The Consolidated EU and National Arms Export Licensing Criteria	491
<u>Annex G</u>	
Ministerial Statement on Man-portable Air Defence Systems (MANPADS) given by the Minister for Europe, Dr Denis MacShane of 18 November 2003	495
<u>Annex H</u>	
Ministerial Statement made by Participating States of the Wassenaar Arrangement, December 12, 2003	496

## Introduction

---

On 1 May 2004 the Export Control Act came into force, concluding a thorough review of the United Kingdom's export control system. We are committed to ensuring that this system is as effective as any in the world, with comprehensive legislation backed up by a well-resourced licensing function and appropriate penalties for non-compliance. The recent revelations about Libya's weapons programmes, and the international clandestine supply network in nuclear materials, show more than ever the importance of this area of policy.

Under the Export Control Act, arms trafficking and brokering activities which take place either wholly or partly in the UK now require a licence, as do intangible technology transfers. The provision of technical assistance related to weapons of mass destruction is also now controlled. Extraterritorial controls on the brokering of equipment that may be used for torture, of long-range missiles and their components and of any military goods to embargoed destinations, have been in force since 3 March 2004. Copies of this legislation and guidance on it can be found at [www.dti.gov.uk/export.control](http://www.dti.gov.uk/export.control). We will monitor the impact of this legislation to ensure that it is achieving its objectives, and will carry out a formal review in three years' time.

Licence applications for brokering and for intangible technology transfers are considered in the same way as export licence applications, on a case-by-case basis against the Consolidated EU and National Arms Export Licensing Criteria. Neither export licences nor licences introduced under the new controls will be issued if the arguments for doing so are outweighed by the need to comply with our international obligations and commitments, by concern that the goods might be used for internal repression or international aggression, by the risks to regional stability, or other considerations as described in these criteria including effect on sustainable development.

The UK defence industry makes an important contribution to the security and prosperity of this country, and to achieving interoperability with our partners. We strongly support legitimate defence exports, and work to enable other countries to meet their defence needs in accordance with our international obligations and commitments. As our armed forces participate in humanitarian and peacekeeping operations around the world, they continue to rely on a highly skilled defence manufacturing sector.

We are encouraged by the continuing improvement in licence processing performance, which exceeded published Government targets in 2003. We are now working to consolidate these gains by improving the ways we work. One of the outcomes of our Joined-up and Efficient Working in Export Licensing project has been to apply more rigorously a risk management approach to export licence applications, allowing us to target resources on the most difficult cases. In doing so, we have insisted that nothing be allowed to undermine the quality and thoroughness of strategic export licence decision-making. The new *mission statement* of the UK's export control community — Promoting global security through strategic export controls, facilitating responsible exports — embodies our approach in this area.

This seventh Annual Report covers licensing decisions made during 2003 and details of policy developments over the last year. The Reports, which have been praised by the Quadripartite Committee on Strategic Export Controls, are seen internationally as a benchmark of openness. However, we have continued to look for ways to enhance transparency, consistent with commercial and other confidentiality requirements, and intend to make an announcement shortly on this subject.

We remain committed to being as transparent as possible about our export licensing decisions and policy, enabling members of the public, civil society and Parliament to hold us to account for them.

Jack Straw

## Section I

### Policy Issues Relating to Strategic Export Controls

---

#### DOMESTIC POLICY

##### *Implementation of the Export Control Act 2002*

On 30 January 2003 the Government published a consultation document on the implementation of the Export Control Act 2002. This contained a partial Regulatory Impact Assessment (RIA); a description of current Export Controls; details of previous consultations; Government criteria on consultations; and the draft secondary legislation itself. This public consultation ended on 30 April. 258 responses were received.

Following careful consideration of the responses, the Government laid two Orders under the Act before Parliament on 31 October 2003. These Orders introduce new controls which came into force on 1 May 2004. At the same time as laying the Orders, the Government published a final RIA, detailed user guidance for those operating under the new controls, a new Open General Trade Control Licence (OGTCL) and application forms for individual trade licences.

To help industry prepare for the new controls, starting in October 2003 the Export Control Organisation within the Department of Trade and Industry together with trade associations have jointly run a series of seminars on the new controls, including workshops and regional roadshows, supported by HM Customs and Excise and the Ministry of Defence.

The Export of Goods, Transfer of Technology and Provision of Technical Assistance (Control) Order 2003 reproduces existing export controls as well as introducing new controls on the electronic transfer abroad of military technology the physical export of which is already controlled. This modernises and harmonises controls on military technology with similar EC controls on the electronic transfer of dual-use technology. The Order also brings in new controls on the transfer by any means of technology; and on the provision of technical assistance intended for any relevant use outside the EC. This essentially applies to

activities in connection with weapons of mass destruction (WMD) or related missile programmes.

The Trade in Goods (Control) Order 2003 extends controls beyond simple exports from the UK to cover trade (trafficking and brokering) of military equipment directly between overseas countries. These controls will apply to trade in any military equipment between overseas countries where any part of the trading activity takes place in the UK. This applies to any activity taking place in the UK, whether by a UK person (individual or company) or a foreign visitor. There are additional extra-territorial controls on UK persons operating wholly overseas who attempt to traffic or broker the Restricted Goods, ie torture equipment and certain long-range missiles and their components, to any destination.

The Trade in Controlled Goods (Embargoed Destinations) Order 2004 was laid before Parliament on 11 February 2004 and came into force on 3 March 2004. This Order introduces extra-territorial controls on trade in military goods to the nine destinations currently under full arms embargoes imposed either by the UK, the EU, or OSCE. Such controls already existed for destinations subject to UN arms embargoes.

The new OGTCL extends the risk management approach already applied for exports to the new trade controls, reducing bureaucracy for legitimate business and enabling the Government to focus on areas of greatest concern. It permits trade in overseas military goods from a wide list of source countries (i.e. any source other than Iraq, Zimbabwe or individuals to which the Al Qa ida sanctions apply) to a smaller group of countries ( Part A ; for example, many European countries, the United States, Australia, Japan, etc.). The OGTCL also permits trade from the countries listed in Part A of the licence to another wide list of permitted destinations ( Part B ).

Part A includes countries which do not give rise to any concern under the Consolidated Criteria as destinations for military goods, and which have

robust and well established export control systems that follow the same core principles as those contained in the EU Code of Conduct on Arms Exports. Part B includes all countries other than those to which the UK is obliged by international law/sanctions regimes, or where the UK has given a specific commitment, to prevent or limit the supply of military goods; for example, embargoed destinations, ECOWAS (Economic Community of West African States) countries, etc. For activities or destinations outside the scope of the OGTCL, individual licences (the equivalent of SIELs and OIELs for brokering) will be required.

Implementation of the Export Control Act 2002 has concluded the most comprehensive review of strategic export controls for over sixty years. The new controls introduced under the Act will be a significant challenge both for industry and Government. It is therefore appropriate to keep their operation under close review. The Government is committed to systematic post-implementation reviews of major legislation; accordingly we will review this legislation within three years of its coming into force. The review will monitor and evaluate the implementation of the new export controls and will examine the effectiveness of the proposed enforcement regime and the extent to which the solutions solved the problem. Collecting reliable data on compliance will also be an important element of the review.

Exporters can obtain guidance on the new legislation from the DTI's export control website at <http://www.dti.gov.uk/export.control> or by contacting the ECO Helpline on 020 7215 8070 or at [eco.help@dti.gsi.gov.uk](mailto:eco.help@dti.gsi.gov.uk)

#### *JEWEL (Joined up and more Efficient Ways of Export Licensing)*

We have been reviewing ways of improving co-ordination between the various Government Departments involved in the export licensing process in order to deliver collectively a more efficient service consistent with achieving the

Government's policy aims. The JEWEL review has confirmed that while performance has been improving, we can do more to make it better. We are therefore now initiating a programme of improvements to help us meet the challenge. These include working towards common IT systems, new joint working procedures and staff training, new published performance targets and better communication with exporters. A joint mission statement will give strategic direction to the activities of the export licensing community in DTI, FCO, MOD and DFID (the text of this is below).

#### *EXPORT LICENSING COMMUNITY JOINT MISSION STATEMENT*

*Promoting global security through strategic export controls, facilitating responsible exports*

##### *Guiding Principles*

We shall implement effectively the UK's framework of strategic export controls so as to ensure that sensitive goods and technology are kept out of the wrong hands. In so doing we shall facilitate responsible defence exports, as these depend on a sound regime of controls.

We shall administer the licensing system efficiently so that we keep the compliance burden on UK exporters to the minimum. In particular we shall therefore: —

- within the framework of our case by case approach, ensure maximum predictability for exporters by taking decisions which are consistent with the Consolidated EU and National Arms Export Licensing Criteria and our policy statements
- aim to meet our published performance indicators which will set us challenging targets for processing applications in a timely manner

- be transparent about our performance and operations, including by publishing an Annual Report to Parliament
- establish a dialogue with exporters, our customers, to enable us to understand their concerns and them to understand our requirements. We shall support them in complying with the process through services such as DTI's helpline, website, and awareness activities and ratings. We shall keep our licence products under review to ensure they remain appropriate as circumstances change.
- benchmark ourselves against comparable licensing authorities elsewhere so that we capture best practice and ensure we are leaders in our field.

#### *Transparency and Accountability*

During the period since the last Annual Report, the Quadripartite Committee has continued its retrospective scrutiny of export licensing decisions and export control policy. To facilitate this work, the Government has provided the Committee with details of a large number of export licence applications which go beyond the information available in the public domain, and responded to many questions on policy matters. In addition, the Foreign Secretary appeared before the Committee on 25 February 2004 to give oral evidence.

### **INTERNATIONAL POLICY**

#### *The European Union Code of Conduct on Arms Exports*

The most important development in the application of the Code of Conduct in the last year has been preparation for the enlargement of the European Union. The ten countries that joined the EU on 1 May 2004 have aligned themselves to the Criteria and to the principles contained in the Code. However, for the Code's continued success it is

important that it be applied in a consistent manner across the enlarged European Union.

With this in mind, the Government organised, in conjunction with the local host governments, two seminars in Tallinn (Estonia) and Bratislava (Slovakia) on the implementation of the Code of Conduct. The seminars focused on the use of the criteria in making licensing decisions, sharing best practice, as well as detailed consideration of the information-sharing and transparency obligations under the Code. The Government is considering what more it can offer by way of assistance in this area.

A report of EU activities in 2003 relating to the Code is set out in section II of the Fifth Annual Report of the Code. The document contains a useful compendium of Member States agreed practices within the framework of the Code (attached at Annex E), as well as a table giving country-by-country breakdowns of each Member State's exports.

A key element of the Code is the denial notification process that allows Member States to inform each other of export licence applications they have refused. It also places a requirement on Member States to consult other Member States if they propose to approve an application which is essentially identical to one which another Member State has refused. Member States agreed in late 2003 a User's Guide to improve the efficiency of the denial notification and consultation system, which started to apply in January 2004.

The UK also participated in an ad hoc group of Member States formed in February 2004 to discuss Criterion 8 (sustainable development). Member States recognise the importance of this criterion and have tasked the working group with producing guidance on how it can best be applied. In October 2003 the UK cited Criterion 8 for the first time in refusing an export licence application. The procedures for assessing applications against Criterion 8, announced by the Secretary of State

---

for Trade and Industry on 1 August 2002, formed the basis of the analysis which contributed to this refusal.

