this Report as Annex E. However, because of the large volume of statistics on Member States' export licences, these statistics are not attached ⁵.

In June 2003 an EU Common Position was agreed which politically commits all current and future Member States to introducing controls on arms

brokering. The Common Position obliges each Member State to control all trafficking and brokering between third countries taking place on their territory, to apply the Code of Conduct to all applications for licences to broker, and to share information in order to ensure the consistent application of the Code in this area. We supported this Common Position, which is consistent with the UK's draft trade control legislation described above.

We also actively participated in a seminar on the Arms Export Policies of the EU and Associated Countries, held in Prague on 28 May 2003. This event focused on the practical implementation of the EU Code of Conduct on Conventional Arms Exports in the ten Associated countries, as well as considering the enforcement of export control regimes, and arms brokering. In May the Associated countries also began attending meetings in the EU's Common Foreign and Security Policy bodies responsible for strategic export controls. Their attendance at these meetings will allow them to gain further insights into the operation of the Code of Conduct, one year before they formally join the EU.

On 30 December 2002, the European Commission made a proposal for a Council Regulation on trade in equipment related to torture and capital punishment⁶. We have been pressing for such EU-wide export controls on torture equipment to match those we introduced in 1997. Discussions of the proposal are continuing in Brussels.

Small Arms & Light Weapons

The UK organised a conference at Lancaster House, London in January 2003 on strengthening arms export controls attended by a wide range of small arms producer and exporter countries, along with representatives from industry, civil society and international and regional organisations. The aim of the conference was to build consensus on the need to increase controls on small arms exports and brokering activities, and to take forward the work laid out in the 2001 UN Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in

⁵ The full text of the Annual Review is available at:
http://europa.eu.int/eur-xf/pri/en/cj/dat/2002/c_319/c_31920021219en00010045.pdf.

⁶ http://europa.eu.int/eur-lex/en/com/pdf/2002/com2002_0770en01.pdf

Small Arms and Light Weapons (SALW) in All its Aspects (UNPoA).

The conference demonstrated the strength of the international consensus and political will that exists to implement more effective controls on exports and brokering as part of international efforts to control the spread of small arms. The UK will report on the outcome of the conference to the UN Biennial Meeting of States in July 2003, which will review progress made on implementation of the UNPoA. In partnership with other governments, international and regional organisations and civil society, the UK continues to seek ways to build further agreement on these issues.

The UK is one of the largest donors in this area and for the period 2001 – 2004 has committed over £20 million to fund projects that will assist UN agencies, regional organisations, governments and NGOs to combat the proliferation and misuse of small arms. UK supported projects include weapons collection, management and destruction programmes; assistance in effective implementation of existing regional agreements; development of national action plans on small arms; and support for civil society and NGOs.

The UNPoA also calls on all States to strengthen existing regional initiatives to combat SALW proliferation and abuse, such as those in Southern, East and West Africa, and Central and South America. In the last year, the UK has been particularly involved in supporting regional initiatives in Africa, including political and financial support to the Nairobi Secretariat to implement the commitments made by States in East Africa in 2000.

We have also worked through other fora to achieve our small arms objectives. In June 2002 we submitted our first information return to the Organisation for Security and Co-operation in Europe on national measures on the export control, manufacture, marking and destruction of SALW. This is part of the implementation of the OSCE Document on Small Arms, agreed in November 2000, under UK negotiation. We also contributed significantly to the OSCE's best practice guide on management of SALW

stockpiles. In addition the Wassenaar Arrangement adopted a set of Best Practice Guidelines on Exports of Small Arms on 12 December 2002 (see below).

Framework Agreement on European Defence Industrial Restructuring

On 6 July 1998 the Defence Ministers of France, Germany, Italy, Spain, Sweden and the United Kingdom signed a Letter of Intent designed to facilitate defence industrial restructuring in Europe. The resulting treaty, the Framework Agreement, has been fully ratified by all member countries except Italy. During 2002, the UK completed the internal administrative procedures necessary to enable the granting of Global Project Licences (GPLs), the export control element of the Framework Agreement. The concept behind GPLs was explained in last year's Annual Report.

We received the first application for a GPL towards the end of 2002. The application was assessed against the Consolidated Criteria in the normal way, and a licence was issued in early 2003. The details of this and any other GPLs issued will be published in the next Annual Report, and are expected to be provided in a similar format as that for OIELs.

UK Waiver from US International Traffic in Arms Regulations (ITAR)

The US Defense Trade Security Initiatives launched in May 2000 identified the UK as one of the first countries with which the US would discuss such a waiver. An ITAR waiver would provide for the export of certain unclassified defence items, technical data, and services to HMG and qualified companies in the UK without the need for a US export licence. The waiver could significantly enhance transatlantic defence industrial co-operation and promote Alliance interoperability.

There is already a high degree of commonality between our export control system and that of the US, which will be increased further under the provisions of the Export Control Act, as well as close customs enforcement co-operation.

Negotiations between UK and US Government Officials on proposed texts for an unclassified ITAR waiver were completed on 16 May 2003. We continue to work on the remaining regulatory and administrative implementation measures to complete the undertakings that have been agreed between the two Governments.

The Wassenaar Arrangement

The Wassenaar Arrangement (WA) on Export Controls for Conventional Arms and Dual Use Goods is the only group bringing together most of the world's major arms exporters – including all EU Member States, the US and Russia – with the aim of preventing destabilising accumulations of arms throughout the world. Our participation in the WA allows us to promote transparency, data exchange and policy co-ordination on conventional arms exports – steps which compliment initiatives we have taken in pursuit of these goals in other fora, such as the OSCE and UN.

The 2002 Plenary meeting of the WA took place from 11-12 December 2002. The outcome of the Plenary, which can be found on the WA's website (www.wassenaar.org), is in line with the UK's objectives of further developing the WA.

A milestone achievement at this Plenary meeting was the agreement of a major new initiative on SALW, which are the weapons of choice in the majority of recent conflicts and for terrorist use. Building on a UK proposal, the WA adopted a document setting out detailed Best Practice guidelines and criteria for exports of SALW. The UK also continues to play a leading role in discussions on how SALW might be reported in the Arrangement's Specific Information Exchange. The Plenary reaffirmed the importance of responsible export control policies towards, and effective export controls over, SALW to prevent destabilising accumulations and diversion, but was not able to agree on new reporting arrangements.

In its review of lists of items subject to export controls, Participating States paid particular attention to the terrorism threat, introducing new controls for this purpose. A number of additional proposals aimed at strengthening export controls,

as part of the fight against terrorism and against illicit transfers, were made. In this context, Participating States also agreed to review existing WA guidelines regarding Man-Portable Air Defence Systems (MANPADS) to assess the adequacy of these guidelines in preventing terrorist use of such systems.

At this plenary meeting, WA States also adopted a Statement of Understanding on arms brokering, which reflects the importance attached to effectively controlling this activity. They agreed to continue discussion with a view to refining essential elements for effective legislation on arms brokering.

2003 is a Review year for the WA, when WA States undertake a thorough examination of the Arrangements procedures and objectives. The UK is taking a lead during this review, with the aim of ensuring that the review delivers real improvements to the WA as a forum for information exchange and policy co-ordination on conventional arms export controls.

Nuclear Suppliers Group and Zangger Committee

This year's Nuclear Suppliers Group (NSG) Plenary was held in South Korea between 19-23 May 2003. The Plenary was immediately preceded by a Consultative Group meeting. The second Licensing and Enforcement Experts Meeting also took place that week, and was chaired by the UK. It sought to further best practice and co-operation between customs officials and other enforcement agencies.

An NSG Extraordinary Plenary was held in Vienna on 13 December 2002 to update NSG Guidelines by including a reference to the NSG's role in preventing nuclear terrorism.

An NSG Consultative Group meeting held from 23-24 October 2002 in Vienna discussed reaffirming common understandings of safety agreements, improving transparency in practices between participating states, and the strengthening of information sharing. The group also reached agreement on changes to the Guidelines that had previously been recommended. Consultations

continued on engaging non-member states and transshipment states on counter proliferation issues, a subject to which we attach great importance.

The Zangger Committee's formal meetings took place in Vienna in October 2002 and April 2003. Items under consideration were outreach to non-members and conditions of supply.

Missile Technology Control Regime (MTCR)

The Missile Technology Control Regime (MTCR) Plenary was held in Warsaw from 23-27 September 2002. Discussions concentrated on strategies to tackle regional proliferation including through national and regime outreach visits, information exchange, and engaging the MTCR in the fight against terrorism. A meeting of technical experts agreed changes ensuring the regime control list keeps pace with technological developments. The MTCR website has been launched at <http://www.mtcr.info> containing the regime control list, national links and other public documents.

Hague Code of Conduct Against Ballistic Missile Proliferation (HCOG)

The Hague Code of Conduct Against Ballistic Missile Proliferation (HCOG) was launched on 25 November 2002. The Code commits states to a number of transparency and confidence building measures in the development and testing of ballistic missiles, and to maintain vigilance in not supporting or assisting ballistic missile programmes in countries developing or acquiring weapons of mass destruction. Over one hundred countries have now subscribed to the Code, which represents the first internationally agreed standards in the field of ballistic missiles.

G8 Meetings

The Prime Minister and other G8 leaders emphasised the threat posed by the proliferation of weapons of mass destruction when they met at Kananaskis, Canada, in June 2002. On that occasion they launched the Kananaskis Principles, designed to prevent terrorists, and any countries that may harbour them, gaining access to WMD.

One of the six Principles calls on states to "develop, review and maintain effective national export and transshipment controls."

The UK strongly supports the current efforts to get more states to sign up to the Kananaskis Principles, including the need for proper export controls. We and our G8 colleagues are currently working on a programme of lobbying specifically on export controls, to take place later this year.

At the G8 Summit in Evian, Heads of Government reiterated that the proliferation of WMD and their means of delivery is the pre-eminent threat to international security, and continued support for the principles set out at Kananaskis. They singled out the nuclear programmes of North Korea and Iran as being of particular concern, and called on the Governments of those two countries to act to resolve those concerns (full text of documents from the Evian summit can be found on the summit web site at <http://www.g8.fr>).

At Evian, the G8 also agreed on a number of measures to prevent the acquisition of MANPADS by terrorists, in the light of recent attempted attacks on civil aircraft. These measures include: agreement to only export these weapons to foreign governments or to agents authorised by a government; providing assistance for the collection, secure stockpile management and destruction of surplus weapons; adopting strict controls on the export and brokering of MANPADS and their essential components; and the exchange of information on uncooperative countries and entities.

Chemical and Biological Weapons (Australia Group)

The 2002 Plenary of the Australia Group (AG) was held in Paris from 3-6 June. The Group used the meeting to adopt tougher export controls aimed at preventing the spread of chemical and biological weapons (CBW), including to terrorist groups. The thirty-three countries at the meeting, including representatives from Europe, the Asia-Pacific region and the Americas, plus the European Commission, agreed to adopt formal guidelines governing the licensing of sensitive chemical and

biological items.

For the first time for an export control regime, the participants agreed to a 'catch-all' provision in these guidelines. This reflected the resolve of participating national governments to use all means at their disposal to fight the spread of CBW. Amongst the measures agreed were: controls on the export of biological equipment; new toxins added to the Group's biological control list; and the introduction of controls on the intangible transfer of information and knowledge that could be used for CBW proliferation.

Export Control Outreach and Bilateral Talks

Outreach, in the form of bilateral talks and awareness raising seminars, plays a key role in our efforts to promote and support the implementation of responsible export control regimes around the world. Joint teams of officials from FCO, DTI, MOD and HM Customs and Excise conduct dedicated export control bilateral meetings to address in detail the practical issues surrounding export licensing and enforcement.

Since the publication of the 2001 Annual Report, we have held bilateral talks on export controls with China, Hong Kong, Israel, Macau, Poland, Russia, Serbia and Montenegro and Ukraine, as well as with the US and Canada, with whom we work closely in this area. In many cases, these meetings were the latest in a series of ongoing contacts focusing on practical export control issues.

Section II

Export Licensing Decisions During 2002

2.1 BACKGROUND TO EXPORT LICENSING DECISIONS

This part of the Report gives information on export licensing decisions taken by the Government between 1 January and 31 December 2002.

There are three main types of licence:

- Standard Individual Export Licences (SIELs)
- Open Individual Export Licences (OIELs)
- Open General Export Licences (OGELs)

In assessing applications for individual licences, and on the basis of the information supplied by the exporter, officials in the Export Control Organisation (ECO) will determine whether or not the items are controlled and, if so, under which entry in the legislation; the relevant alphanumeric entry is known as the “rating” of the items. Items subject to control for strategic reasons are as follows:

- items entered in Part I and Part III of Schedule 1 to the Export of Goods (Control) Order 1994. Part III of Schedule 1 to the Export of Goods (Control) Order 1994 is known as the Military List. The text of Part I and Part III, as at 1 January 2002, is at Annex A to this report; both parts were amended during the reporting period as indicated.
- items entered in the Council Regulation (EC) 1334/2000 setting up a Community regime for the control of exports of dual-use items and technology (the regulation was adopted in June 2000). A summary of the dual-use list categories and sub-categories is at Annex B.
- items subject to control because the exporter has been told, knows or suspects that the items would or might be used in activities connected with weapons of mass destruction or missiles for their delivery. This is the so-called “WMD end-use” or “catch-all” control and goods controlled for these reasons are given the rating “End-Use”.
- items subject to control because the exporter has been told, knows or suspects that the

items in question are or may be intended for a military end-use in a country subject to certain types of arms embargo, or for use as parts or components of military list items which have been exported in breach of United Kingdom export controls. This is the co-called “military end-use control”.

A simple comparison of the numbers of licences issued or refused in this period compared to that reported in previous Annual Reports is not a reliable indicator of the practical effect of changes in Government policy between the periods concerned. In the first place, companies are unlikely to apply for licences that they can judge for themselves are likely to be refused when assessed against the published criteria. More generally, the number and nature of the applications received in total or in relation to particular destinations can vary widely from one period to the next, and there can be many reasons for such variation.

The information contained in this Report may be treated as definitive subject to the constraint that there is always some small risk of human error in the compilation of such a large body of data.

2.2 STANDARD INDIVIDUAL EXPORT LICENCES AND OPEN INDIVIDUAL EXPORT LICENCES

This part of the report provides information about the Standard Individual Export Licences (SIELs) and Open Individual Export Licences (OIELs), granted, refused and revoked during 2002. It also deals with appeals against licensing decisions during this period.

SIELs generally allow shipments of specified items to a specified consignee up to the quantity specified by the licence. Such licences are generally valid for two years where the export will be permanent. Where the export is temporary, for example for the purposes of demonstration, trial or evaluation, the licence is generally valid for one year only and the items must be returned before the licence expires. A licence is not required for the majority of transshipments through the UK en route from one country to another, providing certain

conditions are met. Most other transshipments can be made under one of the Open General Transshipment Licences in force, provided in all cases that the relevant conditions are met. Where this is not the case, a standard individual transshipment licence (SITL) is required.

The information on SIELs included in this part of the Report has been compiled using the Export Control Organisation's computer databases. The databases were interrogated during the compilation of the report to identify the status of all applications on which a decision was taken during the period covered by the report. In a small number of cases, there may be a subsequent change of status. There are two main reasons for such changes: a licence issued during the period may be later revoked, for example because of the imposition of trade sanctions or an arms embargo; or decision during the period to refuse a licence might be overturned because the applicant later appealed successfully.

During the period 8035 SIELs were issued, 3 were revoked and 293 applications for SIELs were refused. In addition, 12 SITLS were issued, whilst no applications for SITLs were refused and none were revoked.

OIELs are specific to an individual exporter and covers multiple shipments of specified items to specified destinations and/or, in some cases, specified consignees. OIELs covering the export of items entered on the Military List are generally valid for two years, while OIELs covering other items are generally valid for three years. There are no Open Individual Transshipment Licences.

During the reporting period 581 OIELs were issued and/or amended to include particular destinations and/or items, including some OIELs originally issued before 1 January 2002. In addition, 11 OIELs were amended during the period to exclude particular destinations and/or items and 5 applications for OIELs were refused in full and no OIELs were revoked. It should be noted that the refusal of an application for an OIEL, amendment to exclude particular destinations and/or items or the revocation of an OIEL does not prevent a company from applying for SIELs covering some or

all of the items concerned to specified consignees in the relevant destinations. Clearly, however, the factors that led to the original decision would be taken into account in the decision on any such application.

The presentation of the 2002 Annual Report is broadly the same as last year's report in that the information on decisions on applications for SIELs and OIELs is set out in a single entry for each destination. This enables the reader to ascertain quickly what goods have been licensed for export to that destination. A summary description is provided for all items covered by licences issued for the period.

The Annual Report also gives information on the number of small arms covered by SIELs issued in the period. However, this information is not provided in cases where, under the Code of Practice on Access to Government Information, the arguments for publication of the information are otherwise outweighed by the harm which this would cause to commercial confidentiality and/or legitimate security interests in the recipient country. No exclusions on those grounds were made in this year's Annual Report.

In addition, information is also provided in Table 1 (below) on the number of items of equipment in the UN Register of Conventional Arms categories covered by SIELs issued during the period, provided that the contract has come into force.

In the case of SIELs refused or revoked only details of ratings (whether or not a licence is required for a proposed export) are provided. Likewise for OIELs, only details of ratings are provided for licences revoked, refused in full or whose coverage was amended during the period by the exclusion of the destination (including items excluded in 2002 by the amendment of 2002 and pre-2002 licences).

Details of Part I and Part III (the Military List) of Schedule 1 to the Export of Goods (Control) Order 1994 is set out at Annex A to this report. Descriptions of the categories and sub-categories covering entries in Annex 1 to the Council Regulation (EC) No 1334/2000 on the control of

Table 1: Number of major equipments in UN Register of Conventional Arms categories licensed for export under a SIEL issued during 2002.

Country	Description	Quantity
Jordan	Challenger 1 Main Battle Tank	88
USA	Tornado GR1	1

exports of dual-use items and technology and in Schedule 2 of the Dual-Use Items (Export Control) Regulations 2000 are provided at Annex B.

INFORMATION ON SIELs, SITLs AND OIELs

The entry for each destination in section 2.6 contains the following information:

For SIELs:

- Total value of all applications in respect of which a SIEL was issued for the export of items to the destination concerned during the period, whether the export concerned was permanent or temporary. The total value will either be rounded up to the nearest £500,000 or stated as being less than £250,000. It should be noted that the actual value of exports that are actually made under the licences concerned is likely to be less than shown because some of these licences will not be used to make all of the exports authorised and others will not be used at all. In addition, some items are exported only temporarily and later returned to the UK.
- The number of licences issued, including numbers of licences for items on the Military List, for other items and for both.
- A summary description of the items covered by the licences issued during the period is given for each destination, with the items that were allowed for temporary export indicated by a (T).

The data on refused SIELs applications does not include those refused during this period following

an appeal against an earlier refusal. But it does include applications refused during the period which, at the end of it were pending a decision on an appeal against a decision to refuse a licence. The SIELs data also does not cover applications from which specific goods were removed before a licence was issued, applications withdrawn before a decision was reached, or applications where it was determined that no licence was required or that the goods could be exported to the destination concerned under an Open General Export Licence (OGEL).

In a small number of cases SIELs may be issued identifying more than one destination. This normally arises where a licence is issued for the temporary export of items for exhibition or demonstration in more than one destination. Details of all such licences issued are shown for all relevant destinations. This means that the total number of SIELs issued shown above is slightly lower than the sum of all SIELs issued shown on the destination pages (Section 2.6).

For SITLs:

Information on SITLs is provided in the same format as for SIELs. The items covered by SITLs issued merely pass through the UK and it would therefore be misleading to include a 'value' for these licences in the report.

For OIELs:

- The number of licences issued or where coverage was amended during the period by the inclusion or reinstatement of the destination concerned. The data also includes additional items authorised in 2002 through amendment to a pre-2002 licence.

- A summary description of the items covered by all the relevant OIELs issued during the period is shown, including temporary OIEL licences identified with a (T).
- Information is also provided on the relevant destination pages for OIEL applications refused in full or for licences which were revoked or where coverage was amended during the period by the exclusion of the destination or by the exclusion of items in 2002 by amendment to licences issued in 2002 or earlier.

The destination coverage of an OIEL may be amended for a variety of reasons, but mainly in the light of recommendations received from advisory departments. Sometimes, amendments follow the imposition of an arms embargo, but they may also reflect general concerns about the country concerned or a relevant change in circumstances there. A decision to exclude a particular country from the coverage of an OIEL does not mean that country is permanently excluded. Where the concerns that led to the original decision are no longer relevant, it might be decided to reinstate the country concerned.

The OIELs data does not cover applications from which specific items or destinations were removed before an OIEL was issued, or applications withdrawn before a decision was reached, or those for which it was determined that no licence was required or that the items could be exported to the destination concerned under an OGEL.

The information in Section 2.6 does not cover OIELs whose period of validity was extended temporarily during the period pending a decision on an application for a new OIEL; such cases amount to a temporary extension of an OIEL granted in an earlier period. The decision on the new application will be covered in this or a future report, as the case may be.

As OIELs cover multiple shipments of specified goods to specified destinations or specified consignees, exporters holding OIELs are not asked to provide details of the value of goods they propose to ship under an OIEL and it is therefore

not possible to provide information on the total value of applications for OIELs issued.

Special OIELs

There are two special categories of OIELs:

Media OIELs

Media OIELs authorise the export of protective clothing and equipment, mainly for the protection of aid agency workers and journalists, for example when working in areas of conflict. They are valid for two years, and cover the export to all destinations of items such as military helmets, body armour, bullet-proof or bullet-resistant clothing, flak suits and specially designed components for any of these goods. Goods exported under a Media OIEL must be returned to the UK when they are no longer required for personal protection. During the period, 5 Media OIELs were issued.

Continental Shelf OIELs

Continental Shelf OIELs authorise the export of controlled goods to the UK sector of the Continental Shelf for the use only on, or in connection with, offshore installation and associated vessels. During the period 2 Continental Shelf OIELs were issued.

REFUSALS AND REVOCATIONS

Table 2 provides information on the main reasons for decisions to refuse and revoke SIELs and SITLs. There were 296 such decisions in 2002.

The main reasons for the refusals (293 cases) and revocations (3 cases) in Table 2 are set out broadly in line with the criteria used in the consideration of arms exports, under the Consolidated EU and National Arms Export Licensing Criteria (attached at Annex F). The reasons have also been used to encompass reasons for revocation/refusal of dual-use goods. In a number of cases, the refusals/revocations were made for more than one reason and in these instances, the main reason has been provided. Some licences were refused principally because of the application of national controls or policy commitments (See Annex D) ⁷.

Table 2: Reasons for refusals and revocations of SIEL applications

Reason	Number of cases
Risk of contributing to proliferation of weapons of mass destruction or ballistic missiles (or contrary to UK international obligations under the non proliferation Treaties and Conventions and export control regimes)	121
UK's commitment to observe UN, EU or OSCE arms embargoes	5
Existence of national embargoes restrictions or policy commitments	5
UK's obligations under the Ottawa Convention and the 1998 Land Mines Act	1
Risk of use for internal repression	32
Risk of contributing to internal tensions or conflicts in the recipient country	76
Preservation of regional stability	21
National Security of the UK, of allies, EU Member States and other friendly countries	15
Risk of diversion or re-export to undesirable end-users	18
Total	296*

This information above does not include reasons for decisions to refuse OIELs in full or in part, to amend the coverage of an OIEL to exclude particular destinations and/or goods or to revoke an OIEL. As stated above, these decisions do not preclude a company from applying for SIELs covering some or all of the goods concerned to specified consignees in the relevant destinations.

* Note - The total number of cases does not match the number of reasons stated as one licence was revoked after it was issued in error and subsequently issued in 2003 and another licence was revoked because the applicant had not supplied full details of the ultimate end user.

APPEALS

This section provides information on all appeals against a decision to refuse an application for a SIEL or against a decision to revoke a SIEL, where the decision on the appeal was taken in the relevant period. The Government has set a target of 30 working days from receipt of all relevant information from the appellant.

There is no provision in the licensing procedure for a formal appeal against refusal or revocation decisions on OIELs. This is because such decisions do not prevent a company from applying for SIELs. Decisions to refuse licences are not taken lightly. Only in those cases where refusal is clearly justified is a final decision taken to refuse. In this context, appeals against refusals will often raise difficult and complex issues. Appeals are considered at an independent and more senior level than the original licence application. Every effort is made to deal with all appeals as expeditiously as possible, however, the time taken can be lengthy due to the need to examine afresh all relevant information.

In total, there were 65 appeals heard in 2002 against the original decision to refuse an application for a SIEL. There were 3 appeals against the revocation of SIELs. The appeals against the original decisions on 37 applications were refused; the appeals against the original decisions on 14 applications were upheld and licences were issued. A further 17 appeals were withdrawn by the exporter.

⁷ For a current summary of UK Restrictions on the Export of Strategic Goods see <http://www.fco.gov.uk/und/sanctions/list.pdf>

2.3 OPEN GENERAL LICENCES

Open General Export Licences (OGELs) allow the export of specified controlled goods by any company, removing the need for exporters to apply for an individual licence, provided the shipment and destinations are eligible and the conditions are met. Exporters must register with the Export Control Organisation before they make use of most OGELs. There is also a small number of Open General Transshipment Licences (OGTLs) for which registration is not required. All Open General Licences (OGLs) remain in force until they are revoked.

Note: Council Regulation (EC) No.1334/2000 on the export of dual-use items and technology entered into force on 28 September 2000. Annex II of the Regulation introduced a new Community General Export Authorisation (CGEA). The Regulation was subsequently amended by Council Regulation (EC) No. 880/2002, (the "Amending Regulation") which entered into force on 3rd June 2002. The Amending Regulation made changes to Annex IV of the Regulation which automatically changed the scope of the CGEA. (The CGEA is the Community equivalent of a UK OGEL and is directly applicable in all EU Member States).

Table 3: Open general export and transshipment licences in force at any time between 1 January and 31 December 2002 ⁸

2.4 PERFORMANCE IN PROCESSING LICENCE APPLICATIONS

The Export Control Organisation sets out the government's commitments to exporters in a Service and Performance Code. Where, as in almost all cases, it is necessary for an application for a SIEL to be circulated to other government departments in accordance with their policy requirements as determined by them, the aim is to provide such a response within 20 working days. These targets apply as soon as full documentation in support of the application has been provided by the applicant.

The targets do not apply to applications for OIELs because of the very wide variation in the goods and destination coverage of such licences, nor do they apply to licences concerning Iran or Iraq or to applications for licences to export goods which are subject to control solely because of United Nations Sanctions. As well as SIELs and OIELs, HMG processed and approved 461 Sanctions only licences to Iraq and 94 Sanctions only licences to Angola and refused 2 Sanctions only applications to Iraq. Sanctions licences are licences for goods not subject to strategic controls but licensable by virtue of UN Sanctions.

During the period, 59 % of all SIEL applications that were circulated to other government departments were processed within 20 working days.

Rating requests

The Export Control Organisation also responds to requests from exporters for advice on whether or not a licence is required to export particular goods of which the exporter has provided full technical details.

During the period 2974 such requests were dealt with: of those that were circulated to other government departments, approximately 51 % were given advice within 20 working days; of those that did not require circulation approximately 85 % were given advice within 10 working days.

Licensing performance by department

Figures 1, 2, 3 and 4 provide a breakdown of the performance in the period of the main Government Departments involved in the processing of SIELs, based on data compiled from the ELATE computer database within the Export Control Organisation.

Figure 1 gives a breakdown of the processing time taken by the Department of Trade and Industry alone in dealing with cases on which a substantive decision was reached. It covers all cases, whether or not circulated to advisory Departments. This shows that approximately 76% of cases were processed in DTI within its target of 10 working days.

Figures 2, 3 and 4 provide a breakdown of processing time taken in the Foreign and Commonwealth Office, Ministry of Defence and Department for International Development (DFID) respectively. DFID saw a relatively small proportion of all licences in this period. Approximately 49 %, 69% and 34 % of licences circulated to FCO, MOD and DFID respectively were processed within their target of 10 working days.

Appeals performance

On appeals against a decision to refuse an application for a SIEL our aim is to provide a decision within 30 working days from receipt of all the relevant information from the appellant. The target does not apply to appeals concerning Iraq or Iran, or to appeals concerning goods which are controlled solely because of UN Sanctions. Of the 68 appeals decided in 2002, 1 fell into this category. A further 17 of the remaining 67 appeals were withdrawn by the exporter concerned.

Of the remaining 50 appeals heard in 2002, 1 met the Government's 30 working day target. 14 of the 50 appeals circulated to MOD, and 10 of the 50 appeals circulated to FCO were processed within their target of 15 working days. 4 of the appeals

Figures 1-4: Breakdown of the performance of the main Government Departments involved in the processing of SIELS

Figure 1: Department of Trade and Industry

Figure 2: Foreign & Commonwealth Office

Figure 3: Ministry of Defense

Figure 4: Department for International Development

were processed by DTI within its target of 15 working days. 1 of the 2 appeals circulated to DFID was processed within its target of 15 working days.

2.5 STATISTICS ON EXPORTS OF MILITARY EQUIPMENT DURING 2002

Introduction

This section of the Report provides an overview of the physical export of defence equipment from the United Kingdom during 2002, and gives information on small arms destroyed by the MOD during 2002 (Table 4). The information relates to deliveries of equipment in the period 1 January to 31 December 2002 and has been obtained from three sources: HM Customs & Excise data (Tables 5 and 6), information provided for the UK contribution to the UN Register of Conventional Arms (Table 7), and information on Government to Government exports (Table 8).

HM Customs & Excise

The HM Customs & Excise (HM C&E) system for calculating UK trade data provides information on the value of military goods, and the numbers of certain weapons (generally small arms and light weapons), which have been identified as being exported from the UK during the reporting period. Information on exports to European Community (EC) partners is collected through the HM C&E Intrastat system and, for trade outside the EC, from customs declarations submitted by exporters. In both cases the identification of exports is based on the classification of goods in EC Tariff codes, which do not match the classifications of goods subject to strategic export controls. As a result, the information in Tables 5 and 6 provides an indicator of the level of trade with individual countries identified under EC Codes rather than a record of all exports of licensable goods during the period. With the aim of achieving a greater level of commonality and transparency, discussion with EC Partners continues and includes consideration of changes to the Tariff codes.

UN Register of Conventional Arms

The number of major equipments exported are based on an extract from the information provided for the UK contribution to the UN Register of Conventional Arms. The information in Table 7 has been provided voluntarily by industry in the knowledge that it will be made public. The data for these categories of equipment relate only to the export of complete new systems. The UN Register of Conventional Arms takes the date at which the goods are exported from the UK as representing the point of transfer.

Government to Government transfers of major equipment

Government to Government transfers include items gifted as well as the sale of surplus equipment. As the Import, Export and Customs Powers (Defence) Act 1939 does not bind the Crown, no licence is generally required for Government to Government transfers by gifting. They do not therefore appear in Section 2.6 but are included as appropriate in the Tables in this section of the report.

The UK's main Government supply agreement is the Government to Government Saudi Arabia Armed Forces Project, known as Al Yamamah. This has provided for the supply of Tornado, Hawk and PC9 aircraft and Minehunters with associated weapon equipment and facilities. This project is in the sustainment phase, providing ongoing support for equipment already in service. There is also a Government to Government supply agreement in place with Kuwait. This currently includes the supply of spares and maintenance for Warrior vehicles and Hawk aircraft, flying training and the Kuwait Naval School Management Programme.

Other Government supply agreements covering the sale of surplus defence equipment are entered into by the Disposals Services Agency of the Ministry of Defence. The major items of surplus equipment transferred during 2002, expressed as whole systems, are listed in Table 8. Where the transfer of ownership of surplus goods sold to overseas Governments takes place in the UK, the agency will require the purchasing government to obtain a UK export licence before collection.

Consequently, these exports appear in Section 2.6. Disposal sales are also made through UK contractors, who are required to apply for export licences in the normal way.

2.6 Export licence decisions during 2002 by country of destination

Afghanistan

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 0.5m
Number of SIELs issued covering:	
Items on the Military List	5
Other items	2
Military List and other items	0
Total number of SIELs issued	7

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for explosive ordnance disposal equipment, components for semi-automatic pistols (T), components for submachine guns (T), explosive ordnance disposal equipment, firing sets, military cargo vehicles, replica munitions for disposal training, semi-automatic pistols (8) (T), small arms ammunition (T), submachine guns (8) (T)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No.	Type	Goods Summary
1	P	Unclassified items as specified in part III of schedule 1 to the export of goods (control) order 1994, as amended, except for the following: 1. goods specified by PL5001 2. land mines specified by ML4 and all goods related to land mines 3. RDX or HMX explosive material or explosive material containing RDX or HMX 4. chemicals specified in the chemical weapons convention (schedule 1) and specified by ML7a or ML7b, and associated technology for these goods as specified in ML7 5. Complete rocket systems (including ballistic missile systems, space launch vehicles and sounding rockets) and unmanned air vehicles systems (including cruise missiles systems, remote piloted vehicles, target drones and reconnaissance drones) capable of at least a 300 km range 6. Complete subsystems, designed or modified for the rocket systems specified in 5, as follows; (i) individual rocket stages (ii) re-entry vehicles and equipment designed or modified therefore and electronic equipment specially designed for re-entry vehicles (iii) solid or liquid propellant rocket engines, having a total impulse capacity of 1.1mn.s (iv) guidance sets (systems that integrate the process of measuring and computing a vehicles' position and velocity with that of computing and sending commands to the vehicles flight control systems to correct the trajectory) capable of achieving system accuracy of 3.33% or less of the range (v) thrust vector control systems (e.g. flexible nozzle, deflection of exhaust gas stream, movable engines or nozzle, etc) (vi) weapons or warhead safing, arming, fuzing and firing mechanisms. 7. Specially designed production facilities or production equipment for the goods specified in 5 and 6 above. 8. Software specially designed or modified for the use of goods specified in 5 and 6, and specially designed or modified for production facilities specified in 7.

Footnote

The Government believes that the granting of these licences for Afghanistan is consistent with United Nations Security Council Resolution 1333 of 19 December 2000 which imposed a mandatory arms embargo only on the territory of Afghanistan under Taliban control. On 5 November 2001 the EU embargo was brought into line with UNSCR 1333 (Common Position 2001/771/CFSP). Under UNSCR 1390, adopted on 16 January 2002, the UN arms embargo was amended to cover only Usama bin Laden, Al Qa'ida and the Taliban and individuals and groups associated with them. The EU embargo was brought into line with UNSCR 1390 on 27 May 2002 (Common Position 2002/402/CFSP).

Footnote

*The UK government supports the decision of the Committee of Senior Officials of the OSCE 28/2/92 on Armenia and Azerbaijan and has only made exceptions to this for equipment for humanitarian end-use. The only exception made for export to Armenia was for de-mining equipment. The decision to allow the export of de-mining equipment reflects the government's determination to tackle the scourge of landmines throughout the world (HC 38WS, 5 June 2003).

65	P	General military aircraft components.
66	T	Military infrared/thermal imaging equipment.
67	P	Components for large calibre artillery, components for anti-aircraft guns, components for large calibre ammunition, components for anti-aircraft ammunition, castings for large calibre artillery, castings for anti-aircraft guns, castings for large calibre ammunition, castings for anti-aircraft ammunition, forgings for large calibre artillery, forgings for anti-aircraft guns, forgings for large calibre ammunition, forgings for anti-aircraft ammunition, unfinished products for large calibre artillery, unfinished products for anti-aircraft guns, unfinished products for large calibre ammunition, unfinished products for anti-aircraft ammunition, general naval vessel components, components for submarines, components for naval engines, castings for submarines, castings for naval engines, castings for general naval vessel components, forgings for submarines, forgings for naval engines, forgings for general naval vessel components, unfinished products for submarines, unfinished products for naval engines, unfinished products for general naval vessel components.

Australia cont.

68	P	Military improvised explosive devices disposal equipment, explosive ordnance disposal equipment, linear cutting explosive charges, demolition charges, explosive ordnance disposal equipment.
69	T	Naval electronic equipment.
70	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
71	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
72	P	Military electronic equipment, components for military electronic equipment.
73	P	Components for transport aircraft, technology for the use of components for transport aircraft, equipment for the use of components for military transport aircraft.
74	P	Military electronic equipment, software for the use of military electronic equipment.
75	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
76	P	Components for military transport aircraft.
77	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
78	P	Sporting gun ammunition, components for sporting gun ammunition.
79	P	Anti-riot shields.
80	P	General military aircraft components.
81	P	Components for military aero-engines, components for military surveillance aircraft, components for military transport aircraft.
82	P	Shotguns, components for shotguns.
83	P	Components for military electronic equipment, technology for the use of components for military electronic equipment.
84	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
85	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.
86	P	Shotguns, sporting rifles, weapon sights, military image intensifier equipment, gun mountings, components for shotguns, components for sporting rifles, revolvers, sporting gun ammunition.
87	T	Naval navigation equipment, components for naval navigation equipment.
88	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
89	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment

Australia cont.

		for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
90	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, equipment for the use of combat aircraft, equipment for the use of combat helicopters, equipment for the use of military training aircraft, equipment for the use of military transport aircraft, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for military training aircraft, test equipment for military transport aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military training aircraft, technology for the use of military transport aircraft.
91	T	Ground based radars.
92	P	Components for submarines.
93	T	Military electronic equipment, military communications equipment, components for military electronic equipment, components for military communications equipment.
94	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
95	P	Naval sonar equipment, components for naval sonar equipment, software for the use of naval sonar equipment, technology for the use of naval sonar equipment, test equipment for naval sonar equipment, equipment for the use of naval sonar equipment.
96	P	Small arms ammunition.
97	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
98	P	Components for military communications equipment.
99	P	Components for missile scoring equipment, test equipment for missile scoring equipment, software for the use of missile scoring equipment, components for ground based radars, components for airborne radars, test equipment for ground based radars, test equipment for airborne radars, software for the use of ground based radars, test equipment for airborne radars, components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment.
100	P	Components for military utility vehicles.
101	P	Airborne refuelling equipment, components for airborne refuelling equipment, military aircraft ground equipment, technology for the use of airborne refuelling equipment, technology for the use of military aircraft ground equipment.
102	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
103	P	Equipment for the use of weapon sights.
104	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
105	P	Sporting rifles, components for sporting rifles, sporting gun ammunition, shotguns, weapon sights.
106	T	Military electronic equipment.
107	P	Forgings for combat aircraft, forgings for military training aircraft.
108	P	Shotguns, components for shotguns.
109	P	Military aero-engines, components for military aero-engines.

Australia cont.

110	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
111	P	Components for military transport aircraft, components for military aero-engines.
112	P	Shotguns, combination rifle-shotguns, replica vintage guns, rifles, sporting rifles, weapon sights.
113	P	Sporting gun ammunition, components for sporting gun ammunition.
114	P	Fire control equipment, components for fire control equipment, test equipment for fire control equipment, equipment for the use of fire control equipment, software for the use of fire control equipment, technology for the use of fire control equipment.
115	P	Military aero-engines, components for military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines.
116	P	Components for sporting rifles.
117	P	Military electronic equipment, technology for the use of military electronic equipment.
118	P	Shotguns, components for shotguns, sporting rifles, components for sporting rifles, weapon sights.
119	P	Technology for the use of military aircraft navigation equipment, software for the use of military aircraft navigation equipment.
120	P	Improvised explosive devices disposal equipment, technology for the use of improvised explosive disposal equipment.
121	T	Remote ground sensor systems, software for the use of remote ground sensor systems.
122	P	Body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour, components for military helmets, military helmets.
123	P	Equipment employing cryptography.
124	P	Components for machine pistols, components for assault rifles, components for pistols, components for semi-automatic pistols, components for machine guns.
Licences revoked or whose coverage was amended during the period by the exclusion of the destination (including goods excluded in 2002 by amendment of 2002 and pre 2002 licences).

Austria

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 2.0m
Number of SIELs issued covering:	
Items on the Military List	13
Other items	1
Military List and other items	0
Total number of SIELs issued	14

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

air guns (2), components for armoured personnel carriers, enriched uranium, equipment for the use of weapon day and night sights (T), equipment for the use of weapon night sights (T), laser range finders (T), military airborne cargo nets, military aircraft flight data recorders, military infrared/thermal imaging equipment (T), NBC filters, NBC protective equipment, neptunium 237, plutonium 239, shotguns (2), software for the use of military communications equipment, test equipment for military communications equipment (T), uranium 233, weapon day and night sights (T), weapon night sights (T)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
2	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
3	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
4	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/ tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
5	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
6	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
7	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.

16	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
17	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
18	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/ tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
19	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
20	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/ tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
21	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
22	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
23	P	Equipment employing cryptography.
24	P	Devices for initiating explosives, firing sets.
25	P	Software for the use of equipment employing cryptography.
26	P	Towed hydrophone arrays.
27	P	Non-military explosives/propellants.
28	P	Weapon simulators, components for weapon simulators, anti-aircraft guns training equipment,

Austria cont.

		components for anti-aircraft guns training equipment, armoured fighting vehicles training equipment, components for armoured fighting vehicles training equipment, large calibre artillery training equipment, components for large calibre artillery training equipment, small calibre artillery training equipment, components for small calibre artillery training equipment, anti-armour missiles training equipment, components for anti-armour missiles training equipment, naval light guns training equipment, components for naval light guns training equipment.
29	P	Military communications equipment, military helmets, components for military communications equipment.
30	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
31	T	Armoured all wheel drive vehicles.
32	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
33	P	Components for military video recording equipment, general military aircraft components, components for aiming devices, test equipment for military video recording equipment, test equipment for general military aircraft components, components for aiming devices, technology for the use of military video recording equipment, technology for the use of general military aircraft components, technology for the use of aiming devices.
34	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
35	P	Anti-riot shields.
36	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.
37	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters.
38	P	Components for military communications equipment, equipment for the use of military communications equipment.
39	T	Weapons night sights.
40	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
41	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
42	P	Sporting gun ammunition, components for sporting gun ammunition.
43	P	Components for military transport aircraft, components for military aero-engines, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, technology for the use of military transport aircraft.
44	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
45	P	Ground vehicle military communications equipment.
46	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic

Austria cont.

		equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of chemical agent detection, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
47	P	Military infrared/thermal imaging equipment.
48	P	Military improvised explosive devices disposal equipment, explosive ordnance disposal equipment, linear cutting explosive charges, demolition charges, explosive ordnance disposal equipment
49	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
50	P	Military electronic equipment, components for military electronic equipment.
51	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
52	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
53	P	Anti-riot shields.
54	P	Demolition charges, explosive ordnance disposal equipment, military improvised explosive devices disposal equipment.
55	P	Military electronic equipment, general military aircraft components, test equipment for military electronic equipment, test equipment for general military aircraft components.
56	P	Components for combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, technology for the use of combat aircraft.
57	T	Ground based radars.
58	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
59	P	Small arms ammunition.
60	P	Components for NBC decontamination systems, components for NBC decontamination equipment, components for NBC protective equipment.
61	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
62	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, air guns, veterinary/tranquillising rifles, rifles, sporting rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
63	P	Military aero-engines, components for military aero-engines.
64	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert

12	T	Gyroscopes, inertial equipment, technology for the use of inertial equipment, technology for the use of gyroscopes.
13	T	Armoured all wheel drive vehicles.
14 ²	P	Body armour, military utility vehicles, components for military utility vehicles, military cargo vehicles, components for military cargo vehicles, military engineer vehicles, components for military engineer vehicles, military trailers, explosive ordnance disposal equipment, components for explosive ordnance disposal equipment, mine detectors, devices for initiating explosives.
15	T	Bathymetric survey systems.