There are two key areas of ongoing work under the Code of Conduct. First, after five years of its operation, Member States are currently reviewing the Code. While the Government considers that the Code has been a success and is widely respected internationally, we also consider that the Code should extend to brokering and intangible (military) technology transfer activities; should take specific account of exports destined for use in overseas licensed production arrangements, and that transparency of licensing decisions taken using the Code could be improved. Secondly, Member States are investigating means of closer collaboration with non-EU countries which have chosen to apply the Code or which subscribe to its principles. Promoting wider adherence to the Code, including observance of EU arms embargoes (mentioned in Criterion 1) is an important objective which the Government pursues through Outreach (see page 10) and other activities.

#### *European Union Arms Embargoes*

Within the EU, the UK has taken a lead role in the development of a set of guidelines on implementation and evaluation of sanctions and for the establishment of an EU Sanctions Committee that will meet regularly to oversee the implementation, enforcement and upkeep of sanctions together with the exchange of experience and best practice among Member States.

#### *Framework Agreement*

The Framework Agreement, an intergovernmental agreement on collaborative defence projects, has now been fully ratified by all member countries (France, Germany, Italy, Spain, Sweden, United Kingdom). One of the aims is to simplify arrangements for the movement of defence items and technologies between partners and subsequent exports of the final product to jointly

agreed destinations. Last year the first Global Project Licence was issued by the UK under the export control elements of the treaty in 2003.

#### *UK waiver from US International Traffic in Arms Regulations (ITAR)*

Following the agreement in May 2003 on proposed texts for an ITAR waiver, the potential benefits of which were explained in last year's Annual Report, we continue to support the US Administration in its efforts to secure the necessary Congressional approval for the waiver.

#### *Small Arms & Light Weapons*

Following the January 2003 Lancaster House Conference on Strengthening Export Controls, the UK has been active in raising awareness and building consensus among states on the need to strengthen controls on Small Arms and Light Weapons (SALW) transfers. In July 2003, the UK organised two successful side meetings, in the margins of the UN Biennial Meeting of States (BMS) to review the implementation of the UN Programme of action (UN POA) on small arms. Around thirty co-sponsors and many other interested states discussed ways to strengthen international controls on small arms transfers. The meetings established a considerable degree of support for building regional consensus on a common approach on transfer controls in line with existing commitments in the UN POA. As a result we have launched the Transfer Controls Initiative. This seeks to prevent irresponsible transfers, which might contribute to instability, conflict or repression. Not only does the initiative cover export controls, but also import controls and transshipment. Diverse security concerns mean different regions approach this problem with distinct perspectives. Many countries are now constructively engaged in a regional process with the UK and key partners in carrying forward this process in Latin America, East and West Africa and South East Asia. Workshops were held in Buenos Aires in April 2004 and Nairobi in May 2004, with other workshops planned for Managua

---

and Bangkok. These are regions where the small arms problem is acute. We aim to seek minimum common international controls on SALW transfers within the UN Programme of Action (UN POA) at the UN Review meeting on small arms in 2006.

The UK is one of the largest donors to projects for combating the proliferation and misuse of small arms. Between 2001 — 2004 we have committed over £19.5 million to projects run by UN agencies, regional organisations, governments and NGOs. The UK supported projects include weapons collection, management and destruction programmes; assistance in effective implementation of existing regional agreements; development of national action plans on small arms; and support for civil society.

The UK continues to work to strengthen existing regional initiatives to combat SALW proliferation and abuse, including in Southern, East and West Africa, and Central and South America. This includes part-funding an ECOWAS conference on Combating Illicit Small Arms Brokering during March 2004, which also reviewed the existing ECOWAS moratorium on small arms and the responsibilities of the ECOWAS Small Arms Unit.

During 2003, the UK provided an expert for the UN Group of Government Experts on Marking and Tracing of SALW which presented its report to the July BMS. We also supported the Decision in SALW Resolution 58/241 in December 2003 to set up an Open Ended Working Group to develop an international instrument on Marking and Tracing; and will provide an expert accordingly.

#### *Man-Portable Air Defence Systems*

Man-Portable Air Defence Systems (MANPADS) are surface to air missiles, usually shoulder-launched and fired by an individual or operated by several individuals acting as a crew. MANPADS pose a particular threat in the hands of terrorists when used against civil aviation. The UK Government is fully committed to preventing terrorist acquisition of these weapons. Reflecting

international concern, the G8 Action Plan on Transport Security, which included a number of measures in the field of export and brokering controls on MANPADS, was agreed by the Prime Minister and other G8 leaders at the Evian Summit in June 2003. One of the measures in the G8 Action Plan agreed at Evian is to: *ban the transfer of MANPADS to non-state end users. MANPADS should only be exported to foreign governments or to agents authorised by a government*. A Written Ministerial Statement to Parliament on 18 November explained Government policy in support of the G8 Action Plan on the exports of MANPADS to non-state entities (Annex G). The Statement demonstrates the UK's commitment to preventing these weapons from falling into the wrong hands. The UK together with G8 partners, keeps progress under the Evian commitments under regular review and is working to explore further ways to minimise the MANPADS threat, focusing on best practice in stockpile management and security, and in the efforts to destroy surplus stocks globally.

#### *Wassenaar Arrangement (WA)*

The WA currently comprises 33 of the world's leading conventional arms exporters, including 19 EU countries, the US, Russia, Ukraine, Australia and Japan. On 10-12 December 2003, the Plenary concluded an Assessment Year for the WA (ie a major review every 4 years), leading to a number of changes and improvements in the Arrangement's operation.

The Plenary agreed tough standards on the export of MANPADS following the G8 Action Plan on Transport Security agreed in Evian in June 2003. The WA Elements for the control of MANPADS oblige the exporting state to assure itself that the recipient state is able to secure the weapons. The Plenary also agreed that in future WA Participating States will report on all Small Arms and Light Weapons transfers, including MANPADS. It also agreed lower reporting thresholds for transfers of artillery systems. However, no consensus was reached on a denial notification system (for military items) or consultation mechanism (for military and

---

dual-use items). We shall continue to pursue both objectives.

Guidelines on Arms Brokering were also agreed, as was a Statement of Understanding on Control of Non-Listed Dual-Use Items. The Statement enables export controls to be placed on non-listed dual-use items intended for military end-use to a destination subject to an arms embargo binding on a Participating State.

There was no agreement to admit new countries to the Arrangement. The applications of seven countries — Croatia, Cyprus, Estonia, Latvia, Lithuania, Malta and Slovenia — will be addressed during 2004. The UK supports the expansion of the WA to applicant countries which meet the eligibility requirements. We consider that applications from the new EU Member States are particularly strong and will contribute to the EU's overall effectiveness in implementing controls. The Plenary also agreed that contacts between the WA and major arms producers such as Brazil, South Africa and China will take place during 2004, to better explain the WA's role and to encourage the wider adoption of WA standards.

#### *UN Register of Conventional Arms*

The UN Register of Conventional Arms is a voluntary global reporting instrument, intended to promote greater transparency in international arms transfers and to help identify excessive build-ups of arms in particular countries or regions.

During 2003 the UK provided an expert for the Group of Governmental Experts on the Register (the fourth periodic review since 1994 carried out under a mandate from the UN General Assembly). For the first time since the Register's establishment in 1992, agreement was reached on significant technical improvements to the categories, including lowering the reporting threshold of artillery systems from 100mm to 75mm, and adding MANPADS as a subcategory under the existing category of Missiles and Missile

Launchers. Member States can now also record transfers of SALW in their annual report to the Register as part of additional background information.

In 2003 we also supported the UN Department for Disarmament Affairs in the production of a number of booklets about the Register, including a brochure highlighting the 2003 Report of Government Experts. In 2004 the UK intends to support regional and subregional workshops, which are designed to strengthen the progress of the Register and receive feedback on its further development.

The UK's Annual Return to the Register, which forms the basis for the table on "Exports of military equipment in major categories" will be available from August 2004 via [www.fco.gov.uk](http://www.fco.gov.uk) International Security. Further information can be found at the UN website <http://www.disarmament.un.org:8080/cab/register.html>

#### *OSCE (Organisation for Security and Co-operation in Europe)*

The OSCE Handbook of Best Practices on Small Arms and Light Weapons was published in December 2003. The UK contributed substantially to the Handbook by co-authoring the chapter on Stockpile Management and Security, and by contributing in particular towards chapters on Brokering, Export Control and Marking and Tracing chapters. The intention is that this guidance will inform national policy-making, with the emphasis on encouraging higher common standards of practice among all Participating States. It builds on agreements reached in other multilateral fora.

The UK has supported efforts to agree a set of OSCE principles on the control of brokering to set an international standard in line with the UN POA on SALW.

In March the UK tabled a draft decision, based on the Wassenaar Arrangement Elements on

---

MANPADS mentioned above, entitled the OSCE Principles of Export Control of MANPADS. This draft was supported by several OSCE delegations and it is expected to be adopted before the end of the current OSCE session in July.

#### *Nuclear Suppliers Group (NSG)*

NSG is a group of nuclear supplier states, which aims to contribute to the non-proliferation of nuclear weapons through the implementation of two sets of guidelines for nuclear and nuclear-related exports. NSG guidelines control the export of Trigger list items specifically designed for nuclear applications and Dual Use items that have both legitimate civil and nuclear applications.

The annual NSG Plenary will be held in Gothenburg on 26-28 May 2004. A Consultative Group meeting will immediately precede the Plenary. The third Licensing and Enforcement Experts Meeting (LEEM) will also take place that week and will be chaired once again by the UK. The LEEM is a subsection of the Information Exchange Meeting. It aims to improve co-operation between participants through the sharing of both intelligence on programmes of concern and best practice to counter proliferators of sensitive items.

An NSG Consultative Group meeting was held in Vienna on 15-17 October 2003. The Consultative Group reached agreement on a Catch All text on control of non-listed dual-use items to be included in the guidelines, which has been put forward for endorsement at the 2004 Plenary. The group continued discussions on membership issues. Progress was also made on improving and expanding the lists of controlled items to account for technological advances in the manufacture of machine tools. Owing to the number of items for discussion the Consultative Group reconvened in Vienna on 23-24 March. Topics discussed included proposals supported by the UK making the IAEA's Additional Protocol a condition of supply for NSG Trigger List goods.

#### *Missile Technology Control Regime*

The Missile Technology Control Regime Plenary meeting was held in Buenos Aires from 19-26 September 2003. Discussion concentrated on strategies to tackle regional proliferation through national and regime outreach visits, information exchange and engaging the MTCR in the fight against terrorism. In order to further increase the effectiveness of the regime, MTCR Partners agreed to include national catch-all requirements in the Guidelines to control non-listed items where they are destined for missile programmes. A meeting of technical experts agreed changes which will ensure the regime control list keeps pace with advances in technology.

#### *Hague Code of Conduct*

The Hague Code of Conduct Against Ballistic Missile Proliferation (HCOC) held its second Regular Meeting of Subscribing States in New York on 2-3 October 2003. Launched on 25 November 2002, over one hundred countries have now subscribed to the Code which represents the first internationally agreed norms on ballistic missiles. The Code commits states to a number of transparency and confidence — building measures in the development and testing of ballistic missiles, and to maintain vigilance in not supporting or assisting ballistic missile programmes in countries seeking to develop or acquire weapons of mass destruction.

#### *Australia Group*

The 2003 Plenary of the Australia Group (AG) was held in Paris from 2-5 June. New measures agreed by the Group aimed at preventing the spread of chemical and biological weapons (CBW) included:

- Addition of 14 biological agents (human pathogens) to the Biological Control List.
- Endorsement of a cooperative program of action for more effectively engaging countries in the

---

Asia-Pacific region on CBW-related export control issues — a response, in part, to specific requests from several countries in that region.