Footnote

The UK government supports the decision of the Committee of Senior Officials of the OSCE 28/2/92 on Armenia and Azerbaijan and has only made exceptions to this for equipment for humanitarian end-use. The only exception made for export to Azerbaijan was for de-mining equipment. The decision to allow the export of de-mining equipment reflects the government's determination to tackle the scourge of landmines throughout the world (HC 835W, 16 October 2002)¹, (HC 38WS, 5 June 2003)².

Military List and other items	0
Total number of SIELs issued	6

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

body armour (T), civil body armour, components for body armour (T), components for improvised explosive device detection equipment, components for military cargo vehicles*, components for small arms ammunition, components for test equipment for small arms ammunition, cryptographic software, equipment employing cryptography, improvised explosive device detection equipment, improvised explosive device disposal equipment, military helmets (T), production equipment for small arms ammunition, technology for the use of improvised explosive device detection equipment, technology for the use of production equipment for small arms ammunition, test equipment for small arms ammunition, weapon cleaning equipment

Footnote

*An EU arms embargo is in place against Bosnia and Herzegovina, established in Common Position 96/184/CFSP of 7 March 1996. This is the only exception that has been made to the embargo. The licence was issued for the export of non-lethal military equipment for humanitarian purposes for NATO peacekeeping. In line with the usual procedure, Parliament was informed by means of a written ministerial statement (HC 2WS, 28 April 2003).

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 11.5m
---	---------

Number of SIELs issued covering:	
Items on the Military List	84
Other items	11
Military List and other items	3
Total number of SIELs issued	98

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export)

ballistic shields, bomb suits, chaff, chaff equipment, components for aircraft military communications equipment, components for aircraft radars, components for assault rifles, components for bomb suits, components for combat aircraft, components for combat helicopters, components for destroyers, components for ejector seats, components for fire control equipment, components for frigates, components for guided missile decoying equipment, components for heavy machine guns, components for large calibre artillery, components for large calibre artillery ammunition, components for military aero-engines, components for military aircraft flight data recorders, components for military communications equipment, components for military communications equipment (T), components for military firing sets, components for military infrared/thermal imaging equipment, components for military surveillance aircraft, components for military training aircraft, components for naval communications equipment, components for naval electronic equipment, components for naval engines, components for naval light guns, components for naval radars, components for naval sonar equipment, components for nuclear reactors, components for submachine guns, components for unmanned air vehicles, cryptographic software, decoy flares, equipment employing cryptography, equipment for the use of large calibre artillery, equipment for the use of military firing sets, equipment for the use of weapon sights, firing sets, general military aircraft components, general naval vessel components, improvised explosive device disposal equipment, inertial equipment (T), microwave components, military aircraft communications equipment, military aircraft ground equipment, military communications equipment, military electronic equipment, military firing sets, military helmets, military infrared/thermal imaging equipment (T), military video recording equipment (T), munition fuzes, naval electronic warfare equipment, naval shock mounts, rebreathing swimming apparatus, software for the development of equipment employing cryptography, submachine guns (164), technology for the use of assault rifles, technology for the use of inertial equipment (T), technology for the use of submachine guns, test equipment for large calibre artillery, test equipment for military firing sets, triggered spark gaps, weapon cleaning equipment, weapon sights

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	P	Inertial equipment.
3	P	Bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment.
4	T	Radiation hardened TV cameras, radiation hardened TV cameras lenses.
5	P	Animal pathogens.
6	T	Accelerometers, inertial equipment.
7	P	Direct view imaging equipment, image intensifier tubes, imaging cameras.
8	P	Accessories for semiconductor process equipment, components for semiconductor process equipment.
9	P	Triggered spark gaps.
10	P	Inertial equipment.
11	P	Equipment employing cryptography, cryptographic software.
12	P	Cryptographic software.
13	P	Equipment employing cryptography.
14	P	Marine position fixing equipment.
15	P	Software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography.
16	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
17	P	Devices for initiating explosives, firing sets.
18	P	Software for the use of equipment employing cryptography.
19	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
20	P	Technology for the production of toxins
21	P	Cryptographic software, software for the development of equipment employing cryptography, equipment employing cryptography
22	P	Towed hydrophone arrays.
23	P	Non-military explosives/propellants.
24	P	Equipment employing cryptography.
25	P	Components for combat helicopters, equipment for the use of combat helicopters, components for military aero-engines, technology for the use of combat helicopters.
26	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
27	P	Military communications equipment, military helmets, components for military communications equipment.
28	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
29	P	Components for air to surface missiles, components for air to surface missiles control equipment, components for air to surface missile handling equipment, components for air to surface missiles launching equipment.
30	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
31	P	Components for military video recording equipment, components for airborne radars,

Brazil cont.

		components for aiming devices, test equipment for military video recording equipment, test equipment for general military aircraft components, test equipment for airborne radars, test equipment for aiming devices, technology for the use of military video recording equipment, technology for the use of general military aircraft components, technology for the use of aiming devices, technology for the use of airborne radars.
32	P	Aircraft military communications equipment, military communications equipment, equipment for the use of military communications equipment.
33	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
34	P	Software for the use of naval electronic warfare training equipment.
35	P	General naval vessel components, test equipment for general naval vessel components.
36	P	Components for frigates, components for naval engines, technology for the use of frigates, technology for the use of naval engines.
37	P	General naval vessel components.
38	P	Military equipment and components for ex-Royal Navy vessels excluding complete weapons or ammunition.
39	P	Components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft.
40	P	Components for military communications equipment, equipment for the use of military communications equipment.
41	P	General naval vessel components, components for submarines.
42	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
43	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
44	P	Armoured plate.
45	P	Components for fire control equipment, software for the use of fire control equipment, technology for the use of fire control equipment, equipment for the use of fire control equipment, components for weapons control systems, software for the use of weapons control systems, technology for the use of weapons control systems, equipment for the use of weapons control systems.
46	P	Naval engines, components for naval engines, equipment for the use of naval engines.
47	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
48	P	General purpose machine guns, heavy machine guns.

Brazil cont.

49	P	General naval vessel components.
50	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
51	P	Components for submarines.
52	P	General military aircraft components.
53	P	Components for combat aircraft, components for military surveillance aircraft, equipment for the use of components for combat aircraft, equipment for the use of components for military surveillance aircraft, test equipment for components for combat aircraft, test equipment for components for military surveillance aircraft, production equipment for components for combat aircraft, production equipment for components for military surveillance aircraft, test equipment for components for combat aircraft, test equipment for components for military surveillance aircraft.
54	T	Naval electronic equipment.
55	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
56	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
57	P	Military electronic equipment, components for military electronic equipment.
58	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
59	P	Components for military communications equipment, software for the use of military communications equipment, software for the use of artillery fire location equipment, technology for the use of military communications equipment, technology for the use of artillery fire location equipment, test equipment for military communications equipment, test equipment for artillery fire location equipment, equipment for the use of military communications equipment, equipment for the use of artillery fire location equipment.
60	P	Components for military aero-engines.
61	T	Naval navigation equipment, components for naval navigation equipment.
62	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
63	P	Components for combat aircraft, components for military search and rescue aircraft,

Brazil cont.

		components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
64	P	Components for military aero-engines, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, technology for the use of components for military aero-engines.
65	T	Ground based radars.
66	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
67	P	Small arms ammunition.
68	P	Components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment, components for ground based radars, components for airborne radars, test equipment for ground based radars, test equipment for airborne radars, software for the use of ground based radars, software for airborne radars.
69	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
70	P	Triggered spark gaps.
71	P	Software for the use of naval radars, technology for the use of naval radars, components for naval radars, test equipment for naval radars, equipment for the use of naval radars.
72	P	Military aero-engines, components for military aero-engines.
73	P	Components for military transport aircraft, components for military aero-engines.
74	P	Equipment employing cryptography, technology for the development of equipment employing cryptography, equipment for the development of equipment employing cryptography, software for the use of equipment employing cryptography.
75	P	Military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines, components for the use of military aero-engines.
76	P	Software for the use of equipment employing cryptography.
77	P	Equipment employing cryptography, development equipment for equipment employing cryptography, test equipment for equipment employing cryptography, software for the development of equipment employing cryptography, software for the use of equipment employing cryptography.
78	P	Equipment employing cryptography.

No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	T	Accelerometers, inertial equipment.
3	P	Software for the use of equipment employing cryptography.
4	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
5	P	Technology for the production of toxins.
6	T	Submersible vehicles, marine position fixing equipment, magnetometers, bathymetric survey systems, inertial equipment.
7	P	Cryptographic software, software for the development of equipment employing cryptography, equipment employing cryptography.
8	T	Gyroscopes, inertial equipment, technology for the use of inertial equipment, technology for the use of gyroscopes.
9	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for

Cameroon cont.

		military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
10	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.

Canada

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 19.0m
Number of SIELs issued covering:	
Items on the Military List	171
Other items	2
Military List and other items	0
Total number of SIELs issued	173

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export)

additives to explosive chemicals, anti-riot shields, assault rifles (1455), chemical agent detection equipment, combat shotguns (6), components for aircraft military communications equipment, components for aircraft radars, components for armoured fighting vehicles, components for armoured personnel carriers, components for assault rifles, components for avalanche control projectiles, components for chemical agent detection equipment, components for combat aircraft, components for combat helicopter simulators, components for combat helicopters, components for general purpose machine guns, components for ground based radars, components for ground vehicle military communications equipment, components for gun silencers, components for military aero-engines, components for military aero-engines (T), components for military aircraft head-up displays, components for military aircraft navigation equipment, components for military communications equipment, components for military infrared/thermal imaging equipment, components for military infrared/thermal imaging equipment (T), components for military navigation equipment (T), components for military sonar detection equipment (T), components for military surveillance aircraft, components for military training aircraft, components for military training aircraft (T), components for military utility helicopter simulators, components for military utility helicopter training equipment, components for missile scoring equipment, components for mortars, components for munition fuzes, components for naval communications equipment, components for naval electronic warfare equipment, components for naval sonar equipment, components for night vision goggles (T), components for rifles, components for sniper rifles, components for sniper rifles (T), components for submachine guns, components for submarines, components for vintage military aircraft, components for weapon day and night sights (T), components for weapon night sights, components for weapon sights, equipment for the use of anti-aircraft guns, equipment for the use of military communications equipment, equipment for the use of naval communications equipment, equipment for the use of weapon day and night sights (T), equipment for the use of

Canada cont.

weapon night sights, general military vehicle components, general naval vessel components, general purpose machine guns (156), gun mountings, gun mountings (T), gun silencers, gun silencers (T), helmet mounted display equipment (T), inert ammunition, laser range finders, mass spectrometers, military acoustic detection equipment (T), military communications equipment, military communications equipment (T), military electronic equipment, military field engineer equipment, military firing sets, military improvised explosive device disposal equipment, military parachutes, military sonar detection equipment, military sonar detection equipment (T), military training aircraft, naval acoustic equipment, naval navigation equipment, NBC filters, NBC respirators, periscopes, rifles (1), semi-automatic pistols (201), shotguns (12), small arms ammunition, sniper rifles (188), sniper rifles (5) (T), software for the evaluation of weapon systems, software for the simulation of military operation scenarios (T), software for the use of combat helicopter simulators, software for the use of helmet mounted display equipment (T), software for the use of military electronic warfare equipment, software for the use of night vision goggles (T), sporting rifles (10), submachine guns (420), technology for the use of military communications equipment, technology for the use of military training aircraft training equipment, technology for the use of military utility helicopter simulators, technology for the use of naval communications equipment, test equipment for submarines (T), training equipment for military training aircraft, tritium, weapon day and night sights (T), weapon sights, weapon sights (T)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Towed hydrophone arrays
2	P	Instrumentation cameras.
3	P	Devices for initiating explosives.
4	P	Technology for the development of non-military detonators, technology for the development of firing sets, technology for the development of high current pulse generators.
5	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
6	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
7	P	Triggered spark gaps.
8	P	Cryptographic software.
9	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
10	P	Devices for initiating explosives, firing sets.
11	P	Software for the use of equipment employing cryptography.
12	P	Thorium, natural uranium, depleted uranium.
13	P	Towed hydrophone arrays.
14	P	Non-military explosives/propellants.
15	P	Weapon simulators, components for weapon simulators, anti-aircraft guns training equipment, components for anti-aircraft guns training equipment, armoured fighting vehicles training equipment, components for armoured fighting vehicles training equipment, large calibre artillery training equipment, components for large calibre artillery training equipment, small calibre artillery training equipment, components for small calibre artillery training equipment, anti-armour missiles training equipment, components for anti-armour missiles training equipment, naval light guns training equipment, components for naval light guns training equipment.
16	P	Military electronic equipment.
17	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
18	P	Military communications equipment, military helmets, components for military communications equipment.
19	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
20	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
21	P	Rifles, sporting rifles, weapon sights, small arms ammunition, sporting gun ammunition, shotguns.
22	P	Pyrotechnic signaling devices, components for anti-ship missiles, components for torpedoes,

Canada cont.

		components for rocket launching equipment, components for chaff equipment, components for weapons control systems, components for naval radars, components for electronic countermeasure equipment, components for naval gun mountings, components for naval electronic warfare equipment, components for naval sonar equipment, components for naval communications equipment, components for naval navigation equipment, components for submarines, components for frigates, components for destroyers, components for fast attack craft, components for naval auxiliary vessels, general naval vessel components, components for military communications equipment, military electronic equipment, technology for the use of military communications equipment, technology for the use of naval gun mountings, technology for the use of naval electronic warfare equipment, technology for the use of naval sonar equipment, technology for the use of naval communications equipment, technology for the use of naval navigation equipment, technology for the use of submarines, technology for the use of frigates, technology for the use of fast attack craft, technology for the use of naval auxiliary vessels, technology for the use of electronic countermeasure equipment, technology for the use of naval radars, technology for the use of weapons control systems, technology for the use of rocket launching equipment, technology for the use of chaff equipment, technology for the use of pyrotechnic signaling devices, technology for the use of anti-ship missiles, technology for the use of torpedoes.
23	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
24	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.
25	P	Components for military bridges.
26	P	Components for military video recording equipment, components for military aircraft navigation equipment, components for aircraft head-up displays, test equipment for military video recording equipment, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for aircraft head-up displays, technology for the use of military video recording equipment, technology for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of aircraft head-up displays.
27	P	Components for assault rifles, components for rifles, components for general purpose machine guns, components for semi-automatic pistols, components for submachine guns, gun mountings, components for small calibre artillery, components for large calibre artillery, components for grenade launchers, components for anti-aircraft guns, components for mortars, equipment for the use of assault rifles, equipment for the use of rifles, equipment for the use of general purpose machine guns, equipment for the use of semi-automatic pistols, equipment for the use of submachine guns, equipment for the use of small calibre artillery, equipment for the use of large calibre artillery, equipment for the use of grenade launchers, equipment for the use of anti-aircraft guns, equipment for the use of mortars, equipment for the use of rocket launching equipment, gun laying equipment, components for gun laying equipment.
28	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
29	P	Software for the use of naval electronic warfare training equipment.
30	P	Military electronic equipment, general military aircraft components, test equipment for military electronic equipment, test equipment for general military aircraft components.
31	P	Components for armoured personnel carriers, components for tanks, components for armoured fighting vehicles, components for military engineering vehicles, components for armoured repair and recovery vehicles, equipment for the use of components for armoured personnel carriers, equipment for the use of components for tanks, equipment for the use of components for armoured fighting vehicles, equipment for the use of components for military engineering vehicles, equipment for the use of components for armoured repair and recovery vehicles.
32	P	General naval vessel components, test equipment for general naval vessel components.
33	P	Components for combat aircraft, components for military training aircraft.

Canada cont.

34	P	Components for military utility helicopters, equipment for the use of military utility helicopters, components for combat helicopters, equipment for the use of combat helicopters.
35	P	Components for military transport aircraft.
36	P	Shotguns, sporting rifles, components for shotguns, components for sporting rifles, weapon sights, equipment for the use of shotguns, equipment for the use of sporting rifles, weapons cleaning equipment.
37	P	Components for military transport aircraft.
38	P	General naval vessel components.
39	P	Military equipment and components for ex-Royal Navy vessels excluding complete weapons or ammunition.
40	P	Components for combat helicopters, components for military utility helicopters.
41	P	Military electronic equipment, software for the use of military electronic equipment, technology for the use of military electronic equipment.
42	P	Projectile launchers, non-sporting shotgun ammunition, tear gas/irritant ammunition, training tear gas/irritant ammunition, components for ammunition for wall and door breaching projectile launchers.
43	P	Military bridges, equipment for the use of military bridges.
44	P	Goods specified in the military list as ML10a and ML10b.
45	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters.
46	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras, accessories for military photographic equipment, technology for the use of military surveillance aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
47	P	Components for military communications equipment, equipment for the use of military communications equipment.
48	P	Components for large calibre artillery, components for small calibre artillery, components for naval light guns, components for anti-aircraft guns, components for mortars, components for armoured fighting vehicles, components for military utility vehicles, components for bridge laying vehicles, components for tanks, components for armoured fighting vehicles.
49	P	Naval navigation equipment.
50	P	Sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, small arms ammunition, shotguns.
51	T	Shotguns.
52	P	General naval vessel components, components for submarines.
53	P	Components for sniper rifles.
54	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for

Canada cont.

		the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft military utility aircraft, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
55	T	Weapons night sights.
56	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
57	P	Forgings for military aero-engines, forgings for military transport aircraft, forgings for military utility helicopters, forgings for combat aircraft, forgings for military training aircraft, forgings for combat helicopters, forgings for military search and rescue aircraft, forgings for military surveillance aircraft, forgings for military utility aircraft.
58	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
59	P	Sporting gun ammunition, components for sporting gun ammunition.
60	P	Sporting rifles, components for sporting rifles, shotguns, components for shotguns.
61	P	Components for airborne surveillance equipment, military communications equipment, components for combat aircraft, components for military communications equipment, software for the use of components for combat aircraft, software for the use of military communications equipment, technology for the use of components for combat aircraft, technology for the use of airborne surveillance equipment, technology for the use of military communications equipment, test equipment for the use of airborne surveillance equipment, test equipment for the use of components for combat aircraft, test equipment for the use of military communications equipment.
62	P	Components for military transport aircraft, components for military surveillance aircraft, components for military utility helicopters, components for combat aircraft, components for combat helicopters, components for military aero-engines.
63	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
64	P	General purpose machine guns, heavy machine guns.
65	P	Shotguns, sporting rifles.
66	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
67	P	General naval vessel components.
68	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
69	P	Components for submarines.
70	P	Military communications equipment, components for military communications equipment, technology for the use of military communications equipment, technology for the production of military communications equipment, technology for the development of military communications equipment, software for the use of military communications equipment, software for the production of military communications equipment, software for the development of military communications equipment, test equipment for military communications equipment, production equipment for military communications equipment, equipment for the use of military communications equipment.
71	P	Components for combat helicopters, components for military utility helicopters, equipment for the use of combat helicopters, equipment for the use of military utility helicopters.

Canada cont.

72	T	Naval electronic equipment.
73	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
74	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
75	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
76	P	Military electronic equipment, components for military electronic equipment.
77	P	Components for military transport aircraft, technology for the use of components for military transport aircraft, equipment for the use of components for military transport aircraft.
78	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
79	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
80	P	Components for military transport aircraft.
81	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
82	P	Sporting gun ammunition, components for sporting gun ammunition.
83	P	Anti-riot shields
84	P	Components for military training aircraft, equipment for the use of components for military training aircraft, technology for the use of components for military training aircraft, components for combat aircraft, equipment for the use of components for combat aircraft, technology for the use of components for combat aircraft.
85	P	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for bombs, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication

Canada cont.

		equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
86	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
87	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes, production equipment for military utility helicopters, equipment for the development of military utility helicopters, technology for the development of military utility helicopters, technology for the production of military utility helicopters.
88	T	Naval navigation equipment, components for naval navigation equipment
89	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
90	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
91	P	Components for combat aircraft, components for combat helicopters, components for military transport aircraft, components for tanks, components for frigates, equipment for the use of combat aircraft, equipment for the use of combat helicopters, equipment for the use of military transport aircraft, equipment for the use of armoured fighting vehicles, equipment for the use of frigates, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for military transport aircraft, test equipment for frigates, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military transport aircraft, technology for the use of armoured fighting vehicles, technology for the use of frigates.
92	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.

Canada cont.

93	P	Small arms ammunition.
94	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for combat helicopters, components for military utility helicopters, military aero-engines, components for military aero-engines, military aircraft navigation equipment, aircraft military communication equipment, components for military aircraft navigation equipment, components for aircraft military communication equipment, military aircraft ground equipment, test equipment for the use of combat aircraft, test equipment for the use of military training aircraft, test equipment for the use of military transport aircraft, test equipment for the use of military utility aircraft, test equipment for the use of combat helicopters, test equipment for the use of military utility helicopters, aircraft radars, components for aircraft radars, general military aircraft components, military electronic equipment, components for combat aircraft, components for combat helicopters, military aircraft ground equipment, military flying helmets, anti-g/pressure suits, military aircraft pressurised breathing equipment, military parachutes, night vision goggles, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of military aircraft navigation equipment, technology for the use aircraft military communication equipment, technology for the use of aircraft radars, technology for the use of military aircraft ground equipment, technology for the use of military flying helmets, technology for the use of anti-g/pressure suits, technology for the use of military aircraft pressurised breathing equipment, technology for the use of night vision goggles, technology for the use of general military aircraft components, technology for the use of military electronic equipment.
95	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
96	P	Components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment, components for missile scoring equipment, test equipment for missile scoring equipment, software for the use of missile scoring equipment, components for ground based radars, components for airborne radars, test equipment for ground based radars, test equipment for airborne radars, software for the use of ground based radars, software for airborne radars.
97	P	Components for military utility vehicles.
98	P	Military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment.
99	P	Airborne refuelling equipment, components for airborne refuelling equipment, military aircraft ground equipment, technology for the use of airborne refuelling equipment, technology for the use of military aircraft ground equipment.
100	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
101	P	Equipment for the use of weapon sights.
102	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
103	P	Triggered spark gaps.
104	P	Sporting rifles, components for sporting rifles, sporting gun ammunition, shotguns, weapon sights.
105	P	Software for the use of naval radars, technology for the use of naval radars, components for naval radars, test equipment for naval radars, equipment for the use of naval radars.
106	P	Components for military engineer vehicles.
107	P	Forgings for combat helicopters, forgings for military utility helicopters.
108	P	Shotguns, components for shotguns.
109	P	Military aero-engines, components for military aero-engines.
110	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
111	P	Equipment for the use of periscopes, test equipment for periscopes.
112	P	Components for submarines.
113	P	Components for armoured fighting vehicles.

Canada cont.

114	P	Components for sporting rifles.
115	P	Components for military transport aircraft, components for military aero-engines.
116	P	Sporting gun ammunition, components for sporting gun ammunition.
117	P	Crowd control ammunition, components for crowd control ammunition, large calibre artillery ammunition, components for large calibre artillery ammunition, mortars bombs, components for mortars bombs, munition fuses anti-armour mines, bombs, components for bombs, demolition devices, exploding simulation devices, components for exploding simulation devices, fragmentation hand grenades, components for fragmentation hand grenades, illuminators, components for illuminators, incendiary hand grenades, components for incendiary hand grenades, components for naval mines, practice bombs, components for practice bombs, pyrotechnic hand grenades, components for pyrotechnic hand grenades, pyrotechnic signalling devices, components for pyrotechnic signalling devices, rifle grenades, components for rifle grenades, smoke canisters, components for smoke canisters, smoke hand grenades, components for smoke hand grenades, signal hand grenades, components for signal hand grenades, stun grenades, components for stun grenades, components for torpedoes, training hand grenades, components for training hand grenades.
118	P	Naval engines, components for naval engines, equipment for the use of naval engines, technology for the use of naval engines.
119	P	Components for military training aircraft.
120	P	Military electronic equipment, technology for the use of military electronic equipment.
121	P	Shotguns, components for shotguns, sporting rifles, components for sporting rifles, weapon sights.
122	P	Technology for the use of military aircraft navigation equipment, software for the use of military aircraft navigation equipment.
123	P	Software for the use of sonar equipment, technology for the use of sonar equipment.
124	P	Improvised explosive devices disposal equipment, technology for the use of improvised explosive disposal equipment.
125	P	Components for body armour, ballistic shields.
126	P	Shotguns, sporting rifles.
127	T	Remote ground sensor systems, software for the use of remote ground sensor systems
128	P	Body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour, components for military helmets, military helmets.
129	P	Equipment employing cryptography.
130	P	Semi-automatic pistols.
131	P	Components for machine pistols, components for assault rifles, components for pistols, components for semi-automatic pistols, components for machine guns.
132	P	Components for military electronics equipment, technology for the use of components for military electronics equipment.

70	P	Military improvised explosive devices disposal equipment, explosive ordnance disposal equipment, linear cutting explosive charges, demolition charges, explosive ordnance disposal equipment.
71	T	Naval electronic equipment.
72	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
73	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
74	P	Components for aircraft carriers, components for naval auxiliary vessels, components for of patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
75	P	Military electronic equipment, components for military electronic equipment.
76	P	Components for transport aircraft, technology for the use of components for transport aircraft, equipment for the use of components for transport aircraft.
77	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
78	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
79	P	Components for military transport aircraft.
80	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use
81	P	Components for armoured fighting vehicles, components for artillery rocket launching vehicles.
82	P	Components for sporting gun ammunition.
83	P	Components for military communications equipment, artillery fire location equipment, components for artillery fire location equipment, software for the use of military communications equipment, software for the use of artillery fire location equipment, technology for the use of military communications equipment, technology for the use of artillery fire location equipment,

Denmark cont.

		test equipment for military communications equipment, test equipment for artillery fire location equipment, equipment for the use of military communications equipment, equipment for the use of artillery fire location equipment.
84	P	Anti-riot shields.
85	P	Demolition charges, military explosives.
86	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems
87	P	Components for combat helicopters, technology for the production of combat helicopters, equipment for the use of combat helicopters, components for military utility helicopters.
88	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.
89	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
90	P	Components for military electronic equipment.
91	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
92	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
93	P	Components for combat helicopters, components for military transport aircraft, equipment for the use of combat helicopters, equipment for the use of military transport aircraft, test equipment for combat helicopters, test equipment for military transport aircraft, technology for the use of combat helicopters, technology for the use of military transport aircraft.
94	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
95	P	Small arms ammunition.
96	P	Components for armoured personnel carriers.

Denmark cont.

97	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
98	P	Components for military communications equipment.
99	P	Components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment,
100	P	Equipment for the use of weapon sights.
101	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
102	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment
103	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, air guns, veterinary/tranquillising rifles, rifles, sporting rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
104	P	Components for ground based radars, software for the use of ground based radars, technology for the use of ground based radars, equipment for the use of ground based radars, test equipment for ground based radars.
105	P	Software for the use of naval radars, technology for the use of naval radars, components for naval radars, test equipment for naval radars, equipment for the use of naval radars.
106	T	Military electronic equipment.
107	P	Components for combat aircraft, components for airborne electronic warfare equipment, military electronic equipment.
108	P	Forgings for combat helicopters, forgings for military utility helicopters.
109	P	Military aero-engines, components for military aero-engines.
110	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
111	P	Military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, components for combat aircraft, components for ejector seats, ejector seats, military parachutes, combat aircraft simulators, chemical agent detection equipment training equipment.
112	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, components for rifles, components for sporting rifles, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, sporting gun ammunition.
113	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 170.0m
---	----------

Number of SIELs issued covering:	
Items on the Military List	352
Other items	8
Military List and other items	1
Total number of SIELs issued	361

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export)

aiming devices (T), air defence systems (T), air to air missile launching equipment (T), air to surface missile handling equipment, airborne radars (T), airborne surveillance equipment, anti-armour missile handling equipment, anti-armour missile handling equipment (T), armoured all wheel drive vehicles, armoured all wheel drive vehicles (T), armoured fighting vehicles, armoured fighting vehicles (T), armoured plate, assault rifles (200), attack alerting/warning equipment (T), ballistic test equipment (T), body armour, castings for air to surface missile control equipment, castings for air to surface missiles, castings for airborne radars, castings for combat aircraft, castings for military training aircraft, castings for surface to air missiles, castings for tanks, chaff, chaff equipment, chemical agent detection equipment (T), combination rifle-shotguns (1), command communications control and intelligence equipment (T), command communications control and intelligence software (T), components for aiming devices (T), components for air to air missile launching equipment, components for air to air missile launching equipment (T), components for air to air missiles, components for air to air missiles (T), components for air to surface missile control equipment, components for air to surface missiles, components for air to surface missiles (T), components for airborne electronic warfare equipment, components for airborne radars, components for airborne targeting equipment, components for aircraft radars, components for anti-armour ammunition, components for anti-armour missiles, components for anti-radiation missile launching equipment (T), components for anti-ship missile control equipment, components for anti-ship missile control equipment (T), components for anti-ship missiles, components for armoured fighting vehicles, components for armoured fighting vehicles (T), components for armoured personnel carriers, components for ballistic test equipment, components for bombs (T), components for combat aircraft, components for combat helicopters, components for command and control vehicles (T), components for crowd control ammunition, components for destroyers, components for ejector seats, components for electronic countermeasures equipment, components for equipment for the development of anti-armour ammunition (T), components for ground based radars, components for ground vehicle military communications equipment, components for military acoustic detection equipment, components for military aero-engines, components for military aircraft head-down displays, components for military aircraft navigation equipment (T), components for military communications equipment (T), components for military devices for initiating explosives, components for military firing sets, components for military firing sets (T), components for military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment (T), components for military infrared/thermal imaging equipment, components for military infrared/thermal imaging equipment (T), components for military navigation equipment, components for military photographic equipment, components for military sonar detection equipment, components for military training aircraft, components for military transport aircraft, components for mine detection equipment, components for mine hunting equipment, components for missile scoring equipment, components for munitions launching equipment, components for munitions launching equipment (T), components for naval electronic equipment,

components for naval navigation equipment, components for naval radars, components for naval radars (T), components for naval sonar equipment (T), components for NBC respirators, components for NBC respirators (T), components for optical target acquisition equipment, components for production equipment for large calibre artillery, components for projectile launchers, components for small calibre artillery, components for small calibre artillery ammunition, components for sniper rifles, components for surface to air missile control/launching equipment (T), components for surface to air missile launching equipment (T), components for surface to air missile launching vehicles (T), components for surface to air missiles, components for surface to air missiles (T), components for surface to surface missiles, components for surface to surface missiles (T), components for tanks, components for test equipment for air to surface missiles, components for test equipment for combat aircraft, components for test models for the development of military transport aircraft (T), components for unmanned air vehicle control equipment, components for warhead fuzes, components for weapon day and night sights, components for weapon night sights, components for weapon sights, decoy flares, defensive system against NBC agents, defensive system against NBC agents (T), demolition charges, electronic countermeasures equipment, electronic warfare equipment training equipment (T), equipment for the development of air to surface missiles (T), equipment for the development of anti-armour ammunition (T), equipment for the development of armoured fighting vehicles (T), equipment for the use of test models for the development of military transport aircraft (T), equipment for the use of military acoustic detection equipment, equipment for the use of military firing sets (T), equipment for the use of military image intensifier equipment (T), equipment for the use of military improvised explosive device disposal equipment, equipment for the use of naval engines, equipment for the use of projectile launchers, equipment for the use of small calibre artillery, equipment for the use of sniper rifles, equipment for the use of test models for the development of military transport aircraft (T), fire control equipment (T), forgings for ejector seats, general military aircraft components, general military vehicle components, general naval vessel components, general naval vessel components (T), general purpose machine guns (1) (T), general purpose machine guns (100), goods treated for signature suppression for military use, ground vehicle military communications equipment (T), gun mountings, gun silencers, heavy machine guns (1) (T), heavy machine guns (30), helmet mounted display equipment, improvised explosive device detection equipment, inert air to surface missiles, inert anti-armour missiles, inert anti-armour missiles (T), inert surface to air missiles (T), laser range finders (T), laser warning detectors (T), linear cutting explosive charges, military acoustic detection equipment, military cameras, military cameras (T), military communications equipment (T), military containers (T), military devices for initiating explosives, military electronic equipment (T), military explosives, military firing set training equipment (T), military firing sets, military flying helmets (T), military image intensifier equipment, military image intensifier equipment (T), military improvised explosive device detection equipment (T), military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment (T), military initiators, military navigation equipment, military navigation equipment (T), military parachutes (T), military parachutist equipment (T), military propellants, military training aircraft, military training aircraft (T), military transport aircraft (T), military utility vehicles (T), military video recording equipment, mine hunting equipment, naval engines, NBC clothing (T), NBC filters (T), NBC respirators, NBC respirators (T), night vision goggles (T), periscope training equipment (T), projectile launchers, projectile launchers (T), propellants, remote ground sensor systems (T), replica revolvers (1), revolvers (1), rifles (350), semi-automatic pistols (1), shotguns (21), small calibre artillery, sniper rifles (115), software for optimising equipment designs, software for the development of air to surface missiles (T), software for the development of equipment employing cryptography, software for the development of military navigation equipment, software for the modelling of military operation scenarios (T), software for the production of air to surface missiles (T), software for the production of military navigation equipment, software for the production of surface to air missiles, software for the simulation of military operation scenarios (T), software for the use of airborne radars (T), software for the use of anti-ship missile control equipment, software for the use of ballistic test equipment (T), software for the use of combat aircraft (T), software for the use of electronic warfare equipment training equipment (T), software for the use of military acoustic detection equipment, software for the use of military communications equipment (T), software for the use of military communications equipment simulators, software for the use of military navigation equipment, software for the use of military navigation equipment (T), software for the use of military sonar detection equipment, software for the use of remote ground sensor systems (T), software for the use of surface to air missiles, software for the use of test equipment for anti-ship missile control equipment, sporting gun ammunition, sporting rifles (33), submachine guns (620), surface to air missile launching equipment (T), surface to air missile launching vehicles (T), surface to air missile training equipment (T), surface to air missiles, surface to air missiles (T), technology for the development of air defence systems, technology for the development of equipment employing cryptography, technology for the development of materials for reduced electro-magnetic reflectivity for military use, technology for the development of mine detection equipment, technology for the development of surface to air missiles, technology for the development of surface to air missiles (T), technology for the production of surface to air missiles, technology for the production of surface to surface missiles, technology for the use of military electronic equipment, technology for the use of military training aircraft, technology for the use of naval radars (T), technology for the use of nuclear reactor fuel element fabrication equipment, technology for the use of small calibre artillery, technology for the use of surface to air missiles, technology for the use of surface to air missiles (T), technology for the use of test equipment for military communications equipment (T), telemetering equipment (T), test equipment for air to surface missiles (T), test equipment for anti-ship missile control equipment, test equipment for military aero-engines, test equipment for military communications equipment (T), test equipment for military infrared/thermal imaging equipment (T),

France cont.

test equipment for projectile launchers, test equipment for small calibre artillery ammunition, test equipment for surface to air missiles, test equipment for surface to air missiles (T), test models for the development of military transport aircraft (T), test models for the development of small calibre artillery, triggered spark gaps, turrets (T), unfinished products for air to air missiles, unfinished products for submarines, weapon cleaning equipment, weapon night sights, weapon night sights (T), weapon sight mounts (T), weapon sights

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
2	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
3	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
4	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
5	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
6	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
7	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising

France cont.

		components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
15	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
16	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
17	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
18	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
19	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
20	T	Towed hydrophone arrays.
21	P	Technology for the development of cryptographic software.
22	P	Devices for initiating explosives.
23	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
24	P	Devices for initiating explosives.
25	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
26	P	Triggered spark gaps.
27	P	Devices for initiating explosives, components for devices for initiating explosives.
28	P	Equipment employing cryptography.
29	P	Devices for initiating explosives, firing sets

France cont.

30	P	Technology for the development, production or use of nuclear materials facilities and equipment.
31	P	Software for the use of equipment employing cryptography.
32	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
33	P	Towed hydrophone arrays, hydrophones.
34	P	Non-military explosives/propellants.
35	P	Military electronic equipment.
36	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
37	P	Military communications equipment, military helmets, components for military communications equipment.
38	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
39	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
40	T	Armoured all wheel drive vehicles.
41	P	Pyrotechnic signalling devices, components for anti-ship missiles, components for torpedoes, components for rocket launching equipment, components for chaff equipment, components for weapons control systems, components for naval radars, components for electronic countermeasure equipment, components for naval gun mountings, components for naval electronic warfare equipment, components for naval sonar equipment, components for naval communications equipment, components for naval navigation equipment, components for submarines, components for frigates, components for destroyers, components for fast attack craft, components for naval auxiliary vessels, general naval vessel components, components for military communications equipment, military electronic equipment, technology for the use of military communications equipment, technology for the use of naval gun mountings, technology for the use of naval electronic warfare equipment, technology for the use of naval sonar equipment, technology for the use of naval communications equipment, technology for the use of naval navigation equipment, technology for the use of submarines, technology for the use of frigates, technology for the use of fast attack craft, technology for the use of naval auxiliary vessels, technology for the use of electronic countermeasure equipment, technology for the use of naval radars, technology for the use of weapons control systems, technology for the use of rocket launching equipment, technology for the use of chaff equipment, technology for the use of pyrotechnic signalling devices, technology for the use of anti-ship missiles, technology for the use of torpedoes.
42	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
43	P	Air to surface missiles, components for air to surface missiles, military aero-engines, software for the use of air to surface missiles, software for the use of test equipment for air to surface missiles, software for the use of air to surface missiles simulators, training equipment for air to surface missiles, test equipment for air to surface missiles, air to surface missiles simulators, air to surface missile handling equipment, equipment for the use of air to surface missiles, technology for the production of air to surface missiles, technology for the use of air to surface missiles, technology for the production of components for air to surface missiles, technology for the use of software for the use of components for air to surface missiles, technology for the use of software for the production of air to surface missiles, technology for the use of software for the production of components for air to surface missiles, technology for the production of military aero-engines, technology for the use of military aero-engines, technology for the production of components for military aero-engines, technology for the use of components for military aero-engines.
44	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.

France cont.

45	P	Components for military video recording equipment, components for aircraft head-up displays, test equipment for military video recording equipment, test equipment for general military aircraft components, test equipment for aircraft head-up displays, technology for the use of military video recording equipment, technology for the use of general military aircraft components, technology for the use of aircraft head-up displays.
46	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
47	P	Anti-riot shields.
48	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22.
49	P	Components for armoured personnel carriers, components for tanks, components for armoured fighting vehicles, components for military engineering vehicles, components for armoured repair and recovery vehicles, equipment for the use of components for armoured personnel carriers, equipment for the use of components for tanks, equipment for the use of components for armoured fighting vehicles, equipment for the use of components for military engineering vehicles, equipment for the use of components for armoured repair and recovery vehicles.
50	P	General naval vessel components, test equipment for general naval vessel components.
51	P	Components for combat aircraft, components for military training aircraft.
52	T	Components for frigates, components for fast attack craft, components for patrol craft, components for corvettes, components for mine hunters, components for landing craft.
53	P	Components for surface to surface missiles, technology for the production of surface to surface missiles.
54	P	General naval vessel components.
55	P	Components for combat helicopters, components for military utility helicopters.
56	P	Military electronic equipment, software for the use of military electronic equipment, technology for the use of military electronic equipment.
57	P	Components for armoured fighting vehicles, technology for the use of components for armoured fighting vehicles.
58	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.
59	P	Components for military communications equipment, components for aircraft military communications equipment, components for naval communications equipment, components for electronic warfare equipment, components for airborne electronic warfare equipment, components for naval electronic warfare equipment, components for ground based radars, components for airborne radars, components for aircraft radars, components for air to air missiles, components for air to surface missiles, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for surface to air missiles, components for surface to surface missiles.
60	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters.
61	P	Artillery fire location equipment, components for artillery fire location equipment, test equipment for artillery fire location equipment, technology for the use of artillery fire location equipment.
62	P	Components for military utility helicopters, components for combat aircraft, components for military training aircraft, components for combat helicopters, equipment for the use of military utility helicopters, equipment for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of combat helicopters, technology for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military training aircraft, technology for the use of components for combat helicopters, technology for the use of equipment for the use of military utility helicopters, technology for the use of equipment for the use of combat aircraft, technology for the use of equipment for the use of military training aircraft, technology for the use of equipment for the use of combat helicopters.
63	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras, accessories for military photographic equipment, technology for the use of military surveillance

France cont.

		aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
64	P	Components for military communications equipment, equipment for the use of military communications equipment.
65	P	Naval navigation equipment.
66	P	General naval vessel components, components for submarines.
67	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
68	T	Weapons night sights.
69	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
70	P	Forgings for military aero-engines, forgings for military transport aircraft, forgings for military utility helicopters, forgings for combat aircraft, forgings for military training aircraft, forgings for combat helicopters, forgings for military search and rescue aircraft, forgings for military surveillance aircraft, forgings for military utility aircraft.
71	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
72	P	Sporting gun ammunition, components for sporting gun ammunition.
73	P	General naval vessel components.
74	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
75	P	General purpose machine guns, heavy machine guns.
76	P	Unmanned air vehicles, unmanned air vehicles control/handling/launching equipment, equipment for the use of unmanned air vehicles, equipment for the use of unmanned air vehicles control/handling/launching equipment.
77	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
78	P	Components for weapons day and night sights, components for anti-ship missiles, components for anti-armour missiles, components for missile jamming equipment, components for fire control equipment, components for optical target acquisition equipment, components for optical target surveillance equipment, components for optical target tracking equipment, components for electronic countermeasures equipment, components for periscopes, components for laser range

France cont.

		finders, components for combat aircraft, components for combat helicopters, components for military surveillance aircraft, components for military infrared/thermal imaging equipment, imaging countermeasures equipment, components for laser weapons systems.
79	P	Components for combat helicopters, components for combat aircraft, components for military surveillance aircraft, components for turrets, components for surface to air missiles, components for military aero-engines.
80	P	General naval vessel components.
81	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of chemical agent detection, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
82	P	General military aircraft components.
83	T	Military infrared/thermal imaging equipment.
84	P	Military improvised explosive devices disposal equipment, explosive ordnance disposal equipment, linear cutting explosive charges, demolition charges.
85	P	Software for the development of air to surface missiles, components for air to surface missiles.
86	T	Naval electronic equipment.
87	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
88	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
89	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components
90	P	Military electronic equipment, components for military electronic equipment.
91	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.

France cont.

92	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
93	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
94	P	Components for naval sonar equipment.
95	T	Components for armoured fighting vehicles, components for artillery rocket launching vehicles
96	P	Components for sporting gun ammunition.
97	P	Anti-riot shields.
98	P	Components for military utility helicopters.
99	P	Components for military aero-engines.
100	P	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for bombs, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons system.
101	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
102	P	Components for military image intensifier equipment, components for weapons day and night sights, castings for military aircraft head-up displays, components for weapons night sights, castings for airborne surveillance equipment, components for fire control equipment, components for optical target designator equipment, components for laser range finders, components for military infrared/thermal imaging equipment, components for optical target acquisition equipment, components for airborne radars, components for aircraft radars, components for military communications equipment, components for weapon sights, components for weapon fire simulation equipment, castings for chaff equipment, components for test equipment for military communications equipment, castings for combat aircraft, castings for torpedoes, castings for combat helicopters, components for air to surface missiles.
103	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.

No	Type	Goods Summary
1	T	Accelerometers, inertial equipment.
2	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.

French Overseas Territory

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
Number of SIELs issued covering:	
Items on the Military List	1
Other items	1
Military List and other items	0
Total number of SIELs issued	2

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for military transport aircraft, rebreathing swimming apparatus

French Overseas Territory cont.

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).

No	Type	Goods Summary
1	P	Software for the use of equipment employing cryptography

Gabon

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 0.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	0
Other items	1
Military List and other items	0
Total number of SIELs issued	1

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

bathymetric survey systems

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).

No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	T	Accelerometers, inertial equipment.
3	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
4	P	Marine position fixing equipment.
5	P	Devices for initiating explosives, firing sets.
6	P	Software for the use of equipment employing cryptography.
7	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
8	P	Technology for the production of toxins.
9	T	Submersible vehicles, marine position fixing equipment, magnetometers, bathymetric survey systems, inertial equipment.
10	P	Cryptographic software, software for the development of equipment employing cryptography, equipment employing cryptography.
11	T	Gyroscopes, inertial equipment, technology for the use of inertial equipment, technology for the use of gyroscopes.
12	P	Towed hydrophone arrays.
13	P	Non-military explosives/propellants.
14	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
15	P	General naval vessel components.
16	P	Military aero-engines, airborne refuelling equipment, components for military transport aircraft, components for military aero-engines, components for airborne refuelling equipment, military aircraft ground support equipment, technology for the use of military transport aircraft, test equipment for military aero-engines, test equipment for military transport aircraft.

Gambia

helicopters, components for mine clearing equipment, components for munitions launching equipment, components for naval communications equipment, components for naval communications equipment (T), components for naval electronic warfare equipment, components for naval navigation equipment, components for naval radars, components for NBC clothing, components for NBC filters, components for optical target acquisition equipment, components for periscopes, components for practice bomb launching equipment, components for semi-automatic pistols, components for small arms ammunition, components for smoke ammunition, components for sniper rifles, components for sniper rifles (T), components for sporting rifles, components for sporting rifles (T), components for submachine guns, components for submarines, components for surface to air missiles, components for tanks, components for test equipment for military aero-engines (T), components for turrets, components for weapon day and night sights, components for weapon sights, computer analogue to digital equipment, constituents of propellants, decoy flares, demolition charges, devices containing military pyrotechnic materials, equipment employing cryptography, equipment for the development of anti-armour missiles (T), equipment for the development of attack alerting/warning equipment, equipment for the development of military explosives, equipment for the production of assault rifles, equipment for the use of military flying helmets (T), equipment for the use of military improvised explosive device disposal equipment (T), equipment for the use of military sonar detection equipment, equipment for the use of naval electronic warfare equipment, equipment for the use of weapon sights, explosive ordnance disposal equipment (T), firing sets, flash suppressors, forgings for air to air missiles, forgings for artillery rockets, forgings for military aero-engines, general military aircraft components, general military vehicle components, general naval vessel components, gun mountings, gun silencers (T), improvised explosive device detection equipment, improvised explosive device jamming equipment, inert ammunition, inert anti-armour missiles (T), inert anti-ship missiles, inert components for anti-armour missiles (T), laser range finders (T), linear cutting explosive charges, military aircraft ground equipment, military aircraft navigation equipment, military aircraft navigation equipment (T), military aircraft navigation equipment simulators, military communications equipment, military electronic equipment, military electronic equipment (T), military flying helmets (T), military image intensifier equipment (T), military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment (T), military propellants, military pyrotechnic materials, military sonar detection equipment, military training aircraft (T), minefield breaching vehicles (T), naval communications equipment (T), naval electronic warfare equipment, naval navigation equipment, naval radars, optical target surveillance equipment (T), production equipment for general purpose machine guns, production equipment for munition fuzes, remote ground sensor systems (T), rifles (1), semi-automatic pistols (11), shotguns (7), small arms ammunition, smoke ammunition, sniper rifles (60), sniper rifles (1) (T), software for optimising equipment designs, software for the development of anti-armour missiles (T), software for the use of combat aircraft (T), software for the use of military sonar detection equipment, software for the use of naval electronic warfare equipment, software for the use of remote ground sensor systems (T), software for the use of test equipment for military aero-engines (T), sporting rifles (20), sporting rifles (36) (T), submarines, submersible vehicles, substances related to military explosives/propellants, tanks, tear gas/riot control agents, technology for the development of air defence systems, technology for the development of nuclear reactor fuel element fabrication equipment, technology for the production of combat helicopters, technology for the use of ballistic test equipment, technology for the use of combat aircraft (T), technology for the use of decoy flares, technology for the use of naval electronic equipment, technology for the use of naval electronic warfare equipment, technology for the use of naval navigation equipment, technology for the use of naval radars, technology for the use of nuclear reactor fuel element fabrication equipment, technology for the use of sniper rifles, test equipment for anti-armour missiles (T), test equipment for military aero-engines (T), test equipment for military infrared/thermal imaging equipment, test equipment for military sonar detection equipment, test equipment for periscopes, test equipment for weapon sights, test models for the development of military transport aircraft, torpedo handling equipment, torpedo launching equipment, torpedo training equipment, toxic chemical precursors, training equipment for electronic warfare equipment, triggered spark gaps, unfinished products for air to air missile, unfinished products for military aero-engines, unfinished products for sporting rifles (T), uranium isotope separation equipment, weapon cleaning equipment, weapon night sights (T), weapon sight mounts, weapon sight mounts (T), weapon sights, weapon sights (T)

19	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
20	T	Towed hydrophone arrays.
21	P	Technology for the development of cryptographic software.
22	P	Devices for initiating explosives.
23	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
24	P	Devices for initiating explosives.
25	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
26	P	Linear cutting explosive charges, devices for initiating explosives.
27	P	Equipment employing cryptography.
28	P	Devices for initiating explosives, firing sets.
29	P	Technology for the development production or use of nuclear materials facilities and equipment.
30	P	Software for the use of equipment employing cryptography.
31	P	Technology for the development, production or use of nuclear materials facilities and equipment.
32	P	Towed hydrophone arrays
33	P	Non-military explosives/propellants.
34	P	Military electronic equipment.
35	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.

Germany cont.

36	P	Military communications equipment, military helmets, components for military communications equipment.
37	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
38	T	Armoured all wheel drive vehicles.
39	P	Pyrotechnic signalling devices, components for anti-ship missiles, components for torpedoes, components for rocket launching equipment, components for chaff equipment, components for weapons control systems, components for naval radars, components for electronic countermeasure equipment, components for naval gun mountings, components for naval electronic warfare equipment, components for naval sonar equipment, components for naval communications equipment, components for naval navigation equipment, components for submarines, components for frigates, components for destroyers, components for fast attack craft, components for naval auxiliary vessels, general naval vessel components, components for military communications equipment, military electronic equipment, technology for the use of military communications equipment, technology for the use of naval gun mountings, technology for the use of naval electronic warfare equipment, technology for the use of naval sonar equipment, technology for the use of naval communications equipment, technology for the use of naval navigation equipment, technology for the use of submarines, technology for the use of frigates, technology for the use of fast attack craft, technology for the use of naval auxiliary vessels, technology for the use of electronic countermeasure equipment, technology for the use of naval radars, technology for the use of weapons control systems, technology for the use of rocket launching equipment, technology for the use of chaff equipment, technology for the use of pyrotechnic signalling devices, technology for the use of anti-ship missiles, technology for the use of torpedoes.
40	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
41	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.
42	P	Components for military bridges.
43	P	Components for military video recording equipment, components for aircraft military communications equipment, components for aircraft head-up displays, components for military aircraft navigation equipment, components for helmet mounted displays equipment, components for airborne radars, test equipment for military video recording equipment, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for aircraft military communications equipment, test equipment for aircraft head-up displays, test equipment for airborne radars, test equipment for helmet mounted displays equipment, technology for the use of military video recording equipment, technology for the use of general military aircraft components, technology for the use of aircraft military communications equipment, technology for the use of military aircraft navigation equipment, technology for the use of aircraft head-up displays, technology for the use of airborne radars, technology for the use of helmet mounted displays equipment.
44	P	Components for combat aircraft.
45	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
46	P	Anti-riot shields.
47	P	General naval vessel components, test equipment for general naval vessel components.
48	P	Components for combat aircraft, components for military training aircraft.
49	T	Components for frigates, components for fast attack craft, components for patrol craft, components for corvettes, components for mine hunters, components for landing craft.
50	P	General naval vessel components.

Germany cont.

51	P	Components for combat helicopters, components for military utility helicopters.
52	P	Military electronic equipment, software for the use of military electronic equipment, technology for the use of military electronic equipment.
53	P	Components for armoured fighting vehicles, technology for the use of components for armoured fighting vehicles.
54	P	Goods specified in the military list as ML10a and ML10b.
55	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.
56	P	Components for military communications equipment, components for aircraft military communications equipment, components for naval communications equipment, components for electronic warfare equipment, components for airborne electronic warfare equipment, components for naval electronic warfare equipment, components for ground based radars, components for airborne radars, components for aircraft radars, components for air to air missiles, components for air to surface missiles, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for surface to air missiles, components for surface to surface missiles.
57	P	Production equipment for components for combat aircraft.
58	P	Artillery fire location equipment, components for artillery fire location equipment, test equipment for artillery fire location equipment, technology for the use of artillery fire location equipment.
59	P	Components for military utility helicopters, components for combat aircraft, components for military training aircraft, components for combat helicopters, equipment for the use of military utility helicopters, equipment for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of combat helicopters, technology for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military training aircraft, technology for the use of components for combat helicopters, technology for the use of equipment for the use of military utility helicopters, technology for the use of equipment for the use of combat aircraft, technology for the use of equipment for the use of military training aircraft, technology for the use of equipment for the use of combat helicopters.
60	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras, accessories for military photographic equipment, technology for the use of military surveillance aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
61	P	Components for military communications equipment, equipment for the use of military communications equipment.
62	P	Naval navigation equipment.
63	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military

Military List and other items	0
Total number of SIELs issued	6

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export)

firing sets, toxic chemical precursors

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	P	Equipment employing cryptography.
3	P	Inertial equipment.
4	T	Accelerometers, inertial equipment.
5	P	Mixtures containing toxic chemical precursors.
6	P	Equipment employing cryptography.
7	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
8	P	Software for the use of equipment employing cryptography.
9	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
10	T	Gyroscopes, inertial equipment, technology for the use of inertial equipment, technology for the use of gyroscopes.
11	P	Towed hydrophone arrays.
12	P	Components for ground based radars.
13	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
14	P	Components for military aero-engines, components for military transport aircraft, components for combat aircraft, components for military training aircraft, components for military utility helicopters.
15	P	Components for military communications equipment, software for the use of military communications equipment, software for the use of artillery fire location equipment, technology for the use of military communications equipment, technology for the use of artillery fire location equipment, test equipment for military communications equipment, test equipment for artillery fire location equipment, equipment for the use of military communications equipment, equipment for the use of artillery fire location equipment.
16	T	Naval navigation equipment, components for naval navigation equipment
17	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for combat helicopters, components for military utility helicopters, military aero-engines, components for military aero-engines, military aircraft navigation equipment, aircraft military communication equipment, components for military aircraft navigation equipment, components for aircraft military communication equipment, military aircraft ground equipment, test equipment for the use of combat aircraft, test equipment for the use of military training aircraft, test equipment for the use of military transport aircraft, test equipment for the use of military utility aircraft, test equipment for the use of combat helicopters, test equipment for the use of military utility helicopters, aircraft radars, components for aircraft radars, general military aircraft components, military electronic equipment, military aircraft ground equipment, military flying helmets, anti-g/pressure suits, military aircraft pressurised breathing equipment, military parachutes, night vision goggles, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of military aircraft navigation equipment, technology for the use aircraft military communication equipment, technology for the use of aircraft radars, technology for the use of military aircraft ground equipment, technology for the use of military flying helmets, technology for the use of anti-g/pressure suits, technology for the use of military aircraft pressurised breathing equipment, technology for the use of night vision goggles, technology for the use of general military aircraft components, technology for the use of military electronic equipment.
18	P	Components for ground based radars, technology for the use of components for ground based radars.
19	T	Artillery computers, components for artillery computers, military electronic equipment, mortars training equipment, small calibre artillery training equipment, large calibre artillery training equipment.

Ghana cont.

20	P	Military helmets, components for military helmets, body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour.
21	T	Bathymetric survey systems.

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export)

body armour, components for submachine guns, shotguns (3), sporting rifles (1), submachine gun maintenance equipment, submachine guns (5), technology for the use of submachine guns, towed hydrophone arrays, weapon cleaning equipment

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Equipment employing cryptography
2	P	Technology for the development of equipment employing cryptography, development equipment for equipment employing cryptography, equipment employing cryptography, cryptographic software.
3	P	Equipment employing cryptography
4	P	Software for the use of equipment employing cryptography.
5	P	Marine position fixing equipment, magnetometers, bathymetric survey systems, underwater communication systems, inertial equipment, underwater television cameras.
6	T	Weapons night sights.
7	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
8	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of

Gibraltar cont.

		combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
9	T	Components for naval sonar equipment.
10	P	Small arms ammunition.
11	P	Semi-automatic pistols
12	P	Equipment employing cryptography
Licences revoked or whose coverage was amended during the period by the exclusion of the destination (including goods excluded in 2002 by amendment of 2002 and pre 2002 licences).

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 36.0m
---	---------

Number of SIELs issued covering:	
Items on the Military List	60
Other items	2
Military List and other items	0
Total number of SIELs issued	62

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

air guns (1), air to surface rocket launching equipment (T), anti-armour rockets (T), chemical agent detection equipment (T), combination rifle-shotgun (1), command communications control and intelligence equipment (T), command communications control and intelligence software, command communications control and intelligence software (T), components for aiming devices (T), components for airborne radars, components for armoured fighting vehicles, components for ground based radars, components for improvised explosive device disposal equipment (T), components for military aero-engines, components for military communications equipment, components for military communications equipment (T), components for military helmets, components for military improvised explosive device disposal equipment (T), components for military transport aircraft, components for military utility helicopters, components for naval navigation equipment, components for naval radars, components for NBC clothing, components for nuclear radiation detection equipment, components for shotguns, components for sniper rifles, components for sniper rifles (T), computer analogue to digital equipment, deactivated firearms for training simulators (T), equipment for the use of military communications equipment, equipment for the use of military improvised explosive device disposal equipment (T), equipment for the use of naval navigation equipment, equipment for the use of weapon night sights (T), equipment for the use of weapon sights, explosive ordnance disposal equipment (T), gun mountings, gun silencers, improvised explosive device disposal equipment (T), instrumentation cameras, military communications equipment, military firing sets (T), military helmets, military improvised explosive device disposal equipment (T), military sonar detection equipment, naval communications equipment, naval radars, NBC clothing (T), NBC filters (T), NBC protective equipment (T), NBC respirators, NBC respirators (T), shotguns (13), small arms ammunition, sniper rifle maintenance equipment (T), sniper rifles (23), sniper rifles (3) (T), software for the modelling of military operation scenarios, software for the use of equipment for the use of military communications equipment, software for the use of ground based radars, software for the use of military communications equipment, sporting rifles (4), technology for the use of ground based radars, technology for the use of military communications equipment, technology for the use of naval navigation equipment, technology for the use of naval radars, technology for the use of sniper rifles, technology for the use of sniper rifles (T), technology for the use of software for the use of military communications equipment, test equipment for military communications equipment, weapon cleaning equipment, weapon night sights (T), weapon sight mounts, weapon sights, weapon sights (T)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
2	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
3	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
4	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
5	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
6	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
7	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.

		deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
16	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
17	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
18	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
19	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
20	T	Towed hydrophone arrays.
21	P	Equipment employing cryptography
22	P	Cryptographic software
23	P	Devices for initiating explosives, firing sets.
24	P	Software for the use of equipment employing cryptography.
25	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
26	P	Equipment employing cryptography, software for the use of equipment employing cryptography
27	P	Towed hydrophone arrays.
28	P	Non-military explosives/propellants
29	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns
30	P	Military communications equipment, military helmets, components for military communications equipment.
31	T	Armoured all wheel drive vehicles.
32	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of

Greece cont.

		equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
33	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.
34	P	General military aircraft components, components for military cameras, components for aircraft head-up displays, test equipment for general military aircraft components, test equipment for military cameras, test equipment for aircraft head-up displays, technology for the use of general military aircraft components, technology for the use of military cameras, technology for the use of aircraft head-up displays.
35	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles.
36	P	Anti-riot shields.
37	P	General naval vessel components, test equipment for general naval vessel components.
38	P	General naval vessel components.
39	P	Military equipment and components for ex-Royal Navy vessels excluding complete weapons or ammunition.
40	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras, accessories for military photographic equipment, technology for the use of military surveillance aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
41	P	Components for military communications equipment, equipment for the use of military communications equipment.
42	P	Naval navigation equipment.
43	P	General naval vessel components.
44	T	Weapons night sights.
45	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
46	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
47	P	Sporting gun ammunition, components for sporting gun ammunition.
48	P	Naval engines, components for naval engines, equipment for the use of naval engines.
49	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
50	P	General purpose machine guns, heavy machine guns.
51	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
52	P	General naval vessel components.
53	P	Ground vehicle military communications equipment.

Greece cont.

54	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
55	P	General military aircraft components.
56	T	Military infrared/thermal imaging equipment.
57	T	Naval electronic equipment.
58	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
59	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
60	P	Military electronic equipment, components for military electronic equipment.
61	P	Components for military transport aircraft.
62	P	Components for ground based radars, software for the use of ground based radars, test equipment for the use of ground based radars, technology for the use of ground based radars.
63	P	Components for armoured fighting vehicles, components for artillery rocket launching vehicles.
64	P	Anti-riot shields.
65	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
66	P	Components for military image intensifier equipment, components for weapons day and night sights, castings for military aircraft head-up displays, components for weapons night sights, castings for airborne surveillance equipment, components for fire control equipment, components for optical target designator equipment, components for laser range finders, components for military infrared/thermal imaging equipment, components for optical target acquisition equipment, components for airborne radars, components for aircraft radars, components for military communications equipment, components for weapon sights, components for weapon fire simulation equipment, castings for chaff equipment, components for

Greece cont.

		test equipment for military communications equipment, castings for combat aircraft, castings for torpedoes, castings for combat helicopters, components for air to surface missiles.
67	T	Naval navigation equipment, components for naval navigation equipment.
68	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
69	P	Small arms ammunition
70	P	Components for armoured personnel carriers
71	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
72	P	Airborne refuelling equipment, components for airborne refuelling equipment, military aircraft ground equipment, technology for the use of airborne refuelling equipment, technology for the use of military aircraft ground equipment.
73	P	Equipment for the use of weapon sights.
74	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
75	P	Components for ground based radars, test equipment for ground based radars, software for the use of ground based radars, technology for the use of ground based radars, equipment for the use of ground based radars.
76	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, air guns, veterinary/tranquillising rifles, rifles, sporting rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
77	T	Military electronic equipment.
78	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
79	P	Military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, components for combat aircraft, components for ejector seats, ejector seats, military parachutes, combat aircraft simulators, chemical agent detection equipment training equipment.
80	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, components for rifles, components for sporting rifles, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, sporting gun ammunition.
81	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.

Footnote

*All applications for licences to export goods to Iran are considered on the basis of the policy announced by the then Foreign Secretary in his ministerial statement on 1 March 1993, as amended on 28 January 1998. There was only one exception made to this embargo during 2002. This was for goods to be used as part of the process of drilling oil and gas wells (HC 17WS, 13 January 2003).

Iraq

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 2.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	7
Other items	4
Military List and other items	0
Total number of SIELs issued	11

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

body armour, CBW munitions disposal equipment, chemical agent detection equipment, civil aircraft, components for CBW munitions disposal equipment, components for chemical agent detection equipment, components for military aero-engines, equipment for the use of CBW munitions disposal equipment, imaging cameras, military firing sets, NBC clothing, technology for the use of CBW munitions disposal equipment, toxic chemical precursors.

OPEN INDIVIDUAL EXPORT LICENCES

None

Footnote

The export to Iraq of any goods, unless under the authority of an export licence, is prohibited by the Export of Goods (Control) (Iraq and Kuwait Sanctions) Order [SI 1990/1640]. The above licences have been included in this report because the goods concerned are controlled to all destinations under Part I and Part III of Schedule 1 to the Export of Goods (Control) Order 1994, as amended (Annex A) or the Dual-Use Items (Export Control) Regulations 2000 (Annex B).

Iraq cont.

In all cases the United Nations' Iraq Sanctions Committee was consulted and had no objections to these exports. In seven cases the goods were destined for use in humanitarian programmes under the United Nations' Oil for Food Programme. Of these, in three cases the goods were destined for a UN demining programme, in three cases the goods were for a UN aid programme and in one case the goods were for use in oil production. Finally in four other cases the goods were for use by UNMOVIC personnel. (HC 579W, 21 January 2002), (HC 526W, 11 April 2002), (HC 149WA, 16 April 2002), (HC 665W, 15 May 2002), (HC 295W, 18 June 2002), (HL WA120, 24 June 2002), (HC 833W, 16 October 2002), (HL WA95, 22 October 2002), (HC 499W, 24 October 2002).

		control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
20	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
21	T	Towed hydrophone arrays.
22	P	Equipment employing cryptography
23	P	Technology for the development of cryptographic software
24	P	Devices for initiating explosives.
25	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
26	P	Devices for initiating explosives
27	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
28	P	Linear cutting explosive charges, devices for initiating explosives.
29	P	Equipment employing cryptography.
30	P	Devices for initiating explosives, firing sets.
31	P	Software for the use of equipment employing cryptography
32	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
33	P	Towed hydrophone arrays
34	P	Non-military explosives/propellants.
35	P	Military electronic equipment
36	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
37	P	Military communications equipment, military helmets, components for military communications equipment.
38	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
39	P	Components for ground based radars
40	T	Armoured all wheel drive vehicles.
41	P	Pyrotechnic signalling devices, components for anti-ship missiles, components for torpedoes, components for rocket launching equipment, components for chaff equipment, components for weapons control systems, components for naval radars, components for electronic countermeasure equipment, components for naval gun mountings, components for naval electronic warfare equipment, components for naval sonar equipment, components for naval communications equipment, components for naval navigation equipment, components for submarines, components for frigates, components for destroyers, components for fast attack craft, components for naval auxiliary vessels, general naval vessel components, components for military communications equipment, military electronic equipment, technology for the use of military communications equipment, technology for the use of naval gun mountings, technology for the use of naval electronic warfare equipment, technology for the use of naval sonar equipment, technology for the use of naval communications equipment, technology for the use of naval navigation equipment, technology for the use of submarines, technology for the use of frigates, technology for the use of fast attack craft, technology for the use of naval auxiliary vessels, technology for the use of electronic countermeasure equipment, technology for the use of naval radars, technology for the use of weapons control systems, technology for the use of rocket launching equipment, technology for the use of chaff equipment, technology for the use of pyrotechnic signalling devices, technology for the use of anti-ship missiles, technology for the use of torpedoes.
42	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for

Italy cont.

		ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
43	P	Air to surface missiles, components for air to surface missiles, military aero-engines, software for the use of air to surface missiles, software for the use of test equipment for air to surface missiles, software for the use of air to surface missiles simulators, training equipment for air to surface missiles, test equipment for air to surface missiles, air to surface missiles simulators, air to surface missile handling equipment, equipment for the use of air to surface missiles, technology for the production of air to surface missiles, technology for the use of air to surface missiles, technology for the production of components for air to surface missiles, technology for the use of software for the use of components for air to surface missiles, technology for the use of software for the production of air to surface missiles, technology for the use of software for the production of components for air to surface missiles, technology for the production of military aero-engines, technology for the use of military aero-engines, technology for the production of components for military aero-engines, technology for the use of components for military aero-engines.
44	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.
45	P	Components for military bridges.
46	P	Components for military video recording equipment, general military aircraft components, components for aircraft radars, components for aircraft head-up displays, components for aircraft military communications equipment, components for military aircraft navigation equipment, components for weapon sights, test equipment for military video recording equipment, test equipment for general military aircraft components, test equipment for aircraft military communications equipment, test equipment for military aircraft navigation equipment, test equipment for aircraft head-up displays, test equipment for weapon sights, test equipment for aircraft radars, technology for the use of military video recording equipment, technology for the use of general military aircraft components, technology for the use of aircraft military communications equipment, technology for the use of military aircraft navigation equipment, technology for the use of aircraft head-up displays, technology for the use of aircraft radars, technology for the use of weapon sights.
47	P	Components for combat aircraft.
48	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
49	P	Anti-riot shields
50	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22
51	P	General naval vessel components, test equipment for general naval vessel components.
52	P	Components for combat aircraft, components for military training aircraft.
53	P	Components for military utility helicopters, equipment for the use of military utility helicopters, components for military utility helicopters, components for combat helicopters, equipment for the use of combat helicopters.
54	T	Components for frigates, components for fast attack craft, components for patrol craft, components for corvettes, components for mine hunters, components for landing craft.
55	P	Components for military transport aircraft.
56	P	General naval vessel components
57	P	Military equipment and components for ex-Royal Navy vessels excluding complete weapons or ammunition.
58	P	Components for combat helicopters, components for military utility helicopters.
59	P	military electronic equipment, software for the use of military electronic equipment, technology for the use of military electronic equipment.
60	P	Military bridges, equipment for the use of military bridges.
61	P	Components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft.
62	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.

Italy cont.

63	P	Components for military communications equipment, components for aircraft military communications equipment, components for naval communications equipment, components for electronic warfare equipment, components for airborne electronic warfare equipment, components for naval electronic warfare equipment, components for ground based radars, components for airborne radars, components for aircraft radars, components for air to air missiles, components for air to surface missiles, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for surface to air missiles, components for surface to surface missiles.
64	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters.
65	P	Components for military utility helicopters, components for combat aircraft, components for military training aircraft, components for combat helicopters, equipment for the use of military utility helicopters, equipment for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of combat helicopters, technology for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military training aircraft, technology for the use of components for combat helicopters, technology for the use of equipment for the use of military utility helicopters, technology for the use of equipment for the use of combat aircraft, technology for the use of equipment for the use of military training aircraft, technology for the use of equipment for the use of combat helicopters.
66	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras, accessories for military photographic equipment, technology for the use of military surveillance aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
67	P	Components for military communications equipment, equipment for the use of military communications equipment
68	P	Components for large calibre artillery, components for small calibre artillery, components for naval light guns, components for anti-aircraft guns.
69	P	Naval navigation equipment
70	P	General naval vessel components, components for submarines
71	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
72	T	Weapons night sights.
73	P	Ejector seats, components for ejector seats, military parachutes, components for military

Italy cont.

		parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
74	P	Forgings for military aero-engines, forgings for military transport aircraft, forgings for military utility helicopters, forgings for combat aircraft, forgings for military training aircraft, forgings for combat helicopters, forgings for military search and rescue aircraft, forgings for military surveillance aircraft, forgings for military utility aircraft.
75	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
76	P	Sporting gun ammunition, components for sporting gun ammunition
77	P	Aircraft cannon ammunition, training aircraft cannon ammunition, small calibre artillery ammunition, training small calibre artillery ammunition.
78	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
79	P	Components for weapons day and night sights, components for anti-ship missiles, components for anti-armour missiles, components for missile jamming equipment, components for fire control equipment, components for optical target acquisition equipment, components for optical target surveillance equipment, components for optical target tracking equipment, components for electronic countermeasures equipment, components for periscopes, components for laser range finders, components for combat aircraft, components for combat helicopters, components for military surveillance aircraft, components for military infrared/thermal imaging equipment, imaging countermeasures equipment, components for laser weapons systems.
80	P	Components for combat helicopters, components for combat aircraft, components for military surveillance aircraft, components for turrets, components for surface to air missiles, components for military aero-engines.
81	P	General naval vessel components
82	P	Ground vehicle military communications equipment
83	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
84	P	General military aircraft components.
85	T	Military infrared/thermal imaging equipment
86	P	Components for combat aircraft, components for military surveillance aircraft, equipment for the use of components for combat aircraft, equipment for the use of components for military surveillance aircraft, test equipment for components for combat aircraft, test equipment for components for military surveillance aircraft, production equipment for components for combat aircraft, production equipment for components for military surveillance aircraft, test equipment for components for combat aircraft, test equipment for components for military surveillance aircraft.
87	P	Components for combat helicopters, components for military utility helicopters, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters
88	P	Software for the development of air to surface missiles, components for air to surface missiles.
89	T	Naval electronic equipment.
90	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
91	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications

Italy cont.

		equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
92	P	Components for combat aircraft, test equipment for components for combat aircraft, equipment for the use of components for combat aircraft, technology for the use of components for combat aircraft.
93	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
94	P	Military electronic equipment, components for military electronic equipment.
95	P	Components for transport aircraft, technology for the use of components for transport aircraft, equipment for the use of components for transport aircraft.
96	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
97	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
98	P	Components for military transport aircraft
99	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
100	T	Components for naval sonar equipment.
101	P	Components for armoured fighting vehicles, components for artillery rocket launching vehicles.
102	P	Components for sporting gun ammunition.
103	P	Anti-riot shields.
104	P	Components for military surveillance aircraft, components for military transport aircraft
105	P	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for bombs, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons system.
106	T	Components for air to air missiles, components for air to surface missiles, components for air to

Total number of SIELs issued	128

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

air guns (20), artillery computers, artillery fire location equipment, assault rifles (128), body armour, chaff, chemical agent detection equipment, chemical agent detection equipment (T), components for airborne radars, components for airborne surveillance equipment, components for aircraft military communications equipment, components for aircraft radars, components for anti-ship missiles, components for artillery computers, components for chemical agent detection equipment, components for chemical agent detection equipment (T), components for combat aircraft, components for combat helicopters, components for combat helicopters (T), components for ground based radars, components for military aero-engines, components for military aircraft flight data recorders, components for military communications equipment, components for military improvised explosive device disposal equipment (T), components for military infrared/thermal imaging equipment, components for military navigation equipment, components for military transport aircraft, components for military utility helicopters, components for mine detection equipment, components for munitions launching equipment, components for naval engines (T), components for naval radars, components for naval sonar equipment, components for sniper rifles, components for submarines, components for weapon sights, deactivated anti-tank weapons, deactivated assault rifles (10), deactivated general purpose machine guns (53), deactivated rifles (52), deactivated submachine guns (232), demolition charges, electrolytic cells for fluorine production, equipment employing cryptography, equipment for the use of artillery computers, equipment for the use of chemical agent detection equipment, equipment for the use of combat aircraft, equipment for the use of munitions launching equipment, equipment for the use of naval engines (T), general military aircraft components, general naval vessel components, general purpose machine guns (38), grenade launchers, gun mountings, heavy machine guns (4), materials containing depleted uranium, materials containing enriched uranium, military aircraft ground equipment, military devices for initiating explosives, military explosives, military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment, military infrared/thermal imaging equipment (T), military sonar detection equipment, mine detection equipment, mixtures containing toxic chemical precursors, munitions launching equipment, natural uranium, naval engines (T), naval sonar equipment, NBC clothing, NBC filters, NBC respirators, non-sporting shotgun ammunition, production equipment for gas turbines, remote sensing imaging sensors, rifles (17), shotguns (3), small arms ammunition, sniper rifle maintenance equipment, sniper rifles (20), software for optimising equipment designs, software for the development of submarines, software for the evaluation of weapon systems, software for the use of artillery computers, software for the use of fire control equipment, submachine guns (62), technology for the development of nuclear fuel reprocessing equipment, technology for the development of nuclear reactor fuel element fabrication equipment, technology for the development of nuclear reactors, technology for the production of nuclear reactors, technology for the production of plutonium-239, technology for the use of artillery computers, technology for the use of chemical agent detection

Japan cont.

equipment, technology for the use of electrolytic cells for fluorine production, technology for the use of naval sonar equipment, technology for the use of nuclear reactor fuel element fabrication equipment, technology for the use of nuclear reactors, technology for the use of sniper rifles, technology for the use of software for the evaluation of weapon systems, test equipment for combat aircraft, test equipment for munitions launching equipment, test equipment for naval engines (T), toxic chemical precursors, weapon cleaning equipment, weapon night sights, weapon sight mounts, weapon sights

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	P	Devices for initiating explosives.
3	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
4	P	Equipment employing cryptography, cryptographic software.
5	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
6	P	Software for the use of equipment employing cryptography.
7	P	Thorium, natural uranium, depleted uranium.
8	P	Military communications equipment, military helmets, components for military communications equipment
9	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
10	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
11	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
12	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars
13	P	Components for military bridges.
14	P	Components for military video recording equipment, components for military aircraft navigation equipment, components for weapon sights, components for military navigation equipment, components for aiming devices, components for weapons control systems, components for military infrared/thermal imaging equipment, components for anti-aircraft guns fire simulation equipment, test equipment for military video recording equipment, test equipment for military aircraft navigation equipment, test equipment for weapon sights, test equipment for aiming devices, test equipment for military navigation equipment, test equipment for weapons control systems, test equipment for military infrared/thermal imaging equipment, test equipment for anti-aircraft guns fire simulation equipment, technology for the use of military aircraft navigation equipment, technology for the use of weapon sights, technology for the use of aiming devices, technology for the use of military navigation equipment, technology for the use of weapons control systems, technology for the use of military infrared/thermal imaging equipment, technology for anti-aircraft guns fire simulation equipment.
15	T	Laser range finders, components for laser range finders, weapon sights, components for

Japan cont.

		weapon sights, military image intensifier equipment, night vision goggles.
16	P	Software for the use of naval electronic warfare training equipment
17	P	General naval vessel components, test equipment for general naval vessel components.
18	P	Components for military utility helicopters, equipment for the use of military utility helicopters, components for military utility helicopters, components for combat helicopters, equipment for the use of combat helicopters.
19	P	Components for military transport aircraft
20	P	Military bridges, equipment for the use of military bridges
21	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.
22	P	Components for military communications equipment, equipment for the use of military communications equipment.
23	P	Sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, small arms ammunition, shotguns.
24	T	Shotguns
25	P	Components for sniper rifles.
26	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility helicopters, components for naval engines.
27	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
28	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
29	P	Sporting gun ammunition, components for sporting gun ammunition
30	P	Air guns, components for air guns, weapon sights, components for weapon sights, gun silencers, components for gun silencers, gun mountings.
31	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
32	P	General naval vessel components.
33	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for

Japan cont.

		chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
34	T	Weapons night sights.
35	P	Components for combat helicopters, components for military utility helicopters, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters.
36	P	Military improvised explosive devices disposal equipment, explosive ordnance disposal equipment, linear cutting explosive charges, demolition charges.
37	P	Components for military search and rescue aircraft.
38	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
39	P	Military electronic equipment, components for military electronic equipment.
40	P	Components for landing craft, equipment for the use of components for landing craft, production equipment for components for landing craft, components for military search and rescue aircraft, equipment for the use of components for military search and rescue aircraft, production equipment for components for military search and rescue aircraft.
41	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
42	P	Components for military search and rescue aircraft.
43	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use
44	P	Sporting gun ammunition, components for sporting gun ammunition
45	P	Components for military surveillance aircraft, components for military transport aircraft.
46	P	Components for military electronic equipment, technology for the use of components for military electronic equipment.
47	P	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for bombs, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
48	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
49	P	Sporting gun ammunition.
50	P	Components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
51	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of

Japan cont.

		components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
52	P	Components for military transport aircraft, components for naval engines, equipment for the use of military transport aircraft, equipment for the use of naval engines, test equipment for military transport aircraft, test equipment for naval engines, technology for the use of military transport aircraft, technology for the use of naval engine.
53	P	Components for military search and rescue aircraft.
54	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
55	P	Software for the use of naval sonar equipment, technology for the use of naval sonar equipment, test equipment for naval sonar equipment, equipment for the use of naval sonar equipment, components for naval sonar equipment.
56	P	Small arms ammunition.
57	P	Components for military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment.
58	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
59	P	Military helmets, components for military helmets, body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour.
60	P	Sporting rifles, components for sporting rifles, sporting gun ammunition, shotguns, components for shotguns.
61	P	Sporting rifles, components for sporting rifles, sporting gun ammunition, shotguns, weapon sights.
62	P	Components for military search and rescue aircraft.
63	P	Military pyrotechnic materials.
64	P	Components for military search and rescue aircraft
65	P	General naval vessel components.
66	P	Naval engines, components for naval engines, equipment for the use of naval engines
67	P	Sporting gun ammunition, components for sporting gun ammunition.
68	P	Military electronic equipment, technology for the use of military electronic equipment.
69	P	Equipment employing cryptography
70	P	Components for machine pistols, components for assault rifles, components for pistols, components for semi-automatic pistols, components for machine guns

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 17.5m
---	---------

Number of SIELs issued covering:	
Items on the Military List	62
Other items	7
Military List and other items	0
Total number of SIELs issued	69

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

aiming devices (T), anti-riot shields, armoured all wheel drive vehicles (T), assault rifles (136), body armour, chaff, chemical agent detection equipment (T), components for armoured fighting vehicles, components for armoured personnel carriers, components for assault rifles, components for attack alerting/warning equipment, components for body armour, components for general purpose machine guns, components for grenade launchers, components for large calibre artillery ammunition, components for military cameras, components for military communications equipment, components for military firing sets, components for military improvised explosive device disposal equipment (T), components for military training aircraft, components for semi-automatic pistols, components for submachine guns, components for tank transporters, components for tanks, components for test equipment for tanks, components for turrets, components for weapon day and night sights, components for weapon sights, corrosion resistant chemical manufacturing equipment, decoy flares, electronic warfare equipment training equipment, equipment for the use of military firing sets, equipment for the use of military improvised explosive device disposal equipment (T), equipment for the use of military training aircraft, equipment for the use of weapon sights, explosive ordnance disposal equipment (T), fire control equipment, fire control equipment (T), flash suppressors, goods treated for signature suppression for military use (T), ground based radars, ground vehicle military communications equipment (T), gun mountings (T), gun silencers, illuminators, improvised explosive device detection equipment (T), military communications equipment (T), military electronic equipment (T), military firing sets, military firing sets (T), military helmets, military helmets (T), military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment, military infrared/thermal imaging equipment (T), military training aircraft, military utility vehicles, military utility vehicles (T), military video recording equipment, NBC clothing (T), NBC filters, NBC filters (T), NBC protective equipment (T), NBC respirators, NBC respirators (T), smoke hand grenades, software for the use of electronic warfare equipment training equipment, software for the use of military communications equipment (T), sporting rifles (1), stun grenades, submachine guns (121), tanks, technology for the use of assault rifles, technology for the use of chaff, technology for the use of decoy flares, technology for the use of electronic warfare equipment training equipment, technology for the use of military training aircraft, technology for the use of submachine guns, technology for the use of test equipment for tanks, test equipment for tanks, thunderflashes, toxic chemical precursors, training large calibre artillery ammunition, weapon cleaning equipment, weapon fire simulation equipment, weapon sight mounts, weapon sights

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Direct view imaging equipment, image intensifier tubes, imaging cameras.
2	P	Equipment employing cryptography, cryptographic software.
3	P	Cryptographic software.
4	P	Equipment employing cryptography
5	T	Imaging cameras.
6	P	Software for the use of equipment employing cryptography
7	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
8	P	Technology for the production of toxins
9	P	Technology for the production of toxins
10	P	Equipment employing cryptography.

Jordan cont.

11	P	Components for tanks.
12	T	Armoured all wheel drive vehicles.
13	P	Body armour, components for body armour, technology for the production of body armour.
14	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
15	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles
16	P	Anti-riot shields
17	P	Components for patrol craft, components for naval engines, technology for the use of patrol craft, technology for the use of naval engines
18	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
19	P	General military aircraft components
20	P	Air weapons, components for air weapons, weapon sights.
21	P	Military airborne cargo nets and strops, military airborne cargo handling equipment, components for military transport aircraft, equipment for the use of military airborne cargo nets and strops, equipment for the use of components for military transport aircraft, equipment for the use of military airborne cargo handling equipment.
22	T	Ground based radars.
23	P	Military parachutes.
24	P	Small arms ammunition, components for small arms ammunition, training small arms ammunition, components for training small arms ammunition, components for aircraft cannon ammunition, components for small calibre artillery ammunition, components for large calibre artillery ammunition.
25	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
26	P	Components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment.
27	P	General purpose machine guns, components for general purpose machine guns, technology for the use of general purpose machine guns, components for fire control equipment, components for weapons day and nights sights, components for tanks, components for armoured repair and recovery vehicles, training equipment for tanks, training equipment for armoured recovery and repair vehicles, components for training equipment for tanks, components for training equipment for armoured recovery and repair vehicles, components for tanks, components for defensive system against NBC agents, test equipment for tanks, test equipment for armoured recovery and repair vehicles, equipment for the use of tanks, equipment for the use of armoured recovery and repair vehicles, components for test equipment for tanks, components for test equipment for armoured recovery and repair vehicles, technology for the use of tanks, technology for the use of armoured recovery and repair vehicles, technology for the use of test equipment for tanks, technology for the use of test equipment for armoured recovery and repair vehicles, software for the use of test equipment for tanks, software for the use of test equipment for armoured recovery and repair vehicles, projectile launchers.
28	P	Equipment employing cryptography.
29	P	Components for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, software for the use of military aircraft navigation equipment, technology for the use of military aircraft navigation equipment, software for the use of test equipment for military aircraft navigation equipment, technology for the use of test equipment for military aircraft navigation equipment.
30	P	Military parachutes.

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Equipment employing cryptography
2	P	Mass spectrometers.
3	P	Bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment.
4	P	Components for semiconductor process equipment, software for the use of semiconductor process equipment.
5	P	Accessories for semiconductor process equipment, components for semiconductor process equipment.
6	P	Technology for the development of equipment employing cryptography, development equipment for equipment employing cryptography, equipment employing cryptography, cryptographic software.
7	P	Mixtures containing toxic chemical precursors.
8	P	Inertial equipment.
9	P	Equipment employing cryptography, cryptographic software
10	P	Equipment employing cryptography.
11	P	Software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography.
12	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
13	P	Software for the use of equipment employing cryptography.
14	P	Technology for the production of toxins
15	P	Cryptographic software, software for the development of equipment employing cryptography, equipment employing cryptography.
16	P	Towed hydrophone arrays
17	P	Toxic chemical precursors.
18	P	Components for combat helicopters, equipment for the use of combat helicopters, components for military aero-engines, technology for the use of combat helicopters.
19	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
20	P	Military communications equipment, military helmets, components for military communications equipment
21	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
22	P	Components for air to surface missiles, components for anti-armour missiles, components for anti-ship missiles, components for air to surface missiles control equipment, components for air to surface missile handling equipment, components for anti-armour missiles control equipment, components for anti-armour missile handling equipment, components for anti-armour missiles launching equipment, components for anti-ship missiles control equipment, components for anti-ship missile handling equipment, components for anti-ship missiles launching equipment.
23	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
24	P	Components for naval radars, technology for the use of naval radars
25	P	Components for military bridges.

Korea, South cont.