- Approval of a practical guide for compliance and enforcement officers to help them more efficiently detect, identify and prevent illegitimate transfers of items controlled by the AG.
- New procedures for improving transparency and enhancing information sharing among members.

Discussion was wide-ranging. Good progress was made on key issues, including the desirability of controlling new precursor and other types of chemicals. Participants identified additional chemicals to be considered in coming months for inclusion on the control list.

Participants also reiterated their commitment to fair and transparent trade in chemical and biological materials for peaceful purposes. They agreed that non-discriminatory application of national export licensing measures allows legitimate trade to expand unhampered by proliferation fears. As parties to the Chemical Weapons Convention and the Biological Weapons Convention, participants reaffirmed that such measures were fully consistent with their obligations under these conventions.

#### *Plutonium Disposition*

The UK has committed £70m towards the disposal of Plutonium in Russia following a US-Russia agreement under which each will dispose of 34 tonnes of weapons-grade plutonium. There are a number of outstanding issues to resolve before this programme can be put into operation, including the legal framework incorporating mutually acceptable liability provisions, the implementation framework and a shortfall in funds pledged by Russia and donor countries. We are actively contributing to bilateral and multilateral discussions aimed at resolving the outstanding issues. However even if progress is made quickly, it is unlikely that we will be in a position to allocate funds towards the programme before 2007.

#### *Outreach*

Outreach, in the form of bilateral talks in London or overseas, awareness raising seminars and attendance at conferences plays a major role in the government's efforts to promote effective export controls and responsible licensing systems. Teams of officials from various Government Departments conduct export control visits to take this work forward. Since the publication of last year's Annual Report, officials have held bilateral talks on export controls with Albania, Bosnia and Herzegovina, China, Hong Kong, Macau, Norway, Russia, South Africa, Ukraine and the United Arab Emirates, in addition to the work with the EU Accession countries mentioned above. The UK also works closely with EU partners, the US and others in carrying out its export control outreach work.

## Section II

### Export Licensing Decisions during 2003

---

#### 2.1 BACKGROUND TO EXPORT LICENSING DECISIONS

This part of the Report gives information on export licensing decisions taken by the Government between 1 January and 31 December 2003. There are three main types of licence:

- Standard Individual Export Licences (SIELs)
- Open Individual Export Licences (OIELs)
- Open General Export Licences (OGELs)

In assessing applications for individual licences, and on the basis of the information supplied by the exporter, officials in the Export Control Organisation (ECO) will determine whether or not the items are controlled and, if so, under which entry in the legislation; the relevant alphanumeric entry is known as the rating of the items. Items subject to control for strategic reasons are as follows:

- items entered in Part I and Part III of Schedule 1 to the Export of Goods (Control) Order 1994. Part III of Schedule 1 to the Export of Goods (Control) Order 1994 is known as the Military List. The text of Part I and Part III, as at 1 January 2003, is at Annex A to this report; Part III was amended during the reporting period as indicated.
- items entered in the Council Regulation (EC) 1334/2000 setting up a Community regime for the control of exports of dual-use items and technology (the regulation was adopted in June 2000). A brief summary of the dual-use list categories and sub-categories is at Annex B.
- items subject to control because the exporter has been told, knows or suspects that the items would or might be used in activities connected with weapons of mass destruction or missiles for their delivery. This is the so-called WMD end-use or catch-all control and goods controlled for these reasons are given the rating End-Use .
- items subject to control because the exporter has been told, knows or suspects that the items

in question are or may be intended for a military end-use in a country subject to certain types of arms embargo, or for use as parts or components of military list items which have been exported in breach of United Kingdom export controls. This is the co-called Military End-Use control.

A simple comparison of the numbers of licences issued or refused in this period compared to that reported in previous Annual Reports is not a reliable indicator of the practical effect of changes in Government policy between the periods concerned. In the first place, companies are unlikely to apply for licences that they can judge for themselves are likely to be refused when assessed against the published criteria. More generally, the number and nature of the applications received in total or in relation to particular destinations can vary widely from one period to the next, and there can be many reasons for such variation. The information contained in this Report may be treated as definitive subject to the constraint that there is always some small risk of human error in the compilation of such a large body of data.

#### 2.2 STANDARD INDIVIDUAL EXPORT LICENCES AND OPEN INDIVIDUAL EXPORT LICENCES

This part of the report provides information about Standard Individual Export Licences (SIELs) and Open Individual Export Licences (OIELs), granted, refused and revoked during 2003. It also deals with appeals against licensing decisions during this period.

SIELs generally allow shipments of specified items to a specified consignee up to the quantity specified by the licence. Such licences are generally valid for two years where the export will be permanent. Where the export is temporary, for example for the purposes of demonstration, trial or evaluation, the licence is generally valid for one year only and the items must be returned before the licence expires. A licence is not required for the majority of transshipments through the UK en route

---

from one country to another, providing certain conditions are met. Most other transshipments can be made under one of the Open General Transshipment Licences in force, provided in all cases that the relevant conditions are met. Where this is not the case, a standard individual transshipment licence (SITL) is required. The information on SIELs included in this part of the Report has been compiled using the Export Control Organisation's computer databases. The databases were interrogated during the compilation of the report to identify the status of all applications on which a decision was taken during the period covered by the report. In a small number of cases, there may be a subsequent change of status. There are two main reasons for such changes: a licence issued during the period may have been revoked, for example because of the imposition of trade sanctions or an arms embargo; or a decision during the period to refuse a licence might be overturned because the applicant later appealed successfully.

During the period 10,012 SIEL applications were processed, with 7,145 SIELs issued, 3 SIELs revoked, 193 SIEL applications refused and a further 1,381 were no licence required. In addition, 23 SITLs were issued, 1 SITL was refused and no SITLs were revoked.

OIELs are specific to an individual exporter and cover multiple shipments of specified items to specified destinations and/or, in some cases, specified consignees. OIELs covering the export of items entered on the Military List are generally valid for two years, while OIELs covering other items are generally valid for three years. There are no Open Individual Transshipment Licences. During the reporting period 542 OIELs were issued and/or amended to include particular destinations and/or items, including some OIELs originally issued before 1 January 2003. In addition, 2 OIELs were amended during the period to exclude particular destinations and/or items, 2 applications for OIELs were refused in full and no OIELs were revoked. It should be noted that the refusal of an application for an OIEL, amendment to exclude particular

destinations and/or items or the revocation of an OIEL does not prevent a company from applying for SIELs covering some or all of the items concerned to specified consignees in the relevant destinations. Clearly, however, the factors that led to the original decision would be taken into account in the decision on any such application.

The presentation of the 2003 Annual Report has undergone a couple of changes from last year's report. The information on SIELs and OIELs is set out in a single entry for each destination, but a further entry has been added to identify those applications where the goods are to be incorporated in the end user country. (It is not possible to break down exports covered by an OIEL as to identify incorporation cases.) Information on incorporation was, however, only collected from licences from March 2003 onwards. The information included in this Report for licences issued prior to this time has been collated by means of a manual search of the licence files over that period. While we are confident that this SIELs Incorporation information is a comprehensive record of the licensing information, we are however publishing it with this caveat.

Dealer-to-Dealer OIELs have been extracted to become section 2.6, rather than listed under each destination separately. This will reduce some of the repetition found within this section of the report. This will enable the reader to ascertain quickly what goods have been licensed for export to that destination. A summary description is provided for all items covered by licences issued for the period. The Annual Report also gives information on the number of small arms covered by SIELs issued in the period. However, this information is not provided in cases where, under the Code of Practice on Access to Government Information, the arguments for publication of the information are otherwise outweighed by the harm that this would cause to commercial confidentiality and/or legitimate security interests in the recipient country. No exclusions on those grounds were made in this year's Annual Report.

---

In the case of SIELs refused or revoked only details of ratings (whether or not a licence is required for a proposed export) are provided. Likewise for OIELs, only details of ratings are provided for licences revoked, refused in full or whose coverage was amended during the period by the exclusion of the destination (including items excluded in 2003 by the amendment of 2003 and pre-2003 licences).

### INFORMATION ON SIELs, SITLs AND OIELs

The entry for each destination in section 2.7 contains the following information:

#### *For SIELs:*

- Total value of all applications in respect of which a SIEL was issued for the export of items to the destination concerned during the period, whether the export concerned was permanent or temporary. The total value will either be rounded up to the nearest £500,000 or stated as being less than £250,000. It should be noted that the actual value of exports that are actually made under the licences concerned is likely to be less than shown because some of these licences will not be used to make all of the exports authorised and others will not be used at all. In addition, some items are exported only temporarily and later returned to the UK.
- The number of licences issued, including numbers of licences for items on the Military List, for other items and for both.
- A summary description of the items covered by the licences issued during the period is given for each destination, with the items that were allowed for temporary export indicated by a (T). The data on refused SIELs applications does not include those refused during this period following an appeal against an earlier refusal. But it does include applications refused during the period that, at the end of it, were pending a decision on an appeal against a decision to refuse a licence. The SIELs data also does not cover applications from which specific goods were removed before

a licence was issued, applications withdrawn or stopped before a decision was reached, or applications where it was determined that no licence was required or that the goods could be exported to the destination concerned under an Open General Export Licence (OGEL).

In a small number of cases SIELs may be issued identifying more than one destination. This normally arises where a licence is issued for the temporary export of items for exhibition or demonstration in more than one destination. Details of all such licences issued are shown for all relevant destinations. This means that the total number of SIELs issued shown above is slightly lower than the sum of all SIELs issued shown on the destination pages (Section 2.7).

#### *For Incorporation:*

Information on incorporation is provided in the same format as for SIELs, and includes the same level of information.

#### *For SITLs:*

Information on SITLs is provided in the same format as for SIELs. The items covered by SITLs issued merely pass through the UK and it would therefore be misleading to include a value for these licences in the report.

#### *For OIELs:*

- The number of licences issued also includes additional items authorised in 2003 through amendment to a pre-2003 licence.
- A summary description of the items covered by all the relevant OIELs issued during the period is shown, including temporary OIEL licences identified with a (T).
- Information is also provided on the relevant destination pages for OIEL applications refused in full or for licences which were revoked or where coverage was amended during the period by the exclusion of the destination or by the exclusion of items in 2003 by amendment to licences issued in 2003 or earlier.

---

The destination coverage of an OIEL may be amended for a variety of reasons, but mainly in the light of recommendations received from advisory departments. Sometimes, amendments follow the imposition of an arms embargo, but they may also reflect general concerns about the country concerned or a relevant change in circumstances there. A decision to exclude a particular country from the coverage of an OIEL does not mean that country is permanently excluded. Where the concerns that led to the original decision are no longer relevant, it might be decided to reinstate the country concerned.

The OIELs data does not cover applications from which specific items or destinations were removed before an OIEL was issued, or applications withdrawn before a decision was reached, or those for which it was determined that no licence was required or that the items could be exported to the destination concerned under an OGEL.

The information in Sections 2.6 and 2.7 does not cover OIELs whose period of validity was extended temporarily during the period pending a decision on an application for a new OIEL; such cases amount to a temporary extension of an OIEL granted in an earlier period. The decision on the new application will be covered in this or a future report, as the case may be. As OIELs cover multiple shipments of specified goods to specified destinations or specified consignees, exporters holding OIELs are not asked to provide details of the value of goods they propose to ship under an OIEL and it is therefore not possible to provide information on the total value of applications for OIELs issued.

### *Special OIELs*

There are three special categories of OIELs:

#### *Media OIELs*

Media OIELs authorise the export of protective clothing and equipment, mainly for the protection of aid agency workers and journalists, for example when working in areas of conflict. They are valid for two years, and cover the export to all destinations of items such as military helmets, body armour,

bullet-proof or bullet-resistant clothing, flak suits and specially designed components for any of these goods. Goods exported under a Media OIEL must be returned to the UK when they are no longer required for personal protection. During the period, 2 Media OIELs were issued.