26	P	Components for aiming devices, components for weapons control systems, components for military aircraft navigation equipment, components for weapon sights, components for airborne radars, components for military infrared/thermal imaging equipment, test equipment for aiming devices, test equipment for weapons control systems, test equipment for military aircraft navigation equipment, test equipment for weapon sights, test equipment for general military aircraft components, test equipment for airborne radars, test equipment for military infrared/thermal imaging equipment, technology for the use of aiming devices, technology for the use of weapons control systems, technology for the use of military aircraft navigation equipment, technology for the use of weapon sights, technology for the use of general military aircraft components, technology in the use of airborne radars, technology in the use of military infrared/thermal imaging equipment.
27	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
28	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22
29	P	Software for the use of surface to air missiles control/launching equipment, components for surface to air missiles control/launching equipment, equipment for the use of surface to air missiles control/launching equipment, test equipment for surface to air missiles control/launching equipment, technology for the use of surface to air missiles control/launching equipment.
30	P	General naval vessel components.
31	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.
32	P	Components for military utility helicopters, components for combat aircraft, components for military training aircraft, components for combat helicopters, equipment for the use of military utility helicopters, equipment for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of combat helicopters, technology for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military training aircraft, technology for the use of components for combat helicopters, technology for the use of equipment for the use of military utility helicopters, technology for the use of equipment for the use of combat aircraft, technology for the use of equipment for the use of military training aircraft, technology for the use of equipment for the use of combat helicopters.
33	P	Components for military communications equipment, equipment for the use of military communications equipment.
34	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of military utility helicopters, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
35	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of

Korea, South cont.

		military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
36	P	Components for weapons control systems, software for the use of weapons control systems, technology for the use of weapons control systems, equipment for the use of weapons control systems.
37	P	Components for naval radars, software for the use of naval radars, software for the use of test equipment for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars.
38	P	Components for naval radars, software for the use of naval radars, software for the use of test equipment for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars.
39	P	General naval vessel components.
40	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
41	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
42	P	Military electronic equipment, components for military electronic equipment.
43	P	Components for military transport aircraft
44	P	Components for combat aircraft, components for military training aircraft
45	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use
46	P	Components for armoured fighting vehicles.
47	P	Components for armoured fighting vehicles.
48	T	Naval navigation equipment, components for naval navigation equipment
49	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
50	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military

Korea, South cont.

		transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
51	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military utility aircraft, components for military transport aircraft, components for military aircraft ground equipment.
52	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
53	P	Software for the use of naval sonar equipment, technology for the use of naval sonar equipment, test equipment for naval sonar equipment, equipment for the use of naval sonar equipment, components for naval sonar equipment.
54	P	Small arms ammunition
55	P	Components for military communications equipment
56	P	Components for missile scoring equipment, test equipment for missile scoring equipment, software for the use of missile scoring equipment, components for naval navigation equipment, test equipment for naval navigation equipment, software for the use of naval navigation equipment.
57	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
58	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
59	P	Military aero-engines, components for military aero-engines.
60	P	Equipment employing cryptography, technology for the development of equipment employing cryptography, equipment for the development of equipment employing cryptography, software for the use of equipment employing cryptography.
61	p	Military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines, components for the use of military aero-engines.
62	P	Equipment employing cryptography
63	P	Equipment employing cryptography, development equipment for equipment employing cryptography, test equipment for equipment employing cryptography, software for the development of equipment employing cryptography, software for the use of equipment employing cryptography

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 14.5m
---	---------

Number of SIELs issued covering:	
Items on the Military List	27
Other items	10
Military List and other items	0
Total number of SIELs issued	37

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

accessories for military training aircraft simulators, aircraft military communications equipment (T), blank ammunition, chemical agent detection equipment, chemical agent dissemination simulators, components for military cargo vehicles (T), components for military improvised explosive device disposal equipment (T), components for military training aircraft, components for military training aircraft (T), components for munitions launching equipment, components for naval radars, components for naval radars (T), components for semi-automatic pistols, components for submachine guns, components for weapon sights, corrosion resistant chemical manufacturing equipment, demolition charges, demolition devices, equipment employing cryptography, equipment for the use of military firing sets, equipment for the use of military improvised explosive device disposal equipment (T), equipment for the use of weapon night sights (T), general military vehicle components, general naval vessel components, military communications equipment, military devices for initiating explosives, military explosives, military firing sets, military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment (T), military pyrotechnic materials, military small arms training equipment, military training aircraft simulators, military utility vehicles, mixtures containing toxic chemical precursors, NBC clothing, NBC filters, NBC respirators, night vision goggles (T), semi-automatic pistols (50), small arms ammunition, smoke hand grenades, software for the use of military small arms training equipment, sporting rifles (1), stun grenades, submachine guns (1), technology for the use of military training aircraft simulators, technology for the use of semi-automatic pistols, technology for the use of weapon sights, toxic chemical precursors, training equipment for naval communications equipment, training equipment for naval electronic equipment, training equipment for naval navigation equipment, training equipment for NBC protective equipment, weapon cleaning equipment, weapon night sights (T)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Equipment employing cryptography.
2	P	Cryptographic software, equipment employing cryptography.
3	P	Equipment employing cryptography, cryptographic software
4	P	Inertial equipment.
5	T	Imaging cameras
6	T	Accelerometers, inertial equipment.
7	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
8	P	Mixtures containing toxic chemical precursors.
9	P	Equipment employing cryptography, cryptographic software
10	P	Linear cutting explosive charges, devices for initiating explosives
11	P	Cryptographic software.
12	P	Cryptographic software.
13	P	Equipment employing cryptography.
14	P	Inertial equipment
15	P	Software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography.
16	P	Devices for initiating explosives, firing sets.

Kuwait cont.

17	T	Imaging cameras.
18	P	Cryptographic software
19	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
20	P	Technology for the production of toxins.
21	P	Technology for the production of toxins.
22	T	Gyroscopes, inertial equipment, technology for the use of inertial equipment, technology for the use of gyroscopes.
23	P	Non-military explosives/propellants.
24	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
25	T	Armoured all wheel drive vehicles
26	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
27	P	Components for naval radars, technology for the use of naval radars.
28	P	Components for military video recording equipment, components for airborne radars, components for aiming devices, test equipment for military video recording equipment, test equipment for airborne radars, test equipment for aiming devices, technology for the use of military video recording equipment, technology for the use of airborne radars, technology for the use of aiming devices.
29	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
30	P	Anti-riot shields
31	P	Software for the use of naval electronic warfare training equipment
32	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22.
33	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.
34	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
35	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
36	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
37	P	General naval vessel components.
38	P	Ground vehicle military communications equipment
39	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for

Kuwait cont.

		chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
40	T	Naval electronic equipment.
41	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
42	P	Components for military communications equipment, software for the use of military communications equipment, software for the use of artillery fire location equipment, technology for the use of military communications equipment, technology for the use of artillery fire location equipment, test equipment for military communications equipment, test equipment for artillery fire location equipment, equipment for the use of military communications equipment, equipment for the use of artillery fire location equipment.
43	T	Naval navigation equipment, components for naval navigation equipment
44	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
45	P	Components for combat aircraft, components for military training aircraft, components for the use of combat aircraft, components for tanks, test equipment for combat aircraft, test equipment for military training aircraft, technology for the use of combat aircraft, technology for the use of military training aircraft.
46	P	Small arms ammunition
47	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for combat helicopters, components for military utility helicopters, military aero-engines, components for military aero-engines, military aircraft navigation equipment, aircraft military communication equipment, components for military aircraft navigation equipment, components for aircraft military communication equipment, military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for combat helicopters, test equipment for military utility helicopters, aircraft radars, components for aircraft radars, general military aircraft components, military electronic equipment, components for combat aircraft, components for combat helicopters, military aircraft ground equipment, military flying helmets, anti-g/pressure suits, military aircraft pressurised breathing equipment, military parachutes, night vision goggles, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of military aircraft navigation equipment, technology for the use aircraft military communication equipment, technology for the use of aircraft radars, technology for the use of military aircraft ground equipment, technology for the use of military flying helmets, technology for the use of anti-g/pressure suits, technology for the use of military aircraft pressurised breathing equipment, technology for the use of night vision goggles, technology for the use of general military aircraft components, technology for the use of military electronic equipment.
48	P	Components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment.
49	P	Components for military utility vehicles.
50	P	Military helmets, components for military helmets, body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour.
51	P	Equipment employing cryptography.
52	P	Components for military engineer vehicles
53	P	General naval vessel components, technology for the use of general naval vessel components
54	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
55	P	Components for military transport aircraft, components for military aero-engines.
56	P	Equipment employing cryptography
57	P	Rifles, sporting rifles, weapon sights, small arms ammunition, sporting gun ammunition

1	P	Components for military utility vehicles

Malaysia

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 67.5m
Number of SIELs issued covering:	
Items on the Military List	99
Other items	27
Military List and other items	2
Total number of SIELs issued	128

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

accessories for military image intensifier equipment (T), aiming devices (T), air to air missile simulators (T), aircraft military communications equipment, aircrew protective masks, anti-riot shields, armoured personnel carriers (T), artillery computers, artillery computers (T), attack alerting/warning equipment (T), ballistic shields (T), ballistic test equipment, body armour (T), chaff equipment (T), chemical agent detection equipment (T), chemical agent detection equipment training equipment (T), chemical resistant manufacturing equipment, command and control vehicles (T), command communications control and intelligence equipment (T), components for air to air missile handling equipment (T), components for air to air missile launching equipment (T), components for aircraft cannons, components for aircraft military communications equipment, components for anti-armour ammunition, components for anti-ship missile control equipment, components for artillery computers, components for ballistic test equipment, components for chemical agent detection equipment (T), components for combat aircraft, components for combat helicopters, components for general purpose machine guns, components for guided missile decoying equipment, components for gun mountings, components for laser range finders (T), components for military aircraft ground equipment, components for military cargo vehicles, components for military communications equipment, components for military communications equipment (T), components for military image intensifier equipment (T), components for military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment (T), components for military infrared/thermal imaging equipment (T), components for military training aircraft, components for military transport

Malaysia cont.

aircraft, components for military utility helicopters, components for munitions launching equipment, components for naval light guns, components for naval radars, components for optical target surveillance equipment (T), components for signal flares, components for small arms ammunition, components for sniper rifles, components for surface to air missile handling/launching equipment (T), components for surface to air missile launching equipment, components for surface to air missiles, components for surface to air missiles (T), components for training anti-armour ammunition, components for weapon sights, composite laminates, corrosion resistant chemical manufacturing equipment, crowd control ammunition (T), cryptographic software (T), CS hand grenades (T), demolition charges (T), deuterium compounds, devices containing military pyrotechnic materials (T), equipment employing cryptography, equipment for operation of military aircraft in confined areas (T), equipment for the use of aircraft military communications equipment, equipment for the use of artillery computers, equipment for the use of artillery computers (T), equipment for the use of ballistic test equipment, equipment for the use of heavy machine guns, equipment for the use of laser range finders (T), equipment for the use of military firing sets, equipment for the use of military image intensifier equipment, equipment for the use of military improvised explosive device disposal equipment (T), equipment for the use of sniper rifles, exploding simulation devices (T), explosive ordnance disposal equipment (T), fibre prepreps, forward observer/target recognition training equipment (T), general military aircraft components, general military aircraft components (T), gun laying equipment, gun mountings, hand grenade training equipment, heavy machine gun maintenance equipment, heavy machine guns (3), illuminators, illuminators (T), improvised explosive device disposal equipment (T), inertial equipment, laser range finders (T), military aircraft ground equipment, military aircraft navigation equipment, military communications equipment, military devices for initiating explosives (T), military firing set training equipment, military firing sets, military helmets, military helmets (T), military image intensifier equipment, military image intensifier equipment (T), military improvised explosive device disposal equipment (T), military improvised explosive device disposal equipment training equipment (T), military propellants, mixtures containing toxic chemical precursors, naval mine training equipment (T), NBC protective equipment, night vision goggles, night vision goggles (T), pressure transducers, production equipment for military utility helicopters, production equipment for small arms ammunition, range-finding equipment, rebreathing swimming apparatus, remote ground sensor systems (T), smoke ammunition (T), smoke canisters, smoke canisters (T), smoke hand grenades (T), sniper rifle maintenance equipment, software for the use of artillery computers, software for the use of equipment employing cryptography, software for the use of munition fuzes, software for the use of naval mine training equipment (T), software for the use of remote ground sensor systems (T), spacecraft, stun grenades (T), surface to air missile launching equipment (T), surface to air missile simulators (T), tear gas/irritant ammunition (T), technology for the use of anti-armour ammunition, technology for the use of anti-ship missile control equipment, technology for the use of artillery computers, technology for the use of equipment employing cryptography, technology for the use of gun mountings, technology for the use of heavy machine guns, technology for the use of military communications equipment, technology for the use of military image intensifier equipment, technology for the use of production equipment for small arms ammunition, technology for the use of training anti-armour ammunition, technology for the use of weapon sights, thunderflashes, thunderflashes (T), toxic chemical precursors, training equipment for electronic warfare equipment (T), training equipment for military sonar detection equipment (T), weapon cleaning equipment, weapon sight mounts (T), weapon sights, weapon sights (T)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	P	Inertial equipment.
3	P	Bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment.
4	T	Accelerometers, inertial equipment.
5	P	Components for semiconductor process equipment, software for the use of semiconductor process equipment
6	P	Accessories for semiconductor process equipment, components for semiconductor process equipment.
7	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
8	P	Inertial equipment.
9	P	Equipment employing cryptography, cryptographic software
10	P	Linear cutting explosive charges, devices for initiating explosives.
11	P	Technology for the development of radar equipment, technology for the development of software for the use of radar equipment.
12	P	Cryptographic software

Malaysia cont.

13	P	Cryptographic software
14	P	Equipment employing cryptography
15	P	Devices for initiating explosives, firing sets
16	P	Software for the use of equipment employing cryptography
17	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
18	P	Technology for the production of toxins.
19	P	Cryptographic software, software for the development of equipment employing cryptography, equipment employing cryptography.
20	T	Gyroscopes, inertial equipment, technology for the use of inertial equipment, technology for the use of gyroscopes.
21	P	Radiation hardened integrated circuits, extended temperature range integrated circuits, general purpose integrated circuits, components for underwater communication systems, components for radio transmitters, components for radio receivers, components for telecommunications equipment using signal processing.
22	P	Submersible equipment, submersible vehicles, marine position fixing equipment, marine object detection systems, marine location systems, inertial equipment.
23	P	Non-military explosives/propellants.
24	P	Components for combat helicopters, equipment for the use of combat helicopters, components for military aero-engines, technology for the use of combat helicopters.
25	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
26	P	Military communications equipment, military helmets, components for military communications equipment.
27	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
28	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
29	P	Components for naval radars, technology for the use of naval radars.
30	P	Components for military bridges.
31	P	General military aircraft components, components for laser range finders, components for aircraft head-up displays, components for aiming devices, test equipment for general military aircraft components, test equipment for laser range finders, test equipment for aiming devices, test equipment for aircraft head-up displays, technology for the use of general military aircraft components, technology for the use of laser range finders, technology for the use of aiming devices, technology for the use of aircraft head-up displays.
32	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
33	P	Anti-riot shields.
34	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for combat helicopters, components for military utility helicopters, components for equipment for the use of combat aircraft, components for equipment for the use of military training aircraft, components for equipment for the use of military transport aircraft, components for equipment for the use of combat helicopters, components for equipment for the use of military utility helicopters.
35	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22.
36	P	General naval vessel components, test equipment for general naval vessel components.
37	P	Components for corvettes, components for patrol craft, components for fast attack craft, components for mine hunters, components for assault vessels, components for naval auxiliary vessels.
38	P	General naval vessel components.

Malaysia cont.

39	P	Military equipment and components for ex-Royal Navy vessels excluding complete weapons or ammunition.
40	P	Components for combat helicopters.
41	P	Components for frigates.
42	P	Components for military communications equipment, equipment for the use of military communications equipment.
43	P	General naval vessel components.
44	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
45	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
46	P	Aircraft head-down displays, components for aircraft head-down displays, aircraft head-up displays, components for head-up displays, components for military training aircraft, components for military transport aircraft.
47	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
48	P	General purpose machine guns, heavy machine guns.
49	P	General naval vessel components.
50	P	General military aircraft components.
51	P	Military improvised explosive devices disposal equipment, explosive ordnance disposal equipment, linear cutting explosive charges, demolition charges, explosive ordnance disposal equipment.
52	T	Naval electronic equipment.
53	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military

Malaysia cont.

		aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
54	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
55	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
56	P	Artillery fire location equipment, components for artillery fire location equipment.
57	P	Components for communication equipment, software for the use of communication equipment, technology for the use of communication equipment, test equipment for communication equipment, equipment for the use of communication equipment.
58	T	Naval navigation equipment, components for naval navigation equipment.
59	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
60	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
61	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, equipment for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of military transport aircraft, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft.
62	P	Small arms ammunition.
63	P	Components for military combat aircraft, components for military training aircraft, components for military utility aircraft, components for military transport aircraft, components for military utility helicopters, components for military aircraft navigation equipment, components for aircraft military communications equipment, general military aircraft components, military aero-engines, components for military aero-engines, military aircraft pressurised breathing equipment, anti-g/pressure suits, military parachutes, military flying helmets, components for air defence system, torpedoes control equipment, torpedoes handling equipment, torpedoes launching equipment, bomb handling equipment, surface to air missiles control equipment, surface to air missile handling equipment, surface to air missile launching equipment, rocket control equipment, rocket handling equipment, rocket launching equipment, aircraft radars, components for aircraft radars, military electronic equipment, components for military electronic equipment, test equipment for components for military training aircraft, test equipment for components for military utility aircraft, test equipment for components for military transport aircraft, test equipment for components for military utility helicopters, night vision goggles, technology for the

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.0m
Number of SIELs issued covering:	
Items on the Military List	14
Other items	6
Military List and other items	0
Total number of SIELs issued	20

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

aircraft military communications equipment, anti-riot shields, assault rifles (2), bathymetric survey systems (T), body armour, components for armoured personnel carriers, components for assault rifles, components for body armour, components for NBC respirators, components for patrol craft, electronic warfare equipment training equipment (T), equipment employing cryptography, equipment for the use of military communications equipment, firing sets, general military aircraft components, gun mountings, gun silencers, improvised explosive device detection equipment, rebreathing swimming apparatus, technology for the use of assault rifles, weapon cleaning equipment, weapon sights

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	P	Inertial equipment.
3	P	Bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment.
4	T	Accelerometers, inertial equipment.
5	P	Mixtures containing toxic chemical precursors.
6	P	Equipment employing cryptography, cryptographic software.
7	P	Accelerometers, components for accelerometers, gyroscopes, components for gyroscopes, inertial equipment, components for inertial equipment, gyro-astro compasses, global positioning satellite receivers, components for global positioning satellite receivers, radio altimeters, RF direction finding equipment, components for RF direction finding equipment, passive directional sensors for rockets, flight control systems for rocket.
8	P	Cryptographic software.
9	P	Equipment employing cryptography.
10	P	Marine position fixing equipment.
11	P	Software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography.
12	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
13	P	Software for the use of equipment employing cryptography.
14	P	Technology for the production of toxins.

Mexico cont.

15	P	Cryptographic software, software for the development of equipment employing cryptography, equipment employing cryptography.
16	P	Equipment employing cryptography.
17	P	Components for ground based radars.
18	P	Body armour, components for body armour, technology for the production of body armour.
19	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
20	P	Components for naval radars, technology for the use of naval radars.
21	P	Aircraft military communications equipment, military communications equipment, equipment for the use of military communications equipment.
22	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles.
23	P	Components for military communications equipment, equipment for the use of military communications equipment.
24	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
25	T	Naval electronic equipment.
26	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
27	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
28	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
29	T	Naval navigation equipment, components for naval navigation equipment.
30	P	Components for ground based radars, technology for the use of components for ground based radars.

Mexico cont.

31	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
32	P	Components for ground based radars.
33	P	Components for ground based radars, test equipment for ground based radars, software for the use of ground based radars, technology for the use of ground based radars, equipment for the use of ground based radars.
34	P	Components for military transport aircraft, components for military aero-engines.
35	P	Equipment employing cryptography, technology for the development of equipment employing cryptography, equipment for the development of equipment employing cryptography, software for the use of equipment employing cryptography.
36	P	Equipment employing cryptography
37	P	Equipment employing cryptography, development equipment for equipment employing cryptography, test equipment for equipment employing cryptography, software for the development of equipment employing cryptography, software for the use of equipment employing cryptography

45	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
46	T	Armoured all wheel drive vehicles.
47	P	Pyrotechnic signaling devices, components for anti-ship missiles, components for torpedoes, components for rocket launching equipment, components for chaff equipment, components for weapons control systems, components for naval radars, components for electronic countermeasure equipment, components for naval gun mountings, components for naval electronic warfare equipment, components for naval sonar equipment, components for naval communications equipment, components for naval navigation equipment, components for submarines, components for frigates, components for destroyers, components for fast attack craft, components for naval auxiliary vessels, general naval vessel components, components for military communications equipment, military electronic equipment, technology for the use of military communications equipment, technology for the use of naval gun mountings, technology for the use of naval electronic warfare equipment, technology for the use of naval sonar equipment, technology for the use of naval communications equipment, technology for the use of naval navigation equipment, technology for the use of submarines, technology for the use of frigates, technology for the use of fast attack craft, technology for the use of naval auxiliary vessels, technology for the use of electronic countermeasure equipment, technology for the use of naval radars, technology for the use of weapons control systems, technology for the use of rocket launching equipment, technology for the use of chaff equipment, technology for the use of pyrotechnic signaling devices, technology for the use of anti-ship missiles, technology for the use of torpedoes.
48	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility

Netherlands cont.

		helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
49	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.
50	P	Components for military bridges.
51	P	Components for military video recording equipment, components for military aircraft navigation equipment, components for aircraft radars, components for aircraft head-up displays, components for optical target designator equipment, components for airborne radars, test equipment for military video recording equipment, test equipment for military aircraft navigation equipment, test equipment for general military aircraft components, test equipment for aircraft radars, test equipment for aircraft head-up displays, test equipment for optical target designator equipment, test equipment for airborne radars, technology for the use of military video recording equipment, technology for the use military aircraft navigation equipment, technology for the use of general military aircraft components, technology for the use of aircraft radars, technology for the use of aircraft head-up displays, technology for the use of optical target designator equipment, technology for the use of airborne radars.
52	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles.
53	P	Anti-riot shields.
54	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22.
55	P	components for armoured personnel carriers, components for tanks, components for armoured fighting vehicles, components for military engineering vehicles, components for armoured repair and recovery vehicles, equipment for the use of components for armoured personnel carriers, equipment for the use of components for tanks, equipment for the use of components for armoured fighting vehicles, equipment for the use of components for military engineering vehicles, equipment for the use of components for armoured repair and recovery vehicles.
56	P	General naval vessel components, test equipment for general naval vessel components.
57	T	Components for frigates, components for fast attack craft, components for patrol craft, components for corvettes, components for mine hunters, components for landing craft.
58	P	General naval vessel components.
59	P	Military electronic equipment, software for the use of military electronic equipment, technology for the use of military electronic equipment.
60	P	Components for armoured fighting vehicles, technology for the use of components for armoured fighting vehicles.
61	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.
62	P	Components for military communications equipment, components for aircraft military communications equipment, components for naval communications equipment, components for electronic warfare equipment, components for airborne electronic warfare equipment, components for naval electronic warfare equipment, components for ground based radars, components for airborne radars, components for aircraft radars, components for air to air missiles, components for air to surface missiles, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for surface to air missiles, components for surface to surface missiles.
63	P	Components for submarines.
64	P	Components for military utility helicopters, components for combat aircraft, components for military training aircraft, components for combat helicopters, equipment for the use of military utility helicopters, equipment for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of combat helicopters, technology for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military training aircraft, technology for the use of components for combat helicopters, technology for the use of equipment for the use of military utility helicopters, technology for the use of equipment for the use of combat aircraft, technology for the use of equipment for the use of military training aircraft, technology for the use of equipment for the use of combat helicopters.
65	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras,

Netherlands cont.

		accessories for military photographic equipment, technology for the use of military surveillance aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
66	P	Components for military communications equipment, equipment for the use of military communications equipment.
67	P	Components for large calibre artillery, components for small calibre artillery, components for naval light guns, components for anti-aircraft guns, components for mortars.
68	P	Naval navigation equipment.
69	P	General naval vessel components, components for submarines.
70	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
71	T	Weapons night sights.
72	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
73	P	Forgings for military aero-engines, forgings for military transport aircraft, forgings for military utility helicopters, forgings for combat aircraft, forgings for military training aircraft, forgings for combat helicopters, forgings for military search and rescue aircraft, forgings for military surveillance aircraft, forgings for military utility aircraft.
74	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
75	P	Sporting gun ammunition, components for sporting gun ammunition.
76	P	Aircraft cannon ammunition, training aircraft cannon ammunition, small calibre artillery ammunition, training small calibre artillery ammunition.
77	P	Naval engines, components for naval engines, equipment for the use of naval engines.
78	P	Gun silencers, components for gun silencers, gun mountings.
79	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
80	P	Components for weapons day and night sights, components for anti-ship missiles, components for anti-armour missiles, components for missile jamming equipment, components for fire control equipment, components for optical target acquisition equipment, components for optical target surveillance equipment, components for optical target tracking equipment, components for electronic countermeasures equipment, components for periscopes, components for laser range finders, general military aircraft components, components for combat aircraft, components for combat helicopters, components for military surveillance aircraft, components for military infrared/thermal imaging equipment, imaging countermeasures equipment, components for

Netherlands cont.

		laser weapons systems.
81	P	General naval vessel components.
82	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
83	T	Military infrared/thermal imaging equipment.
84	P	Military improvised explosive devices disposal equipment, explosive ordnance disposal equipment, linear cutting explosive charges, demolition charges, explosive ordnance disposal equipment.
85	T	Naval electronic equipment.
86	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
87	P	Components for armoured personnel carriers.
88	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
89	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
90	P	Military electronic equipment, components for military electronic equipment.
91	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
92	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
93	P	Clothing treated for signature suppression for military use, cloth treated for signature

Netherlands cont.

		suppression for military use, goods treated for signature suppression for military use.
94	P	Components for armoured fighting vehicles, components for artillery rocket launching vehicles.
95	P	Components for sporting gun ammunition.
96	P	Components for military communications equipment, artillery fire location equipment, components for artillery fire location equipment, software for the use of military communications equipment, software for the use of artillery fire location equipment, technology for the use of military communications equipment, technology for the use of artillery fire location equipment, test equipment for military communications equipment, test equipment for artillery fire location equipment, equipment for the use of military communications equipment, equipment for the use of artillery fire location equipment.
97	P	Anti-riot shields.
98	P	Demolition charges, military explosives.
99	P	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for bombs, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
100	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
101	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.
102	T	Naval navigation equipment, components for naval navigation equipment.
103	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval

		engines.
104	T	Ground based radars.
105	P	Air to surface missiles, components for air to surface missiles, military aero-engines, software for the use of air to surface missiles, training equipment for air to surface missiles, equipment for the use of air to surface missiles, air to surface missile handling equipment, technology for the production of air to surface missiles, technology for the use of air to surface missiles, technology for the production of components for air to surface missiles, technology for the use of software for the use of air to surface missiles, technology for the use of software for the production of components for air to surface missiles, technology for the use of software for the production of components for air to surface missiles, technology for the production of military aero-engines, technology for the use of military aero-engines, technology for the production of components for military aero-engines, technology for the use of components for military aero-engines.
106	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
107	P	Small arms ammunition.
108	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
109	P	Components for military communications equipment.
110	P	Components for ground based radars, components for airborne radars, test equipment for ground based radars, test equipment for airborne radars, software for the use of ground based radars, software for the use of airborne radars.
111	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
112	P	Equipment for the use of weapon sights.
113	P	Components for military utility helicopters.
114	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
115	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
116	P	Triggered spark gaps.
117	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, air guns, veterinary/tranquillising rifles, rifles, sporting rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
118	P	Software for the use of naval radars, technology for the use of naval radars, components for naval radars, test equipment for naval radars, equipment for the use of naval radars.
119	T	Military electronic equipment.
120	P	Components for military engineer vehicles.
121	P	Components for combat aircraft, components for airborne electronic warfare equipment, military

Netherlands cont.

		electronic equipment.
122	P	Forgings for combat helicopters, forgings for military utility helicopters, forgings for military aero-engines.
123	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
124	P	Military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, components for combat aircraft, components for ejector seats, ejector seats, military parachutes, combat aircraft simulators, chemical agent detection equipment training equipment.
125	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, components for rifles, components for sporting rifles, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, sporting gun ammunition.
126	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
127	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, components for shotguns, components for rifles, components for sporting rifles, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for replica weapons, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, sporting gun ammunition.
128	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
129	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, sporting gun ammunition.
130	P	Shotguns, replica weapons, replica vintage guns, deactivated weapons, vintage guns, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control

The SITLs issued were granted for the following items:

sporting gun ammunition

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
3	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
4	P	Devices for initiating explosives, components for devices for initiating explosives.
5	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
6	P	Devices for initiating explosives, firing sets.
7	P	Software for the use of equipment employing cryptography.
8	P	Thorium, natural uranium, depleted uranium.
9	P	Marine object detection systems, marine location systems.
10	P	Towed hydrophone arrays.
11	P	Non-military explosives/propellants.
12	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
13	P	Military communications equipment, military helmets, components for military communications equipment.
14	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
15	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
16	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of

New Zealand cont.

		equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
17	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.
18	P	Components for military bridges.
19	P	Components for military video recording equipment, components for optical target designator equipment, components for aircraft head-up displays, general military aircraft components, test equipment for optical target designator equipment, test equipment for military video recording equipment, test equipment for aircraft head-up displays, test equipment for general military aircraft components, technology for the use of optical target designator equipment, technology for the use of military video recording equipment, technology for the use of aircraft head-up displays.
20	P	Aircraft military communications equipment, military communications equipment, equipment for the use of military communications equipment.
21	P	Components for assault rifles, components for rifles, components for general purpose machine guns, components for semi-automatic pistols, components for submachine guns, gun mountings, components for small calibre artillery, components for large calibre artillery, components for grenade launchers, components for anti-aircraft guns, components for mortars, equipment for the use of assault rifles, equipment for the use of rifles, equipment for the use of general purpose machine guns, equipment for the use of semi-automatic pistols, equipment for the use of submachine guns, equipment for the use of small calibre artillery, equipment for the use of large calibre artillery, equipment for the use of grenade launchers, equipment for the use of anti-aircraft guns, equipment for the use of mortars, equipment for the use of rocket launching equipment, gun laying equipment, components for gun laying equipment.
22	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
23	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22.
24	P	Components for large calibre artillery.
25	P	Shotguns, sporting rifles, components for shotguns, components for sporting rifles, weapon sights, equipment for the use of shotguns, equipment for the use of sporting rifles, weapons cleaning equipment.
26	P	General naval vessel components.
27	P	Military equipment and components for ex-Royal Navy vessels excluding complete weapons or ammunition.
28	P	Military electronic equipment, software for the use of military electronic equipment, technology for the use of military electronic equipment.
29	P	Goods specified in the military list except for goods specified by PL5001, land mines specified by ML4 and related goods and chemicals specified in the chemical weapons convention (schedule 1) and specified by ML7a and ML7b and associated technology for these goods as specified in ML7i and ML18.
30	P	Military bridges, equipment for the use of military bridges.
31	P	Components for military communications equipment, equipment for the use of military communications equipment.
32	P	Components for large calibre artillery, components for small calibre artillery, components for naval light guns, components for anti-aircraft guns, components for mortars, components for military utility vehicles, components for bridge laying vehicles, components for tanks, components for armoured fighting vehicles.
33	P	Naval navigation equipment.
34	P	Sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, small arms ammunition, shotguns.
35	T	Shotguns.
36	P	General naval vessel components, components for submarines.
37	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for

New Zealand cont.

		tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
38	T	Weapons night sights.
39	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
40	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
41	P	Sporting gun ammunition, components for sporting gun ammunition.
42	P	Sporting rifles, components for sporting rifles, shotguns, components for shotguns.
43	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
44	P	General purpose machine guns, heavy machine guns.
45	P	Shotguns, sporting rifles.
46	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
47	P	General naval vessel components.
48	P	Ground vehicle military communications equipment.
49	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
50	P	General military aircraft components.
51	T	Naval electronic equipment.
52	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
53	P	Military electronic equipment, components for military electronic equipment.
54	P	Components for transport aircraft, technology for the use of components for transport aircraft, equipment for the use of components for transport aircraft.
55	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the

		use of general military vehicle components, technology for the use of general naval vessel components.
56	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
57	P	Sporting gun ammunition, components for sporting gun ammunition.
58	P	Anti-riot shields.
59	P	Shotguns, components for shotguns.
60	P	Shotguns, components for shotguns.
61	P	Components for military electronic equipment, technology for the use of components for military electronic equipment.
62	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
63	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.
64	T	Naval navigation equipment, components for naval navigation equipment.
65	P	Components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
66	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
67	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
68	P	Small arms ammunition.
69	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
70	P	Components for military communications equipment.
71	P	Components for missile scoring equipment, test equipment for missile scoring equipment, software for the use of missile scoring equipment, components for gun laying equipment, test

New Zealand cont.

		equipment for gun laying equipment, software for the use of gun laying equipment.
72	P	Components for military utility vehicles.
73	P	Equipment for the use of weapon sights.
74	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
75	P	Sporting rifles, components for sporting rifles, sporting gun ammunition, shotguns, weapon sights.
76	P	Software for the use of naval radars, technology for the use of naval radars, components for naval radars, test equipment for naval radars, equipment for the use of naval radars.
77	P	Shotguns, components for shotguns.
78	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
79	P	Shotguns, sporting rifles.
80	P	Sporting gun ammunition, components for sporting gun ammunition.
81	P	Components for sporting rifles.
82	P	Military electronic equipment, technology for the use of military electronic equipment.
83	P	Shotguns, components for shotguns, sporting rifles, components for sporting rifles, weapon sights.
84	P	Improvised explosive devices disposal equipment, technology for the use of improvised explosive disposal equipment.
85	P	Body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour, components for military helmets, military helmets.
86	P	Equipment employing cryptography
87	P	Components for machine pistols, components for assault rifles, components for pistols, components for semi-automatic pistols, components for machine guns

41	P	General naval vessel components, components for submarines.
42	P	Components for sniper rifles.
43	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
44	T	Weapons night sights.
45	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
46	P	Sporting gun ammunition, components for sporting gun ammunition.
47	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
48	P	General purpose machine guns, heavy machine guns.
49	P	Shotguns, sporting rifles.
50	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military

Norway cont.

		vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
51	P	Components for weapons day and night sights, components for anti-ship missiles, components for anti-armour missiles, components for missile jamming equipment, components for fire control equipment, components for optical target acquisition equipment, components for optical target surveillance equipment, components for optical target tracking equipment, components for electronic countermeasures equipment, components for periscopes, components for laser range finders, general military aircraft components, components for combat aircraft, components for combat helicopters, components for military surveillance aircraft, components for military infrared/thermal imaging equipment, imaging countermeasures equipment, components for laser weapons systems.
52	P	General naval vessel components.
53	P	Ground vehicle military communications equipment.
54	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
55	T	Weapons night sights.
56	P	General military aircraft components.
57	T	Military infrared/thermal imaging equipment.
58	T	Naval electronic equipment.
59	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
60	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
61	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
62	P	Military electronic equipment, components for military electronic equipment.
63	P	Components for transport aircraft, technology for the use of components for transport aircraft, equipment for the use of components for transport aircraft.
64	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the

Norway cont.

		use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
65	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
66	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
67	P	Components for armoured fighting vehicles, components for artillery rocket launching vehicles.
68	P	Sporting gun ammunition, components for sporting gun ammunition.
69	P	Anti-riot shields.
70	P	Demolition charges, military explosives.
71	P	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for bombs, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
72	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
73	P	Components for military image intensifier equipment, components for weapons day and night sights, castings for military aircraft head-up displays, components for weapons night sights, castings for airborne surveillance equipment, components for fire control equipment, components for optical target designator equipment, components for laser range finders, components for military infrared/thermal imaging equipment, components for optical target acquisition equipment, components for airborne radars, components for aircraft radars, components for military communications equipment, components for weapon sights, components for weapon fire simulation equipment, castings for chaff equipment, components for test equipment for military communications equipment, castings for combat aircraft, castings for torpedoes, castings for combat helicopters, components for air to surface missiles.
74	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.
75	T	Naval navigation equipment, components for naval navigation equipment.
76	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
77	P	Components for military electronic equipment.
78	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for

Norway cont.

		tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
79	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
80	P	Small arms ammunition.
81	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
82	P	Components for military communications equipment.
83	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
84	P	Components for NBC decontamination systems, components for NBC decontamination equipment, components for NBC protective equipment.
85	P	Equipment for the use of weapon sights.
86	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
87	P	Sporting rifles, components for sporting rifles, sporting gun ammunition, shotguns, components for shotguns.
88	T	Laser range finders, components for laser range finders, fire control equipment, weapon sights, components for fire control equipment, components for weapon sights, military image intensifier equipment, components for military image intensifier equipment, night vision goggles, components for night vision goggles, equipment for the use of laser range finders, test equipment for laser range finders, test equipment for military image intensifier equipment.
89	P	Sporting rifles, components for sporting rifles, sporting gun ammunition, shotguns, weapon sights.
90	P	Components for ground based radars, software for the use of ground based radars, technology for the use of ground based radars, equipment for the use of ground based radars, test equipment for ground based radars.
91	P	Software for the use of naval radars, technology for the use of naval radars, components for naval radars, test equipment for naval radars, equipment for the use of naval radars.
92	T	Military electronic equipment.
93	P	Components for military engineer vehicles.
94	P	Components for combat aircraft, components for airborne electronic warfare equipment, military electronic equipment.
95	P	Shotguns, components for shotguns.
96	P	Military aero-engines, components for military aero-engines.
97	P	Military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, components for combat aircraft, components

Norway cont.

		for ejector seats, ejector seats, military parachutes, combat aircraft simulators, chemical agent detection, equipment training equipment.
98	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
99	P	General naval vessel components.
100	P	Components for military transport aircraft, components for military aero-engines.
101	T	Vintage military aircraft, military training aircraft.
102	P	Sporting gun ammunition, components for sporting gun ammunition.
103	P	Military aero-engines, components for military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines.
104	P	Components for sporting rifles.
105	P	Shotguns, components for shotguns, sporting rifles, components for sporting rifles, weapon sights.
106	P	Improvised explosive devices disposal equipment, technology for the use of improvised explosive disposal equipment.
107	T	Remote ground sensor systems, software for the use of remote ground sensor systems.
108	P	Body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour, components for military helmets, military helmets.
109	P	Components for weapon sights.
110	P	Components for defensive systems against NBC agents.
111	P	Equipment employing cryptography
112	P	Components for machine pistols, components for assault rifles, components for pistols, components for semi-automatic pistols, components for machine guns
Licences revoked or whose coverage was amended during the period by the exclusion of the destination (including goods excluded in 2002 by amendment of 2002 and pre 2002 licences).

Oman

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 304.0m
---	----------

Number of SIELs issued covering:	
Items on the Military List	66
Other items	3
Military List and other items	0
Total number of SIELs issued	69

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

aiming devices (T), air to surface rocket launching equipment, anti-g/pressure suits, armoured all wheel drive vehicles (T), armoured plate, assault rifles (1), chemical agent detection equipment, combat helicopter simulators, combat helicopter training equipment, combat helicopters, components for aiming devices (T), components for airborne electronic warfare equipment, components for armoured personnel carriers, components for bombs, components for chemical agent detection equipment, components for combat aircraft, components for combat helicopters, components for ejector seats, components for fragmentation hand grenades, components for laser range finders, components for military communications equipment, components for military distress signalling equipment, components for military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment (T), components for military infrared/thermal imaging equipment, components for military training aircraft, components for military transport aircraft, components for naval navigation equipment, components for naval radars, components for smoke ammunition, components for sniper rifles (T), components for surface to air missile control/handling/launching equipment, components for unmanned air vehicles, components for weapon sights, cryptographic software, CS hand grenades, decoy flares, demolition charges, devices containing military pyrotechnic materials (T), equipment for operation of military aircraft in

Oman cont.

confined areas, equipment for the use of air to air missiles (T), equipment for the use of aircraft cannons, equipment for the use of combat helicopters, equipment for the use of large calibre artillery ammunition, equipment for the use of military aero-engines, equipment for the use of military devices for initiating explosives (T), equipment for the use of military improvised explosive device disposal equipment (T), equipment for the use of patrol craft, equipment for the use of sniper rifles (T), equipment for the use of swarming ropes, equipment for the use of test equipment for combat helicopters, equipment for the use of weapon sights (T), explosive ordnance disposal equipment (T), general military aircraft components, general military vehicle components, goods treated for signature suppression for military use, gun laying equipment, gun mountings, gun silencers, illuminators, improvised explosive device detection equipment (T), inert air to air missiles (T), inert guided missile decoy rounds, large calibre artillery ammunition, laser range finders (T), military aircraft ground equipment, military aircraft navigation equipment, military communications equipment, military engineer vehicles, military firing sets (T), military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment, military infrared/thermal imaging equipment (T), military parachutes, military parachutist equipment, military utility vehicles (T), munitions launching equipment, patrol craft, pistols (1), rebreathing swimming apparatus, revolvers (1), semi-automatic pistols (1), small arms ammunition, small calibre artillery ammunition, smoke canisters, smoke grenades, smoke hand grenades, sniper rifles (1) (T), sporting gun ammunition, sporting rifles (13), submachine guns (1), technology for the use of combat helicopters, test equipment for air to air missile launching equipment (T), test equipment for air to air missiles (T), test equipment for aircraft radars, test equipment for combat helicopters, test equipment for electronic warfare equipment, test equipment for laser warning detectors, test equipment for military communications equipment, test equipment for military electronic equipment, thunderflashes, torpedo handling equipment, training equipment for improvised explosive device disposal, weapon cleaning equipment, weapon day and night sights (T), weapon sight mounts, weapon sights (T)

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	P	Equipment employing cryptography.
3	P	Cryptographic software, equipment employing cryptography.
4	P	Equipment employing cryptography, cryptographic software.
5	P	Inertial equipment.
6	T	Imaging cameras.
7	T	Accelerometers, inertial equipment.
8	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
9	P	Equipment employing cryptography, cryptographic software.
10	P	Devices for initiating explosives, components for devices for initiating explosives.
11	P	Linear cutting explosive charges, devices for initiating explosives.
12	P	Cryptographic software.
13	P	Cryptographic software.
14	P	Equipment employing cryptography.
15	P	Devices for initiating explosives, firing sets.
16	T	Imaging cameras.
17	P	Software for the use of equipment employing cryptography.
18	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
19	P	Technology for the production of toxins.
20	T	Gyroscopes, inertial equipment, technology for the use of inertial equipment, technology for the use of gyroscopes.
21	P	Non-military explosives/propellants.
22	P	Equipment employing cryptography.
23	P	Devices for initiating explosives.
24	P	Components for combat helicopters, equipment for the use of combat helicopters, components for military aero-engines, technology for the use of combat helicopters.
25	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
26	P	Military communications equipment, military helmets, components for military communications equipment.

Oman cont.

27	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
28	P	Components for surface to air missiles, components for anti-armour missiles, components for surface to air missiles control equipment, components for surface to air missile handling equipment, components for surface to air missile launching equipment, components for anti-armour missiles control equipment, components for anti-armour missile handling equipment, components for anti-armour missiles launching equipment.
29	P	Components for ground based radars.
30	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
31	P	Components for naval radars, technology for the use of naval radars.
32	P	Components for military aircraft navigation equipment, components for aiming devices, components for aircraft head-up displays, components for optical target designator equipment, test equipment for military aircraft navigation equipment, test equipment for aiming devices, test equipment for aircraft head-up displays, test equipment for optical target designator equipment, test equipment for general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of aiming devices, technology for the use of aircraft head-up displays, technology for the use of optical target designator equipment, technology for the use of general military aircraft components.
33	P	Components for assault rifles, components for rifles, components for general purpose machine guns, components for semi-automatic pistols, components for submachine guns, gun mountings, components for small calibre artillery, components for large calibre artillery, components for grenade launchers, components for anti-aircraft guns, components for mortars, equipment for the use of assault rifles, equipment for the use of rifles, equipment for the use of general purpose machine guns, equipment for the use of semi-automatic pistols, equipment for the use of submachine guns, equipment for the use of small calibre artillery, equipment for the use of large calibre artillery, equipment for the use of grenade launchers, equipment for the use of anti-aircraft guns, equipment for the use of mortars, equipment for the use of rocket launching equipment.
34	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
35	P	Software for the use of naval electronic warfare training equipment.
36	P	Components for surface to air missile launching equipment, components for surface to air missiles.
37	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22.
38	P	Goods specified in the military list as ML1a, ML1b, PL5018 and ML2a (relating to smooth bore weapons with a calibre of 30mm or less), flash suppressors, gun mountings, gun silencers, weapon sights, components for anti-armour rockets, components for mortars, components for large calibre artillery, components for small calibre artillery, small arms ammunition, signal flares, smoke canisters, smoke hand grenades, stun grenades, pyrotechnic hand grenades, crowd control ammunition, tear gas/irritant ammunition, components for fire control equipment, components for ground based radars, components for laser range finders, components for attack alerting/warning equipment, components for tanks, components for armoured fighting vehicles, components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters, military parachutes, military image intensifier equipment, military infrared/thermal imaging equipment, military construction equipment, military field engineer equipment, components for vessels specified in the military list as ML9.
39	P	Components for corvettes, components for fast attack craft, components for naval engines, technology for corvettes, technology for fast attack craft, technology for the use of naval engines.
40	P	General naval vessel components.