#### *Continental Shelf OIELs*

Continental Shelf OIELs authorise the export of controlled goods to the UK sector of the Continental Shelf for the use only on, or in connection with, offshore installation and associated vessels. During the period 4 Continental Shelf OIELs were issued.

#### *Global Project Licences*

This is a new form of export licence that has recently been introduced by Framework Agreement partners, including the UK, to streamline the arrangements for licensing military goods and technologies between Framework Agreement (FA) Partners (UK, France, Italy, Sweden, Spain and Germany) where these transfers relate to their participation in specific collaborative defence projects. In relation to the collaborative project, each Partner state will, as appropriate, issue their own GPLs to permit transfers of specified goods and technology where these are required for that programme. The GPLs will operate on a similar basis to UK Open Individual Export Licences, and applications for GPLs will be assessed against the Consolidated Criteria in the UK, and against the EU Code of Conduct in other Framework Partner countries. One licence was issued in 2003 to France.

## **REFUSALS AND REVOCATIONS**

Table 1 provides information on the main reasons for decisions to refuse and revoke SIELs and SITLs. There were 197 such decisions in 2003. The main reasons for the refusals and revocations in Table 1 are set out broadly in line with the criteria used in the consideration of arms exports, under the Consolidated EU and National Arms Export Licensing Criteria (attached at Annex F). The reasons have also been used to encompass

**Table 1: Reasons for refusals and revocations of SIEL applications**

Reason	Number of cases
Risk of contributing to proliferation of weapons of mass destruction or ballistic missiles (or contrary to UK international obligations under the non-proliferation Treaties and Conventions and export control regimes)	116
UK's commitment to observe UN, EU or OSCE arms embargoes	11
Existence of national embargoes or policy commitments	2
UK's obligations under the Ottawa Convention and the 1998 Land Mines Act	1
Risk of use for internal repression	22
Risk of contributing to internal tensions or conflict in the recipient country	15
Preservation of regional stability	13
National security of the UK, of allies, EU Member States and other friendly countries	5
Risk of diversion or re-export to undesirable end-users	11
Compatibility of the arms exports with the technical and economic capacity of the recipient country	1
<b>Total</b>	<b>197</b>

reasons for revocation/refusal of dual use goods. In a number of cases, the refusals/revocations were made for more than one reason and in these instances, the main reason has been provided. Some licences were refused principally because of the application of national controls or policy commitments (See Annex D).

This information above does not include reasons for decisions to refuse OIELs in full or in part, to amend the coverage of an OIEL to exclude particular destinations and/or goods or to revoke an OIEL. As stated above, these decisions do not preclude a company from applying for SIELs covering some or all of the goods concerned to specified consignees in the relevant destinations.

## APPEALS

This section provides information on all appeals against a decision to refuse an application for a SIEL or against a decision to revoke a SIEL, where

the decision on the appeal was taken in the relevant period. The Government has set a target of 30 working days from receipt of all relevant information from the applicant. There is no provision in the licensing procedure for a formal appeal against refusal or revocation decisions on OIELs. This is because such decisions do not prevent a company from applying for SIELs. Decisions to refuse licences are not taken lightly. Only in those cases where refusal is clearly justified is a final decision taken to refuse. In this context, appeals against refusals will often raise difficult and complex issues. Appeals are considered at an independent and more senior level than the original licence application. Every effort is made to deal with all appeals as expeditiously as possible, however, the time taken can be lengthy due to the need to examine afresh all relevant information.

In total, there were 130 appeals heard in 2003 against the original decision to refuse an

application for a SIEL. There were no appeals against the revocation of SIELs. The appeals against the original decisions on 77 applications were refused; the appeals against the original decisions on 37 applications were upheld and licences were issued. A further 16 appeals were withdrawn by the exporter.

### 2.3 OPEN GENERAL LICENCES

Open General Export Licences (OGELs) allow the export of specified controlled goods by any company, removing the need for exporters to apply for an individual licence, provided the shipment and destinations are eligible and the conditions are met. Exporters must register with the Export Control Organisation before they make use of most OGELs. There is also a small number of Open General

Transshipment Licences (OGTLs) for which registration is not required. All Open General Licences (OGLs) remain in force until they are revoked.

Note: Council Regulation (EC) No.1334/2000 on the export of dual-use items and technology entered into force on 28 September 2000. Annex II of the Regulation introduced a new Community General Export Authorisation (CGEA). The Regulation was subsequently amended by Council Regulation (EC) No. 149/2003, (the Amending Regulation ) which entered into force on 7th March 2003. The Amending Regulation made changes to Annex I, II and IV of the Regulation which automatically changed the scope of the CGEA. (The CGEA is the Community equivalent of a UK OGEL and is directly applicable in all EU Member States).

**Table 2. Open general export and transshipment licences in force at any time between 1 January and 31 December 2003<sup>1</sup>**

Name	Made	Into Force	Revoked
1. Military Goods: Government End-Use	10.07.02 27.01.03	10.07.02 28.01.03	28.01.03

---

## 2.4 PERFORMANCE IN PROCESSING LICENCE APPLICATIONS

The Export Control Organisation sets out the Government's commitments to exporters in a Service and Performance Code. The performance target is to provide a response on 70% of applications for SIELs within 20 working days. During the period, 76% of all SIEL applications that were circulated to other Government Departments were processed within 20 working days. The targets apply as soon as the applicant has supplied full documentation necessary to support their application. The targets do not apply to applications for OIELs because of the very wide variation in the goods and destination coverage of such licences, or to applications for licences to export goods that are subject to control solely because of United Nations Sanctions. Also the targets only applied for licences concerning Iran from 2 March 2003 and Iraq from 14 June 2003. As well as SIELs and OIELs, HMG processed and approved 119 Sanctions only licences to Iraq. Sanctions licences are licences for goods not subject to strategic controls but licensable by virtue of UN Sanctions.

### *Rating requests*

The Export Control Organisation also responds to requests from exporters for advice on whether or not a licence is required to export particular goods of which the exporter has provided full technical details. During the period 3901 such requests were dealt with: of those that did not require circulation approximately 72% were given advice within 10 working days; of those that were circulated to other government departments, approximately 36% were given advice within 20 working days.

### *Licensing performance by department*

Figures 1, 2, 3 and 4 provide a breakdown of the performance in the period of the main Government Departments involved in the processing of SIELs,

based on data compiled from the ELATE computer database within the Export Control Organisation.

Figure 1 gives a breakdown of the processing time taken by the Department of Trade and Industry alone in dealing with cases on which a substantive decision was reached. It covers all cases, whether or not circulated to advisory Departments. This shows that approximately 89% of cases were processed in DTI within its target of 10 working days.

Figures 2, 3 and 4 provide a breakdown of processing time taken in the Foreign and Commonwealth Office, Ministry of Defence and Department for International Development (DFID) respectively. DFID saw a relatively small proportion of all licences in this period. Approximately 77%, 79% and 61 % of licences circulated to FCO, MOD and DFID respectively were processed within their target of 10 working days.

### *Appeals performance*

On appeals against a decision to refuse an application for a SIEL our aim is to provide a decision within 30 working days from receipt of all the relevant information from the appellant. The target does not apply to appeals concerning Iraq or Iran, or to appeals concerning goods that are controlled solely because of UN Sanctions. Of the 130 appeals decided in 2003, 1 fell into this category. Exporters withdrew a further 16 of the remaining 129 appeals. Of the remaining 113 appeals heard in 2003, 1 met the Government's 30 working day target. 35 of the 113 appeals circulated to MOD, and 11 of the 113 appeals circulated to FCO were processed within their target of 15 working days. 38 of the appeals were processed by DTI within its target of 15 working days. 2 of the 3 appeals circulated to DFID were processed within its target of 15 working days. DTI is working with other Government Departments on adjustments to the appeals procedure and appeal processing times to improve performance against this target.

## 2.5 STATISTICS ON EXPORTS OF MILITARY EQUIPMENT DURING 2003

### *Introduction*

This section of the Report provides an overview of the physical export of defence equipment from the United Kingdom in 2003. The information on exports relates to deliveries of equipment in the period 1 January to 31 December 2003 and is comprised of data from HM Customs and Excise (Tables 4 and 5), and information on Government to Government exports (Table 6).

Information on UK armed forces small arms destroyed by the Ministry of Defence in 2003 in conformity with the UN Programme of Action on Small Arms and Light Weapons is shown at (Table 3). Policy on the disposal of small arms declared surplus by the Ministry of Defence is to restrict transfers to those which meet the legitimate defence and security needs of overseas Governments. In the absence of approved transfers in line with this policy, surplus small arms are routinely destroyed.

### *HM Customs and Excise*

The HM Customs & Excise (HM C&E) system for calculating UK trade data provides information on the value of military goods, and the numbers of certain weapons (generally weapons and small arms) which have been identified as being exported from the UK during the reporting period. Information on exports is collected from two sources, with exports to European Community (EC) partners collected through the HM C&E Intrastat system and, for trade outside the EC, from customs declarations submitted by exporters. In both cases the identification of exports is based on the classification of goods in EU tariff codes, which do not match the classifications of goods subject to strategic export controls. Custom procedure codes, and knowledge of exporters active in the defence sector, have been used to distinguish between civil and military usage of mixed tariff codes. Tables 4 and 5 provide an indication of the level of trade with individual

countries identified under EC Codes, rather than a record of all exports of licensable goods during the period. The Government continues to explore opportunities to extend the data available on defence exports.

### *Government to Government transfers of equipment*

Equipment sold Government to Government is listed in Table 6. Where the transfer of ownership of surplus goods sold to overseas Governments takes place in the UK, the purchasing government is required to obtain a UK export licence before collection, and those licences will appear in Section 2.7. Disposal sales are also made through UK contractors who, where they sell to overseas customers, are required to apply for export licences in the normal way. Licences for the export of those goods are included in Section 2.7.

The UK's main Government to Government supply agreement is the Saudi Arabia Armed Forces Project. This has provided for the supply of Tornado, Hawk and PC9 aircraft and Minehunters with associated weapons, in-service support and facilities. The project is in the sustainment phase, providing ongoing support for equipment already in service. There is also a Government to Government supply agreement in place with

**Table 3: Small arms destroyed by the Ministry of Defence during 2003**

Description	Quantity
Injector	127
Launcher	1074
Machine Gun	837

Sub Machine Gun	22
<b>Total</b>	<b>24093</b>

Kuwait. This currently includes the supply of spares and maintenance for Warrior vehicles and Hawk aircraft, flying training and the Kuwait Naval School Management Programme. In respect of the supply of submarines to Canada under the Government to Government Upholder Project, one submarine was exported to Canada in 2003. The Disposals Services Agency of the Ministry of Defence also enters into Government supply agreements covering the sale of surplus defence equipment. Items of surplus equipment sold

Government to Government during 2003 are listed in Table 6.

Government to Government transfers include items gifted as well surplus items that are sold. As the Import, Export and Customs Powers (Defence) Act 1939, and Export Control Act 2002, do not bind the Crown, no licence is generally required for Government to Government transfers by gifting. Items gifted in financial year 2003/04 are listed in Table 7.

Senegal	0.01	Thailand	1.25
Sierra Leone	0.72	Trinidad: Tobago	0.01
Singapore	2.17	Turkey	42.37
South Africa	22.11	United Arab Emirates	25.19
South Korea	15.82	USA	116.3
Spain	20.35	Zambia	0.05
Sri Lanka	0.05	<b>Total</b>	<b>992.4</b>

3: The value of exports was compiled from the tariff codes listed in Part I and II of Annex C

#### **Explanatory Notes**

1. The total may not reflect the sum of individual values added together, this is due to rounding.
2. It is possible that some countries for which no values are shown may have received goods which appear on the military list but which are not identifiable under EC Tariff Codes.

**Table 6: Government to Government transfers of equipment between 1 January and 31 December 2003**

Country	Type of Equipment	Quantity <sup>4</sup>
Austria	C130	2
Bangladesh	Island Class Offshore Patrol Vessel	1
Canada	Upholder Class submarine and associated spares	1
Chile	Type 22 frigate	1
Finland	Radar displays	—
Jordan	Challenger main battle tanks	94
	Challenger driver training tanks	2
	Scammell Commander tank transporters	59
Kuwait	Components for armoured fighting vehicles Components for military aircraft Components for missiles	—
Saudi Arabia	Components and spares for aircraft and their engines Components for naval vessels and their systems; Components for ground based radar systems; Components for simulators	—

4: Quantities are only shown for whole systems

**Table 7: Items of military equipment gifted by the Government during financial year 2003/04**

Country/Strategy	Recipient	Total Cost (£)	Description (end use)
Afghanistan	Afghan Transitional Administration	817,753	Communications equipment and spares
Balkans	UNMIK	555,101	Surveillance equipment for tackling organised crime
Belize & Guatemala	Belize Defence Force	116,566	Non-lethal military equipment including uniforms, trucks, outboard motors, mess kits
Former Soviet Union	OSCE	268,444 <sup>5</sup>	Riot shields and riot clothing for the OSCE Special Police Advisor in Kyrgyzstan
Ghana	Ghanaian contingent of ECOMICI and UNOCI	250,000	Observation and communications equipment

5: Spent over FY 2002/03 & FY 2003/04

**Table 7: (cont)**

Country/Strategy	Recipient	Total Cost (£)	Description (end use)
Iraq	Iraqi Police, Fire & Ambulance Service	1m	3200 hand-held and 300 vehicle radios to improve the responsiveness of the Iraq Emergency Services in MND (SE)
	Iraqi Civil Defence Corps	159,000	To provide vehicles (13 GAZ trucks) to the 5th ICDC Battalion in MND (SE) in order to improve local security and create the conditions for the transition to local, national and strategic stand
Middle East & North Africa	Palestinian Authority	3,516	PHASE II (Gaza Project) 51 Merez Radio/phones
	Palestinian Authority	5,480	Jericho Monitoring Mission Infrastructure improvements at Jericho gaol included: 1 metal detector arch (paid to enhance UK/US monitor safety)
Mozambique	Mozambique contingent of African Union Peacekeeping Mission in Burundi (AMIB)	3.3m	Mobility and Communications Equipment
Nepal	Government of Nepal RNA	589,185	Explosive Ordnance Detail (bomb disposal)
		272, 843	Tactical radios
		400,000 <sup>6</sup>	Infrastructure work for UN Peacekeeping centre at Panchkal (Nepal)
Security Sector Reform	Uruguay Ministry of Interior	7,240	High visibility jackets
United Nations	Uruguayan armed forces	30,000	Firearms training simulator

6: Spent over FY2001/02, FY2002/03 & FY2003/04

## 2.6 Dealer to dealer (Dealer) Open Individual Export Licences (OIEL s)

Dealer OIELs authorise UK registered firearms dealers to export certain categories of firearms and ammunition solely to other registered firearms dealers in the European Union only, provided that copies of valid documentation are forwarded to the Export Control Organisation at least 2 working days before each shipment.

The following is a list of the items that have been authorised for export to the following destinations only:

Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden

No. of Licences issued	Goods Summary
2	air guns, ammunition for veterinary/tranquillising rifles, blank ammunition, components for veterinary/tranquillising rifles, components for air guns, components for deactivated weapons, components for pistols, components for replica vintage guns, components for replica weapons, components for revolvers, components for rifles, components for semi-automatic pistols, components for shotguns, components for sporting pistols, components for sporting rifles, components for vintage guns, components for vintage shotguns, components for weapon sights, crowd control ammunition, deactivated weapons, inert ammunition, pistols, replica vintage guns, replica weapons, revolvers, rifles, semi-automatic pistols, small arms ammunition, smoke ammunition, sporting gun ammunition, sporting pistols, sporting rifles, training ammunition, veterinary/tranquillising rifles, vintage guns, weapon sights
2	air guns, ammunition for veterinary/tranquillising rifles, blank ammunition, components for air guns, components for deactivated weapons, components for replica vintage guns, components for replica weapons, components for rifles, components for shotguns, components for sporting rifles, components for veterinary/tranquillising rifles, components for vintage guns, components for weapon sights, crowd control ammunition, deactivated weapons, inert ammunition, replica vintage guns, replica weapons, rifles, shotguns, small arms ammunition
1	air guns, ammunition for veterinary/tranquillising rifles, blank ammunition, components for air guns, components for deactivated weapons, components for replica vintage guns, components for replica weapons, components for shotguns, components for veterinary/tranquillising rifles, components for vintage guns, crowd control ammunition, deactivated weapons, inert ammunition, replica vintage guns, replica weapons, shotguns, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, veterinary/tranquillising rifles, vintage guns
1	air guns, ammunition for veterinary/tranquillising rifles, blank ammunition, components for veterinary/tranquillising rifles, components for air guns, components for deactivated weapons, components for pistols, components for replica vintage guns, components for replica weapons, components for revolvers, components for rifles, components for semi-automatic pistols, components for shotguns, components for sporting pistols, components for sporting rifles, components for vintage guns, components for vintage shotguns, components for weapon sights, crowd control ammunition, deactivated weapons, inert ammunition, pistols, replica vintage guns, replica weapons, revolvers, rifles, semi-automatic pistols, small arms ammunition, smoke ammunition, sporting gun ammunition, sporting pistols, sporting rifles, training ammunition, veterinary/tranquillising rifles, vintage guns, weapon sights, shotguns
9	air guns, ammunition for veterinary/tranquillising rifles, blank ammunition, components for air guns, components for deactivated weapons, components for replica vintage guns, components for replica weapons, components for rifles, components for shotguns, components for sporting rifles, components for veterinary/tranquillising rifles, components for vintage guns, components for weapon sights, crowd control ammunition, deactivated weapons, deactivated weapons, inert ammunition, replica vintage guns, replica weapons,

	rifles, shotguns, small arms ammunition, smoke ammunition, sporting gun ammunition, sporting rifles, training ammunition, veterinary/tranquillising rifles, vintage guns, weapon sights
14	air guns, ammunition for veterinary/tranquillising rifles, blank ammunition, components for veterinary/tranquillising rifles, components for air guns, components for deactivated weapons, components for pistols, components for replica vintage guns, components for replica weapons, components for revolvers, components for rifles, components for semi-automatic pistols, components for shotguns, components for sporting pistols, components for sporting rifles, components for vintage guns, components for vintage shotguns, components for weapon sights, crowd control ammunition, deactivated weapons, inert ammunition, pistols, replica vintage guns, replica weapons, revolvers, rifles, semi-automatic pistols, small arms ammunition, smoke ammunition, sporting gun ammunition, sporting pistols, sporting rifles, training ammunition, veterinary/tranquillising rifles, vintage guns, weapon sights, shotguns

## 2.7 Export licence decisions during 2003 by country of destination

### Afghanistan

#### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£1.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	11
Other items	2
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>13</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

armoured all wheel drive vehicles, ballistic shields, body armour, body armour (T), components for body armour (T), components for firing sets, devices for initiating explosives, equipment for the operation of military aircraft in confined areas, explosive ordnance disposal equipment, firing sets, improvised explosive device disposal equipment, military cargo vehicles, military helmets, military helmets (T), night vision goggles (T), non-military firing sets, test equipment for equipment employing cryptography

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1*	P	military, security and para-military goods and arms, ammunition and Issued related material as specified by the 'Order' except the following: - goods specified by PL5001; landmines and all related goods; materials or explosive materials containing RDX or HMX; chemicals specified in the Chemical Weapons Convention (Schedule 1) and related technology; complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor; software specially designed or modified for the use of complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor
2	P	improvised explosive device disposal equipment, firing set
3	T	civil NBC protection clothing, NBC respirators, NBC clothing, NBC filters

#### Footnote

\*This licence was for the use of the US Government within Afghanistan

# Albania

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£1.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	0
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>1</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

inertial equipment (T), technology for the use of inertial equipment (T)

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	technology for the production of toxins
2	T	magnetometers

# Algeria

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£2.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	3
Other items	3
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>6</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

chaff, chaff equipment, components for equipment employing cryptography, components for guided missile decoying equipment, components for military communications equipment, decoy flares, inertial equipment (T), military communications equipment, military electronic equipment (T), technology for the use of inertial equipment (T), technology for the use of military communications equipment

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	military transport aircraft, components for military transport aircraft, military aircraft ground equipment, technology for the use of military transport aircraft

Algeria cont.

2	P	components for military improvised explosive device disposal equipment, military improvised explosive device disposal equipment
3	T	magnetometers
4	P	command communications control and intelligence software
5	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
6	P	equipment employing cryptography

## American Samoa

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£3.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	0
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>1</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

equipment employing cryptography

### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	sporting gun ammunition

## Andorra

### STANDARD INDIVIDUAL EXPORT LICENCES

None

### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	sporting gun ammunition
2	P	air guns, components for air guns, weapon sights

Andorra cont.

3	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapon sights
---	---	---

## Angola

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£6.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	6
Other items	0
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>6</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

armoured all wheel drive vehicles, armoured plate, body armour, components for military communications equipment, deuterium compounds, equipment for the use of military communications equipment, inertial equipment, inertial equipment (T), military cargo vehicles, military communications equipment, military firing sets, military navigation equipment, software for the use of military communications equipment, technology for the use of inertial equipment (T), test equipment for military communications equipment, test equipment for military navigation equipment

### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	marine location systems, marine object detection systems, marine position fixing equipment
2	T	inertial equipment
3	T	towed hydrophone arrays
4	T	magnetometers
5	T	inertial equipment
6	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
7	T	inertial equipment, technology for the use of inertial equipment
8	T	marine position fixing equipment, inertial equipment
9	T	inertial equipment
10	T	magnetometers

# Antigua and Barbuda

## STANDARD INDIVIDUAL EXPORT LICENCES

8	P	towed hydrophone arrays, hydrophones

## Armenia

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>2</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

armoured plate\*, toxic chemical precursors

Number of SIELs refused covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
<b>Total number of SIELs refused</b>	<b>1</b>

Rating	ML11
No of SIELS covering items with this rating	1

### Footnote

\*The UK government supports the decision of the Senior Officials of the OSCE 28/2/92 on Armenia and has only made exceptions to this for equipment for humanitarian end-use. The only exception made for export to Armenia was for de-mining equipment. The decision to allow the export of de-mining equipment reflects the government's determination to tackle the scourge of landmines throughout the world, (HL WA59, 30 June 2003).