Oman cont.

41	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters.
42	P	Components for mortars.
43	P	General naval vessel components, components for submarines.
44	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
45	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
46	P	General naval vessel components.
47	T	Weapons night sights.
48	P	General military aircraft components.
49	T	Naval electronic equipment.
50	P	General military aircraft components.
51	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
52	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
53	P	Components for combat aircraft.
54	P	Components for military communications equipment, artillery fire location equipment, components for artillery fire location equipment, software for the use of military communications equipment, software for the use of artillery fire location equipment, technology for the use of military communications equipment, technology for the use of artillery fire location equipment, test equipment for military communications equipment, test equipment for artillery fire location equipment, equipment for the use of military communications equipment, equipment for the use of artillery fire location equipment.
55	P	Equipment for the use of armoured fighting vehicles, equipment for the use of armoured personnel carriers, equipment for the use of armoured repair and recovery vehicles.
56	T	Naval navigation equipment, components for naval navigation equipment.
57	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
58	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military utility aircraft, components for military transport aircraft, components for military aircraft ground equipment.
59	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, equipment for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of military transport aircraft, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft.
60	T	Ground based radars.
61	P	Small arms ammunition.
62	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for combat helicopters, components for military utility helicopters, military aero-engines, components for

Oman cont.

		military aero-engines, military aircraft navigation equipment, aircraft military communication equipment, components for military aircraft navigation equipment, components for aircraft military communication equipment, military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for combat helicopters, test equipment for military utility helicopters, aircraft radars, components for aircraft radars, general military aircraft components, military electronic equipment, components for combat aircraft, components for combat helicopters, military aircraft ground equipment, military flying helmets, anti-g/pressure suits, military aircraft pressurised breathing equipment, military parachutes, night vision goggles, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of military aircraft navigation equipment, technology for the use aircraft military communication equipment, technology for the use of aircraft radars, technology for the use of military aircraft ground equipment, technology for the use of military flying helmets, technology for the use of anti-g/pressure suits, technology for the use of military aircraft pressurised breathing equipment, technology for the use of night vision goggles, technology for the use of general military aircraft components, technology for the use of military electronic equipment, ground based radars, components for ground based radars, missiles launching equipment, components for missile launching equipment, technology for the use of ground based radars, technology for the use of missiles launching equipment.
63	P	Components for aircraft military communication equipment, components for aircraft radars, components for combat aircraft, components for combat helicopters, components for military transport aircraft, components for military utility helicopters, components for military training aircraft, military aero-engines, components for military aero-engines, military aircraft pressurised breathing equipment, military parachutes, military flying helmets, anti-g/pressure suits, components for military transport aircraft, components for military utility helicopters, components for military training aircraft, equipment for the use of combat aircraft, equipment for the use of combat helicopters, equipment for the use of military transport aircraft, equipment for the use of military utility helicopters, equipment for the use of military training aircraft, general military vehicle components, bomb handling equipment.
64	P	Components for ground based radars, technology for the use of components for ground based radars.
65	P	Components for ground based radars, components for airborne radars, test equipment for ground based radars, test equipment for airborne radars, software for the use of ground based radars, software for the use of airborne radars, components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment.
66	P	Components for military utility vehicles.
67	P	Components for combat aircraft, components for combat helicopters, test equipment for components for combat aircraft, test equipment for components for combat helicopters.
68	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
69	P	Military helmets, components for military helmets, body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour.
70	P	Components for ground based radars.
71	P	Software for the use of naval radars, technology for the use of naval radars, components for naval radars, test equipment for naval radars, equipment for the use of naval radars.

20	P	Ground vehicle military communications equipment.
21	T	Military infrared/thermal imaging equipment.
22	T	Naval electronic equipment.
23	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
24	P	Military electronic equipment, components for military electronic equipment.
25	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
26	T	Naval navigation equipment, components for naval navigation equipment.
27	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
28	P	Small arms ammunition.
29	T	Military electronic equipment.
30	P	Components for military engineer vehicles.
31	P	General naval vessel components, technology for the use of general naval vessels components.
32	T	Vintage military aircraft, military training aircraft.
33	P	Improvised explosive devices disposal equipment, technology for the use of improvised explosive disposal equipment.
34	P	Equipment employing cryptography
Licences revoked or whose coverage was amended during the period by the exclusion of the destination (including goods excluded in 2002 by amendment of 2002 and pre 2002 licences).		
No.	Type	Ratings
1	P	5A002, 5D002

Portugal

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	35
Other items	0
Military List and other items	0
Total number of SIELs issued	35

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for military communications equipment, components for military utility helicopters, components for naval communications equipment, components for naval navigation equipment, components for nuclear radiation detection equipment, components for shotguns, military communications equipment, nuclear radiation detection equipment, production equipment for military utility helicopters, shotguns (43), sporting rifles (3), technology for the use of military communications equipment, weapon sight mounts

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
2	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
3	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
4	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
5	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
6	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
7	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.

20	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
21	T	Towed hydrophone arrays.
22	P	Devices for initiating explosives.
23	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
24	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
25	P	Devices for initiating explosives, components for devices for initiating explosives.
26	P	Equipment employing cryptography.
27	P	Devices for initiating explosives, firing sets.
28	P	Software for the use of equipment employing cryptography.

Portugal cont.

29	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
30	P	Equipment employing cryptography, software for the use of equipment employing cryptography
31	P	Towed hydrophone arrays.
32	P	Non-military explosives/propellants.
33	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
34	P	Military communications equipment, military helmets, components for military communications equipment.
35	P	Components for ground based radars.
36	T	Armoured all wheel drive vehicles.
37	P	Pyrotechnic signalling devices, components for anti-ship missiles, components for torpedoes, components for rocket launching equipment, components for chaff equipment, components for weapons control systems, components for naval radars, components for electronic countermeasure equipment, components for naval gun mountings, components for naval electronic warfare equipment, components for naval sonar equipment, components for naval communications equipment, components for naval navigation equipment, components for submarines, components for frigates, components for destroyers, components for fast attack craft, components for naval auxiliary vessels, general naval vessel components, components for military communications equipment, military electronic equipment, technology for the use of military communications equipment, technology for the use of naval gun mountings, technology for the use of naval electronic warfare equipment, technology for the use of naval sonar equipment, technology for the use of naval communications equipment, technology for the use of naval navigation equipment, technology for the use of submarines, technology for the use of frigates, technology for the use of fast attack craft, technology for the use of naval auxiliary vessels, technology for the use of electronic countermeasure equipment, technology for the use of naval radars, technology for the use of weapons control systems, technology for the use of rocket launching equipment, technology for the use of chaff equipment, technology for the use of pyrotechnic signalling devices, technology for the use of anti-ship missiles, technology for the use of torpedoes.
38	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
39	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.
40	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
41	P	Anti-riot shields.
42	P	Software for the use of naval electronic warfare training equipment.
43	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22.
44	P	General naval vessel components.
45	P	Components for combat helicopters, components for military utility helicopters.
46	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras, accessories for military photographic equipment, technology for the use of military surveillance aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military

Portugal cont.

		film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
47	P	Components for military communications equipment, equipment for the use of military communications equipment.
48	P	Components for large calibre artillery, components for small calibre artillery, components for naval light guns, components for anti-aircraft guns, components for mortars.
49	P	Naval navigation equipment.
50	P	General naval vessel components, components for submarines.
51	T	Weapons night sights.
52	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
53	P	Sporting gun ammunition, components for sporting gun ammunition.
54	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
55	P	General purpose machine guns, heavy machine guns.
56	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
57	P	General naval vessel components.
58	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
59	T	Military infrared/thermal imaging equipment.
60	T	Naval electronic equipment.
61	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
62	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
63	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
64	P	Military electronic equipment, components for military electronic equipment.

Portugal cont.

65	T	combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
66	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
67	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
68	T	Components for naval sonar equipment.
69	P	Anti-riot shields.
70	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
71	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.
72	T	Naval navigation equipment, components for naval navigation equipment.
73	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
74	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
75	P	Small arms ammunition.
76	P	Components for ground based radars, technology for the use of components for ground based radars.
77	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
78	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
79	P	Equipment for the use of weapon sights.
80	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components

Portugal cont.

		for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
81	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
82	P	Components for ground based radars.
83	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, air guns, veterinary/tranquillising rifles, rifles, sporting rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
84	P	Software for the use of naval radars, technology for the use of naval radars, components for naval radars, test equipment for naval radars, equipment for the use of naval radars, software for the use of ground based radars, technology for the use of ground based radars, components for ground based radars, equipment for the use of ground based radars, test equipment for ground based radars.
85	T	Military electronic equipment.
86	P	Military aero-engines, components for military aero-engines.
87	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
88	P	Military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, components for combat aircraft, components for ejector seats, ejector seats, military parachutes, combat aircraft simulators, chemical agent detection equipment training equipment.
89	P	Air guns, veterinary/tranquillising rifles, shotguns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, components for rifles, components for sporting rifles, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, sporting gun ammunition.
90	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
91	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, components for shotguns, components for rifles, components for sporting rifles, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, sporting gun ammunition.
92	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 3.0m
Number of SIELs issued covering:	
Items on the Military List	32
Other items	5
Military List and other items	0
Total number of SIELs issued	37

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

accessories for night vision goggles, body armour, chemical agent detection equipment, chemical agent detection equipment (T), chemical agent detection equipment training equipment (T), components for body armour, components for chemical agent detection equipment, components for combat helicopters, components for ejector seats, components for grenade launchers, components for gun laying equipment, components for military improvised explosive device disposal equipment (T), components for military training aircraft, components for naval radars, components for NBC respirators, components for optical target acquisition equipment, components for semi-automatic pistol fire simulation equipment, components for semi-automatic pistols, components for small arms ammunition, components for submachine gun fire simulation equipment, components for submachine guns, composite materials production equipment, corrosion resistant chemical manufacturing equipment, equipment for the use of gun laying equipment, equipment for the use of military improvised explosive device disposal equipment (T), equipment for the use of optical target acquisition equipment, general naval vessel components, goods treated for signature suppression for military use, gun laying equipment, gun laying equipment (T), improvised explosive device detection equipment (T), improvised explosive device disposal equipment (T), military diving apparatus, military helmets, military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment (T), NBC filters, NBC respirators, night vision goggles, optical target acquisition equipment, projectile launchers, semi-automatic pistols (5), shotguns (1), small arms ammunition, sporting rifles (7), submachine guns (5), submachine guns (1) (T), tear gas/irritant ammunition, technology for the use of chemical agent detection equipment, technology for the use of gun laying equipment, technology for the use of night vision goggles, technology for the use of semi-automatic pistols, technology for the use of submachine guns, toxic chemical precursors, training small arms ammunition

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Cryptographic software, equipment employing cryptography.
2	P	Equipment employing cryptography, cryptographic software.
3	P	Inertial equipment.
4	T	Imaging cameras.
5	T	Accelerometers, inertial equipment.
6	P	Direct view imaging equipment, image intensifier tubes, imaging cameras.
7	P	Equipment employing cryptography, cryptographic software.
8	P	Devices for initiating explosives, components for devices for initiating explosives.

Qatar cont.

9	P	Linear cutting explosive charges, devices for initiating explosives.
10	P	Cryptographic software.
11	P	Cryptographic software.
12	P	Equipment employing cryptography.
13	P	Software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography.
14	P	Devices for initiating explosives, firing sets.
15	T	Imaging cameras.
16	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
17	P	Technology for the production of toxins.
18	T	Gyroscopes, inertial equipment, technology for the use of inertial equipment, technology for the use of gyroscopes.
19	P	Non-military explosives/propellants.
20	P	Devices for initiating explosives.
21	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
22	P	Military communications equipment, military helmets, components for military communications equipment.
23	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
24	P	Components for assault rifles, components for rifles, components for general purpose machine guns, components for semi-automatic pistols, components for submachine guns, gun mountings, components for small calibre artillery, components for large calibre artillery, components for grenade launchers, components for anti-aircraft guns, components for mortars, equipment for the use of assault rifles, equipment for the use of rifles, equipment for the use of general purpose machine guns, equipment for the use of semi-automatic pistols, equipment for the use of submachine guns, equipment for the use of small calibre artillery, equipment for the use of large calibre artillery, equipment for the use of grenade launchers, equipment for the use of anti-aircraft guns, equipment for the use of mortars, equipment for the use of rocket launching equipment.
25	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
26	P	Software for the use of naval electronic warfare training equipment.
27	P	Components for fast attack craft, components for patrol craft, components for naval engines, technology for the use of fast attack craft, technology for the use of patrol craft, technology for the use of naval engines.
28	P	General naval vessel components.
29	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
30	P	General naval vessel components.
31	T	Weapons night sights.
32	T	Naval electronic equipment.
33	P	Components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for command and control vehicles, components for munitions launching vehicles, components for military ambulances.
34	P	Components for military communications equipment, software for the use of military communications equipment, software for the use of artillery fire location equipment, technology

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

body armour, heavy machine guns (30)*

Footnote

*DRC is subject to an EU arms embargo, imposed by a Declaration of 7/4/1993 with exemptions for humanitarian purposes adopted through Council Common Position 2002/829/CFSP of 21 October 2002.

The embargo was put in place mainly to ensure the safety of international troops and civilian personnel deployed in the DRC. The decision to grant an exemption does not affect HMG's continued support for the EU arms embargo on the DRC.

The decision to grant an exemption to the EU arms embargo on the DRC was made on the basis that the equipment is needed by bona fide UN peacekeepers and is proportionate to the humanitarian needs of the Senegalese peacekeepers.

HMG fully supports the Senegalese troops deployed to the UN peacekeeping mission in the DRC. The decision underlines our continued support for the work being done by peacekeepers within the country (HC 833W, 16 October 2002).

12	P	Military communications equipment, military helmets, components for military communications equipment.
13	T	Armoured all wheel drive vehicles.
14	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
15	P	Aircraft military communications equipment, military communications equipment, equipment for the use of military communications equipment.
16	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
17	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras, accessories for military photographic equipment, technology for the use of military surveillance aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
18	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
19	P	Small arms ammunition.
20	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
21	P	Equipment employing cryptography, cryptographic software.
22	P	Equipment employing cryptography, technology for the development of equipment employing cryptography, equipment for the development of equipment employing cryptography, software for the use of equipment employing cryptography.
23	P	Software for the use of equipment employing cryptography.
24	P	Equipment employing cryptography

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.5m
Number of SIELs issued covering:	
Items on the Military List	6
Other items	6
Military List and other items	0
Total number of SIELs issued	12

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

body armour, chemical agent detection equipment, chemical agent detection equipment (T), components for improvised explosive device disposal equipment, components for military communications equipment, components for remote ground sensor systems (T), computer analogue to digital equipment, cryptographic software, equipment employing cryptography, equipment for evaluating and validating information security functions, radiation hardened TV cameras, remote ground sensor systems (T), software for the use of remote ground sensor systems (T), sporting gun ammunition

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Inertial equipment.
2	P	Products containing thorium, products containing depleted uranium, products containing natural uranium, products containing plutonium -239, uranium -233, products containing enriched uranium, products containing enriched uranium -233, deuterium solutions.
3	P	Equipment employing cryptography, cryptographic software.
4	P	Cryptographic software.
5	P	Cryptographic software.
6	P	Equipment employing cryptography.
7	P	Software for the use of equipment employing cryptography.
8	P	Technology for the production of toxins.
9	P	Cryptographic software, equipment employing cryptography.
10	P	Military communications equipment, military helmets, components for military communications equipment.
11	P	Components for ground based radars.
12	T	Armoured all wheel drive vehicles.
13	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras, accessories for military photographic equipment, technology for the use of military surveillance aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
14	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.

Slovenia cont.

15	P	General purpose machine guns, heavy machine guns.
16	P	Components for ground based radars, technology for the use of components for ground based radars.
17	P	Components for NBC decontamination systems, components for NBC decontamination equipment, components for NBC protective equipment.
18	P	Military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment.
19	P	Components for ground based radars.
20	P	Components for defensive systems against NBC agents.
21	P	Equipment employing cryptography

sporting gun ammunition

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	P	Equipment employing cryptography.
3	P	Equipment employing cryptography.
4	P	Devices for initiating explosives.
5	P	Inertial equipment.
6	P	Bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment.
7	P	Products containing thorium, products containing depleted uranium, products containing natural uranium, products containing plutonium -239, uranium -233, products containing enriched uranium, products containing enriched uranium -233, deuterium solutions.
8	T	Radiation hardened TV cameras, radiation hardened TV cameras lenses.
9	P	Animal pathogens.
10	T	Accelerometers, inertial equipment.
11	P	Direct view imaging equipment, image intensifier tubes, imaging cameras.
12	P	Accessories for semiconductor process equipment, components for semiconductor process equipment.
13	P	Technology for the development of equipment employing cryptography, development equipment for equipment employing cryptography, equipment employing cryptography, cryptographic software.
14	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.

South Africa cont.

15	P	Inertial equipment.
16	P	Equipment employing cryptography, cryptographic software.
17	P	Devices for initiating explosives, components for devices for initiating explosives.
18	P	Accelerometers, components for accelerometers, gyroscopes, components for gyroscopes, inertial equipment, components for inertial equipment, gyro-astro compasses, global positioning satellite receivers, components for global positioning satellite receivers, radio altimeters, RF direction finding equipment, components for RF direction finding equipment, passive directional sensors for rockets, flight control systems for rockets.
19	P	Cryptographic software.
20	P	Cryptographic software.
21	P	Equipment employing cryptography, software for the use of equipment employing cryptography.
22	P	Equipment employing cryptography.
23	P	Marine position fixing equipment.
24	P	Software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography.
25	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
26	P	Cryptographic software.
27	P	Software for the use of equipment employing cryptography.
28	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
29	P	Technology for the production of toxins.
30	P	Corrosion resistant chemical manufacturing equipment.
31	T	Gyroscopes, inertial equipment, technology for the use of inertial equipment, technology for the use of gyroscopes.
32	P	Radiation hardened integrated circuits, extended temperature range integrated circuits, general purpose integrated circuits, components for underwater communication systems, components for radio transmitters, components for radio receivers, components for telecommunications equipment using signal processing.
33	P	Towed hydrophone arrays.
34	P	Corrosion resistant chemical manufacturing equipment, components for corrosion resistant chemical manufacturing equipment.
35	P	Equipment employing cryptography.
36	P	Components for combat helicopters, equipment for the use of combat helicopters, components for military aero-engines, technology for the use of combat helicopters.
37	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
38	P	Military communications equipment, military helmets, components for military communications equipment.
39	P	Components for military aero-engines, equipment for the use of military aero-engines, military aircraft ground equipment, technology for the use of military aero-engines.
40	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
41	P	Components for naval radars, technology for the use of naval radars.
42	P	Components for military bridges.
43	P	Components for aiming devices, test equipment for aiming devices, technology in the use of aiming devices.
44	P	Aircraft military communications equipment, military communications equipment, equipment for the use of military communications equipment.
45	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles.

South Africa cont.

46	P	Equipment for the use of military training aircraft, equipment for the development of military training aircraft, production technology for military training aircraft.
47	P	Components for combat aircraft, components for military training aircraft.
48	P	Components for military transport aircraft.
49	P	General naval vessel components.
50	P	Military equipment and components for ex-Royal Navy vessels excluding complete weapons or ammunition.
51	P	Military electronic equipment, software for the use of military electronic equipment, technology for the use of military electronic equipment.
52	P	Components for military training aircraft, production technology for military training aircraft, production equipment for military training aircraft, test equipment for military training aircraft.
53	P	Goods specified in the military list as ML10a and ML10b.
54	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.
55	P	Components for military communications equipment, components for aircraft military communications equipment, components for naval communications equipment, components for electronic warfare equipment, components for airborne electronic warfare equipment, components for naval electronic warfare equipment, components for ground based radars, components for airborne radars, components for aircraft radars, components for air to air missiles, components for air to surface missiles, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for surface to air missiles, components for surface to surface missiles.
56	P	Sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, small arms ammunition, shotguns.
57	T	Shotguns.
58	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility helicopters, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
59	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
60	P	Sporting rifles, components for sporting rifles, shotguns, components for shotguns.
61	P	Ballistic test equipment, components for ballistic test equipment, software for the use of ballistic test equipment.
62	P	Components for military infrared/thermal imaging equipment.
63	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.

South Africa cont.

64	P	General naval vessel components.
65	T	Naval electronic equipment.
66	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
67	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
68	T	Military electronic equipment, components for military electronic equipment.
69	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
70	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
71	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
72	P	Components for military aero-engines.
73	P	Shotguns, components for shotguns.
74	P	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for bombs, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components, military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
75	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 20.0m
Number of SIELs issued covering:	
Items on the Military List	117
Other items	4
Military List and other items	1
Total number of SIELs issued	122

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

air guns (2), air to air missile simulators (T), airborne electronic warfare equipment, airborne radars (T), anti-riot guns (T), anti-riot shields, anti-riot shields (T), armoured all wheel drive vehicles (T), assault rifles (21), assault rifles (3) (T), ballistic test equipment (T), castings for combat aircraft, castings for military aero-engines, castings for tanks, chaff, combat aircraft simulators (T), combat shotguns (2) (T), components for aiming devices (T), components for airborne electronic warfare equipment, components for airborne radars (T), components for airborne targeting equipment, components for aircraft radars, components for armoured fighting vehicles, components for assault rifles, components for assault rifles (T), components for attack alerting/warning equipment, components for chaff equipment, components for combat aircraft, components for ejector seats, components for electronic warfare equipment, components for frigates, components for ground based radars, components for guided missile decoying equipment, components for large calibre artillery, components for large calibre artillery ammunition, components for military communications equipment, components for military improvised explosive device disposal equipment, components for military infrared/thermal imaging equipment, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for mine hunting equipment, components for munition fuses, components for naval electronic warfare equipment, components for naval sonar equipment, components for semi-automatic pistols (T), components for tanker aircraft, components for test models for the development of military transport aircraft, components for weapon day and night sights, crowd control ammunition (T), decoy flares, equipment for operation of military aircraft in confined areas (T), equipment for the use of airborne radars (T), equipment for the use of military communications equipment, equipment for the use of military communications equipment (T), equipment for the use of military improvised explosive device disposal equipment, equipment for the use of naval sonar equipment, equipment for the use of naval sonar equipment (T), forgings for combat aircraft, general military aircraft components, general naval vessel components, general purpose machine guns (1), ground vehicle military communications equipment, ground vehicle military communications equipment (T), guided missile decoy rounds, gun mountings (T), heavy machine guns (3), human pathogens, improvised explosive device detection equipment, inert ammunition, inertial equipment (T), instrumentation cameras, large calibre artillery ammunition, laser range finders (T), military aircraft navigation equipment, military communications equipment, military communications equipment (T), military electronic equipment, military explosives, military improvised explosive device disposal equipment, military infrared/thermal imaging equipment, military navigation equipment (T), military parachutes (T), military parachutist equipment (T), military surveillance aircraft (T), military utility vehicles, military utility vehicles (T), naval sonar equipment, NBC clothing, NBC filters, non-military training grenades, non-sporting shotgun ammunition, nuclear reactor fuel element fabrication equipment, production equipment for large calibre artillery ammunition, remote ground sensor systems (T), revolvers (3) (T), rifles (1), semi-automatic pistols (7), semi-automatic pistols (4) (T), shotguns (3), small arms ammunition, small arms ammunition (T), software for the development of airborne radars (T), software for the development of developmental warheads, software for the use of air to air missile simulators (T), software for the use of combat aircraft simulators (T), software for the use of guided missile decoying equipment simulators, software for the use of military communications equipment (T), software for the use of military electronic equipment, sporting rifles (3), submachine guns (1), tear gas/irritant ammunition, technology for the use of guided missile decoying equipment simulators, technology for the use of infrared/thermal imaging equipment, technology for the use of military improvised explosive device disposal equipment, technology for the use of software for the development of developmental warheads, test equipment for military communications equipment, test models for the development of military transport aircraft, training large calibre artillery ammunition, weapon day and night sights (T)

Number of SITLs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
Total number of SITLs issued	1

The SITLs issued were granted for the following items:

components for surface to air missiles

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).

No	Type	Goods Summary
1	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
2	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
3	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
4	P	Semi-automatic pistols, shotguns, pistols, revolvers, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, vintage guns, deactivated weapons, weapon sights, components for semi-automatic pistols, components for shotguns, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
5	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
6	P	Shotguns, rifles, sporting rifles, replica weapons, replica vintage guns, veterinary/tranquillising rifles, vintage guns, air guns, deactivated weapons, weapon sights, components for shotguns, components for rifles, components for sporting rifles, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, components

		ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
21	T	Towed hydrophone arrays.
22	P	Technology for the development of cryptographic software.
23	P	Instrumentation cameras.
24	P	Devices for initiating explosives.
25	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
26	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
27	P	Equipment employing cryptography.
28	P	Cryptographic software.
29	P	Devices for initiating explosives, firing sets.
30	P	Software for the use of equipment employing cryptography.
31	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
32	P	Towed hydrophone arrays.
33	P	Non-military explosives/propellants.
34	P	Military electronic equipment.
35	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
36	P	Military communications equipment, military helmets, components for military communications equipment.
37	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
38	P	Components for ground based radars.
39	T	Armoured all wheel drive vehicles.
40	P	Pyrotechnic signaling devices, components for anti-ship missiles, components for torpedoes, components for rocket launching equipment, components for chaff equipment, components for weapons control systems, components for naval radars, components for electronic countermeasure equipment, components for naval gun mountings, components for naval electronic warfare equipment, components for naval sonar equipment, components for naval communications equipment, components for naval navigation equipment, components for submarines, components for frigates, components for destroyers, components for fast attack craft, components for naval auxiliary vessels, general naval vessel components, components for military communications equipment, military electronic equipment, technology for the use of military communications equipment, technology for the use of naval gun mountings, technology for the use of naval electronic warfare equipment, technology for the use of naval sonar equipment, technology for the use of naval communications equipment, technology for the use of naval navigation equipment, technology for the use of submarines, technology for the use of frigates, technology for the use of fast attack craft, technology for the use of naval auxiliary vessels, technology for the use of electronic countermeasure equipment, technology for the use of naval radars, technology for the use of weapons control systems, technology for the use of rocket launching equipment, technology for the use of chaff equipment, technology for the use of pyrotechnic signaling devices, technology for the use of anti-ship missiles, technology for the use of torpedoes.
41	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
42	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.

Spain cont.

43	P	Components for aircraft radars, components for optical target designator equipment, test equipment for aircraft radars, test equipment for optical target designator equipment, technology for the use of aircraft radars, technology for the use of optical target designator equipment.
44	P	Components for combat aircraft.
45	P	aircraft military communications equipment, military communications equipment, equipment for the use of military communications equipment.
46	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles, equipment for the use of laser range finders, optical target designator equipment.
47	P	Anti-riot shields.
48	P	Components for combat helicopters, components for military transport aircraft, components for military utility helicopters, components for combat aircraft.
49	P	Software for the use of naval electronic warfare training equipment.
50	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22.
51	P	General naval vessel components, test equipment for general naval vessel components.
52	P	General naval vessel components.
53	P	Military electronic equipment, software for the use of military electronic equipment, technology for the use of military electronic equipment.
54	P	Components for armoured fighting vehicles, technology for the use of components for armoured fighting vehicles.
55	P	Goods specified in the military list as ML10a and ML10b.
56	P	Military electronic equipment, general military aircraft components, equipment for operation of military aircraft in confined areas, test equipment for military electronic equipment, test equipment for general military aircraft components, test equipment for equipment for operation of military aircraft in confined areas.
57	P	Components for military communications equipment, components for aircraft military communications equipment, components for naval communications equipment, components for electronic warfare equipment, components for airborne electronic warfare equipment, components for naval electronic warfare equipment, components for ground based radars, components for airborne radars, components for aircraft radars, components for air to air missiles, components for air to surface missiles, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for surface to air missiles, components for surface to surface missiles.
58	T	Components for military surveillance aircraft, components for military aero-engines, military aircraft pressurised breathing equipment, military flying helmets, military video recording equipment, military video processing equipment, accessories for military video recording equipment, accessories for military video processing equipment, military film processing equipment, military cameras, military photographic equipment, components for military film processing equipment, components for military cameras, components for military photographic equipment, accessories for military film processing equipment, accessories for military cameras, accessories for military photographic equipment, technology for the use of military surveillance aircraft, technology for the use of military aero-engines, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military film processing equipment, technology for the use of military cameras, technology for the use of military photographic equipment.
59	P	Components for military communications equipment, equipment for the use of military communications equipment.
60	P	Components for large calibre artillery, components for small calibre artillery, components for naval light guns, components for anti-aircraft guns.
61	P	Naval navigation equipment.
62	P	General naval vessel components, components for submarines.
63	T	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment

Spain cont.

		for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, technology for the use of test equipment for combat helicopters, technology for the use of test equipment for military utility helicopters, components for naval engines.
64	T	Weapons night sights.
65	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
66	P	Forgings for military aero-engines, forgings for military transport aircraft, forgings for military utility helicopters, forgings for combat aircraft, forgings for military training aircraft, forgings for combat helicopters, forgings for military search and rescue aircraft, forgings for military surveillance aircraft, forgings for military utility aircraft.
67	P	Armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles.
68	P	Sporting gun ammunition, components for sporting gun ammunition.
69	P	Aircraft cannon ammunition, training aircraft cannon ammunition, small calibre artillery ammunition, training small calibre artillery ammunition.
70	P	Components for heavy machine guns, components for general purpose machine guns, components for mortars, weapons cleaning equipment, equipment for the use of heavy machine guns, equipment for the use of general purpose machine guns, equipment for the use of mortars, gun mountings.
71	P	General purpose machine guns, heavy machine guns.
72	P	General military aircraft components, technology for the use of general military aircraft components, general military vehicle components, technology for the use of general military vehicle components, components for combat aircraft, equipment for the use of combat aircraft, technology for the use of equipment for the use of combat aircraft, technology for the use of combat aircraft.
73	P	Components for weapons day and night sights, components for anti-ship missiles, components for anti-armour missiles, components for missile jamming equipment, components for fire control equipment, components for optical target acquisition equipment, components for optical target surveillance equipment, components for optical target tracking equipment, components for electronic countermeasures equipment, components for periscopes, components for laser range finders, components for combat aircraft, components for combat helicopters, components for military surveillance aircraft, components for military infrared/thermal imaging equipment, imaging countermeasures equipment, components for laser weapons systems.
74	P	General naval vessel components.
75	P	Ground vehicle military communications equipment.
76	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
77	P	General military aircraft components.
78	T	Military infrared/thermal imaging equipment.
79	T	Naval electronic equipment.
80	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.

Spain cont.

81	P	Components for submarines, components for naval engines, components for periscopes, components for torpedoes, components for naval mines, components for naval electronic warfare equipment, components for naval sonar equipment, components for aircraft carriers, components for surface to air missile launching equipment, components for heavy machine guns, components for guided missile decoying equipment, components for command communications control and intelligence equipment, components for naval communications equipment, components for weapons control systems, components for naval radars, components for fire control equipment, components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military aero-engines, components for frigates, components for anti-ship missiles, components for surface to air missiles, components for small calibre artillery, components for torpedoes decoying equipment, components for anti-ship missiles launching equipment, components for torpedoes launching equipment, components for anti-submarine rocket launching equipment, components for corvettes, components for combat helicopters, components for aircraft radars, components for depth charges, technology for the use of combat helicopters, technology for the use of military aero-engines, technology for the use of aircraft radars, technology for the use of airborne electronic warfare equipment, technology for the use of torpedoes, technology for the use of depth charges, technology for the use of anti-ship missiles, components for military sonar detection equipment, technology for the use of military sonar detection equipment, components for patrol craft, components for mortars, components for heavy machine guns, components for naval auxiliary vessels, components for general purpose machine guns.
82	P	Components for combat aircraft, test equipment for components for combat aircraft, equipment for the use of components for combat aircraft, technology for the use of components for combat aircraft.
83	P	Components for aircraft carriers, components for naval auxiliary vessels, components for patrol craft, general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for naval auxiliary vessels, technology for the use of components for patrol craft, technology for the use of general naval vessel components.
84	P	Military electronic equipment, components for military electronic equipment.
85	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
86	P	General military aircraft components, general military vehicle components, general naval vessel components, technology for the use of general military aircraft components, technology for the use of general military vehicle components, technology for the use of general naval vessel components.
87	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
88	T	Components for naval sonar equipment.
89	P	Components for sporting gun ammunition.
90	P	Components for military communications equipment, software for the use of military communications equipment, software for the use of artillery fire location equipment, technology for the use of military communications equipment, technology for the use of artillery fire location equipment, test equipment for military communications equipment, test equipment for artillery fire location equipment, equipment for the use of military communications equipment, equipment for the use of artillery fire location equipment.
91	P	Anti-riot shields.
92	T	Components for air to air missiles, components for air to surface missiles, components for air to surface rockets, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, air to surface rocket decoying equipment, bomb decoying equipment, guided missile decoying equipment, airborne radars, aircraft radars, artillery fire location equipment, ground based radars, naval radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasure equipment, naval communications equipment, naval electronic warfare equipment, aircraft military communication equipment, general military aircraft components,

Spain cont.

		military aircraft navigation equipment, airborne electronic warfare equipment, command communication control and intelligence equipment, electronic warfare equipment, military communications equipment, military navigation equipment, high power RF weapons systems.
93	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.
94	P	Naval navigation equipment, components for naval navigation equipment.
95	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
96	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
97	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military utility aircraft, components for military transport aircraft, components for military aircraft ground equipment.
98	P	Components for combat aircraft, components for combat helicopters, components for military transport aircraft, equipment for the use of combat aircraft, equipment for the use of combat helicopters, equipment for the use of military transport aircraft, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for military transport aircraft, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military transport aircraft.
99	P	Small arms ammunition, components for small arms ammunition, training small arms ammunition, components for training small arms ammunition, components for aircraft cannon ammunition, components for small calibre artillery ammunition, components for large calibre artillery ammunition.
100	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
101	P	Small arms ammunition.
102	P	Components for ground based radars, technology for the use of components for ground based radars.
103	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
104	P	Components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment, components for ground based radars, components for airborne radars, test equipment for ground based radars, test equipment for airborne radars, software for the use of ground based radars, software for the use of airborne radars.

Spain cont.

105	P	Airborne refuelling equipment, components for airborne refuelling equipment, military aircraft ground equipment, technology for the use of airborne refuelling equipment, technology for the use of military aircraft ground equipment.
106	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
107	P	Equipment for the use of weapon sights.
108	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
109	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
110	P	Components for ground based radars.
111	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, air guns, veterinary/tranquillising rifles, rifles, sporting rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
112	P	Test models for the development of military transport aircraft, components for environmental test facilities for military transport aircraft, technology for the development of military transport aircraft.
113	T	Military electronic equipment.
114	P	Forgings for military training aircraft, forgings for combat aircraft, forgings for military aero-engines.
115	P	Military aero-engines, components for military aero-engines.
116	P	Components for ground based radars, test equipment for ground based radars, equipment for the use of ground based radars, software for the use of ground based radars, technology for the use of ground based radars.
117	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
118	P	Military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, components for combat aircraft, components for ejector seats, ejector seats, military parachutes, combat aircraft simulators, chemical agent detection equipment training equipment.
119	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, components for rifles, components for sporting rifles, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.5m
Number of SIELs issued covering:	
Items on the Military List	27
Other items	5
Military List and other items	0
Total number of SIELs issued	32

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

armoured all wheel drive vehicles, artillery computers (T), body armour, camouflage nets, components for armoured personnel carriers, components for artillery computers (T), components for combat helicopters, components for explosive ordnance disposal equipment, components for heavy machine guns, components for improvised explosive device detection equipment, components for military transport aircraft, components for naval light guns, equipment for the use of artillery computers (T), explosive ordnance disposal equipment, flash suppressors, improvised explosive device detection equipment, improvised explosive device disposal equipment, military ambulances, military cargo vehicles, military engineer vehicles, military trailers, military utility vehicles,

Sri Lanka cont.

NBC filters, NBC respirators, non-military explosives/propellants, projectile launchers, small arms ammunition, sporting gun ammunition, technology for the production of military airborne cargo nets, technology for the production of military camouflage nets, technology for the use of improvised explosive device detection equipment, toxic chemical precursors, weapon cleaning equipment

Number of SIELs refused covering:	
Items on the Military List	8
Other items	0
Military List and other items	0
Total number of SIELs refused	8

Rating	ML1	ML2	ML22	PL5017
No of SIELs covering items with this rating	6	1	1	6

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	T	Accelerometers, inertial equipment.
2	P	Equipment employing cryptography, cryptographic software.
3	P	Equipment employing cryptography.
4	P	Software for the use of equipment employing cryptography.
5	P	Improvised explosive devices disposal equipment, non-military firing sets.
6	P	Toxic chemical precursors.
7	P	Military communications equipment, military helmets, components for military communications equipment.
8	P	Software for the use of naval electronic warfare training equipment.
9	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
10	P	Military airborne cargo nets and stops, military airborne cargo handling equipment, goods treated for signature suppression, components for military transport aircraft, equipment for the use of military airborne cargo nets and stops, equipment for the use of goods treated for signature suppression, equipment for the use of components for military transport aircraft, equipment for the use of military airborne cargo handling equipment.
11	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
12	P	Military helmets, components for military helmets, body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour.
13	T	Technology for the production of components for military transport aircraft, technology for the production of military airborne cargo nets, components for military camouflage nets, technology for the production of military camouflage nets, technology for the production of equipment for operation of military aircraft in confined areas.
14	P	Equipment employing cryptography
15	P	Imaging cameras
Licences revoked or whose coverage was amended during the period by the exclusion of the destination (including goods excluded in 2002 by amendment of 2002 and pre 2002 licences).

91	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.
92	T	Naval navigation equipment, components for naval navigation equipment.
93	P	Components for combat aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for tanker aircraft, components for combat helicopters, components for military utility helicopters, military aircraft flight data recorders, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, equipment for the use of components for combat aircraft, equipment for the use of components for military search and rescue aircraft, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military training aircraft, equipment for the use of components for military utility aircraft, equipment for the use of components for combat helicopters, equipment for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military search and rescue aircraft, technology for the use of test equipment for military surveillance aircraft, technology for the use of test equipment for military training aircraft, technology for the use of test equipment for military transport aircraft, technology for the use of test equipment for military utility aircraft, components for naval engines.
94	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military utility aircraft, components for military transport aircraft, components for military aircraft ground equipment.
95	P	Components for combat aircraft, components for military training aircraft, components for military surveillance aircraft, equipment for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of military surveillance aircraft, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military surveillance aircraft, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military surveillance aircraft.
96	P	Air to surface missiles, components for air to surface missiles, military aero-engines, software for the use of air to surface missiles, training equipment for air to surface missiles, equipment for the use of air to surface missiles, air to surface missile handling equipment, technology for the production of air to surface missiles, technology for the use of air to surface missiles, technology for the production of components for air to surface missiles, technology for the use of software for the use of air to surface missiles, technology for the use of software for the production of components for air to surface missiles, technology for the use of software for the production of components for air to surface missiles, technology for the use of software for the production of components for air to surface missiles, technology for the production of military aero-engines, technology for the use of military aero-engines, technology for the production of components for military aero-engines, technology for the use of components for military aero-engines.
97	P	Small arms ammunition.
98	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
99	P	Components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment.
100	P	Airborne refuelling equipment, components for airborne refuelling equipment, military aircraft ground equipment, technology for the use of airborne refuelling equipment, technology for the use of military aircraft ground equipment.
101	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.

Sweden cont.

102	P	Components for NBC decontamination systems, components for NBC decontamination equipment, components for NBC protective equipment.
103	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
104	P	Software for the development of naval sonar equipment, technology for the use of software for the development of naval sonar equipment.
105	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, air guns, veterinary/tranquillising rifles, rifles, sporting rifles, shotguns, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for air guns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for vintage guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
106	P	Components for combat aircraft, components for airborne electronic warfare equipment, military electronic equipment.
107	P	Military aero-engines, components for military aero-engines.
108	P	Air guns, shotguns, veterinary/tranquillising rifles, replica weapons, replica vintage guns, deactivated weapons, vintage guns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition.
109	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for air guns, components for shotguns, components for veterinary/tranquillising rifles, components for replica weapons, components for replica vintage guns, components for deactivated weapons, components for vintage guns, components for rifles, components for sporting rifles, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, sporting gun ammunition.
110	P	Military pyrotechnic materials.
111	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
112	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, components for shotguns, components for rifles, components for sporting rifles, components for semi-automatic pistols, components for pistols, components for revolvers, components for sporting pistols, components for replica weapons, components for replica vintage guns, components for veterinary/tranquillising rifles, components for vintage guns, components for air guns, components for deactivated weapons, weapon sights, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, sporting gun ammunition.
113	P	Semi-automatic pistols, revolvers, replica weapons, replica vintage guns, vintage guns, deactivated weapons, pistols, sporting pistols, rifles, sporting rifles, air guns, veterinary/tranquillising rifles, shotguns, components for semi-automatic pistols, components for pistols, components for pistols, components for revolvers, components for sporting pistols, components for rifles, components for sporting rifles, components for shotguns, components for

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).		
No	Type	Goods Summary
1	P	Technology for the development of cryptographic software.
2	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
3	P	Triggered spark gaps.
4	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
5	P	Software for the use of equipment employing cryptography.
6	P	Thorium, natural uranium, depleted uranium.
7	P	Military communications equipment, military helmets, components for military communications equipment.
8	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
9	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
10	P	Components for ground based radars.
11	T	Armoured all wheel drive vehicles.
12	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.
13	P	Components for military bridges.
14	P	Components for weapon sights, components for aircraft head-up displays, components for aiming devices, test equipment for weapon sights, test equipment for aircraft head-up displays, test equipment for aiming devices, test equipment for general military aircraft components, technology for the use of weapon sights, technology for the use of aircraft head-up displays, technology for the use of aiming devices, technology for the use of general military aircraft components.
15	P	Software for the use of naval electronic warfare training equipment.
16	P	Components for surface to air missile launching equipment, components for surface to air missiles.
17	P	Goods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22.
18	P	General naval vessel components, test equipment for general naval vessel components.
19	P	Components for combat aircraft, components for military training aircraft.
20	P	Components for combat helicopters, components for military utility helicopters.
21	P	Components for armoured fighting vehicles, technology for the use of components for armoured fighting vehicles.
22	P	Components for military communications equipment, components for aircraft military communications equipment, components for naval communications equipment, components for electronic warfare equipment, components for airborne electronic warfare equipment, components for naval electronic warfare equipment, components for ground based radars, components for airborne radars, components for aircraft radars, components for air to air missiles, components for air to surface missiles, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for surface to air missiles, components for surface to surface missiles.

Switzerland cont.