### OPEN INDIVIDUAL EXPORT LICENCES

29	P	items as specified in part III to schedule 1 to the export of goods (control) order 1994, as amended
30	T	military devices for initiating explosives, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
31	P	components for aircraft cannons, test equipment for aircraft cannons, software for the use of aircraft cannons, software for the use of test equipment for aircraft cannons, software for the use of aircraft cannons maintenance equipment, software for the use of equipment for the use of aircraft cannons, technology for the use of aircraft cannons, technology for the use of test equipment for aircraft cannons, technology for the use of aircraft cannons maintenance equipment, technology for the use of equipment for the use of aircraft cannons, equipment for the use of aircraft cannons, aircraft cannons maintenance equipment
32	P	military distress signalling equipment, components for military distress signalling equipment
33	P	body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
34	P	NBC clothing
35	P	air guns, components for air guns, gun mountings, equipment for the use of air guns, gun silencers
36	P	air guns
37	P	military electronic equipment, components for military electronic equipment
38	P	remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems, remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems
39	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars
40	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
41	P	general naval vessel components, test equipment for general naval vessel components
42	P	naval communications equipment, components for naval communications equipment,

Australia cont.

		technology for the use of naval communications equipment, test equipment for naval communications equipment
43	P	components for air defence systems
44	P	equipment employing cryptography
45	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
46	P	inertial equipment
47	P	components for military training aircraft
48	P	components for military electronic equipment
49	P	sporting rifles, components for sporting rifles, gun mountings, weapon sights, sporting gun ammunition
50	P	devices for initiating explosives, explosives, linear cutting explosive charges
51	P	components for aircraft radars, components for naval radars, components for ground based radars, general military vehicle components, general military aircraft components, technology for the production of general military vehicle components, technology for the production of general military aircraft components, technology for the production of components for aircraft radars, technology for the production of components for naval radars, technology for the production of components for ground based radars, technology for the use of general military vehicle components, technology for the use of general military aircraft components, technology for the use of components for aircraft radars, technology for the use of components for naval radars, technology for the use of components for ground based radars
52	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
53	P	components for military aero-engines
54	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
55	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
56	P	components for military utility vehicles, technology for the use of military utility vehicles
57	P	command communications control and intelligence software
58	P	military utility vehicles, technology for the use of military utility vehicles
59	T	military utility vehicles, armoured all wheel drive vehicles
60	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
61	P	weapon sights, components for weapon sights, technology for the use of weapon sights
62	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment

Australia cont.

63	P	components for air guns
64	P	demolition charges, equipment for the use of demolition charges, military explosives, military devices for initiating explosives
65	P	components for military training aircraft, technology for the use of military training aircraft, components for military transport aircraft, technology for the use of military transport aircraft
66	P	components for submarines, devices containing military pyrotechnic materials.
67	P	sniper rifles, sporting rifles, components for sporting rifles
68	P	components for combat aircraft, components for ejector seats, military aircraft ground equipment, components for military aero-engines
69	P	Goods specified in the EG(C)O 1994 as amended relating to military training aircraft as specified by ML4b; ML5; ML10a,b,c,e,f,g,h,i; ML11; ML14; PL5034; ML15; ML16; PL5020; ML17c,f,h,i,j,k,l,m,n; PL5017; ML21a, b1; ML22
70	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
71	P	general naval vessel components, naval shock mounts
72	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
73	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
74	P	military communications equipment
75	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures

Australia cont.

		equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
76	P	components for military electronic equipment
77	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
78	P	air guns, components for air guns, weapon sights
79	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of torpedo handling equipment, technology for the use of components for torpedo handling equipment, torpedo handling equipment, components for torpedo handling equipment, military camouflage nets, components for military camouflage nets, goods treated for signature suppression for military use, components for goods treated for signature suppression for military use, technology for the use of camouflage nets, technology for the use of components for camouflage nets, technology for the use of goods treated for signature suppression for military use, technology for the use of components for goods treated for signature suppression for military use, general military aircraft components, technology for the use of general military aircraft components
80	P	ground vehicle military communications equipment
81	P	aircraft military communications equipment
82	P	torpedo handling equipment, components for torpedo handling equipment, torpedo launching equipment, components for torpedo launching equipment, technology for the use of torpedo handling equipment, technology for the use of components for torpedo handling equipment, technology for the use of torpedo launching equipment, technology for the use of components for torpedo launching equipment
83	P	components for combat helicopters, technology for the use of components for combat helicopters
84	P	constructions for ballistic protection of military systems
85	P	military firing sets, components for military firing sets, military electronic equipment, equipment for the use of military firing sets, test equipment for military firing sets
86	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
87	P	air guns, weapon sights, components for air guns
88	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
89	P	torpedoes decoying equipment, components for torpedoes decoying equipment, military acoustic detection equipment, components for military acoustic detection equipment, military communications equipment, components for military communications equipment, military sonar detection equipment, components for military sonar detection equipment

Australia cont.

90	P	components for military electronic equipment
91	T	components for military communications equipment, military communications equipment
92	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
93	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
94	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
95	P	military transport aircraft, components for military transport aircraft
96	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
97	P	shotguns, sporting gun ammunition, small arms ammunition
98	P	devices for initiating explosives
99	P	components for military electronic equipment, components for chemical agent detection equipment
100	P	software for the simulation of military operation scenarios, software for the modelling of military operation scenarios
101	P	military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
102	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines
103	P	equipment employing cryptography
104	T	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling equipment, components for unmanned air vehicle control/handling equipment, military aero-engines, components for aero engines, test models for

Australia cont.

		unmanned air vehicles, software for the development of unmanned air vehicles, software for the production of unmanned air vehicles, software for the use of unmanned air vehicles, technology for the development of unmanned air vehicles, technology for the production of unmanned air vehicles, technology for the use of unmanned air vehicles, test equipment for unmanned air vehicles
105	P	sporting gun ammunition
106	P	software for the simulation of weapon systems
107	T	inertial equipment, technology for the use of inertial equipment
108	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft
109	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
110	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights
111	P	components for military aero-engines
112	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
113	P	components for ground based radars
114	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted display equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
115	P	military aircraft pressurised breathing equipment, equipment for the use of military aircraft pressurised breathing equipment, test equipment for military aircraft pressurised breathing equipment, technology for the use of military aircraft pressurised breathing equipment
116	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
117	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
118	P	weapon fire simulation equipment, components for weapon fire simulation equipment,

Australia cont.

		software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, software for the use of deactivated weapon simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
119	P	aircraft military communications equipment, general military aircraft components, military aircraft navigation equipment, components for military aero-engines, components for military utility helicopters
120	P	sporting gun ammunition
121	P	chemical agent detection training equipment
122	P	software for the use of military communications equipment
123	P	sporting rifles, shotguns, combination rifle-shotguns, components for sporting rifles, sporting gun ammunition, weapon sights
124	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
125	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
126	P	components for military improvised explosive device disposal equipment, military improvised explosive device disposal equipment
127	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
128	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
129	P	general military aircraft components, components for military aircraft, head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
130	P	small arms ammunition, components for small arms ammunition, blank ammunition, inert ammunition, training small arms ammunition, components for large calibre artillery ammunition, components for small calibre artillery ammunition
131	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
132	P	remote ground sensor systems, components for remote ground sensor systems, technology for the use of remote ground sensor systems, test equipment for remote ground sensor systems
133	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of

Australia cont.

		general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
134	P	non-military explosives/propellants
135	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment
136	T	military utility vehicles, armoured all wheel drive vehicles
137	T	vintage military aircraft

## Austria

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£14.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	5
Other items	0
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>5</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for armoured fighting vehicles, components for sniper rifles, equipment for the use of weapon sights, military transport aircraft, rifles (1), shotguns (2), sniper rifles (1)

Number of SIELs refused covering:	
Items on the Military List	2
Other items	0
Military List and other items	0
<b>Total number of SIELs refused</b>	<b>2</b>

Rating	ML1	ML15	ML22	PL5017
No of SIELS covering items with this rating	2	1	2	2

**OPEN INDIVIDUAL EXPORT LICENCES**

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	components for armoured personnel carriers
2	P	sporting rifles, components for sporting rifles, gun mountings, weapon sights, sporting gun ammunition
3	P	components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military utility aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for transport aircraft components for tanker aircraft, general military aircraft components, components for tanks, components for armoured fighting vehicles, components for armoured personnel carriers, general military vehicle components
4	P	components for military training aircraft, technology for the use of components for military training aircraft
5	P	sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, shotguns, components for shotguns, sporting gun ammunition
6	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
7	P	small arms ammunition, components for small arms ammunition, blank ammunition, inert ammunition, training small arms ammunition, small arms ammunition, components for large calibre artillery ammunition, components for small calibre artillery ammunition
8	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
9	T	components for military communications equipment, military communications equipment
10	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
11	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
12	P	chemical agent detection training equipment
13	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent

Austria cont.

		detection equipment, software for the use of equipment for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment
14	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
15	P	software for the use of helmet mounted display equipment, software for the use of aircraft radars, aircraft radars, components for aircraft radars, helmet mounted display equipment, components for helmet mounted display equipment, technology for the use of aircraft radars, technology for the use of components for aircraft radars
16	P	ground vehicle military communications equipment
17	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, general military aircraft components, technology for the use of general military aircraft components
18	P	weapon sights
19	P	software for the simulation of weapon systems
20	P	components for combat aircraft, components for ejector seats, military aircraft ground equipment, components for military aero-engines
21	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
22	P	military communications equipment
23	P	components for military electronic equipment, components for chemical agent detection equipment
24	P	general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
25	P	military transport aircraft, components for military transport aircraft
26	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat

		aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
27	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
28	P	components for military electronic equipment
29	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components

<b>Total number of SIELs issued</b>	<b>2</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

corrosion resistant chemical manufacturing equipment

## STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION

Total value of SIEL (Incorporation) applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	0
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>1</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

corrosion resistant chemical manufacturing equipment

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems

# Cambodia

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0

Cambodia cont.

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

military firing sets

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	magnetometers

## Cameroon

#### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
Number of SIELs issued covering:	
Items on the Military List	0
Other items	2
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>2</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

bathymetric survey systems (T), toxic chemical precursors

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	military distress signalling equipment, components for military distress signalling equipment
2	T	towed hydrophone arrays
3	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
4	P	equipment employing cryptography
5	T	bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment
6	T	inertial equipment
7	P	sporting gun ammunition
8	T	magnetometers

# Canada

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£12.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	110
Other items	10
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>120</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

animal pathogens, anti-riot shields, assault rifles (14), assault rifles (2) (T), chemical agent detection equipment, chemical agent detection equipment (T), combat aircraft, command communications control and intelligence software, components for armoured personnel carriers (T), components for assault rifles, components for chemical agent detection equipment, components for combat aircraft, components for combat helicopters, components for frigates, components for general purpose machine guns, components for ground based radars, components for large calibre artillery ammunition, components for military aero-engines, components for military aircraft navigation equipment, components for military aircraft navigation equipment (T), components for military bridges, components for military improvised explosive device disposal equipment (T), components for military infrared/thermal imaging equipment, components for military navigation equipment, components for military navigation equipment (T), components for military training aircraft, components for military utility helicopter training equipment, components for military utility helicopters, components for naval acoustic equipment (T), components for naval sonar equipment, components for NBC clothing, components for nuclear reactors, components for rifles, components for semi-automatic pistols, components for shotguns, components for sniper rifles, components for submachine guns, components for submarines, components for unmanned air vehicles (T), corrosion resistant chemical manufacturing equipment, devices containing military pyrotechnic materials, enriched boron compounds, enriched lithium compounds, equipment for the use of chemical agent detection equipment, equipment for the use of general purpose machine guns, equipment for the use of weapon night sights (T), general naval vessel components, general purpose machine guns (7), improvised explosive device detection equipment, improvised explosive device disposal equipment (T), mass spectrometers, military aero-engines, military aircraft ground equipment (T), military communications equipment (T), military improvised explosive device disposal equipment (T), military improvised explosive device jamming equipment, military training aircraft, military utility vehicles (T), mortar bombs, NBC clothing, production equipment for general military aircraft components, production equipment for large calibre artillery ammunition, rifles (58), semi-automatic pistols (1), shotguns (9), sniper rifles (30), software for the use of electronic warfare equipment (T), software for the use of military communications equipment (T), software for the use of naval acoustic equipment (T), sporting guns (22), submachine guns (12), surface to air missiles, technology for the development of anti-armour missile launching equipment, technology for the production of anti-armour missile launching equipment, technology for the use of components for anti-armour missile launching equipment, technology for the use of military improvised explosive device disposal equipment (T), technology for the use of software for the use of military communications equipment (T), triggered spark gaps, tritium (T), tritium handling equipment (T), unmanned air vehicle control/handling/launching equipment, unmanned air vehicles, vintage military vehicles, weapon cleaning equipment, weapon night sights (T), weapon sights

## STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION

Total value of SIEL (Incorporation) applications for which a licence was issued	£1.5m

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£3.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	51
Other items	5
Military List and other items	1
<b>Total number of SIELs issued</b>	<b>57</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

air guns (3), components for equipment for the use of military communications equipment, components for ground based radars, components for ground vehicle military communications equipment, components for gun mountings, components for military communications equipment, components for radar equipment, components for semi-automatic pistols, components for shotguns, components for sniper rifles, components for weapon sights, equipment employing cryptography, equipment for the use of ground based radars, equipment for the use of military communications equipment, equipment for the use of sniper rifles, flash suppressors, general military aircraft components, ground based radars, gun mountings, gun silencers, human pathogens, magnetic gradiometers (T), military communications equipment, military flying helmets (T), military improvised explosive device disposal equipment, semi-automatic pistols (2), shotguns (123), small arms ammunition, sniper rifle maintenance equipment, sniper rifles (16), software for the use of ground based radars, software for the use of test equipment for military aero-engines, sporting gun ammunition, technology for the use of military communications equipment, technology for the use of semi-automatic pistols, triggered spark gaps, weapon cleaning equipment, weapon sight mounts, weapon sights

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of equipment employing cryptography
2	P	sporting gun ammunition
3	P	equipment employing cryptography
4	P	military communications equipment, components for military communications equipment, test equipment for military communications equipment, equipment for the use of military communications equipment, software for the use of military communications equipment, technology for the use of military communications equipment, technology for the use of test equipment for military communications equipment
5	T	Magnetometers
6	T	towed hydrophone arrays
7	P	military distress signalling equipment, components for military distress signalling equipment
8	P	military communications equipment, components for military communications equipment, test equipment for military communications equipment, equipment for the use of military communications equipment, software for the use of military communications equipment, technology for the use of military communications equipment, technology for the use of test equipment for military communications equipment
9	P	improvised explosive device detection equipment, components for improvised explosive device detection equipment

Cyprus cont.

Licences revoked or whose coverage was amended during the period by the exclusion of the destination (including goods excluded in 2003 by amendment of 2003 and pre 2003 licences).		
No.	Type	Ratings
1	P	ML1
2	P	ML1

## Czech Republic

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£2.5m
Number of SIELs issued covering:	
Items on the Military List	59
Other items	10
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>69</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

anthrax vaccines, anti-riot shields, assault rifles (16) (T), blank ammunition (T), chemical agent detection equipment, chemical agent detection equipment (T), components for assault rifles (T), components for chemical agent detection equipment, components for chemical agent detection equipment (T), components for combat aircraft, components for general purpose machine guns (T), components for ground vehicle military communications equipment, components for military cargo vehicles, components for military communications equipment, components for military training aircraft, components for military transport aircraft, components for munitions launching equipment, components for nuclear reactors, components for semi-automatic pistols (T), components for small arms ammunition, components for sniper rifles, components for sniper rifles (T), components for submachine guns (T), components for surface to air missiles (T), corrosion resistant chemical manufacturing equipment, equipment for the use of assault rifles (T), equipment for the use of general purpose machine guns (T), equipment for the use of ground vehicle military communications equipment, equipment for the use of military communications equipment, equipment for the use of military communications equipment (T), equipment for the use of sniper rifles, equipment for the use of weapon sights (T), equipment with reduced electromagnetic emanations, general military vehicle components, general purpose machine guns (3) (T), goods treated for signature suppression for military use, grenade launchers (T), ground vehicle military communications equipment, gun mountings, gun mountings (T), gun silencers, inertial equipment, microwave components, military aero-engines, military communications equipment, military communications equipment (T), military utility vehicles (T), munitions launching equipment (T), night vision goggles, radiation hardened TV cameras, remote ground sensor systems (T), rifles (36) (T), semi automatic pistols (15) (T), semi-automatic pistols (45), shotguns (1) (T), small arms ammunition, sniper rifles (3), sniper rifles (4) (T), software for the development of cryptographic software, software for the use of military communications equipment (T), software for the use of remote ground sensor systems (T), sporting gun ammunition, submachine guns (35) (T), technology for the production of nuclear reactor fuel element fabrication equipment, technology for the use of ground vehicle military communications equipment, technology for the use of military communications equipment, technology for the use of software for the development of cryptographic software, weapon cleaning equipment, weapon sight mounts, weapon sights (T)

**STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION**

Total value of SIEL (Incorporation) applications for which a licence was issued	£4.5m
---	-------

Number of SIELs issued covering:	
Items on the Military List	2
Other items	0
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>2</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for military cargo vehicles, components for tanks

**OPEN INDIVIDUAL EXPORT LICENCES**

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
2	P	forgings for military aero-engines
3	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
4	T	vintage military aircraft
5	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
6	T	military utility vehicles, armoured all wheel drive vehicles
7	T	components for military communications equipment, military communications equipment
8	P	equipment employing cryptography
9	P	improvised explosive device detection equipment, components for improvised explosive device detection equipment
10	P	command communications control and intelligence software
11	P	remote ground sensor systems, components for remote ground sensor systems, technology for the use of remote ground sensor systems, test equipment for remote ground sensor systems
12	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
13	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
14	P	sporting gun ammunition
15	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
16	P	components for military utility vehicles, technology for the use of military utility vehicles
17	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
18	P	aircraft military communications equipment
19	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators

20	P	general military aircraft components, components for military aircraft, head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
21	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
22	P	components for combat aircraft, technology for the use of combat aircraft, equipment for the use of combat aircraft
23	P	radiation hardened integrated circuits, extended temperature range integrated circuits, general purpose integrated circuits
24	P	weapon sights
25	P	components for military electronic equipment
26	P	military distress signalling equipment, components for military distress signalling equipment
27	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
28	P	software for the use of military communications equipment, software for the use of military electronic equipment
29	P	air guns, components for air guns, weapon sights
30	P	military camouflage nets, goods treated for signature suppression for military use
31	P	components for military electronic equipment
32	P	military utility vehicles, technology for the use of military utility vehicles
33	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
34	P	remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems, remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems
35	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
36	P	equipment employing cryptography
37	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour

38	T	assault rifles, pistols, revolvers, semi-automatic pistols, submachine guns, rifles, sniper rifles, sporting rifles, general purpose machine guns, heavy machine guns, shotguns, combat shotguns, mortars, weapon sights
39	P	components for military communications equipment
40	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
41	P	shotguns, sporting rifles, revolvers, semi-automatic pistols, air guns, sporting gun ammunition, weapon sights, components for sporting gun ammunition
42	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
43	P	components for combat aircraft, components for combat helicopters, components for military surveillance aircraft, components for military transport aircraft, components for military training aircraft, components for military utility helicopters, components for unmanned air vehicles, general military aircraft components, software for the use of general military aircraft components, software for the use of components for combat aircraft, software for the use of components for combat helicopters, software for the use of components for military surveillance aircraft, software for the use of components for military transport aircraft, software for the use of components for military training aircraft, software for the use of components for military utility helicopters, software for the use of components for unmanned air vehicles, technology for the use of general military aircraft components, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military surveillance aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military training aircraft, technology for the use of components for military utility helicopters, technology for the use of components for unmanned air vehicles
44	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography

## Denmark

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£12.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	39
Other items	7
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>46</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

anthrax vaccines, assault rifles (10) (T), command communications control and intelligence software, components for airborne surveillance equipment, components for combat helicopters, components for ground based radars, components for military communications equipment, components for military utility helicopters, components for NBC filters, components for small arms ammunition, CS hand grenades, ground based radars (T), improvised explosive device detection equipment (T), improvised explosive device disposal equipment, linear cutting explosive charges, military cargo vehicles, military communications equipment, military electronic equipment, military trailers (T), NBC respirators, production equipment for combat helicopters, production equipment for components for military utility

Denmark cont.

helicopters (T), production equipment for military utility helicopters, shotguns (11), small arms ammunition, smoke canisters, software for the development of military communications equipment, software for the use of military communications equipment, sporting gun ammunition, technology for the use of military communications equipment, weapon sights

#### STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION

Total value of SIEL (Incorporation) applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>1</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for military surveillance aircraft

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
2	P	components for ground based radars, software for the use of ground based radars, test equipment for ground based radars, technology for the use of ground based radars
3	P	software for the simulation of weapon systems
4	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
5	P	improvised explosive device disposal equipment
6	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
7	P	weapon sights
8	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
9	P	demolition charges, equipment for the use of demolition charges, military explosives, military devices for initiating explosives
10	P	aircraft military communications equipment
11	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
12	P	components for military aero-engines
13	P	torpedoes decoying equipment, components for torpedoes decoying equipment, military acoustic detection equipment, components for military acoustic detection equipment, military communications equipment, components for military

Denmark cont.

		communications equipment, military sonar detection equipment, components for military sonar detection equipment
14	P	military aircraft pressurised breathing equipment, components for ejector seats
15	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
16	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
17	P	general naval vessel components, test equipment for general naval vessel components
18	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
19	P	general military vehicle components, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for artillery towing tractors, components for bridge laying vehicles, components for bridge trailers, components for command and control vehicles, components for gun carriers, components for military ambulances, components for military cargo vehicles, components for military engineer vehicles, components for military motorcycles, components for military trailers, components for military utility vehicles, components for minefield breaching vehicles, components for mine clearance vehicles, components for munitions launching vehicles, components for tanks, components for tank destroyers, components for tank transporters
20	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
21	P	components for combat helicopters
22	P	components for military utility helicopters
23	P	small arms ammunition, components for small arms ammunition, blank ammunition, inert ammunition, training small arms ammunition, small arms ammunition, components for large calibre artillery ammunition, components for small calibre artillery ammunition
24	P	military transport aircraft, components for military transport aircraft
25	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
26	P	military aircraft head-up displays, general military aircraft components, military aircraft

		navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted display equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
27	P	general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
28	P	components for military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines
29	P	ground vehicle military communications equipment, test equipment for ground vehicle military communications equipment, technology for the use of ground vehicle military communications equipment, technology for the use of test equipment for ground vehicle military communications equipment, military communications equipment, test equipment for military communications equipment, military electronic equipment, test equipment for military electronic equipment, military navigation equipment, test equipment for military navigation equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military communications equipment, technology for the use of test equipment for military electronic equipment, technology for the use of test equipment for military navigation equipment
30	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
31	P	ground vehicle military communications equipment
32	P	sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, shotguns, components for shotguns, sporting gun ammunition
33	T	military surveillance aircraft
34	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, software for the use of equipment for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment

Denmark cont.