23	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters.
24	P	Components for military utility helicopters, components for combat aircraft, components for military training aircraft, components for combat helicopters, equipment for the use of military utility helicopters, equipment for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of combat helicopters, technology for the use of components for military utility helicopters, technology for the use of components for combat aircraft, technology for the use of components for military training aircraft, technology for the use of components for combat helicopters, technology for the use of equipment for the use of military utility helicopters, technology for the use of equipment for the use of combat aircraft, technology for the use of equipment for the use of military training aircraft, technology for the use of equipment for the use of combat helicopters.
25	P	Components for military communications equipment, equipment for the use of military communications equipment.
26	P	Ejector seats, components for ejector seats, military parachutes, components for military parachutes, military aircraft ground equipment, components for combat aircraft, components for military training aircraft, technology for the use of ejector seats, technology for the use of military parachutes, technology for the use of military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of military training aircraft.
27	P	Sporting gun ammunition, components for sporting gun ammunition.
28	P	Components for weapons day and night sights, components for anti-ship missiles, components for anti-armour missiles, components for missile jamming equipment, components for fire control equipment, components for optical target acquisition equipment, components for optical target surveillance equipment, components for optical target tracking equipment, components for electronic countermeasures equipment, components for periscopes, components for laser range finders, components for combat aircraft, components for combat helicopters, components for military surveillance aircraft, components for military infrared/thermal imaging equipment, imaging countermeasures equipment, components for laser weapons systems.
29	P	Chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, technology for the use of chemical agent detection equipment, technology for the use of military electronic equipment, technology for the use of test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of military electronic equipment, software for the use of test equipment for chemical agent detection equipment, test equipment for military electronic equipment, equipment for the use of biological agent detection equipment, equipment for the use of military electronic equipment.
30	T	Weapons night sights.
31	P	General military aircraft components.
32	T	Military infrared/thermal imaging equipment.
33	P	Technology for the use of chemical agent detection equipment, production equipment for chemical agent detection equipment, test equipment for chemical agent detection equipment, equipment for the use of chemical agent detection equipment.
34	P	Military improvised explosive devices disposal equipment, explosive ordnance disposal equipment, linear cutting explosive charges, demolition charges, explosive ordnance disposal equipment.
35	P	General naval vessel components, components for military communications equipment, general military vehicle components, components for military aero-engines.
36	P	Military electronic equipment, components for military electronic equipment.
37	T	Combat aircraft, components for combat aircraft, military transport aircraft, components for military transport aircraft, military utility helicopters, components for military utility helicopters, military training aircraft, components for military training aircraft, combat helicopters, components for combat helicopters, military aircraft ground equipment, technology for the use of combat aircraft, technology for the use of components for combat aircraft, technology for the use of military transport aircraft, technology for the use of components for military transport aircraft, technology for the use of military utility helicopters, technology for the use of components for military utility helicopters, technology for the use of military training aircraft, technology for the use of components for military training aircraft, technology for the use of combat helicopters, technology for the use of components for combat helicopters, technology for the use of military aircraft ground equipment.
38	P	Components for combat helicopters.

Switzerland cont.

39	P	Clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use.
40	P	Components for military communications equipment, software for the use of military communications equipment, software for the use of artillery fire location equipment, technology for the use of military communications equipment, technology for the use of artillery fire location equipment, test equipment for military communications equipment, test equipment for artillery fire location equipment, equipment for the use of military communications equipment, equipment for the use of artillery fire location equipment.
41	P	Anti-riot shields.
42	P	General military aircraft components.
43	P	Demolition charges, explosive ordnance disposal equipment, military improvised explosive devices disposal equipment.
44	P	Shotguns, components for shotguns.
45	P	Components for military image intensifier equipment, components for weapons day and night sights, castings for military aircraft head-up displays, components for weapons night sights, castings for airborne surveillance equipment, components for fire control equipment, components for optical target designator equipment, components for laser range finders, components for military infrared/thermal imaging equipment, components for optical target acquisition equipment, components for airborne radars, components for aircraft radars, components for military communications equipment, components for weapon sights, components for weapon fire simulation equipment, castings for chaff equipment, components for test equipment for military communications equipment, castings for combat aircraft, castings for torpedoes, castings for combat helicopters, components for air to surface missiles.
46	P	Military aero-engines, components for military aero-engines, components for combat helicopters, components for military utility helicopters, military parachutes, equipment for the use of military aero-engines, equipment for the use of combat helicopters, equipment for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military parachutes.
47	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military surveillance aircraft, components for military aero-engines.
48	P	Components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military utility aircraft, components for military transport aircraft, components for military aircraft ground equipment.
49	P	Military aircraft navigation equipment, components for military aircraft navigation equipment, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components.
50	P	Small arms ammunition.
51	P	Components for ground based radars, technology for the use of components for ground based radars.
52	P	Components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment.
53	P	Military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, test equipment for the use of military aircraft pressurised breathing equipment, equipment for the use of military aircraft pressurised breathing equipment, technology for military aircraft pressurised breathing equipment.
54	P	Components for ground based radars.
55	P	Sporting rifles, components for sporting rifles, sporting gun ammunition, shotguns, components for shotguns.
56	P	Triggered spark gaps.
57	P	Test models for the development of military transport aircraft, components for environmental test facilities for military transport aircraft, technology for the development of military transport aircraft.
58	P	Software for the use of naval radars, technology for the use of naval radars, components for naval radars, test equipment for naval radars, equipment for the use of naval radars.
59	P	Components for military engineer vehicles.
60	P	Shotguns, components for shotguns.

Switzerland cont.

61	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
62	T	Vintage military aircraft, military training aircraft.
63	P	Shotguns, sporting rifles.
64	P	Sporting gun ammunition, components for sporting gun ammunition.
65	P	Components for sporting rifles.
66	P	Improvised explosive devices disposal equipment, technology for the use of improvised explosive disposal equipment.
67	P	Body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour, components for military helmets, military helmets.
68	P	Castings for unmanned air vehicles, components for weapon sights.
69	P	Equipment employing cryptography
70	P	Components for machine pistols, components for assault rifles, components for pistols, components for semi-automatic pistols, components for machine guns

66	P	Small arms ammunition.
67	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for combat helicopters, components for military utility helicopters, military aero-engines, components for military aero-engines, military aircraft navigation equipment, aircraft military communication equipment, components for military aircraft navigation equipment, components for aircraft military communication equipment, military aircraft ground equipment, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for combat helicopters, test equipment for military utility helicopters, aircraft radars, components for aircraft radars, general military aircraft components, military electronic equipment, components for combat aircraft, components for combat helicopters, military aircraft ground equipment, military flying helmets, anti-g/pressure suits, military aircraft pressurised breathing equipment, military parachutes, night vision goggles, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of combat helicopters, technology for the use of military utility helicopters, technology for the use of military aero-engines, technology for the use of military aircraft navigation equipment, technology for the use aircraft military communication equipment, technology for the use of aircraft radars, technology for the use of military aircraft ground equipment, technology for the use of military flying helmets, technology for the use of anti-g/pressure suits, technology for the use of military aircraft pressurised breathing equipment, technology for the use of night vision goggles, technology for the use of general military aircraft components, technology for the use of military electronic equipment.
68	P	Components for aircraft military communication equipment, components for aircraft radars, components for combat aircraft, components for combat helicopters, components for military transport aircraft, components for military utility helicopters, components for military training aircraft, military aero-engines, components for military aero-engines, military aircraft pressurised breathing equipment, military parachutes, military flying helmets, anti-g/pressure suits, components for military transport aircraft, components for military utility helicopters, equipment for the use of combat aircraft, equipment for the use of combat helicopters, equipment for the use of military transport aircraft, equipment for the use of military utility helicopters, general military vehicle components, bomb handling equipment.
69	P	Components for ground based radars, technology for the use of components for ground based radars.
70	P	Body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
71	P	Components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment, components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, software for the use of electronic countermeasures equipment, components for ground based radars, components for airborne radars, test equipment for ground based radars, test equipment for airborne radars, software for the use of ground based radars, software for the use of airborne radars.
72	P	Components for military utility vehicles.
73	P	Airborne refuelling equipment, components for airborne refuelling equipment, military aircraft ground equipment, technology for the use of airborne refuelling equipment, technology for the use of military aircraft ground equipment.
74	P	Components for air to surface missiles, components for combat aircraft, automatic piloting systems for parachuted loads, components for automatic piloting systems for parachuted loads, military aircraft ground equipment, equipment for the use of components for combat aircraft, equipment for the use of components for air to surface missiles, equipment for the use of automatic piloting systems for parachuted loads, technology for the use of components for combat aircraft, technology for the use of components for air to surface missiles, technology for the use of automatic piloting systems for parachuted loads.
75	P	General military aircraft components, components for tanker aircraft, airborne refuelling equipment, airborne navigation equipment, military aircraft pressurised breathing equipment, components for aircraft radars.
76	P	Military helmets, components for military helmets, body armour, ballistic shields, components for ballistic shields, goods treated for signature suppression for military use, components for body armour.
77	P	Components for ground based radars.

United Arab Emirates cont.

78	P	Cryptographic software.
79	P	Equipment employing cryptography.
80	T	Bathymetric survey systems.
81	P	Mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment.
82	P	Components for military transport aircraft, components for military aero-engines.
83	P	Cryptographic software.
84	P	Cryptographic software.
85	P	Equipment employing cryptography
86	P	Imaging cameras
87	P	Ground based radars, aircraft radars, military aircraft navigation equipment, military aircraft communications equipment, components for military training aircraft, components for military aero-engines, ejector seats, anti-g/pressure suits, military flying helmets, aircraft simulators, components for aircraft simulators, equipment for the use of military training aircraft, test equipment for military training aircraft, general military aircraft components
88	P	Rifles, sporting rifles, weapon sights, small arms ammunition, sporting gun ammunition.
Licences revoked or whose coverage was amended during the period by the exclusion of the destination (including goods excluded in 2002 by amendment of 2002 and pre 2002 licences).

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 256.5m
Number of SIELs issued covering:	
Items on the Military List	1130
Other items	47
Military List and other items	1
Total number of SIELs issued	1178

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

accessories for military infrared/thermal imaging equipment, additives to explosive chemicals, aiming devices, air guns (8825), air guns (1) (T), air to surface missile control equipment, air to surface missile control equipment (T), air to surface missile launching equipment (T), airborne electronic warfare equipment, aircraft military communications equipment, aircraft military communications equipment (T), aircraft radars, americium 241, animal pathogens, anthrax vaccines, anti-armour missile launching vehicles, anti-armour missile simulators, anti-armour rocket launching equipment, anti-riot shields, anti-tank weapons, armoured fighting vehicles, armoured personnel carriers, armoured plate, armoured repair and recovery vehicles, assault rifles (5480), attack alerting/warning equipment (T), ballistic test equipment, binders/plasticisers/monomers/polymers for energetic materials, biological agent detection equipment, blank ammunition, body armour, bomb launching equipment (T), bomb suits, castings for combat aircraft, castings for military aero-engines, castings for sniper rifles (T), chaff equipment, chaff equipment simulators, chemical agent detection equipment, chemical agent detection equipment (T), chemical agent detection equipment simulators, chemical agent detection equipment simulators (T), chemical agent detection equipment training equipment, chemical agent detection equipment training equipment (T), combat aircraft, combat helicopters (T), combat shotguns (2), combination rifle-shotguns (3), command and control vehicles, command communications control and intelligence software, command communications control and intelligence software (T), components for aiming devices, components for air to air missile launching equipment, components for air to surface missiles, components for air to surface missiles (T), components for airborne electronic warfare equipment, components for airborne radars, components for airborne refuelling equipment, components for airborne surveillance equipment, components for aircraft cannons, components for aircraft military communications equipment, components for aircraft military communications equipment (T), components for aircraft radars, components for anti-aircraft guns, components for anti-armour missile launching equipment, components for anti-armour missiles, components for anti-ship missile launching

equipment, components for anti-ship missiles, components for anti-tank weapons, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for assault rifles, components for body armour, components for bomb launching equipment (T), components for bomb suits, components for bombs, components for bombs (T), components for chaff equipment, components for chemical agent detection equipment, components for chemical agent detection equipment (T), components for chemical agent detection equipment simulators, components for combat aircraft, components for combat aircraft (T), components for combat aircraft simulators, components for combat helicopters, components for combat helicopters (T), components for combination rifle-shotguns, components for decoy flares, components for ejector seats, components for electronic countermeasures equipment, components for equipment for the development of electronic warfare equipment (T), components for explosive ordnance disposal equipment, components for fire control equipment, components for fragmentation hand grenades, components for general purpose machine guns, components for ground based radars, components for ground based radars (T), components for ground vehicle military communications equipment, components for guided missile decoy rounds, components for guided missile decoying equipment, components for gun silencers (T), components for heavy machine guns, components for helmet mounted display equipment, components for helmet mounted display equipment (T), components for large calibre artillery, components for large calibre artillery ammunition, components for laser weapon systems, components for machine pistols, components for military aero-engines, components for military aero-engines (T), components for military aircraft ground equipment (T), components for military aircraft head-down displays, components for military aircraft head-down displays (T), components for military aircraft head-up displays, components for military aircraft head-up displays (T), components for military aircraft navigation equipment, components for military cameras, components for military cargo vehicles, components for military communications equipment, components for military communications equipment (T), components for military electronic equipment, components for military electronic equipment (T), components for military firing sets (T), components for military improvised explosive device disposal equipment (T), components for military infrared/thermal imaging equipment, components for military infrared/thermal imaging equipment (T), components for military navigation equipment, components for military photographic equipment, components for military search and rescue aircraft, components for military sonar detection equipment, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military underwater remotely operated vehicles (T), components for military utility aircraft, components for military utility helicopter simulators, components for military utility helicopters, components for military utility helicopters (T), components for mine clearing equipment, components for mine countermeasures equipment, components for mine countermeasures equipment training equipment, components for mine detection equipment, components for mine hunters, components for mine hunting equipment, components for mine sweepers, components for missile scoring equipment, components for mortars, components for munition fuzes, components for munitions launching equipment, components for naval acoustic equipment (T), components for naval communications equipment, components for naval electronic warfare equipment, components for naval radars, components for naval sonar equipment (T), components for NBC filters, components for NBC respirators, components for optical target designator equipment, components for periscopes, components for pistols, components for practice bomb launching equipment (T), components for rifles, components for rifles (T), components for search and rescue aircraft, components for sensor data recorders, components for shotguns, components for shotguns (T), components for small arms ammunition, components for small calibre artillery, components for sniper rifles, components for sporting gun ammunition, components for sporting rifles, components for sporting rifles (T), components for submachine guns, components for submarines, components for surface to air missiles, components for surface to surface missile launching equipment, components for surface to surface missile training equipment, components for tanker aircraft, components for tanks, components for test equipment for military aero-engines, components for test equipment for military communications equipment, components for test equipment for military utility aircraft, components for test models for the development of combat aircraft, components for training anti-armour ammunition, components for training small arms ammunition, components for unmanned air vehicles, components for vintage military aircraft, components for warhead fuzes, components for weapon control systems, components for weapon day and night sights, components for weapon day and night sights (T), components for weapon night sights, components for weapons simulators, computer analogue to digital equipment, crowd control ammunition, defensive system against NBC agents, depleted uranium, electronic warfare equipment, equipment employing cryptography, equipment for the development of aircraft military communications equipment, equipment for the development of combat aircraft, equipment for the development of helmet mounted display equipment (T), equipment for the development of military aero-engines, equipment for the development of military parachutes (T), equipment for the use of anti-tank weapons, equipment for the use of attack alerting/warning equipment (T), equipment for the use of ballistic test equipment, equipment for the use of combat aircraft (T), equipment for the use of combat helicopters (T), equipment for the use of general purpose machine guns, equipment for the use of ground vehicle military communications equipment, equipment for the use of military acoustic detection equipment (T), equipment for the use of military aircraft head-up displays, equipment for the use of military communications equipment (T), equipment for the use of military improvised explosive device disposal equipment (T), equipment for the use of military parachutes (T), equipment for the use of military parachutist equipment (T), equipment for the use of military transport aircraft, equipment for the use of military underwater remotely operated vehicles (T), equipment for the use of mine clearing equipment (T), equipment for the use of munition fuzes, equipment for the

use of test models for the development of combat aircraft, equipment for the use of weapon sights, explosive ordnance disposal equipment, explosive ordnance disposal equipment (T), fire control equipment (T), flash suppressors, forgings for aircraft carriers, forgings for military aero-engines, forgings for naval engines, forgings for submarines, general military aircraft components, general military aircraft components (T), general military vehicle components, general naval vessel components, general naval vessel components (T), general purpose machine guns (201), goods treated for signature suppression for military use, grenade launchers, ground based radars, ground vehicle military communications equipment, ground vehicle military communications equipment (T), guided missile decoying equipment, gun mountings, gun silencers, handcuffs, helmet mounted display equipment (T), imaging cameras (T), improvised explosive device detection equipment, improvised explosive device disposal equipment, inert ammunition, inert fragmentation hand grenades, inert munition fuzes, inert pyrotechnic hand grenades, inert equipment, instrumentation cameras, laser range finders, laser range finders (T), linear cutting explosive charges, machine tools, mass spectrometers, microwave components, military acoustic detection equipment (T), military aero-engines, military airborne cargo handling equipment (T), military aircraft communications equipment, military aircraft flight data recorders, military aircraft ground equipment, military aircraft ground equipment (T), military aircraft head-down displays, military aircraft head-down displays (T), military aircraft head-up displays, military aircraft head-up displays (T), military aircraft navigation equipment, military ambulances, military cameras, military cameras (T), military cargo vehicles, military communications equipment, military communications equipment (T), military devices for initiating explosives, military electronic equipment, military electronic equipment (T), military engineer vehicles, military explosives, military firing sets (T), military flying helmets (T), military helmets, military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment, military infrared/thermal imaging equipment (T), military navigation equipment, military navigation equipment (T), military parachutes (T), military parachutist equipment (T), military propellants, military small arms training equipment, military training aircraft, military underwater remotely operated vehicles (T), military utility vehicles, mine clearance vehicles, mine clearing equipment (T), missile jamming equipment, missile scoring equipment (T), munitions launching equipment (T), naval acoustic equipment (T), naval communications equipment, naval communications equipment (T), naval light gun fire simulation equipment (T), naval navigation equipment, naval shock mounts, naval sonar equipment (T), NBC clothing, NBC filters, NBC protective equipment, NBC respirators, non-military explosives/propellants related substances, numerical control software, production equipment for airborne radars, production equipment for military propellants, production equipment for surface to air missiles, production equipment for surface to surface missiles, production technology for guided missile decoy rounds, products containing enriched uranium, remote ground sensor systems, remote ground sensor systems (T), replica antipersonnel land mines, replica rifle grenades, replica vintage guns (1), revolvers (3), rifle training equipment (T), rifles (2059), rifles (16) (T), semi-automatic pistols (2), semiconductor process equipment, semiconductor wafers with epitaxial layers, sensor data recorders, shotguns (14869), shotguns (84) (T), small arms ammunition, smoke ammunition, sniper rifle maintenance equipment, sniper rifles (3052), sniper rifles (2) (T), software for the development of combat helicopters (T), software for the development of cryptographic software, software for the development of electronic warfare equipment, software for the development of equipment employing cryptography, software for the development of military navigation equipment, software for the evaluation of weapon systems, software for the modelling of military operation scenarios (T), software for the modelling of weapon systems (T), software for the simulation of military operation scenarios (T), software for the simulation of weapon systems (T), software for the use of airborne electronic warfare equipment, software for the use of aircraft military communications equipment, software for the use of attack alerting/warning equipment (T), software for the use of ballistic test equipment, software for the use of chemical agent detection equipment, software for the use of combat aircraft, software for the use of combat aircraft (T), software for the use of combat helicopters, software for the use of electronic warfare equipment, software for the use of ground vehicle military communications equipment, software for the use of military aircraft ground equipment, software for the use of military communications equipment, software for the use of military communications equipment (T), software for the use of military parametric technical databases, software for the use of munition fuzes, software for the use of naval electronic warfare equipment, software for the use of naval sonar equipment, software for the use of optical target acquisition equipment, software for the use of remote ground sensor systems (T), software for the use of sensor data recorders, software for the use of surface to air missiles, software for the use of test equipment for combat helicopters (T), software for the use of test equipment for military aero-engines, software for the use of test equipment for mine countermeasures equipment, solid state lasers, sporting gun ammunition, sporting rifles (1418), sporting rifles (27) (T), submachine guns (209), surface to surface missile training equipment, surface to surface missiles, tanks, tear gas/irritant ammunition, technology for the development of air to surface missiles (T), technology for the development of military aircraft pressurised breathing equipment, technology for the development of naval sonar equipment, technology for the development of NBC respirators, technology for the development of unmanned air vehicle control/handling/launching equipment, technology for the development of unmanned air vehicles, technology for the production of equipment for the use of guided missile decoy rounds, technology for the production of guided missile decoy rounds, technology for the production of nuclear reactor fuel element fabrication equipment, technology for the production of uranium isotope separation equipment, technology for the use of air to surface missiles (T), technology for the use of aircraft military communications equipment, technology for the use of armoured fighting vehicles, technology for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment simulators, technology for the use of command communications control and intelligence software,

United States of America cont.

technology for the use of decoy flares, technology for the use of ejector seats, technology for the use of equipment employing cryptography, technology for the use of military aero-engines, technology for the use of military communications equipment, technology for the use of military infrared/thermal imaging equipment, technology for the use of military utility vehicles, technology for the use of naval navigation equipment, technology for the use of naval sonar equipment, technology for the use of sensor data recorders, technology for the use of sniper rifles, technology for the use of software for the development of cryptographic software, technology for the use of software for the development of equipment employing cryptography, technology for the use of software for the simulation of weapon systems (T), technology for the use of software for the use of electronic warfare equipment, technology for the use of software for the use of naval sonar equipment, technology for the use of sporting rifles, technology for uranium isotope separation equipment, test equipment for air to air missiles, test equipment for air to surface missiles (T), test equipment for airborne electronic warfare equipment, test equipment for airborne radars, test equipment for combat aircraft, test equipment for combat helicopters (T), test equipment for equipment employing cryptography, test equipment for helmet mounted display equipment, test equipment for military aero-engines, test equipment for military communications equipment, test equipment for military infrared/thermal imaging equipment, test equipment for military transport aircraft, test equipment for mine countermeasures equipment, test equipment for munition fuzes, test equipment for naval sonar equipment (T), test equipment for surface to air missiles, test equipment for unmanned air vehicles, test equipment for unmanned air vehicles (T), test models for the development of air to surface missiles, test models for the development of combat aircraft, test models for the development of combat aircraft (T), test models for the development of general military aircraft components (T), test models for the development of military training aircraft, test models for the development of military training aircraft (T), toxic chemical precursors, training hand grenades, training small arms ammunition, training tear gas/irritant ammunition, triggered spark gaps, turrets (T), unfinished products for combat aircraft, unfinished products for laser range finders, unfinished products for military aero-engines, unfinished products for revolvers, vintage guns (2) (T), vintage military aircraft, vintage military vehicles, weapon cleaning equipment, weapon sights, weapon sights (T)

Number of SIELs refused covering:

Items on the Military List	7
Other items	0
Military List and other items	0
Total number of SIELs refused	7

Rating	ML1	ML4	ML5	ML7	PL5001
No of SIELs covering items with this rating	1	1	1	1	3

Number of SITLs issued covering:

Items on the Military List	4
Other items	0
Military List and other items	0
Total number of SITLs issued	4

The SITLs issued were granted for the following items:

components for general purpose machine guns, flash suppressors, gun mountings, sporting gun ammunition, weapon sights

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2002 through the amendment of a pre 2002 licence).

No	Type	Goods Summary
1	T	Towed hydrophone arrays.
2	P	Devices for initiating explosives.
3	P	Technology for the development of non-military detonators, technology for the development of firing sets, technology for the development of high current pulse generators.
4	P	Products containing plutonium -239, products containing enriched uranium, products containing enriched uranium -233.
5	P	Devices for initiating explosives, demolition charges, military explosives, firing sets.
6	P	Triggered spark gaps.
7	P	Devices for initiating explosives, components for devices for initiating explosives.

United States of America cont.

8	P	Linear cutting explosive charges, devices for initiating explosives.
9	P	Cryptographic software.
10	P	Software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software employing cryptography.
11	P	Devices for initiating explosives, firing sets.
12	T	Telemetering equipment.
13	P	Software for the use of equipment employing cryptography.
14	P	Hydrophones, towed hydrophone arrays, heading sensors for hydrophone arrays.
15	P	Thorium, natural uranium, depleted uranium.
16	P	Towed hydrophone arrays, hydrophones.
17	P	Non-military explosives/propellants.
18	P	Devices for initiating explosives.
19	P	Weapon simulators, components for weapon simulators, anti-aircraft guns training equipment, components for anti-aircraft guns training equipment, armoured fighting vehicles training equipment, components for armoured fighting vehicles training equipment, large calibre artillery training equipment, components for large calibre artillery training equipment, small calibre artillery training equipment, components for small calibre artillery training equipment, anti-armour missiles training equipment, components for anti-armour missiles training equipment, naval light guns training equipment, components for naval light guns training equipment.
20	P	Naval electronic equipment, test equipment for guns, technology for naval electronic equipment, technology for test equipment for guns.
21	P	Military communications equipment, military helmets, components for military communications equipment.
22	P	Military aero-engines, components for military aero-engines, technology for the use of military aero-engines, military aircraft ground equipment, equipment for the use of military aero-engines.
23	P	Goods specified in the military list as ML1, ML2, ML4, ML10, ML5, ML6, ML9, ML11, ML14 and ML15 excluding 3rd generation image intensifier tubes, land mines and technology, rockets, missiles and unmanned air vehicles.
24	P	Shotguns, components for shotguns, sporting rifles, components for sporting rifles.
25	P	Components for military aero-engines.
26	P	Pyrotechnic signalling devices, components for anti-ship missiles, components for torpedoes, components for rocket launching equipment, components for chaff equipment, components for weapons control systems, components for naval radars, components for electronic countermeasure equipment, components for naval gun mountings, components for naval electronic warfare equipment, components for naval sonar equipment, components for naval communications equipment, components for naval navigation equipment, components for submarines, components for frigates, components for destroyers, components for fast attack craft, components for naval auxiliary vessels, general naval vessel components, components for military communications equipment, military electronic equipment, technology for the use of military communications equipment, technology for the use of naval gun mountings, technology for the use of naval electronic warfare equipment, technology for the use of naval sonar equipment, technology for the use of naval communications equipment, technology for the use of naval navigation equipment, technology for the use of submarines, technology for the use of frigates, technology for the use of fast attack craft, technology for the use of naval auxiliary vessels, technology for the use of electronic countermeasure equipment, technology for the use of naval radars, technology for the use of weapons control systems, technology for the use of rocket launching equipment, technology for the use of chaff equipment, technology for the use of pyrotechnic signalling devices, technology for the use of anti-ship missiles, technology for the use of torpedoes.
27	T	Ejector seats, components for ejector seats, technology for the use of ejector seats, technology for the development of ejector seats, military parachutes, technology for the use of military parachutes, general military aircraft components, technology for the use of general military aircraft components, equipment for the use of ejector seats, technology for the use of equipment for the use of ejector seats, military electronic equipment, technology for the use of military electronic equipment, components for military electronic equipment, test equipment for ejector seats, components for test equipment for ejector seats, technology for the use of test equipment for ejector seats, components for combat helicopters, components for military utility helicopters, technology for the use of components for combat helicopters, technology for the development of components for combat helicopters, technology for the use of components for military utility helicopters, technology for the development of components for military utility helicopters, goods as specified in the military list as ML11, ML10, ML22 and PL5017.

United States of America cont.

28	P	Air to surface missiles, components for air to surface missiles, military aero-engines, software for the use of air to surface missiles, software for the use of test equipment for air to surface missiles, software for the use of air to surface missiles simulators, training equipment for air to surface missiles, test equipment for air to surface missiles, air to surface missiles simulators, air to surface missile handling equipment, equipment for the use of air to surface missiles, technology for the production of air to surface missiles, technology for the use of air to surface missiles, technology for the production of components for air to surface missiles, technology for the use of software for the use of components for air to surface missiles, technology for the use of software for the production of air to surface missiles, technology for the use of software for the production of components for air to surface missiles, technology for the production of military aero-engines, technology for the use of military aero-engines, technology for the production of components for military aero-engines, technology for the use of components for military aero-engines.
29	P	Naval radars, components for naval radars, technology for the use of naval radars, test equipment for naval radars.
30	P	Components for military bridges.
31	P	Components for military video recording equipment, components for combat aircraft, components for guided missile decoying equipment, components for aircraft head-up displays, components for military aircraft navigation equipment, components for helmet mounted displays equipment, components for aircraft radars, components for airborne radars, components for optical target designator equipment, components for military cameras, components for night vision goggles, components for military navigation equipment, components for military infrared/thermal imaging equipment, test equipment for helmet mounted displays equipment, test equipment for military video recording equipment, test equipment for combat aircraft, test equipment for aircraft head-up displays, test equipment for military aircraft navigation equipment, test equipment for general military aircraft components, test equipment for guided missile decoying equipment, test equipment for aircraft radars, test equipment for airborne radars, test equipment for optical target designator equipment, test equipment for military cameras, test equipment for night vision goggles, test equipment for military navigation equipment, test equipment for military infrared/thermal imaging equipment, technology for the use of military video recording equipment, technology for the use of military aircraft navigation equipment, technology for the use of general military aircraft components, technology for the use of guided missile decoying equipment, technology for the use of helmet mounted displays equipment, technology for the use of aircraft radars, technology for the use of combat aircraft, technology for the use of optical target designator equipment, technology for the use of aircraft head-up displays, technology for the use of military cameras, technology for the use of night vision goggles, technology for the use of military navigation equipment, technology for the use of military infrared/thermal imaging equipment.
32	T	Laser range finders, components for laser range finders, weapon sights, components for weapon sights, military image intensifier equipment, night vision goggles.
33	P	Anti-riot shields.
34	P	Airborne radars, components for airborne radars, test equipment for airborne radars, software for the use of airborne radars, technology for the use of airborne radars.
35	P	Software for the use of naval electronic warfare training equipment.
36	P	Components for shotguns.
37	P	Components for optical target tracking/surveillance/target acquisition equipment, test equipment for optical target tracking/surveillance/target acquisition, components for military infrared/thermal imaging equipment, software for the use of military infrared/thermal imaging equipment, equipment for the use of military infrared/thermal imaging equipment, military infrared/thermal imaging equipment.
38	P	Coods specified in the military list as ML10a, b, c, e, h and I, ML15b, ML18b and ML22..
39	P	Shotguns, components for shotguns.
40	P	Military electronic equipment, general military aircraft components, test equipment for military electronic equipment, test equipment for general military aircraft components.
41	P	Components for armoured personnel carriers, components for tanks, components for armoured fighting vehicles, components for military engineering vehicles, components for armoured repair and recovery vehicles, equipment for the use of components for armoured personnel carriers, equipment for the use of components for tanks, equipment for the use of components for armoured fighting vehicles, equipment for the use of components for military engineering vehicles, equipment for the use of components for armoured repair and recovery vehicles.
42	P	Components for air to surface missiles.
43	P	Components for military electronic equipment.

United States of America cont.

44	P	Components for combat aircraft, components for military training aircraft.
45	P	Sporting rifles.
46	P	Components for military utility helicopters, equipment for the use of military utility helicopters, components for military utility helicopters, components for combat helicopters, equipment for the use of combat helicopters.
47	T	Components for frigates, components for fast attack craft, components for patrol craft, components for corvettes, components for mine hunters, components for landing craft.
48	P	Components for military transport aircraft.
49	P	Components for NBC respirators, technology for the production of NBC respirators, technology for the use of NBC respirators.
50	P	Shotguns, sporting rifles, components for shotguns, components for sporting rifles, weapon sights, equipment for the use of shotguns, equipment for the use of sporting rifles, weapons cleaning equipment.
51	P	Components for military transport aircraft.
52	P	Technology for the use of surface to air missiles control/launching equipment.
53	P	NBC respirators, components for NBC respirators, NBC filters.
54	P	General naval vessel components.
55	P	Components for combat helicopters, components for military utility helicopters.
56	P	NBC respirators, components for NBC respirators, NBC filters.
57	P	Military electronic equipment, software for the use of military electronic equipment, technology for the use of military electronic equipment.
58	P	Projectile launchers, non-sporting shotguns ammunition, tear gas/irritant ammunition, training tear gas/irritant ammunition, components for ammunition for wall and door breaching projectile launchers.
59	P	Airborne radars, components for airborne radars, test equipment for airborne radars, software for the use of airborne radars, technology for the use of airborne radars.
60	P	Components for armoured fighting vehicles, technology for the use of components for armoured fighting vehicles.
61	P	Components for guided missile decoying equipment, components for military aircraft navigation equipment, components for optical target designator equipment, test equipment for guided missile decoying equipment, test equipment for military aircraft navigation equipment, test equipment for optical target designator equipment, equipment for the use of military aircraft navigation equipment.
62	P	Military bridges, equipment for the use of military bridges.
63	P	Goods specified in the military list as ML10a and ML10b.
64	P	Components for military communications equipment, components for aircraft military communications equipment, components for naval communications equipment, components for electronic warfare equipment, components for airborne electronic warfare equipment, components for naval electronic warfare equipment, components for ground based radars, components for airborne radars, components for aircraft radars, components for air to air missiles, components for air to surface missiles, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for surface to air missiles, components for surface to surface missiles.
65	P	Components for military communications equipment, components for aircraft military communications equipment, components for naval communications equipment, components for electronic warfare equipment, components for airborne electronic warfare equipment, components for naval electronic warfare equipment, components for ground based radars, components for airborne radars, components for aircraft radars, components for air to air missiles, components for air to surface missiles, components for anti-radiation missiles, components for anti-ship missiles, components for anti-armour missiles, components for surface to air missiles, components for surface to surface missiles.
66	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters.
67	P	Components for combat aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters.

Annex A

Part I and Part III (the Military List) of Schedule 1 to the Export of Goods (Control) Order 1994

Note: This is the text of Part I of Schedule 1 to the Export of Goods (Control) Order 1994 as at 1 January 2002. It was subsequently amended by the Export of Goods (Control) (Amendment) Order 2002 (S.I. 2002/2059) which revoked Group 3 Vehicles and came into force on 28 August 2002

PART I

Group 2 EXPLOSIVE RELATED GOODS

1. Equipment or devices, other than those specified in Part III of this Schedule or in entry 1A005, 3A229 or 3A232 in Annex I to Council Decision 94/942/CFSP, for detection of or use with explosives or for dealing with or protecting against improvised explosive devices (as defined in Part III of this Schedule), as follows, and specially designed components therefor:
 - (a) electronic equipment capable of detecting concealed explosives;
except:
television or X-ray inspection equipment;
 - (b) electronic jamming equipment specially designed to prevent the detonation by radio remote control of improvised explosive devices;
 - (c) equipment and devices specially designed to initiate explosions by electrical or non-electrical means, including firing sets, detonators, igniters and detonating cord;
except:
equipment and devices specially designed for a specific commercial use consisting of the actuation or operation by explosive means of other equipment or devices the function of which is not the initiation or creation of explosions;
and:
pressure controlled equipment specially designed for down-hole oilfield equipment applications and which are incapable of use at atmospheric pressure.
 - (d) equipment and devices, including shields and helmets, specially designed for the disposal of improvised explosive devices;
except:
bomb blankets and containers designed for holding improvised explosive devices or objects suspected of being such devices.
2. Linear cutting explosive charges.
3. Technology required for the use of the above (the words "technology", "required" and "use" being as defined in Part III of this Schedule).

Group 3 VEHICLES

1. The export of goods specified in this Group is prohibited to any destination in the Federal Republic of Yugoslavia.
 - (a) All wheel drive utility vehicles capable of off road use that have a ground clearance of greater than 175 millimetres;
 - (b) Heavy duty recovery vehicles capable of towing suspended a load of more than 6 tonnes or winching a load of more than 10 tonnes;
 - (c) Drop sided trucks that have a load carrying capacity of more than 5 tonnes.

Note: This is the text of Part III (the Military List) of Schedule 1 to the Export of Goods (Control) Order 1994 as at 1 January 2002. It was subsequently amended by the Export of Goods (Control)(Amendment) Order 2002 (S.I.2002/2059) which introduced changes to various definitions and entry ML4, ML8 and ML10 and came into force on 28 August 2002.

Note: The goods in this Part are for convenience specified by reference to the classification system used by the Department of Trade and Industry for export control purposes. For convenience only, defined terms are printed in "quotation marks".

PART III

MILITARY, SECURITY AND PARA-MILITARY GOODS AND ARMS, AMMUNITION AND RELATED MATERIAL

General Technology Note

1. Subject to paragraph 2 below, the export of "technology" specified in this Part of this Schedule is prohibited by Article 2 of this Order if it is capable of being "required" for the "development", "production" or "use" of "goods" specified in this Part of this Schedule, whether or not the "technology" being exported in the particular case is intended to be applied in respect of such goods.
2. The prohibition in Article 2 does not apply to that "technology" which is the minimum necessary for the installation, operation, maintenance (checking) and repair of "goods" not specified in this Part of this Schedule, to "technology" "in the public domain", to "basic scientific research" or to the minimum necessary information for patent applications.

Definitions

In this Part:

"adapted for use in war" means any modification or selection (such as altering purity, shelf life, virulence, dissemination characteristics, or resistance to ultra violet (UV) radiation) designed to increase the effectiveness in producing casualties in humans or animals, degrading equipment or damaging crops or the environment;

"additives" means substances used in explosive formulations to improve their properties;

"anti-idiotypic antibodies" means antibodies which bind to the specific antigen binding sites of other antibodies;

"basic scientific research" means experimental or theoretical work undertaken principally to acquire new knowledge of the fundamental principles of phenomena or observable facts, not primarily directed towards a specific practical aim or objective;

"biocatalyst" means enzymes for special chemical or biochemical reactions and other biological compounds which bind to and accelerate the degradation of chemical warfare (CW) agents;

"biopolymer" means the following biological macromolecules:

- a. enzymes for specific chemical or biochemical reactions;
- b. antibodies, monoclonal, polyclonal or "anti-idiotypic";
- c. specially designed or specially processed "receptors";

"critical temperature" (sometimes referred to as the transition temperature) of a specific superconductive material means the temperature at which the specific material loses all resistance to the flow of direct electrical current;

"development" is related to all stages prior to serial production, such as: design, design research, design analyses, design concepts, assembly and testing of prototypes, pilot production schemes, design data, process of transforming design data into a product, configuration design, integration design, layouts;

"end-effectors" means grippers, active tooling units (that is, devices for applying motive power, process energy or sensing to the workpiece) and any other tooling that is attached to the baseplate on the end of a "robot" manipulator arm;

"expression vectors" means carriers (e.g., plasmid or virus) used to introduce genetic material into host cells;

"first generation image intensifier tubes" mean electrostatically focused tubes, employing input and output fibre optic or glass face plates, multi-alkali photocathodes (S-20 or S-25), but not microchannel plate amplifiers.

"improvised explosive devices" means devices fabricated or intended to be placed in an improvised manner incorporating destructive, lethal, noxious, pyrotechnic or incendiary chemicals, designed to destroy, disfigure or harass; they may incorporate military stores, but are normally devised from non-military components;

"in the public domain" means available without restriction upon further dissemination (no account being taken of restrictions arising solely from copyright);

"laser" means an assembly of components which produce both spatially and temporally coherent light which is amplified by stimulated emission of radiation;

"microprogramme" means a sequence of elementary instructions, maintained in a special storage, the execution of which is initiated by the introduction of a reference instruction into an instruction register;

"military explosives" means solid, liquid or gaseous substances or mixtures of substances which, in their application as primary, booster, or main charges in warheads, demolition and other military applications, are required to detonate;

"military pyrotechnics" means mixtures of solid or liquid fuels and oxidisers which, when ignited, undergo an energetic chemical reaction at a controlled rate intended to produce specific time delays, or quantities of heat, noise, smoke, visible light or infrared radiation; pyrophorics are a subclass of pyrotechnics, which contain no oxidisers but ignite spontaneously on contact with air;

"monoclonal antibodies" means proteins which bind to one antigenic site and are produced by a single clone of cells;

"nuclear reactor" means the items within or attached directly to the reactor vessel, the equipment which controls the level of power in the core, and the components which normally contain, come into direct contact with or control the primary coolant of the reactor core;

"polyclonal antibodies" means a mixture of proteins which bind to the specific antigen and are produced by more than one clone of cells;

"production" means all production stages, such as: product engineering, manufacture, integration, assembly (mounting), inspection, testing, quality assurance;

"programme" means a sequence of instructions to carry out a process in, or convertible into, a form executable by an electronic computer;

"receptors" means biological macromolecular structure capable of binding ligands, the binding of which affects physiological functions;

"required" as applied to "technology", refers to only that portion of "technology" which is peculiarly responsible for achieving or exceeding the controlled performance levels, characteristics or functions. Such "required" "technology" may be shared by different "goods";

"riot control agents" means substances which produce temporary, irritating or disabling physical effects which disappear within minutes of removal from exposure. There is no significant risk of permanent injury and medical treatment is rarely required;

"robot" means a manipulation mechanism, which may be of the continuous path or of the point-to-point variety, may use sensors, and which:

- a. Is multifunctional;
- b. Is capable of positioning or orienting material, parts, tools or special devices through variable movements in three dimensional space;
- c. Incorporates three or more closed or open loop servo-devices which may include stepping motors; and
- d. Has "user-accessible programmability" by means of the teach/playback method or by means of an electronic computer which may be a programmable logic controller, i.e., without mechanical intervention;

except:

- a. Manipulation mechanisms which are only manually/teleoperator controllable;
- b. Fixed sequence manipulation mechanisms, which are automated moving devices, operating according to programmes where the motions are limited by fixed stops, such as pins or cams and the sequence of motions and the selection of paths or angles are not variable or changeable by mechanical, electronic or electrical means;
- c. Mechanically controlled variable sequence manipulation mechanisms, which are automated moving devices, operating according to programmes where the motions are limited by fixed, but adjustable stops, such as pins or cams and the sequence of motions and the selection of paths or angles are variable within the fixed programme pattern; variations or modifications of the programme pattern (e.g., changes of pins or exchanges of cams) in one or more motion axes are accomplished only through mechanical operations;

- d. Non-servo-controlled variable sequence manipulation mechanisms, which are automated moving devices, operating according to mechanically fixed programmed motions; the programme is variable but the sequence proceeds only by the binary signal from mechanically fixed electrical binary devices or adjustable stops;
- e. Stacker cranes defined as Cartesian coordinate manipulator systems manufactured as an integral part of a vertical array of storage bins and designed to access the contents of those bins for storage or retrieval;

"software" means one or more "programmes" or "microprogrammes" fixed in any tangible medium of expression;

"special gun-mounting" means any fixture designed to mount a gun;

"superconductive" in relation to materials (i.e., metals, alloys or compounds) means those which can lose all electrical resistance (i.e., which can attain infinite electrical conductivity and carry very large electrical currents without Joule heating); the superconductive state of a material is individually characterized by a "critical temperature", a critical magnetic field, which is a function of temperature, and a critical current density which is a function of both magnetic field and temperature;

"tear gases" means gases which produce temporary irritating or disabling effects which disappear within minutes of removal of exposure;

"technology" means specific information necessary for the "development", "production" or "use" of a product. The information may take forms such as blueprints, plans, diagrams, models, formulae, tables, engineering designs and specifications, manuals and instructions written or recorded on other media or devices such as disk, tape, read-only memories;

"use" means operation, installation (which includes on-site installation), maintenance, checking, repair, overhaul and refurbishing;

"user-accessible programmability" means the facility allowing a user to insert, modify or replace "programmes" by means other than:

- a. A physical change in wiring or interconnections; or
- b. The setting of function controls including entry of parameters.

ML1 Arms and automatic weapons with a calibre of 12.7 mm (calibre 0.50 inches) or less and accessories, as follows, and specially designed components therefor:

- a. Rifles, carbines, revolvers, pistols, machine pistols and machine guns;
- b. Smooth-bore weapons specially designed for military use;
- c. Weapons using caseless ammunition;
- d. Silencers, "special gun-mountings", weapons sights, clips and flash suppressers for arms specified in ML1.a., ML1.b. or ML1.c.
except:
 - a. Air weapons (other than those declared by the Firearms (Dangerous Air Weapons) Rules 1969 to be specially dangerous);

- b. Firearms specially designed for dummy ammunition and which are incapable of firing any ammunition specified in this Part;
- d. Firearms certified by a registered UK Proof House as having been rendered incapable of firing any ammunition specified in this Part;
- e. Bayonets.

Technical Note:

Smooth-bore weapons specially designed for military use as specified in ML1.b. are those which:

- a. Are proof tested at pressures above 1,300 bars;*
- b. Operate normally and safely at pressures above 1,000 bars; and*
- c. Are capable of accepting ammunition above 76.2 mm in length (e.g., commercial 12-gauge magnum shot gun shells).*

The parameters in this Technical Note are to be measured according to the standards of the Commission Internationale Permanente.

PL5002 Telescopic sights for goods specified in PL5018, other than those specified in entries ML1, ML2 and ML5.

PL5018 Smooth-bore weapons, other than those specified in ML1.b. or ML2, and specially designed components therefor;

except:

- a. Air weapons (other than those declared by the Firearms (Dangerous Air Weapons) Rules 1969 to be specially dangerous);
- b. Air (pneumatic) or cartridge (explosive) powered guns or pistols designed as:
 - 1. Industrial tools; or
 - 2. Humane stunning devices employed specifically for animal slaughter;
- c. Signal pistols.

PL5021 Ammunition or cartridges, including projectiles, and specially designed components therefor, for the "goods" specified in entry PL5018;

except:

- a. Lead or lead alloy pellet ammunition specially designed for air weapons;
- b. Ammunition crimped without a projectile (blank star) and dummy ammunition with a pierced powder chamber.
- c. Cartridges specially designed for signalling, bird scaring or lighting of gas flares at oil wells.

ML2 Armament or weapons with a calibre greater than 12.7 mm (calibre 0.50 inches), projectors and accessories, as follows, and specially designed components therefor:

- a. Guns, howitzers, cannon, mortars, anti-tank weapons, projectile launchers, military flame throwers, recoilless rifles and signature reduction devices therefor;
- b. Military smoke, gas and pyrotechnic projectors or generators;
 - except:
 - Signal pistols.
- c. Weapons sights for arms specified in entry ML2.a. or ML2.b.

ML3 Ammunition, and specially designed components therefor, for the weapons specified in ML1, ML2 or ML12.
except:
a. Ammunition crimped without a projectile (blank star) and dummy ammunition with a pierced powder chamber;
b. Lead or lead alloy pellet ammunition specially designed for air weapons.
c. Cartridges specially designed for signalling, bird scaring or lighting of gas flares at oil wells.

ML4 Bombs, torpedoes, rockets, missiles, and related equipment and accessories, as follows, specially designed for military use, and specially designed components therefor:
a. Bombs, torpedoes, grenades, smoke canisters, rockets, mines, missiles, depth charges, demolition-charges, demolition-devices and demolition-kits, devices that contain "military pyrotechnics", cartridges and simulators (i.e. equipment simulating the characteristics of any of these items);
b. Equipment specially designed for the handling, control, activation, powering with one-time operational output, launching, laying, sweeping, discharging, decoying, jamming, detonation, disruption or detection of items specified in ML4.a.

Technical Note

Hand held devices, limited by design solely to the detection of metal objects and incapable of distinguishing between mines and other metal objects, are not considered to be specially designed for the detection of items specified by ML4.a.

PL5006 Apparatus or devices specially designed for military use, used for the handling, control, discharging, decoying, jamming, detonation, disruption or detection of improvised explosive devices or other explosive devices not specified in ML4.a., and specially designed components therefor.

except:

Inspection devices not employing electronic management.

PL5030 Bombs and grenades, other than those specified in ML4 and specially designed components therefor.

ML5 Fire control equipment and related alerting and warning equipment, related systems, test and alignment and countermeasure equipment, as follows, specially designed for military use, and specially designed components and accessories therefor:

- a. Weapon sights, bombing computers, gun laying equipment and weapon control systems;
- b. Target acquisition, designation, range-finding, surveillance or tracking systems; detection, data fusion, recognition or identification equipment; and sensor integration equipment;
- c. Countermeasure equipment for items specified in ML5.a. or ML5.b.
- d. Field test or alignment equipment, specially designed for items specified in entry ML5.a. or ML5.b.

ML6 Ground vehicles and components therefor specially designed or modified for military use.

Technical Note:

For the purposes of ML6 the term ground vehicles includes trailers.

Note: Modification of a ground vehicle for military use entails a structural, electrical or mechanical change involving one or more specially designed military components.

PL5031 Ground vehicles and related equipment, other than those specified elsewhere in this Part, as follows:

- a. All wheel drive vehicles capable of off road use which have been manufactured or fitted with metallic or non-metallic materials to provide ballistic protection; except:
 1. vehicles designed or fitted out for the transportation of valuables or funds;
 2. vehicles fitted with, or designed or modified to be fitted with, a plough or flail for the purpose of land mine clearance.
- b. Containers for mounting on vehicles, specially designed or modified for military use and components therefor specially designed or modified for military use.

ML7 In this entry, references in square brackets to [Chemical Abstract Service] [CAS] numbers are included for convenience only. Goods of which the description in this entry includes a CAS reference are specified in this entry whether or not they fall within that reference.

Chemical or biological toxic agents, toxic chemicals and mixtures containing such agents or chemicals, "tear gases", radioactive materials, related equipment, components, materials and "technology" as follows:

- a. Chemical or biological toxic agents, toxic chemicals and radioactive materials, as follows:
 1. Biological agents and radioactive materials "adapted for use in war" to produce casualties in humans or animals, degrade equipment or damage crops or the environment, and chemical warfare (CW) agents;
 2. Chemicals listed in items (1) to (6) of the Schedule to the Chemical Weapons Act 1996, read with notes 2 and 3 of that Schedule, whether or not they are CW agents within entry ML7.a and chemical mixtures containing one or more of these chemicals;
 3. 3-Quinuclidinyl benzilate (BZ) [CAS 6581-06-02] and chemical mixtures containing more than 1% by weight thereof;
- b. CW binary precursors and key precursors, as follows, and chemical mixtures containing one or more of these precursors:
 1. Alkyl (Methyl, Ethyl, n-Propyl or Isopropyl) Phosphonyl Difluorides, such as: DF: Methyl Phosphonyldifluoride [CAS 676-99-3];
 2. O-Alkyl (H or equal to or less than C10, including cycloalkyl) O-2-dialkyl (Methyl, Ethyl, n-Propyl or Isopropyl) aminoethyl alkyl (Methyl, Ethyl, n-Propyl or Isopropyl) phosphonite and corresponding alkylated and protonated salts, such as:

QL: O-Ethyl-2-di-isopropylaminoethyl methylphosphonite
[CAS 57856-11-8];
 3. Chlorosarin: O-Isopropyl methylphosphonochloridate [CAS 1445-76-7];
 4. Chlorosoman: O-Pinakolyl methylphosphonochloridate [CAS 7040-57-5];
- c. "Tear gases" and "riot control agents" including:

1. Bromobenzyl cyanide (CA) [CAS 5798-79-8];
2. o-Chlorobenzylidenemalononitrile (o-Chlorobenzalmalononitrile) (CS) [CAS 2698-41-1];
3. Phenylacetyl chloride (w-chloroacetophenone) (CN) [CAS 532-27-4];
4. Dibenz-(b,f)-1,4-oxazepine (CR) [CAS 257-07-8];
except:
Tear gases or riot control agents individually packaged for personal self defence purposes.
- d. Equipment specially designed or modified for the dissemination of any of the following and specially designed components therefor;
 1. Materials or agents specified in entry ML7.a. or entry ML7.c.;
 2. CW agents made up of precursors specified in entry ML7.b.;

Note: ML7.d. does not control equipment not specially designed or modified for military purposes.

- e. "Goods" specially designed for defence against materials specified in entry ML7.a. or entry ML7.c. and specially designed components therefor;

Note: ML7.e. does not control equipment not specially designed or modified for military purposes.

- f. "Goods" specially designed for the detection or identification of materials specified in entry ML7.a. or entry ML7.c. and specially designed components therefor;
except:
Personal radiation monitoring dosimeters.

Note: ML7.f. does not control equipment not specially designed or modified for military purposes.

- g. "Biopolymers" specially designed or processed for the detection or identification of CW agents specified in entry ML7.a., and the cultures of specific cells used to produce them;
- h. "Biocatalysts" for the decontamination or degradation of CW agents, and biological systems therefor, as follows:
 1. "Biocatalysts" specially designed for the decontamination or degradation of CW agents specified in ML7.a. resulting from directed laboratory selection or genetic manipulation of biological systems;
 2. Biological systems, as follows: "expression vectors", viruses or cultures of cells containing the genetic information specific to the production of "biocatalysts" specified in ML7.h.1.;
- i. "Technology" as follows:
 1. "Technology" for the "development", "production" or "use" of toxicological agents, related equipment or components specified in ML7.a. to ML7.f.;
 2. "Technology" for the "development", "production" or "use" of "biopolymers" or cultures of specific cells specified in ML7.g.;
 3. "Technology" exclusively for the incorporation of "biocatalysts", specified in ML7.h.1., into military carrier substances or military material.

- Note 1: *ML7.a. and ML7.c. do not control:*
- a. *Cyanogen chloride [CAS 506-77-4];*
 - b. *Hydrocyanic acid [CAS 74-90-8];*
 - c. *Chlorine [CAS 7782-50-5];*
 - d. *Carbonyl chloride (phosgene) [CAS 75-44-5];*
 - e. *Diphosgene (trichloromethyl-chloroformate) [CAS 503-38-8];*
 - f. *Ethyl bromoacetate [CAS 105-36-2];*
 - g. *Xylyl bromide, ortho: [CAS 89-92-9], meta: [CAS 620-13-3], para: [CAS 104-81-4];*
 - h. *Benzyl bromide [CAS 100-39-0];*
 - i. *Benzyl iodide [CAS 620-05-3];*
 - j. *Bromo acetone [CAS 598-31-2];*
 - k. *Cyanogen bromide [CAS 506-68-3];*
 - l. *Bromo methylethylketone [CAS 816-40-0];*
 - m. *Chloro acetone [CAS 78-95-5];*
 - n. *Ethyl iodoacetate [CAS 623-48-3];*
 - o. *Iodo acetone [CAS 3019-04-3];*
 - p. *Chloropicrin [CAS 76-06-2].*
- Note 2: *The "technology", cultures of cells and biological systems listed in ML7.g., ML7.h.2. and ML7.i.3. are exclusive and do not control "technology", cells or biological systems for civil purposes, such as agricultural, pharmaceutical, medical, veterinary, environmental, waste management, or in the food industry.*

ML 8 In this entry, references in square brackets to [Chemical Abstract Service] [CAS] numbers are included for convenience only. Goods of which the description in this entry includes a CAS reference are specified in this entry whether or not they fall within that reference.

"Military explosives" and fuels, including propellants, and related substances, as follows:

- a. Substances, as follows, and mixtures thereof:
 1. Spherical aluminium powder [CAS 7429-90-5] with a particle size of 60 µm or less, manufactured from material with an aluminium content of 99% or more;
 2. Metal fuels in particle form whether spherical, atomized, spheroidal, flaked or ground, manufactured from material consisting of 99 % or more of any of the following:
 - a. Metals and mixtures thereof:
 1. Beryllium [CAS 7440-41-7] in particle sizes of less than 60 µm;
 2. Iron powder [CAS 7439-89-6] with particle size of 3 µm or less produced by reduction of iron oxide with hydrogen;
 - b. Mixtures, which contain any of the following:
 1. Zirconium [CAS 7440-67-7], magnesium [CAS 7439-95-4] and alloys of these in particle sizes of less than 60 µm;
 2. Boron [CAS 7440-42-8] or boron carbide [CAS 12069-32-8] fuels of 85% purity or higher and particle sizes of less than 60 µm;
 3. Perchlorates, chlorates and chromates composited with powdered metal or other high energy fuel components;

4. Deleted;
5. Compounds composed of fluorine and any of the following: other halogens, oxygen, nitrogen;
except:
chlorine trifluoride [see entry 1C238 of Annex I to Council Decision 94/942/CFSP];
6. Carboranes; decarborane [CAS 17702-41-9]; pentaborane and derivatives thereof;
7. Cyclotetramethylenetetranitramine [CAS 2691-41-0] (HMX); octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazine; 1,3,5,7-tetranitro-1,3,5,7-tetraza-cyclooctane; (octogen, octogene);
8. Hexanitrostilbene (HNS) [CAS 20062-22-0];
9. Diaminotrinitrobenzene (DATB) [CAS 1630-08-6];
10. Triaminotrinitrobenzene (TATB) [CAS 3058-38-6];
11. Triaminoguanidinenitrate (TAGN) [CAS 4000-16-2];
12. Titanium subhydride of stoichiometry TiH 0.65-1.68;
13. Dinitroglycoluril (DNGU, DINGU) [CAS 55510-04-8]; tetranitroglycoluril (TNGU, SORGUYL) [CAS 55510-03-7];
14. Tetranitrobenzotriazolobenzotriazole (TACOT) [CAS 25243-36-1];
15. Diaminohexanitrobiphenyl (DIPAM) [CAS 17215-44-0];
16. Picrylaminodinitropyridine (PYX) [CAS 38082-89-2];
17. 3-nitro-1,2,4-triazol-5-one (NTO or ONTA) [CAS 932-64-9];
18. Hydrazine [CAS 302-01-2] in concentrations of 70% or more; hydrazine nitrate [CAS 37836-27-4]; hydrazine perchlorate [CAS 27978-54-7]; unsymmetrical dimethyl hydrazine [CAS 57-14-7]; monomethyl [CAS 60-34-4] hydrazine; symmetrical dimethyl hydrazine [CAS 540-73-8];
19. Ammonium perchlorate [CAS 7790-98-9];
20. Cyclotrimethylenetrinitramine (RDX) [CAS 121-82-4] ; cyclonite; T4; hexahydro-1,3,5-trinitro-1,3,5-triazine; 1,3,5-trinitro-1,3,5-triaza-cyclohexane (hexogen, hexogene);
21. Hydroxylammonium nitrate (HAN) [CAS 13465-08-2]; hydroxylammonium perchlorate (HAP) [CAS 15588-62-2];
22. 2-(5-cyanotetrazolato) penta amine-cobalt (III) perchlorate (or CP) [CAS 70247-32-4];
23. cis-bis (5-nitrotetrazolato) tetra amine-cobalt (III) perchlorate (or BNCP);
24. 7-Amino-4,6-dinitrobenzofurazane-1-oxide (ADNBF) [CAS 97096-78-1]; amino dinitrobenzofurozan;
25. 5,7-diamino-4,6-dinitrobenzofurazane-1-oxide [CAS 117907-74-1],(CL-14 or diamino dinitrobenzofurozan);
26. 2,4,6-trinitro-2,4,6-triazacyclohexanone (K-6 or Keto-RDX) [CAS 115029-35-1];
27. 2,4,6,8-tetranitro-2,4,6,8-tetraazabicyclo [3,3,0]-octa-3-one [CAS 130256-72-3] (tetranitrosemiglycouril, K-55 or keto-bicyclic HMX);
28. 1,1,3-trinitroazetidine (TNAZ) [CAS 97645-24-4];
29. 1,4,5,8-tetranitro-1,4,5,8-tetraazadecalin (TNAD) [CAS 135877-16-6];
30. Hexanitrohexaazaisowurtzitane [CAS 135285-90-4] (CL-20 or HNIW); and clathrates of CL-20;
31. Polynitrocubanes with more than four nitro groups;

32. Ammonium dinitramide (ADN or SR 12) [CAS 140456-78-6];
33. Trinitrophenylmethyl nitramine (tetryl) [CAS 479-45-8];
- b. Explosives and propellants that meet the following performance parameters:
 1. Any explosive with a detonation velocity exceeding 8,700 m/s or a detonation pressure exceeding 34 GPa (340 kbar);
 2. Other organic explosives not listed in ML8. yielding detonation pressures of 25 GPa (250 kbar) or more that will remain stable at temperatures of 523 K (250°C) or higher for periods of 5 minutes or longer;
 3. Any other United Nations (UN) Class 1.1 solid propellant not listed in ML8. with a theoretical specific impulse (under standard conditions) of more than 250 s for non-metallised, or more than 270 s for aluminised compositions;
 4. Any UN Class 1.3 solid propellant with a theoretical specific impulse of more than 230 s for non-halogenised, 250 s for non-metallised and 266 s for metallised compositions;
 5. Any other gun propellants not listed in ML8. having a force constant of more than 1,200 kJ/kg;
 6. Any other explosive, propellant or pyrotechnic not listed in ML8. that can sustain a steady-state burning rate of more than 38 mm/s under standard conditions of 6.89 MPa (68.9 bar) pressure and 294 K (21°C); or
 7. Elastomer modified cast double based propellants (EMCDB) with extensibility at maximum stress of more than 5% at 233 K (-40°C);
- c. "Military pyrotechnics";
- d. Other substances, as follows:
 1. Aircraft fuels specially formulated for military purposes;
 2. Military materials containing thickeners for hydrocarbon fuels specially formulated for use in flamethrowers or incendiary munitions, such as metal stearates or palmates (also known as octal) [CAS 637-12-7] and M1, M2, M3 thickeners;
 3. Liquid oxidisers comprised of or containing inhibited red fuming nitric acid (IRFNA) [CAS 8007-58-7] or oxygen difluoride;
- e. "Additives" and precursors, as follows:
 1. Azidomethylmethyloxetane (AMMO) and its polymers;
 2. Basic copper salicylate [CAS 62320-94-9]; lead salicylate [CAS 15748-73-9];
 3. Bis(2,2-dinitropropyl) formal [CAS 5917-61-3] or Bis(2,2-dinitropropyl) acetal [CAS 5108-69-0];
 4. Bis-(2-fluoro-2,2-dinitroethyl) formal (FEFO) [CAS 17003-79-1];
 5. Bis-(2-hydroxyethyl) glycolamide (BHEGA) [CAS 17409-41-5];
 6. Bis(2-methyl aziridiny) methylamino phosphine oxide (Methyl BAPO) [CAS 85068-72-0];
 7. Bisazidomethyloxetane and its polymers [CAS 17607-20-4];
 8. Bischloromethyloxetane (BCMO) [CAS 142173-26-0];
 9. Butadienenitrileoxide (BNO);
 10. Butanetrioltrinitrate (BTTN) [CAS 6659-60-5];
 11. Catocene [CAS 37206-42-1] (2,2-Bis-ethylferrocenyl propane); ferrocene carboxylic acids; N-butyl-ferrocene [CAS 319904-29-7]; Butacene [CAS 125856-62-4] and other adducted polymer ferrocene derivatives;
 12. Dinitroazetidine-t-butyl salt;

13. Energetic monomers, plasticisers and polymers containing nitro, azido, nitrate, nitraza or difluoroamino groups;
14. Poly-2,2,3,3,4,4-hexafluoropentane-1,5-diol formal (FPF-1);
15. Poly-2,4,4,5,5,6,6-heptafluoro-2-tri-fluoromethyl-3-oxaheptane-1,7-diol formal (FPF-3);
16. Glycidylazide Polymer (GAP) [CAS 143178-24-9] and its derivatives;
17. Hexabenzylhexaazaisowurtzitane (HBIW) [CAS 124782-15-6];
18. Hydroxyl terminated polybutadiene (HTPB) with a hydroxyl functionality equal to or greater than 2.2 and less than or equal to 2.4, a hydroxyl value of less than 0.77 meq/g, and a viscosity at 30°C of less than 47 poise [CAS 69102-90-5];
19. Superfine iron oxide (Fe₂O₃ hematite) with a specific surface area more than 250 m²/g and an average particle size of 0.003 µm or less [CAS 1309-37-1];
20. Lead beta-resorcylate [CAS 20936-32-7];
21. Lead stannate [CAS 12036-31-6], lead maleate [CAS 19136-34-6], lead citrate [CAS 14450-60-3];
22. Lead-copper chelates of beta-resorcylate or salicylates [CAS 68411-07-4];
23. Nitratomethylmethyloxetane or poly (3-Nitratomethyl, 3-methyl oxetane); (Poly-NIMMO) (NMMO) [CAS 84051-81-0];
24. 3-Nitraza-1,5-pentane diisocyanate [CAS 7406-61-9];
25. N-Methyl-p-Nitroaniline [CAS 100-15-2];
26. Organo-metallic coupling agents, specifically:
 - a. Neopentyl [diallyl] oxy, tri [dioctyl] phosphato titanate [CAS 103850-22-2]; also known as titanium IV, 2,2[bis 2-propenolato-methyl, butanolato, tris (dioctyl) phosphato] [CAS 110438-25-0]; or LICA 12 [CAS 103850-22-2];
 - b. Titanium IV, [(2-propenolato-1) methyl, n-propanolatomethyl] butanolato-1, tris[dioctyl]pyrophosphate; or KR3538;
 - c. Titanium IV, [(2-propenolato-1)methyl, n-propanolatomethyl] butanolato-1, tris(dioctyl)phosphate;
27. Polycyanodifluoroaminoethyleneoxide (PCDE);
28. Polyfunctional aziridine amides with isophthalic, trimesic (BITA or butylene imine trimesamide), isocyanuric or trimethyladipic backbone structures and 2-methyl or 2-ethyl substitutions on the aziridine ring;
29. Polyglycidylnitrate or poly (nitratomethyl oxirane); (Poly-GLYN) (PGN) [CAS 27814-48-8];
30. Polynitroorthocarbonates;
31. Propyleneimine, 2-methylaziridine [CAS 75-55-8];
32. Tetraacetyldibenzylhexaazaisowurtzitane (TAIW);
33. Tetraethylenepentaamineacrylonitrile (TEPAN) [CAS 68412-45-3]; cyanoethylated polyamines and their salts;
34. Tetraethylenepentaamineacrylonitrileglycidol (TEPANOL) [CAS 68412-46-4]; cyanoethylated polyamines adducted with glycidol and their salts;
35. Triphenyl bismuth (TPB) [CAS 603-33-8];
36. Tris-1-(2-methyl)aziridinyl phosphine oxide (MAPO) [CAS 57-39-6]; bis(2-methyl aziridinyl) 2-(2-hydroxypropanoxy) propylamino phosphine oxide (BOBBA 8); and other MAPO derivatives;
37. 1,2,3-Tris[1,2-bis(difluoroamino)ethoxy] propane [CAS 53159-39-0]; tris vinoxyl propane adduct (TVOPA);
38. 1,3,5-trichlorobenzene [CAS 108-70-3];

39. 1,2,4 trihydroxybutane (1,2,4-butanetriol);
40. 1,3,5,7 tetraacetyl-1,3,5,7,-tetraaza cyclo-octane (TAT) [CAS 41378-98-7];
41. 1,4,5,8 Tetraazadecalin [CAS 5409-42-7];
42. Low (less than 10,000) molecular weight, alcohol-functionalised, poly(epichlorohydrin); poly(epichlorohydrindiol) and triol.
except:
Boron and boron carbide enriched with boron-10 (20% or more of total boron-10 content).

ML9 Combatant vessels and vessels (surface or underwater) specially designed or modified for offensive or defensive action, whether or not converted to non-military use, regardless of current state of repair or operating condition, and whether or not they contain weapon delivery systems or armour, and components therefor specially designed or modified for military use.

ML10 "Aircraft", unmanned airborne vehicles, aero-engines and "aircraft" equipment, related "goods" and components, specially designed or modified for military use, as follows:

- a. Combat "aircraft" and components therefor specially designed or modified for military use;
- b. Other "aircraft" specially designed or modified for military use, including military reconnaissance, assault, military training, transporting and airdropping troops or military equipment, logistics support, and components therefor specially designed or modified for military use;
- c. Aero-engines specially designed or modified for military use, and components therefor specially designed or modified for military use;
- d. Unmanned airborne vehicles, including remotely piloted air vehicles (RPVs), and autonomous, programmable vehicles specially designed or modified for military use and their launchers, ground support and related equipment for command and control and components therefor specially designed or modified for military use;
- e. Airborne equipment, including airborne refuelling equipment, specially designed for use with the "aircraft" specified in ML10.a. or ML10.b. or the aero-engines specified in ML10.c., and components therefor specially designed or modified for military use;
- f. Pressure refuellers, pressure refuelling equipment, equipment specially designed to facilitate operations in confined areas and ground equipment, developed specially for "aircraft" specified in ML10.a. or ML10.b., or for aero-engines specified in ML10.c.;
- g. Pressurised breathing equipment and partial pressure suits for use in "aircraft", anti-g suits, military crash helmets and protective masks, liquid oxygen converters used for "aircraft" or missiles, and catapults and cartridge actuated devices for emergency escape of personnel from "aircraft";
- h. Parachutes used for combat personnel, cargo dropping or "aircraft" deceleration, as follows:
 1. Parachutes for:
 - a. Pin point dropping of military personnel;
 - b. Dropping of paratroopers;
 2. Cargo parachutes;
 3. Paragliders, drag parachutes, drogue parachutes for stabilisation and attitude control of dropping bodies, (e.g. recovery capsules, ejection seats, bombs);
 4. Drogue parachutes for use with ejection seat systems for deployment and inflation sequence regulation of emergency parachutes;

5. Recovery parachutes for guided missiles, drones or space vehicles;
6. Approach parachutes and landing deceleration parachutes;
7. Other military parachutes;
- i. Automatic piloting systems for parachuted loads; equipment specially designed or modified for military use for controlled opening jumps at any height, including oxygen equipment.

ML11 Electronic equipment, not controlled elsewhere in this Part, specially designed for military use and specially designed components therefor.

ML12 High velocity kinetic energy weapon systems and related equipment, as follows, and specially designed components therefor:

- a. Kinetic energy weapon systems specially designed for destruction or effecting mission-abort of a target;
- b. Specially designed test and evaluation facilities and test models, including diagnostic instrumentation and targets, for dynamic testing of kinetic energy projectiles and systems.

N.B.: For weapon systems using sub-calibre ammunition or employing solely chemical propulsion, and ammunition therefor, see ML1 to ML4.

ML13 Armoured or protective equipment and constructions and components, as follows:

- a. Armoured plate as follows:
 1. Manufactured to comply with a military standard or specification; or
 2. Suitable for military use;
- b. Constructions of metallic or non-metallic materials or combinations thereof specially designed to provide ballistic protection for military systems, and specially designed components therefor;
- c. Military helmets;

except:

 - a. Conventional steel helmets, neither modified or designed to accept, nor equipped with any type of accessory device;
 - b. Helmets manufactured before 1945.
- d. Body armour and flak suits manufactured according to military standards or specifications, or equivalent, and specially designed components therefor.

except:

Individual suits of body armour for personal protection and accessories therefor when accompanying their users.

PL5014 Specially designed components for the "goods" specified in ML13.a. or ML13.c.

ML14 Specialised equipment for military training or for simulating military scenarios and specially designed components and accessories therefor.

PL5034 Simulators, other than those specified in entry ML14, for training in the use of any firearm or weapon specified in entry ML1, PL5018 or ML2, and specially designed or modified components and accessories therefor.

- ML15** Imaging or countermeasure equipment, as follows, specially designed for military use, and specially designed components and accessories therefor:
- a. Recorders and image processing equipment;
 - b. Cameras, photographic equipment and film processing equipment;
 - c. Image intensifier equipment;
 - d. Infrared or thermal imaging equipment;
 - e. Imaging radar sensor equipment;
 - f. Countermeasure or counter-countermeasure equipment for the equipment specified in ML15.a. to ML15.e.
- except:
- "First generation image intensifier tubes" or equipment specially designed so that only "first generation image intensifier tubes" are or can be incorporated in it.
- N.B.: For weapons sights incorporating "first generation image intensifier tubes", see entries ML1, ML2 and ML5.*
- ML16** Forgings, castings and other unfinished products the use of which in a controlled product is identifiable by material composition, geometry or function, and which are specially designed for any products specified in ML1 to ML4, ML6, ML9, ML10, ML12 or ML19.
- PL5020** Forgings, castings and semi-finished products specially designed for "goods" specified in entries PL5006 or PL5018.
- ML17** Miscellaneous "goods", materials and libraries, as follows, and specially designed components therefor:
- a. Self-contained diving and underwater swimming apparatus, as follows:
 1. Closed or semi-closed circuit (rebreathing) apparatus specially designed for military use (i.e., specially designed to be non magnetic);
 2. Specially designed components for use in the conversion of open-circuit apparatus to military use;
 3. Articles designed exclusively for military use with self-contained diving and underwater swimming apparatus;
 - b. Construction equipment specially designed for military use;
 - c. Fittings, coatings and treatments for signature suppression, specially designed for military use;
 - d. Field engineer equipment specially designed for use in a combat zone;
 - e. "Robots", "robot" controllers and "robot" "end-effectors", having any of the following characteristics:
 1. Specially designed for military use;
 2. Incorporating means of protecting hydraulic lines against externally induced punctures caused by ballistic fragments (e.g., incorporating self-sealing lines) and designed to use hydraulic fluids with flash points higher than 839 K (566°C); or
 3. Specially designed or rated for operating in an electro-magnetic pulse (EMP) environment;
 - f. 'Libraries' (parametric technical databases) specially designed for military use with equipment specified in this Part;

- g. Nuclear power generating equipment or propulsion equipment, including "nuclear reactors", specially designed for military use and components therefor specially designed or modified for military use;
- h. "Goods" and material, coated or treated for signature suppression, specially designed for military use, other than those controlled elsewhere in this Part;
- i. Simulators specially designed for military "nuclear reactors";
- j. Mobile repair shops specially designed to service military equipment;
- k. Field generators specially designed for military use;
- l. Containers specially designed for military use; and
- m. Bridges specially designed for military use.
- n. Test models specially designed for the "development " of "goods" specified in ML4, ML6, ML9 or ML10.

Technical Note:

For the purpose of ML17, the term 'library' (parametric technical database) means a collection of technical information of a military nature, reference to which may enhance the performance of military equipment or systems.

PL5033 Ferries and rafts specially designed or modified for military use and components therefor specially designed or modified for military use.

ML18 Equipment and "technology" for the "production" (including design, examination, manufacture, testing and checking) of "goods" referred to in this Part of this Schedule, as follows:

- a. Specially designed or modified "production" equipment for the "production" of products specified in this Part, and specially designed components therefor;
- b. Specially designed environmental test facilities and specially designed equipment therefor, for the certification, qualification or testing of products specified in this Part;
- c. Specific "production" "technology", even if the equipment with which such "technology" is to be used is not controlled;
- d. "Technology" specific to the design of, the assembly of components into, and the operation, maintenance and repair of complete 'production' installations even if the components themselves are not controlled.

PL5017 Equipment and test models, other than those specified by ML11 or by ML 17.n., specially designed or modified for the "development" or "use" of military "goods" specified in this Part.

ML19 Directed energy weapon systems (DEW), related or countermeasure equipment and test models, as follows, and specially designed components therefor:

- a. "Laser" systems specially designed for destruction or effecting mission-abort of a target;
- b. Particle beam systems capable of destruction or effecting mission-abort of a target;
- c. High power radio-frequency (RF) systems capable of destruction or effecting mission-abort of a target;
- d. Equipment specially designed for the detection or identification of, or defence against, systems specified in ML19.a. to ML19.c.;
- e. Physical test models and related test results for the systems, equipment and components specified in this Item.

- f. Continuous wave or pulsed "laser" systems specially designed to cause permanent blindness to unenhanced vision (i.e. to the naked eye or to the eye with corrective eyesight devices).

ML20 Cryogenic and "superconductive" equipment, as follows, and specially designed components and accessories therefor:

- a. Equipment specially designed or configured to be installed in a vehicle for military ground, marine, airborne or space applications, capable of operating while in motion and of producing or maintaining temperatures below 103 K (- 170 °C);
- b. "Superconductive" electrical equipment (rotating machinery and transformers) specially designed or configured to be installed in a vehicle for military ground, marine, airborne or space applications, capable of operating while in motion.
except:
Direct-current hybrid homopolar generators that have single-pole normal metal armatures which rotate in a magnetic field produced by superconducting windings, provided those windings are the only superconducting component in the generator.

ML21 "Software", as follows:

- a. "Software" specially designed or modified for the "development", "production" or "use" of equipment or materials specified in this Part;
- b. Specific "software", as follows:
 - 1. "Software" specially designed for:
 - a. Modelling, simulation or evaluation of military weapon systems;
 - b. "Development", monitoring, maintenance or up-dating of "software" embedded in military weapon systems;
 - c. Modelling or simulating military operation scenarios, not specified in ML14;
 - d. Command, Communications, Control and Intelligence (C3I) applications or Command, Communications, Control, Computer and Intelligence (C4I) applications;
 - 2. "Software" for determining the effects of conventional, nuclear, chemical or biological warfare weapons.
 - 3. "Software" not controlled under entry ML21.a or ML21.b.1 or ML21.b.2, specially designed or modified to enable equipment not specified in this part of this Schedule to perform military functions of equipment specified in any of the following entries: ML5, ML7.f., ML9, ML10.e., ML11, ML14, ML15, ML17.i. and ML18.

PL5001 Other security and para-military police "goods", as follows:

- a. Acoustic devices represented by the manufacturers or suppliers thereof as suitable for riot control purposes, and specialised components therefor;
- b. Anti-riot and ballistic shields and specially designed components therefor;
- c. Restraints specially designed for restraining human beings, as follows:
 - 1. Leg-irons;
 - 2. Gangchains;
 - 3. Electric shock belts;
 - 4. Shackles having a maximum locked dimension exceeding 240mm overall (i.e., including cuffs and connecting chain);
 - 5. Individual cuffs having an internal perimeter dimension when fully locked exceeding 165mm and shackles made therewith.

- d. Portable anti-riot devices for administering an incapacitating substance, and specialised components therefor;
- e. Water cannon and components therefor;
- f. Riot control vehicles which have been specially designed or modified to be electrified to repel boarders and components therefor specially designed or modified for that purpose;
- g. Portable devices designed or modified for the purpose of riot control or self-protection by the administration of an electric shock (including electric-shock batons, electric shock shields, stun guns and electric shock dart guns (tasers) and components therefor specially designed or modified for such a purpose.

ML22 "Technology" according to the General Technology Note for the "development", "production" or "use" of "goods" specified in this Part, other than that "technology" controlled in ML7 and ML18.

Annex C

Summary of HM Customs Tariff Codes

Part I – Tariff Codes used to compile data on the numbers of small arms and weapons exported.

CustomsTariff code	Goods Description
9301 11001,2	Artillery weapons (eg guns, howitzers, mortars) – self propelled
9301 19001,2	Artillery weapons (eg guns, howitzers, mortars) – other than self propelled
9301 20001,2	Rocket launchers; flame throwers; grenade launchers; torpedo tubes and similar projectors
9301 90001,2	Other military weapons (exc. Revolvers, pistols and the arms of heading 9307)
9302 0010	Revolvers and pistols: 9mm calibre and higher.
9302 0090	Revolvers and pistols below 9mm calibre.

Part II - Additional tariff codes used to compile data on the value of defence exports.

CustomsTariff code	Goods Description
8710 0000	Tanks and other armoured fighting vehicles and parts thereof.
8802 1190	Helicopters, other than civil, of an unladen weight not exceeding 2,000 kg.
8802 1290	Helicopters, other than civil, of an unladen weight exceeding 2,000kg.
8802 2090	Aircraft, other than civil, of an unladen weight not exceeding 2,000kg.
8802 3090	Aircraft, other than civil of an unladen weight between 2,000 and 15,000kg.
8802 4090	Aircraft, other than civil, of unladen weight exceeding 15,000kg.
8803 1090	Aircraft propellers and parts thereof, other than civil.
8803 2090	Aircraft under-carriage and parts thereof, other than civil.
8803 3090	Other parts for use in aircraft/helicopters (other than civil).
8805 1010	Aircraft launching gear and parts thereof.
8805 1090	Deck arrestors or similar gear.
8805 2100	Air combat simulators and parts thereof
8805 2990	Other ground flying trainers and parts thereof (other than civil)
8906 10002	Warships.
9305 1000	Parts and accessories for revolvers and pistols.
9305 9100	Parts and accessories for military weapons within heading 9301.
9306 3010	Cartridges and parts thereof for revolvers and pistols within heading 9302 and for sub machine guns within heading 9301.
9306 3030	Cartridges and parts thereof for military weapons.
9306 9010	Munitions for military purposes and parts thereof – including bombs, grenades, torpedoes, mines and similar.
9307 0000	Swords, cutlasses, bayonets, lances and similar arms and parts thereof.

1 – Information only available for extra-EC destinations.

2 - New codes introduced for 2002 (derived from existing codes, hence minimal change to coverage)

We have summarised in the following tables the arms embargoes and other defence export restrictions in place for all or part of the reporting period, to enable readers better to cross-reference licensing decisions against export restrictions in force at the time the licensing decisions were made.

Except where otherwise stated, the UK interprets the scope of UN (United Nations), EU (European Union), OSCE (Organisation for Security and Co-operation in Europe) and national arms embargoes as covering all goods and technology on the Military List (see Annex A).

The up-to-date version of the 'List of Sanctions Regimes and Arms Embargoes implemented by the UK' to which is annexed the 'Summary of Additional UK Restrictions on the Export of Strategic Goods' is available on the Internet at www.fco.gov.uk/sanctions

Annex D

The United Kingdom's International Commitments on Export Controls in 2002

We have summarised in the following tables the arms embargoes and other defence export restrictions in place for all or part of the reporting period, to enable readers better to cross-reference licensing decisions against export restrictions in force at the time the licensing decisions were made.

Except where otherwise stated, the UK interprets the scope of UN (United Nations), EU (European Union), OSCE (Organisation for Security and Co-operation in Europe) and national arms embargoes as covering all goods and technology on the Military List (see Annex A).

The up-to-date version of the 'List of Sanctions Regimes and Arms Embargoes implemented by the UK' to which is annexed the 'Summary of Additional UK Restrictions on the Export of Strategic Goods' is available on the Internet at www.fco.gov.uk/sanctions

TABLE A: Arms Embargoes in Force in 2002

Country	Details of Embargo	Dates in Force	Reference
Afghanistan	EU arms embargo on the whole territory of Afghanistan. UN arms embargo of Taliban-controlled Afghanistan	Ended on 15 January 2002 by UN SCR 1390(2002) "See All Destinations" entry	Common Position 96/746/CFSP UNSCR1333 19/12/2000
Angola	UN arms embargo except through named entry points. See also entry in Table C.	Terminated by UN SCR1448 on 9 December 2002.	UNSCR 864 15/9/93
Armenia	OSCE arms embargo	Throughout 2002	OSCE decision 28/2/92
Azerbaijan	OSCE arms embargo	Throughout 2002	OSCE decision 28/2/92
Bosnia & Herzegovina	EU arms embargo (1) (Transfers of small arms to the police forces in Bosnia & Herzegovina not covered by the embargo.)	Throughout 2002	Declaration 5/7/91 and Common Position 96/184/CFSP Council Decision 99/481/CFSP
Burma	EU arms embargo. Ban on the supply of equipment that might be used for internal repression or terrorism.	Throughout 2002	Declaration by General Affairs Council 29/7/91. Confirmed by Common Position 96/635/CFSP Common Position 2000/346/CFSP
Burundi	See Rwanda entry in Table A and Angola entry in Table C.		
China (Excluding Hong Kong and Macau Special Administrative Region)	EU arms embargo (UK interprets this embargo as covering: - Lethal weapons such as machine guns, large calibre weapons, bombs, torpedoes, rockets and missiles; - Specially designed components of the above and ammunition; - Military aircraft and helicopters, vessels of war, armoured fighting vehicles and other such	Throughout 2002	Declaration by Madrid European Council 27/6/89

Country	Details of embargo	Dates in force	Reference
	<p>weapons platforms;</p> <p>- Any equipment which might be used for internal repression.</p> <p>UK interprets this embargo as covering:</p> <ul style="list-style-type: none"> – Lethal weapons such as machine guns, large calibre weapons, bombs, torpedoes, rockets and missiles; – Specially designed components of the above and ammunition; – Military aircraft and helicopters, vessels of war, armoured fighting vehicles and other such weapons platforms; – Any equipment which might be used for internal repression.) 		
Democratic Republic of Congo	Democratic Republic of Congo EU arms embargo (Also see Rwandan entry)	Throughout 2002	Declaration of 07/04/1993; Common Position 2002/829/CFSP of 23 October 2002
Iran	<p>UK arms embargo – covers all goods and technology on the Military List as well as items entered in category O in Annex 1 of the European Decision 94/942/CFSP on the export of dual-use goods. This was replaced by EC Regulation 1334 on 28 September 2000. The embargo now covers items entered in category O (Nuclear List) in Annex 1 of that regulation.</p> <p>Exceptions:</p> <ul style="list-style-type: none"> a) Goods essential for the safety of civil aircraft and air traffic control systems; b) Radioactive material in the form of sources for medical equipment and deuterium labelled compounds for medical use. <p>Licences are not approved for any equipment where there is knowledge or reason to suspect that it would go to a military end-user or be used for military purposes. The exception is equipment which would normally require an export licence but is deemed licensable under the WMD end-use control (Articles 4.1 and</p>	Throughout 2002	Ministerial Statement 1 March 1993 28/1/98 Official report column 273-274

Country	Details of embargo	Dates in force	Reference
	4.2 of the EC Dual Use Goods Regulation and Articles 4(2)(b)(i)(ii)(iii) and (c) and (d) (ii)(bb) of the Dual Use and Related Goods (Export Control) Regulations 1996 as amended)(3) and where WMD concerns are not subsequently substantiated.		
Iraq	UN ban on all exports to Iraq (with specified exemptions).	Throughout 2002	SCR 661 06/08/1990 and subsequent resolutions.
Liberia	UN arms embargo (with specified exemptions)	Throughout 2002	UNSCR 1343(2001), renewed UNSCR 1408(2002), and will be renewed again before 6 May 2003. Common Position 2001/357/CFSP, renewed and extended 2002/457/CFSP. Council Regulations 1146/2001 and 1318/2002
Libya	EU arms embargo	Throughout 2002	Declaration of 27/1/86
Rwanda	UN arms embargo, except to Government of Rwanda through named entry points. Exception for UN peacekeeping forces. Embargo applies to sale or supply to neighbouring states (Burundi, Tanzania & DRC) if the arms and related material are for use in Rwanda. See also Angola entry in Table C	Throughout 2002	SCR 918 17/5/1994 SCR 997 09/6/1995 SCR 1011 16/8/1995
Sierra Leone	UN arms embargo, except to the Government of Sierra Leone through named-entry points	Throughout 2002	UNSCR 1171(1998). Common Position
Somalia	UN arms embargo, with specified exemptions. Original UNSCR 733(1992), amended several times, but UNSCR 1425(2002) which came into force on 22 July 2002 widened the scope of the arms embargo to prohibit direct or indirect supply to Somalia of	Throughout 2002	98/4091/CFSP Common Position: 2002/960/CFSP and Council Regulation, 147/2003

Country	Details of embargo	Dates in force	Reference
	technical advice, financial and other assistance, and training related to military activities.		
Sudan	EU arms embargo (does not apply to contracts entered into force prior to the date of entry into force of the embargo)	Throughout 2002	Common Position 1994/165/CFSP
Tanzania	See Rwanda entry		
Uganda	See Rwanda entry in Table A and Angola entry in Table C		
Zimbabwe	EU embargo on: arms; items that could be used for internal repression; and technical assistance for military items.	From February 18th 2002 (3)	Common Position 2002/145/CFSP; Council Regulation 310/2002
All Destinations	EU and UN sanctions, including arms embargo applying to Usama Bin Laden, the Taliban and Al-Qa'ida as defined by the UN list maintained on its website (4)	From 16 January 2002	UN SCR 1390 (2002) Common Position 2002/402/CFSP [Official Journal (OJ) L 139, May 29, 2002]; Council Regulation (EC) No 881/2002 (OJ L 139, May 29, 2002)

Notes:

- (1) Exempts transfers of equipment needed for demining
- (2) From 28 September 2000 these Articles were superseded by Article 4.1, 4.4 and 4.5 of Council Regulation (EC) 1334 and Regulation 4 (3)(b), (c) and (d)(iii) of the Dual Use Items (Export Control) Regulations 2000 and Article 2 (2) of the Export of Goods (Control) Order 1994.
- (3) The Foreign Secretary announced on 3 May 2000 (HC150) that all new export licence applications for arms and military equipment for Zimbabwe would be refused. The embargo was confirmed on 12 May when extant licences for military goods were revoked.
- (4) See http://www.un.org/Docs/sc/committees/Afghanistan/Afg_list_eng.htm

This list contains a summary only: It does not constitute legal advice, which should be sought if required.

TABLE B: Other Defence Export Policies and Restrictions Applying to All Destinations in Force in 2002

Country	Embargo/Prohibited Goods	Dates in force	Reference
All destinations	All applications to export arms and other goods controlled for strategic reasons are considered on a case-by-case basis against the Consolidated EU and national arms export licensing criteria	Throughout 2002	Ministerial Statement HC 199-203W 20/10/00
All destinations	<p>The UK Government is a party to three sets of internationally agreed criteria governing the export of arms and military equipment. These are:</p> <ul style="list-style-type: none"> - The guidelines for conventional arms transfers agreed by the permanent five members of the UN Security Council; - The principles governing arms transfers agreed by the Forum for Security Cooperation of the OSCE; - EU Code of Conduct on Arms Exports. <p>All licence applications are considered case-by-case against these criteria.</p>	<p>Throughout 2002</p> <p>October 1991</p> <p>November 1993</p> <p>June 1998</p>	See website ¹⁰
All Destinations	Portable devices designed or modified for riot control purposes or self-protection to administer an electric shock, including electric-shock batons, electric shock shields, stun guns and tasers, and specially designed components for such devices, leg irons, gang-chains, shackles (excluding normal handcuffs) and electric-shock belts designed for the restraint of a human being.	Throughout 2002	Ministerial Statement HC 65 28/7/97
All Destinations	As part of its policy to further strengthen the barriers against nuclear proliferation, the British Government has adopted a policy of full-scope safeguards as a condition of supply. This means that Britain does not allow the export of any significant new nuclear supplies or materials to any country, other than recognised nuclear weapons states, where there are any unsafeguarded nuclear installations.	Throughout 2002	FCO Statement 24/9/91
All Destinations	All anti-personnel landmines and their component parts	Throughout 2002	Ministerial Statement HC 72 & 135 21/5/97

¹⁰ See export controls page on FCO website www.fco.gov.uk

Country	Embargo/Prohibited Goods	Dates in force	Reference
All Destinations	Blinding Laser Weapons	Throughout 2002	Ministerial Statement HC 360 11/2/99

This list contains a summary only. It does not constitute legal advice, which should be sought if required.

Table C: Restrictions for the maintenance of Regional Peace and Stability in force in 2002.

Country	Embargo/Prohibited Goods	Dates in force	Reference
Angola	The Government will not grant export licences for new military or dual use equipment for those countries intervening in the Democratic Republic of Congo (Angola, Burundi, Namibia, Rwanda, Uganda and Zimbabwe) where there is a clear risk that it would be used in the Democratic Republic of Congo. Applications for Standard Individual Export Licences to provide spares for UK equipment already supplied under pre-existing contracts will be examined on a case by case basis against our national criteria and the EU Code of Conduct on Arms Exports. In reaching decisions on such applications the Government will take into account the wider implications of forcing UK companies to break existing obligations.	Throughout 2002	Ministerial Statement HC 184&185 09/02/00
Benin	See entry under "ECOWAS Member States"		
Burkina Faso	See entry under "ECOWAS Member States"		
Burundi	See Angola entry		
Cape Verde	See entry under "ECOWAS Member States"		
Cote d'Ivoire	See entry under "ECOWAS Member States"		
Cyprus	The Government will grant licences for the export of equipment only to the military forces of either side on the island of Cyprus which the Government is satisfied does not fall within the following categories as defined by the EU common embargo list: a) weapons designed to kill and their ammunition;	Throughout 2002	Ministerial Statement HC 282 13/2/97

Country	Details of embargo	Dates in force	Reference
	<p>b) Weapons platforms; c) Ancillary equipment, which is specifically designed for use in conjunction with a) or b). Note: among other items category a) includes guns, bombs, torpedoes, rockets, missiles, fire control systems and tanks. Category b) includes armed and armoured vehicles or vehicles with fitted mountings for arms, vessels of war, aircraft and helicopters.</p>		
ECOWAS Member States, which are: Benin Burkina Faso Cape Verde Cote d'Ivoire Gambia Ghana Guinea Guinea Bissau Liberia Mali Niger Nigeria Senegal Sierra Leone Togo	<p>The Government will take full account of the ECOWAS Moratorium declared on 1 November 1998 on the import, export and manufacture of light weapons when considering relevant licence applications to export small arms and light weapons to ECOWAS Member States. The Moratorium applies to pistols, rifles, sub-machine guns, carbines, machine guns, anti-tank missiles, mortars and howitzers up to 85mm and ammunition and spare parts for the above. A Code of Conduct on its implementation was agreed on 24 March 1999. Country	Embargo/Prohibited Goods	Dates in force	Reference
Argentina	Licences are only granted for exports that would not, at the time of application or in the foreseeable future, put at risk the security of UK Overseas Territories in the South Atlantic or UK forces operating there.	Throughout 2002	Ministerial Statement HC 721 17/12/98
Hong Kong Special Administrative Region	The Hong Kong Special Administrative Region (SAR) is a separate customs entity from the rest of China and implements its own independent trade controls, including for strategic goods. Licence applications are considered on a case by case basis but goods which would not be approved for export to the Chinese armed forces in mainland China (See Table A) will not be permitted for export for military end use in the Hong Kong SAR.	Throughout 2002	Ministerial Statement HC 225 14/1/98
Macau	Exports considered on a case by case basis but licences not issued for goods which would not be issued to mainland China (see Table A).	Throughout 2002	Ministerial Statement HC 73W 2/5/00

This list contains a summary only. It does not constitute legal advice, which should be sought if required.

Annex E

Fourth Annual Report according to Operative Provision 8 of the European Union Code of Conduct on Arms Exports

Official Journal No. C319, 2002, Item 1 (2002/C319/01, 19 December 2002)

Introduction

The European Code of Conduct on Arms Exports was adopted on 8 June 1998, setting high minimum standards for the management of, and restraint in, conventional arms transfers by all Member States of the European Union. The Code sets up eight criteria for the export of conventional arms and a denial notification procedure obliging Member States to consult on possible undercuts.

Operative Provision 8 of the Code provides for an annual review of its implementation and identification of any necessary improvements. This document constitutes the fourth annual report and covers developments during the fourth year of operation of the Code.

Decisions by Member States on practices relating to the Code of Conduct and its application by Member States are recorded in subsequent annual reports. With each report the body of such decisions grows. In the interest of transparency it was therefore decided to publish a Compendium of Agreed Practices listing all decisions in a systematic way. Together with the Code itself the Compendium gives a comprehensive view of the Code and the way it is applied by Member States. The Compendium is annexed to this report and will be updated with each subsequent report.

I. Review of the Fourth Year of implementation of the Code

During the fourth year of operation the European Union Code of Conduct on Arms Exports consolidated its position as the most comprehensive international arms export control regime, providing for a high degree of internal and external transparency, dialogue, respect for denial notifications and dynamism.

Priority objectives identified in earlier reports were achieved. However, many issues are not settled once and for all but are subject to a continuous dialogue on responsibility in arms transfers and ways to promote it.

When adopting the third annual report it was felt that although the fundamental elements of a common approach to the control of conventional arms exports by Member States of the European Union were in place much remained to be done. Also work needed to begin in certain areas which had not been addressed in the past.

This feeling was echoed in the explanatory statement of the Committee on Foreign affairs, Human Rights and CFSP of the European Parliament, concerning the Council third annual report of the Code of Conduct (EP Doc. A5-0286/2002), which acknowledged that the annual report revealed the extent to which the Code of Conduct had its own built-in dynamics and noted that progress was being made in areas regarded by the Parliament as important, but concluded with the words "a lot done, a lot more to do".

In specific terms, the substantive increase in the number of notified denials and consultations has produced a sizeable body of information which testifies to the growing confidence in this instrument. The Code's unique notification and consultation procedures and the continued exchange of views between Member States on aspects of national export policies including policies on exports to specific countries or regions contribute decisively to transparency, dialogue and convergence between Member States in the field of conventional arms exports.

Dialogue takes place not only between Member States, but also through troika meetings in the framework of the political dialogue of the EU with candidate countries and non-member states and by way of EU Member States' participation in other international and multilateral forums.

The dialogue with third countries which have aligned themselves with the Code's principles, particularly the Associated Countries of Central and Eastern Europe, as well as Cyprus, Malta and Turkey, was stepped up during the fourth year as a result of new initiatives aimed at improving the application of the Code in these countries both at the legislative level and in actual implementation by the operators concerned. Ad hoc expert meetings between all Member States and Associated Countries are now held on a regular basis.

On 9 May 2002 the Republic of Croatia aligned itself with the Code by announcing its acceptance of the principles contained in the Code.

A meeting of the Presidency and the Commission with the United States of America, attended by a number of EU Member States, was held in June 2002 on the subject of export control assistance, including in the field of arms exports.

Member States have been conscious of the increased need to prevent arms from falling into the hands of terrorists and have supported the inclusion of a terrorist clause in the "Initial Elements" of the Wassenaar Arrangement, of which all EU Member States are members. The clause was adopted at the Wassenaar plenary meeting in December 2001. EU Member States have contributed to the subsequent work on the issue in the Arrangement.

The next two sections of the report cover work on specific issues addressed by Member States during the fourth year of operation of the Code. The decisions reported in these sections are also reflected in the annexed Compendium of Agreed Practices (see Annex I).

II. State of play as regards the implementation of priority measures identified in the Third Annual Report

Harmonisation of national reports

Reporting procedures in Member States are different and do not necessarily produce comparable statistical data. Substantial efforts were therefore made to provide an agreed and uniform basis for national reporting providing greater transparency and comparability between data from individual Member States. Since national reporting procedures may take considerable time to change it is important to establish a uniform set of reporting requirements that can be implemented by all Member States. Some work remains to achieve this, but considerable progress was made increasing both the scope of reporting and the comparability of the data.

Member States agreed that the public report will provide, if available, data broken down by recipient country on the number and value of licences granted and the value of actual exports. It will also provide the total number of denials issued by each Member State and the total number of denials by all Member States for each recipient country and indicate the criteria invoked for denials and the number of times these criteria were invoked (see Annex II).

Controlling exports of non-military security and police equipment

Throughout the year, COARM kept this item under review. The Commission announced its intention to present a proposal for a Community regulation covering such items and presented its preliminary ideas for the structure and content of such a proposal, which would ban, altogether, equipment used solely for torture and introduce strict controls on equipment that may be used for internal repression. COARM will continue to follow this issue.

Arms Brokering

In the framework of COARM, Member States have collected and discussed relevant data concerning the control of brokering in their respective national legislation. Several Member States already have controls on brokering and others are in the process of introducing such controls. Member States have discussed ways of strengthening the political commitment to control arms brokering both among Member States and in a wider context. A draft Common position on the control of arms brokering was presented by the Spanish Presidency and is now under examination.

End-user certificates

Member States agreed on a common core of elements that should be found in a certificate of final destination when it is required by a Member State, concerning the export of goods included in the "common list of military equipment". They also identified an additional set of elements, which might also be required in accordance with their national legislation.

The following are the minimal details to be set out in an end-user certificate:

- exporter's details, at least name, address and business name,
- end-user's details, at least name, address and business name. In the case of an export to a firm which resells the goods on the local market, the firm will be regarded as the end-user,
- final destination country,
- a description of the goods being exported (type, characteristics), or reference to the contract concluded with the authorities of the final destination country,
- quantity and/or value of the exported goods,
- signature, name and position of the end-user,
- the date of the end-user certificate,
- end-use and/or non re-export clause.

Moreover, in accordance with their national legislation, Member States can require, inter alia:

- a clause prohibiting re-export of the goods covered in the end-user certificate. Such a clause could, among other things:
 - contain a pure and simple ban on re-export,
 - provide that re-export will be subject to agreement in writing of the authorities of the original exporting country,
 - allow for re-export without the prior authorisation of the authorities of the exporting country, to certain countries identified in the end-user certificate,
 - indication of the end-use of the goods,
 - an undertaking, where appropriate, that the goods being exported will not be used for purposes other than the declared use,
 - an undertaking, where appropriate, that the goods will not be used in the development, production or use of chemical, biological or nuclear weapons or for missiles capable of delivering such weapons,
 - full details, where appropriate, of the intermediary,

- if the end-user certificate comes from the government of the destination country of the goods, the certificate will be authenticated by the authorities of the exporting country in order to check the authenticity of the signature and the capacity of the signatory to make commitments on behalf of their government (2002).

Production of military goods under licence

Member States have agreed that, when considering licence applications for the exports of controlled technology or goods for the purposes of production overseas of equipment on the common list of military equipment, account will be taken of the potential use of the finished product in the country of production and of the risk that the finished product might be diverted or exported to an undesirable end-user.

Promoting the principles and criteria of the Code among non-member countries and international organisations

The Code of Conduct was a primary subject of all political dialogue consultations carried out with non-member States. Consultations are ongoing with the United States on ways to follow-up on the December 2000 Declaration by the European Union and the United States on the responsibility of States and on transparency regarding arms exports.

Involvement of Associated countries in denial notifications

Member States agreed to share information on denials on an aggregate basis with Associated Countries and encourage these countries to similarly inform Member States about their denials. The information will be shared through the Presidency and contain the following details: country of destination; short description of equipment and military list rating of items; classification of end-user as government agency or private entity, and reasons for refusal (criteria of the EU Code of Conduct).

III. Further questions addressed by the COARM Working Party in connection with the implementation of the Code of Conduct

Member States have continued their efforts to upgrade practices relating to the Code of Conduct in the following areas:

EU common list of military equipment

COARM agreed that Presidencies should periodically convene special meetings (at technical expert level) with a view to deciding on the possible update of the EU Common list in order to take account of modifications of the Wassenaar Arrangement (WA) list and coordinating Member States' positions and agreeing on possible common proposals for modifications of the WA list.

Transit

In those cases where Member States require a licence for transit or transshipment of any of the goods on the European Union common list, the criteria of the European Union Code of Conduct on arms exports should be duly taken into consideration by Member States when deciding on applications for such licences.

IV. Priority guidelines for the near future

The first three annual reports established the practice of identifying a number of guidelines on topics requiring consideration or action in the near future, enabling Member States and their partners within and outside the European Union to monitor and measure progress in the implementation of the Code.

Following this example Member States have identified the following guidelines:

1. Continue efforts to increase harmonisation of national reports with the aim of increasing their transparency and producing clearer summary tables;
2. Pressing for definitive adoption of a system for controlling exports of non-military security and police equipment;
3. Continue deliberations in the area of arms brokering on the basis of the guidelines already approved, with a view to adopting a Common Position on the subject. Promote regulation of arms brokering in other relevant forums;
4. Continue work on standardising the information to appear in the certificates of final destination;
5. Continue work on issues related to manufacture under licence in non-member countries;
6. Establish how best the authorities of each Member State should control electronic transfers of the software and technology associated with equipment on the common list;
7. Continue efforts to promote the principles and criteria of the Code among third countries and international organisations;
8. Work towards even greater involvement of the candidate countries in the implementation of the Code of Conduct and provide practical assistance to this effect, including by sharing information on denials;
9. Consider practical measures to improve the implementation of the denial and consultation mechanism in national decision-making taking into account Member States' experiences and the handling of the growing volume of denials circulated among Member States.

ANNEX I

COMPENDIUM OF MEMBER STATES AGREED PRACTICES WITHIN THE FRAMEWORK OF THE CODE OF CONDUCT

I. Introduction

Since the adoption of the Code of Conduct in 1998, the Member States of the European Union have agreed on a number of practices relating to the Code and its operative provisions with a view to clarifying, detailing and sometimes broadening the scope of the Code's principles and operative provisions.

Agreed practices have been reported in the annual reports on the operation of the Code of Conduct by Member States. This compendium gathers them in a systematic way and will be updated and published on a yearly basis as an annex to the annual report. Together with the Code itself the compendium provides a transparent and comprehensive view of the Code of Conduct and its application by Member States. The compendium contains two parts. The first concerns general practices related to the operation of the Code and the second, practices linked to specific operative provisions of the Code. The year of publication in the annual reports is indicated in brackets. The Compendium does not cover issues under discussion or identified as priorities for future discussions.

II. General practices related to the operation of the Code of Conduct

1. Export of equipment for humanitarian purposes

The issue of the desirability of allowing exports of controlled equipment for humanitarian purposes in circumstances that might otherwise lead to a denial on the basis of the Code of Conduct has been addressed by the COARM Working Party. In post-conflict areas, certain types of controlled equipment can make important contributions to the safety of the civilian population and to economic reconstruction. Member States have come to the conclusion that such exports are not inconsistent with the EU Code of Conduct. These exports, like all others, must be dealt with on a case-by-case basis, taking full account of the criteria set out in the Code. Member States will require adequate safeguards against misuse of such exports and, where appropriate, provisions for repatriation of the equipment (2001).

2. Control of arms brokering activities

In the context of the implementation of the Code of Conduct, the issue of arms brokering was raised and was discussed on several occasions by COARM. In accordance with the intention expressed in the second annual report, Member States have continued and deepened their discussions on the procedures for monitoring arms brokering activities. To that end, they have reached agreement on a set of guidelines for controlling brokering that could be a basis for national legislation.

Residents and entities within the EU must be prevented from engaging in arms transfer activities circumventing national, European Union, United Nations or OSCE embargoes or export criteria of the EU Code of Conduct on arms exports; it is also desirable to establish the necessary tools for information exchange on both licit and illicit brokering activities, thereby enhancing cooperation within the EU with a view to preventing and combating arms trafficking. Member States have thus agreed that arms brokers resident or established within the territory of the EU and/or brokering activities that take place within the territory of Member States should be controlled. Such controls should cover the activities of persons and entities that act as agents, traders or brokers in negotiating or arranging transactions that involve the transfer of arms and military equipment from one foreign country to another. These measures will also establish a clear framework for legitimate brokering activities.

In order to prevent loopholes stemming from different national approaches and to facilitate the work of Member States wishing to develop or further elaborate national regulations, some suggestions for controls on arms brokers were evaluated and the following conclusions were drawn.

For transactions involving the activities of buying and selling (where the arms or military equipment enter into the legal possession of the arms-brokering agent) or mediating (without direct acquisition of property), a licence or written authorisation should be obtained from the competent authorities in the Member State where the brokering activities take place or where the brokers are resident or legally established. Such licence applications should be assessed on a case-by-case basis against the criteria of the EU Code of Conduct on arms exports.

Additionally, Member States should seriously consider registering brokers or requiring them to obtain a written authorisation from the competent authorities of the Member State where they are resident or established. In the assessment of an application for authorisation to act as a broker, records of involvement in illicit activities should be taken into account. Such a system of registration or authorisation should not be construed as implying any form of official approval of brokering activities, a fact that is made clear also by the maintenance of a system of individual or global licences authorising transactions.

Legal controls in this important area should be supported by effective penalties. Member States could exchange information on legislation, registered brokers and brokers who have a history of proven involvement in illicit activities and could continue discussions in the COARM Working Party to further define, inter alia, possible criteria for the assessment of applications to register as a broker or obtain authorisation to act as a broker (2001).

In the framework of COARM, Member States have collected and discussed relevant data concerning the control of brokering in their respective national legislation. Several Member States already have controls on brokering and others are in the process of introducing such controls. Member States have discussed ways of strengthening the political commitment to control arms brokering both among Member States and in a wider context. A draft Common Position on the control of arms brokering was presented by the Spanish Presidency and is now under examination (2002).

3. Intangible transfers of technology

COARM endorsed the importance of considering effective legal controls on electronic transfers of the software and technology associated with items on the common list, which is already done in certain Member States. It agreed to pursue its deliberations on this issue, taking into consideration the work done in the dual-use area (2001).

4. Transit

In those cases where Member States require a licence for transit or transshipment of any of the goods on the European Union common list, the criteria of the European Union Code of Conduct on arms exports should be duly taken into consideration by Member States when deciding on applications for such licences (2002).

5. Production of military goods under licence

Concerned by the consequences of uncontrolled flows and destabilising accumulations of arms and other military equipment, and the proliferation of the technology and means to produce such equipment, the EU has adopted measures to consolidate and strengthen controls on arms exports, to promote international cooperation in this area and as a contribution to the prevention of conflicts. In this respect the EU recognises the special responsibility of arms exporting States. Recalling the EU Code of Conduct on arms exports of 8 June 1998, Member States have agreed that, when considering licence application for the exports of controlled technology or goods for the purposes of production overseas of equipment on the Common list of military equipment, account will be taken of the potential use of the finished product in the country of production and of the risk that the finished product might be diverted or exported to an undesirable end-user (2002).

III. Practices related to the operative provisions of the Code of Conduct

Operative Provision 3

EU Member States will circulate, through diplomatic channels, details of licences refused in accordance with the Code of Conduct for military equipment together with an explanation of why the licence has been refused. The details to be notified are set out in the form of a draft proforma at Annex A. Before any Member State grants a licence which has been denied by another Member State or States for an essentially identical transaction within the last three years, it will first consult the Member State or States which issued the denial(s). If following consultations, the Member State nevertheless decides to grant a licence, it will notify the Member State or States issuing the denial(s), giving a detailed explanation of its reasoning. The decision to transfer or deny the transfer of any item of military equipment will remain at the national discretion of each Member State. A "denial of a licence" is understood to take place when the Member State has refused to authorise the actual sale or physical export of the item of military equipment concerned, where a sale would otherwise have come about, or the conclusion of the relevant contract. For these purposes, a notifiable denial may, in accordance with national procedures, include denial of permission to start negotiations or a negative response to a formal initial enquiry about a specific order.

1. Denial notifications and consultations

A serial number indicating the country of origin and the number of the denial will be introduced for denial notifications (accompanied by the Community acronym of the Member State concerned and indication of the year).

Denials still subject to appeal under national procedures will be notified under the Code of Conduct with an indication to that effect.

Decisions to revoke extant licences will be dealt with in the same way as refusals of licence applications.

Denial notifications that have been circulated in the international export control regimes will also be circulated as Code of Conduct denial notifications if relevant to the scope of the Code.

A period of two to four weeks, from the date the request for consultations has been received is established for the consultation procedure envisaged in operative paragraph 3 of the Code, unless a different time period is agreed upon between the parties concerned.

When an arms embargo is lifted, denials solely based on the embargo will expire unless they are renewed by the denying country within a period of one month on the basis of other criteria of the Code.

Denial notifications should include the following particulars:

- country of destination;
- full description of the goods concerned (with their matching common list number);
- buyer (specifying whether the buyer is a government agency, police, army, navy, air force, or paramilitary force, or whether it concerns a private natural or legal person and, if denial is based on criterion 7, the name of the natural or legal person);
- description of the end-use;
- reasons for denial (these should include not only the number(s) of the criteria, but also the elements on which the assessment is based);
- date of the denial (or information on the date when it takes effect unless it is already in force).

A denial of a licence for a transaction deemed essentially identical to a transaction already subject to a denial notified by another Member State should also be notified. The consulting State should always provide feedback on its final decision to the notifying State, irrespective of whether that decision is to grant or deny a licence. On denials issued more than three years previously, even though the obligation to consult ends after three years, as laid down in the Code of Conduct, such a denial does not expire but could be the subject of exchanges of information (2000).

2. Dialogue on undercuts

Licensing cases in which denial consultations lead to a positive decision could be of particular use in enhancing the dialogue on the interpretation of the criteria of the Code and thus in promoting convergence in the field of conventional arms exports. Such cases might be based on developments concerning the destination in question and/or highlight different interpretations of the criteria. Member States deciding an undercut therefore agree to share, to the extent compatible with national considerations and on a confidential basis, information on the undercut decision not only (as specified in the operative provisions) with the State responsible for the relevant denial, but, in the context of COARM deliberations, with all Member States (2001).

3. The concept of "Essentially identical transactions"

Discussions within COARM has led to the following common approach.

Daily operation of the Code's denial mechanism will result in an accumulation of experience that will provide the basis for a clear understanding of what is meant by an "essentially identical transaction".

This process will be facilitated by the adoption of a comprehensive approach to assessing transactions, and by initially using a broad interpretation of the concept of "essentially identical". The resulting

consultation will provide the experience needed to gradually evolve a more precise definition of the term.

In order to accelerate the process further, the consulting Member State will, to the extent compatible with national considerations and on a confidential basis, endeavour to share with other EU Member States, in the context of COARM deliberations, information on the occasions in which consultations result in the conclusion that two transactions are not essentially identical. According to the logic of the consultation mechanism, these cases are not considered as undercuts (2000).

Operative provision 4

EU Member States will keep such denials and consultations confidential and not to use them for commercial advantage.

1. Confidentiality in consultations

Member States have looked at the arrangements for the consultation procedures and, in particular, problems relating to the necessary confidentiality of such contacts, which should not, however, thwart the objective of transparency underlying the Code of Conduct (2000).

Operative provision 5

EU Member States will work for the early adoption of a common list of military equipment covered by the Code, based on similar national and international lists. Until then, the Code will operate on the basis of national control lists incorporating, where appropriate, elements from relevant international lists.

1. The common list

The common list of military equipment was adopted by the Council on 13 June 2000 and published in the Official Journal of 8 July 2000. The Council decided to publicise the list in accordance with the principle of wide-ranging transparency underlying the Code.

Member States will now use the common list's references in denial notifications (with retroactive effect for earlier denial notifications), thereby clarifying and simplifying their information exchanges on these matters.

Denials on items subject to national controls by Member States, but not included in the above-mentioned list, will continue to be notified to all Member States. Member States that do not control these items will inform others.

The common list of military equipment has the status of a political commitment in the framework of the Common Foreign and Security Policy. In this sense, all Member States have made a political commitment to ensure that their national legislation enables them to control the export of all the goods on the list. The common list of military equipment will act as reference point for Member States' national military equipment lists, but will not directly replace them.

Since the list has an evolutionary character, Member States will continue updating it on a regular basis within the COARM Working Party.

Member States have made it known that they would endorse efforts for any items from the common list of military equipment which are not contained in the Wassenaar list, to be put forward for consideration within the Wassenaar Arrangement. (2000)

COARM agreed that Presidencies should periodically convene special meetings (at technical expert level) with a view to deciding on the possible update of the EU common list in order to take account of modifications of the WA list and coordinating Member States' positions and agreeing on possible common proposals for modifications of the WA list (2002).

2. Controlling exports of non-military and police equipment

COARM undertook to draw up a common list of non-military security and police equipment, the export of which should be monitored in accordance with criterion two of the code "Respect for human rights in the country of final destination". The Commission has now announced a proposal for a Community mechanism for controlling exports of non-military equipment that may be used for internal repression (2001).

The Commission announced its intention to present a proposal for a Community Regulation covering such items and presented its preliminary ideas for the structure and content of such a proposal, which would ban altogether equipment used solely for torture and introduce strict control with equipment that may be used for internal repression (2002).

Operative provision 7

In order to maximise the efficiency of this Code, EU Member States will work within the framework of the CFSP to reinforce their cooperation and to promote their convergence in the field of conventional arms exports.

1. Appeal procedures

The COARM Working Party discussed possible appeal procedures relating to exports of military equipment (2001).

2. End-user certificates

Member States agreed on a common core of elements that should be found in a certificate of final destination when it is required by a Member State, concerning the export of goods included in the common list of military equipment. They also identified an additional set of elements, which might also be required in accordance with their national legislation.

The following are the minimal details to be set out in an end-user certificate:

- exporter's details, at least name, address and business name,
- end-user's details, at least name, address and business name. In the case of an export to a firm which resells the goods on the local market, the firm will be regarded as the end-user,
- final destination country,
- a description of the goods being exported (type, characteristics), or reference to the contract concluded with the authorities of the final destination country,
- quantity and/or value of the exported goods,
- signature, name and position of the end-user,
- the date of the end-user certificate,
- end-use and/or non re-export clause.

Moreover, in accordance with their national legislation, Member States can require, inter alia:

- a clause prohibiting re-export of the goods covered in the end-user certificate. Such a clause could, among other things:
- contain a pure and simple ban on re-export;
- provide that re-export will be subject to agreement in writing of the authorities of the original exporting country;
- allow for re-export without the prior authorisation of the authorities of the exporting country, to certain countries identified in the end-user certificate,

- indication of the end-use of the goods,
- an undertaking, where appropriate, that the goods being exported will not be used for purposes other than the declared use,
- an undertaking, where appropriate, that the goods will not be used in the development, production or use of chemical, biological or nuclear weapons or for missiles capable of delivering such weapons,
- full details, where appropriate, of the intermediary,
- if the end-user certificate comes from the government of the destination country of the goods, the certificate will be authenticated by the authorities of the exporting country in order to check the authenticity of the signature and the capacity of the signatory to make commitments on behalf of their government (2002).

3. Member States' Coordination

Coordination within the European Union was exemplary at the United Nations Conference on the Illicit Trade in Small Arms and Light Weapons held in New York from 9 to 20 July 2001, where the European Union was the only group of States to submit an overall plan of action.

The EU also established a high profile at the Conference's preparatory committee meetings where it showed no hesitation in clearly articulating its ambitions in this area with one voice (that of the Presidency) (2001).

Operative provision 8

Each EU Member State will circulate to other EU Partners, in confidence, an annual report on its defence exports and on its implementation of the Code. These reports will be discussed at an annual meeting held within the framework of the CFSP. The meeting will also review the operation of the Code, identify any improvements which need to be made and submit to the Council a consolidated report, based on contributions from Member States.

1. Harmonisation of national reports

Member States agreed that the public report will provide data, broken down by recipient country, on the number and value of licences granted and the value of actual exports (if available). It will also provide the total number of denials issued by each Member State and the total number of denials by all Member States for each recipient country and indicate the criteria invoked for denials and the number of times these criteria were invoked (2002).

Operative provision 9

EU Member States will, as appropriate, assess jointly through the CFSP framework the situation of potential or actual recipients of arms exports from EU Member States, in the light of the principles and criteria of the Code of Conduct.

1. Consultations within COARM

Any individual case of arms exports can be raised for discussion by delegations in the COARM Working Group, if it is considered to be useful for national licensing deliberations (1999).

Member States continue to exchange information on national interpretations of embargoes imposed by the United Nations, the European Union and the Organisation for Security and Cooperation in Europe. Member States also concert on national policies to control arms exports to certain embargo-free countries or regions that are being closely monitored (existence of an internal or external conflict, human rights situation, etc.) (2000).

2. The Development of exchanges of information on national control policies for the export of arms to certain countries or regions regarded as requiring special vigilance

A substantial body of denials, notified in the framework of the mechanism of the Code, is the concrete basis for such exchanges. The exchanges have also been supplemented by exchanges of views and information amongst all Member States undertaken on a regular and systematic basis within COARM, focusing on specific countries and regions (2001).

Operative provision 11

EU Member States will use their best endeavours to encourage other arms exporting States to subscribe to the principles of this Code of Conduct.

1. Third Countries

Non-EU countries which have declared their adherence to the principles and criteria of the Code, and which have become involved in the restructuring of the European defence industry, shall be allowed to gain access to the evolving interpretation of the Code's principles and criteria. This shall not entail access to information made available in the course of the procedures referred to in the operative provisions of the Code.

The European Union and the Member States continue to encourage other arms-exporting countries to subscribe to the principles of the Code (2001).

The Code of Conduct was a primary subject of all political dialogue consultations with non-member States carried out. Consultations are ongoing with the United States of America on ways to follow-up on the December 2000 Declaration by the European Union and the United States of America on the responsibility of States and on transparency regarding arms exports (2002).

2. Involvement of Associated Countries in denial notifications

Member States agreed to share information on denials on an aggregate basis with Associated Countries and encourage these countries to similarly inform Member States about their denials. The information will be shared through the Presidency and contain the following details: country of destination, short description of equipment and military list rating of items, classification of end-user as government agency or private entity, and reasons for refusal (criteria of the EU Code of Conduct) (2002).

Note: As mentioned on page 5 of this Report, Member States export licensing statistics, which form the remainder of Annex I, are not attached here. The internet address for these statistics is given on page 5.

ANNEX II

National reports on arms exports are available in paper form or on the Internet at the following locations:

Annex F

The Consolidated EU and National Arms Export Licensing Criteria

(26 October 2000 - HC 199-203W)

An export licence will not be issued if the arguments for doing so are outweighed by the need to comply with the UK's international obligations and commitments, by concern that the goods might be used for internal repression or international aggression, by the risks to regional stability or by other considerations as described in these criteria.

Criterion one

Respect for the UK's international commitments, in particular sanctions decreed by the UN Security Council and those decreed by the European Community, agreements on non-proliferation and other subjects, as well as other international obligations

The Government will not issue an export licence if approval would be inconsistent with, inter alia:

- a) the UK's international obligations and its commitments to enforce UN, OSCE and EU arms embargoes, as well as national embargoes observed by the UK and other commitments regarding the application of strategic export controls;
- b) the UK's international obligations under the Nuclear Non-Proliferation Treaty, the Biological and Toxin Weapons Convention and the Chemical Weapons Convention;
- c) the UK's commitments in the frameworks of the Australia Group, the Missile Technology Control Regime, the Nuclear Suppliers Group and the Wassenaar Arrangement;
- d) the Guidelines for Conventional Arms Transfers agreed by the Permanent Five members of the UN Security Council, the OSCE Principles Governing Conventional Arms Transfers and the EU Code of Conduct on Arms Exports;
- e) the UK's obligations under the Ottawa Convention and the 1998 Land Mines Act;
- f) the UN Convention on Certain Conventional Weapons.

Criterion two

The respect of human rights and fundamental freedoms in the country of final destination

Having assessed the recipient country's attitude towards relevant principles established by international human rights instruments, the Government will:

- a) not issue an export licence if there is a clear risk that the proposed export might be used for internal repression;
- b) exercise special caution and vigilance in issuing licences, on a case-by-case basis and taking account of the nature of the equipment, to countries where serious violations of human rights have been established by the competent bodies of the UN, the Council of Europe or by the EU.

For these purposes, equipment which might be used for internal repression will include, inter alia, equipment where there is evidence of the use of this or similar equipment for internal repression by the proposed end-user, or where there is reason to believe that the equipment will be diverted from its stated end-use or end-user and used for internal repression.

The nature of the equipment will be considered carefully, particularly if it is intended for internal security purposes. Internal repression includes, inter alia, torture and other cruel, inhuman and degrading treatment or punishment; summary, arbitrary or extra-judicial executions; disappearances; arbitrary detentions; and other major suppression or violations of human rights and fundamental freedoms as set out in relevant international human rights instruments, including the Universal Declaration on

Human Rights and the International Covenant on Civil and Political Rights.

The Government considers that in some cases the use of force by a Government within its own borders, for example to preserve law and order against terrorists or other criminals, is legitimate and does not constitute internal repression, as long as force is used in accordance with the international human rights standards described above.

Criterion three

The internal situation in the country of final destination, as a function of the existence of tensions or armed conflicts.

The Government will not issue licences for exports which would provoke or prolong armed conflicts or aggravate existing tensions or conflicts in the country of final destination.

Criterion four

Preservation of regional peace, security and stability

The Government will not issue an export licence if there is a clear risk that the intended recipient would use the proposed export aggressively against another country or to assert by force a territorial claim. However a purely theoretical possibility that the items concerned might be used in the future against another state will not of itself lead to a licence being refused.

When considering these risks, the Government will take into account inter alia:

- a) the existence or likelihood of armed conflict between the recipient and another country;
- b) a claim against the territory of a neighbouring country which the recipient has in the past tried or threatened to pursue by means of force;
- c) whether the equipment would be likely to be used other than for the legitimate national security and defence of the recipient;
- d) the need not to affect adversely regional stability in any significant way, taking into account the balance of forces between the states of the region concerned, their relative expenditure on defence, the potential for the equipment significantly to enhance the effectiveness of existing capabilities or to improve force projection, and the need not to introduce into the region new capabilities which would be likely to lead to increased tension.

Criterion Five

The national security of the UK, of territories whose external relations are the UK's responsibility, and of allies, EU Member States and other friendly countries

The Government will take into account:

- a) the potential effect of the proposed export on the UK's defence and security interests or on those of other territories and countries as described above, while recognising that this factor cannot affect consideration of the criteria on respect of human rights and on regional peace, security and stability;
- b) the risk of the goods concerned being used against UK forces or on those of other territories and countries as described above;

- c) the risk of reverse engineering or unintended technology transfer;
- d) the need to protect UK military classified information and capabilities.

Criterion Six

The behaviour of the buyer country with regard to the international community, as regards in particular to its attitude to terrorism, the nature of its alliances and respect for international law

The Government will take into account inter alia the record of the buyer country with regard to:

- a) its support or encouragement of terrorism and international organised crime;
- b) its compliance with its international commitments, in particular on the non-use of force, including under international humanitarian law applicable to international and non-international conflicts;
- c) its commitment to non-proliferation and other areas of arms control and disarmament, in particular the signature, ratification and implementation of relevant arms control and disarmament conventions referred to in sub-para b) of Criterion One.

Criterion Seven

The existence of a risk that the equipment will be diverted within the buyer country or re-exported under undesirable conditions

In assessing the impact of the proposed export on the importing country and the risk that exported goods might be diverted to an undesirable end-user, the following will be considered:

- a) the legitimate defence and domestic security interests of the recipient country, including any involvement in UN or other peace-keeping activity;
- b) the technical capability of the recipient country to use the equipment;
- c) the capability of the recipient country to exert effective export controls.

The Government will pay particular attention to the need to avoid diversion of UK exports to terrorist organisations. Proposed exports of anti-terrorist equipment will be given particularly careful consideration in this context.

Criterion Eight

The compatibility of the arms exports with the technical and economic capacity of the recipient country, taking into account the desirability that states should achieve their legitimate needs of security and defence with the least diversion for armaments of human and economic resources

The Government will take into account, in the light of information from relevant sources such as United Nations Development Programme, World Bank, IMF and Organisation for Economic Cooperation and Development reports, whether the proposed export would seriously undermine the economy or seriously hamper the sustainable development of the recipient country.

The Government will consider in this context the recipient country's relative levels of military and social expenditure, taking into account also any EU or bilateral aid, and its public finances, balance of payments, external debt, economic and social development and any IMF- or World Bank-sponsored economic reform programme.

Other Factors

Operative Provision 10 of the EU Code of Conduct specifies that Member States may where appropriate also take into account the effect of proposed exports on their economic, social, commercial and industrial interests, but that these factors will not affect the application of the criteria in the Code.

The Government will thus continue when considering export licence applications to give full weight to the UK's national interest, including:

- a) the potential effect on the UK's economic, financial and commercial interests, including our long-term interests in having stable, democratic trading partners;
- b) the potential effect on the UK's relations with the recipient country;
- c) the potential effect on any collaborative defence production or procurement project with allies or EU partners;
- d) the protection of the UK's essential strategic industrial base. In the application of the above criteria, account will be taken of reliable evidence, including, for example, reporting from diplomatic posts, relevant reports by international bodies, intelligence and information from open sources and non-governmental organisations.

Annex G

Parliamentary answer given by the Secretary of State for Foreign and Commonwealth Affairs on 8 July 2002

Paddy Tipping: To ask the Secretary of State for Foreign and Commonwealth Affairs how the Government considers applications for export licences for the supply of military equipment for incorporation into final products for possible onward export; and if he will make a statement.

[67534]

Mr. Straw: In recent years there have been far reaching changes in the defence industry in the United Kingdom, the rest of Europe and the United States. Against the background of the end of the Cold War and the resulting reduction in defence budgets world wide, the defence industry has been subject to massive rationalisation. One consequence of this change is that increasingly defence goods are manufactured from components sourced in several different countries.

This restructuring of the defence industry presents new challenges for the Government's approach to export licensing. Many export licence applications are for goods which are to be incorporated in defence equipment in a second country, which thereafter may be exported to a third country.

The Consolidated EU and National Arms Export Licensing Criteria set out in a statement by my right hon. Friend the Member for Neath (Mr. Hain), Official Report, column 199–203W on 26 October 2000, make clear that they "will not be applied mechanistically" to decisions on export licence applications, but rather "on a case-by-case basis, using judgment and common sense". The criteria do not provide specific guidance on what approach should be adopted in these "incorporation" cases.

Other EU and NATO member states face the same rapidly changing environment for their defence industries as the UK. Enquiries by Her Majesty's Government suggest, however, that while as yet there is no common policy in such cases, many of our European partners recognise the need to adopt a special approach towards cases involving incorporation for onward export.

8 Jul 2002 : Column: 651W

After very careful consideration, Her Majesty's Government has, therefore, decided that it is necessary to set out how it will in future approach licence applications for goods where it is understood that the goods are to be incorporated into products for onward export. The Government will continue to assess such applications on a case by case basis against the Consolidated Criteria, while at the same time having regard to, inter alia, the following factors:

- (a) the export control policies and effectiveness of the export control system of the incorporating country;
- (b) the importance of the UK's defence and security relationship with the incorporating country;
- (c) the materiality and significance of the UK-origin goods in relation to the goods into which they are to be incorporated, and in relation to any end-use of the finished products which might give rise to concern;
- (d) the ease with which the UK-origin goods, or significant parts of them, could be removed from the goods into which they are to be incorporated; and
- (e) the standing of the entity to which the goods are to be exported.

Against this background the Government has considered its response to a number of applications for the export of parts, subsystems and components to the USA for incorporation into equipment eventually destined for other countries. These include Head Up Display units (HUDs) for incorporation in F-16 aircraft scheduled for delivery to Israel in 2003. The UK content in F-16s is less than 1 per cent. in value, but the supply of HUDs is part of a long-standing collaboration in this US programme. Any interruption to the supply of these components would have serious implications for the UK's defence relations with the United States.

The Government continues to be seriously concerned about the situation in Israel and the Occupied Territories. There has to be a break to the cycle of violence, which has brought so much misery to both peoples, and a resumption of the peace process. We are working closely with partners including the US to reduce the level of tension and to bring about a sustainable and peaceful settlement through negotiation.

The United States Government maintains a strong and effective export licensing system. The Quadripartite Committee has noted that the United States' conventional arms transfer policy "does not appear to differ in any important way from the EU Code or the UK national criteria. In some respects . . . it is an improvement" (HC 467 xxix 73 (25 July 2000)). Appropriate use of arms exported to Israel by the US is the subject of regular dialogue between the two countries, and when the US have concerns they make these known to the Israelis (as required by Congressional legislation). The State Department has been monitoring Israeli actions carefully and will continue to do so.

At the same time the Government carefully takes into account the importance of maintaining a strong and dynamic defence relationship with the US. This relationship is fundamental to the UK's national security as well as to our ability to play a strong and effective role in the world. The importance of this role has been demonstrated repeatedly in recent months. There are also wider benefits to the UK's national security of maintaining a strong indigenous defence industrial capability.

8 Jul 2002 : Column: 652W

Taking account of all these considerations, the Government considered that the applications should be approved, and my right hon. Friend the Secretary of State for Trade and Industry has today granted licences for the export of the HUDs, and other equipment to the USA. The Government will apply similar considerations to similar applications in future.