35	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
36	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
37	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
38	P	components for military utility vehicles, technology for the use of military utility vehicles
39	P	small calibre artillery ammunition, training small calibre artillery ammunition
40	P	components for combat helicopters
41	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic

## Denmark cont.

		equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
42	P	components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military utility aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for transport aircraft, components for tanker aircraft, general military aircraft components
43	P	equipment for operation of military aircraft in confined areas, general naval vessel components, components for submarines, technology for the use of components for frigates, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of components for mine sweepers
44	P	components for combat aircraft, components for military training aircraft, components for military utility helicopters, components for military surveillance aircraft, military aircraft ground equipment, components for airborne radars, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility helicopters, test equipment for military surveillance aircraft, components for military sonar detection equipment, components for military communications equipment, components for torpedoes, components for guided missile decoying equipment
45	P	constructions for ballistic protection of military systems
46	P	chemical agent detection training equipment
47	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
48	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment
49	P	devices for initiating explosives, explosives, linear cutting explosive charges
50	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, general military aircraft components, technology for the use of general military aircraft components
51	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
52	P	general naval vessel components, naval shock mounts
53	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars
54	P	components for military electronic equipment
55	P	components for military transport aircraft
56	T	towed hydrophone arrays
57	P	components for military infrared/thermal imaging equipment, components for air to air missiles, components for combat aircraft
58	P	military distress signalling equipment, components for military distress signalling equipment
59	P	components for military electronic equipment, components for chemical agent detection equipment
60	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights
61	P	military firing sets, components for military firing sets, military electronic equipment, equipment for the use of military firing sets, test equipment for military firing sets

Denmark cont.

62	P	non-military explosives/propellants
63	P	components for military transport aircraft, technology for the use of military transport aircraft, components for combat aircraft, technology for the use of combat aircraft
64	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines
65	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
66	P	NBC clothing
67	P	weapon sights
68	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
69	P	unmanned air vehicles, components for unmanned air vehicles, military parachutes
70	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
71	P	equipment for the use of military communications equipment, components for military communications equipment, technology for the use of military communications equipment
72	P	equipment employing cryptography, cryptographic software, software for the development of equipment employing cryptography, software for the development of cryptographic software, technology for the use of equipment using cryptography, technology for the production of equipment using cryptography, technology for the development of equipment using cryptography, technology for the use of cryptographic software, technology for the production of cryptographic software, technology for the development of cryptographic software
73	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	equipment employing cryptography
2	P	ground based radars, components for ground based radars, test equipment for ground based radars, software for the use of ground based radars, technology for the use of ground based radars
3	P	equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of equipment employing cryptography
4	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapon sights
5	P	equipment employing cryptography
6	P	radiation hardened integrated circuits, extended temperature range integrated circuits, general purpose integrated circuits.
7	T	magnetometers
8	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment

Estonia cont.

9	P	components for military communications equipment
10	P	inertial equipment, components for inertial equipment
11	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
12	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
13	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
14	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
15	P	equipment employing cryptography
16	P	command communications control and intelligence software
17	T	towed hydrophone arrays
18	P	software for the use of military communications equipment, software for the use of military electronic equipment
19	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
20	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights

## Ethiopia

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	4
Military List and other items	1
<b>Total number of SIELs issued</b>	<b>6</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

bomb suits, components for bomb suits, components for improvised explosive device detection equipment, improvised explosive device detection equipment, improvised explosive device disposal equipment, toxic chemical precursors

### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	aiming devices, bombing computers, fire control equipment, weapon control systems, weapon day and night sights, weapon night sights, weapon sights, aircraft military

Ethiopia cont.

		communications equipment, general military aircraft components, military aircraft head-down displays, military aircraft head-up displays, military aircraft navigation equipment, components for military training aircraft, military aero-engines, airborne electronic warfare equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft flight data recorders, equipment for operation of military aircraft in confined areas, military aircraft ground equipment, aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, military flying helmets, military parachutes, equipment for the use of military training aircraft, helmet mounted display equipment, military distress signalling equipment, military electronic equipment, military navigation equipment, test equipment for military training aircraft, military cameras, military photographic equipment, military image intensifier equipment, night vision goggles, military infrared/thermal imaging equipment, military imaging radar equipment, imaging countermeasures equipment, imaging counter-countermeasures equipment, imaging countermeasure/counter-countermeasures equipment, technology for the use of military training aircraft, software for the use military training aircraft

26	P	components for combat aircraft, components for ejector seats, military aircraft ground equipment, components for military aero-engines
27	P	equipment employing cryptography
28	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment, software for the use of mine countermeasures equipment, technology for the use of mine countermeasures equipment
29	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
30	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
31	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
32	P	components for military communications equipment
33	P	components for sporting gun ammunition
34	P	military utility vehicles, technology for the use of military utility vehicles
35	P	components for military infrared/thermal imaging equipment, components for air to air missiles, components for combat aircraft
36	P	military communications equipment
37	T	military utility vehicles, armoured all wheel drive vehicles
38	P	technology for the use of bombs launching equipment, equipment for the use of bombs

Finland cont.

		launching equipment, bombs launching equipment, components for bombs launching equipment, components for military infrared/thermal imaging equipment, technology for the use of components for military infrared/thermal imaging equipment, equipment for the use of components for military infrared/thermal imaging equipment, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
39	P	components for ground based radars
40	P	components for military electronic equipment, components for chemical agent detection equipment
41	P	remote ground sensor systems, components for remote ground sensor systems, technology for the use of remote ground sensor systems, test equipment for remote ground sensor systems
42	P	weapon sights
43	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
44	P	sporting rifles, components for sporting rifles, gun mountings, weapon sights, sporting gun ammunition
45	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights
46	P	software for the use of ground based radars, technology for the use of ground based radars, equipment for the use of ground based radars, components for ground based radars, test equipment for ground based radars
47	P	general naval vessel components, naval shock mounts
48	P	goods specified in the EG(C)O 1994 as amended relating to military training aircraft as specified by ML4b; ML5; ML10a,b,c,e,f,g,h,i; ML11; ML14; PL5034; ML15; ML16; PL5020; ML17c,f,h,i,j,k,l,m,n; PL5017; ML21a, b1; ML22
49	P	general military vehicle components, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for artillery towing tractors, components for bridge laying vehicles, components for bridge trailers, components for command and control vehicles, components for gun carriers, components for military ambulances, components for military cargo vehicles, components for military engineer vehicles, components for military motorcycles, components for military trailers, components for military utility vehicles, components for minefield breaching vehicles, components for mine clearance vehicles, components for munitions launching vehicles, components for tanks, components for tank destroyers, components for tank transporters
50	P	software for the simulation of weapon systems
51	P	military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, components for ejectors seats, military parachutes, chemical agent detection equipment simulators
52	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for

## Finland cont.

		naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
53	T	assault rifles, pistols, revolvers, semi-automatic pistols, submachine guns, rifles, sniper rifles, sporting rifles, general purpose machine guns, heavy machine guns, shotguns, combat shotguns, mortars, weapon sights
54	P	components for aircraft cannons, test equipment for aircraft cannons, software for the use of aircraft cannons, software for the use of test equipment for aircraft cannons, software for the use of aircraft cannons maintenance equipment, software for the use of equipment for the use of aircraft cannons, technology for the use of aircraft cannons, technology for the use of test equipment for aircraft cannons, technology for the use of aircraft cannons maintenance equipment, technology for the use of equipment for the use of aircraft cannons, equipment for the use of aircraft cannons, aircraft cannons maintenance equipment
55	P	sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, shotguns, components for shotguns, sporting gun ammunition
56	P	military aero-engines, components for military aero-engines
57	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
58	P	ground vehicle military communications equipment
59	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
60	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
61	P	components for military electronic equipment
62	P	small arms ammunition, components for small arms ammunition, blank ammunition, inert ammunition, training small arms ammunition, components for large calibre artillery ammunition, components for small calibre artillery ammunition
63	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
64	P	general naval vessel components, test equipment for general naval vessel components
65	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
66	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
67	P	general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
68	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
69	P	components for combat aircraft, components for military training aircraft
70	P	NBC protective equipment, components for NBC protective equipment
71	T	towed hydrophone arrays
72	P	weapon sights

## Finland cont.

73	P	components for military utility vehicles, technology for the use of military utility vehicles
74	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, general military aircraft components, technology for the use of general military aircraft components
75	P	body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
76	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft
77	P	components for military training aircraft
78	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
79	P	components for military aero-engines, test equipment for military utility helicopters, components for test equipment for military utility helicopters, equipment for the use of military utility helicopters, military aircraft ground equipment, components for military utility helicopters, components for military training aircraft, components for military aero-engines, test equipment for military training aircraft, components for test equipment for military training aircraft, equipment for the use of military training aircraft

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£56.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	197
Other items	11
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>208</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

aiming devices (T), air defence systems (T), air guns (2), air to surface missile handling equipment, anti-armour ammunition, anti-armour missile launching equipment (T), anti-riot shields, armoured fighting vehicles (T), assault rifles (13), attack alerting/warning equipment (T), castings for air to air missiles, castings for airborne electronic warfare equipment, castings for surface to air missiles, combination rifle-shotguns (1), command communications control and intelligence software, components for air to air missile launching equipment, components for air to air missiles, components for air to surface missile launching equipment, components for air to surface missiles, components for airborne electronic warfare equipment (T), components for airborne radars, components for anti-armour ammunition, components for anti-ship missiles, components for armoured fighting vehicles, components for bombs, components for combat aircraft, components for combat helicopters, components for combat helicopters (T), components for combination rifle-shotguns, components for crowd control ammunition, components for ejector seats, components for general purpose machine guns, components for grenade launchers, components for guided missile decoy rounds, components for large calibre artillery ammunition (T), components for machine pistols, components for military acoustic detection equipment, components for military aero-engines, components for military aircraft head-up displays, components for military communications equipment, components for military communications equipment (T), components for military electronic equipment (T), components for military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment (T), components for military infrared/thermal imaging equipment, components for military infrared/thermal imaging equipment (T), components for military navigation equipment (T), components for military sonar detection equipment, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military transport aircraft (T), components for military utility aircraft (T), components for military utility helicopters, components for military utility helicopters (T), components for mine hunting equipment, components for munitions launching equipment, components for naval electronic warfare equipment, components for naval engines, components for naval radars, components for periscopes, components for production equipment for chaff, components for propellants, components for small calibre artillery ammunition, components for sniper rifles, components for sporting rifles, components for submachine guns, components for surface to air missile control equipment (T), components for surface to air missile launching equipment (T), components for surface to air missile launching vehicles (T), components for surface to air missiles, components for surface to air missiles (T), components for surface to surface missile fire simulation equipment, components for tanks, components for training anti-armour ammunition, components for unmanned air vehicles, constructions for ballistic protection of military systems, crowd control ammunition, decoy flares, demolition charges, devices for initiating explosives, equipment for the development of airborne electronic warfare equipment (T), equipment for the development of large calibre artillery ammunition (T), equipment for the development of

France cont.

military electronic equipment (T), equipment for the use of equipment for the development of large calibre artillery ammunition (T), equipment for the use of military devices for initiating explosives, equipment for the use of military electronic equipment (T), equipment for the use of military firing sets, explosives, fire control equipment (T), general military aircraft components, general military aircraft components (T), general military vehicle components, general purpose machine guns (110), goods treated for signature suppression for military use, grenade launcher maintenance equipment, grenade launchers, gun mountings, gun silencers, helmet mounted display equipment, helmet mounted display equipment, illuminators, improvised explosive device disposal equipment (T), inert ammunition, inert surface to air missiles (T), laser range finders (T), machine pistols (51), military aircraft pressure refuellers (T), military cameras, military cameras (T), military communications equipment (T), military containers (T), military electronic equipment, military electronic equipment (T), military firing sets, military firing sets (T), military flying helmets, military image intensifier equipment (T), military improvised explosive device disposal equipment, military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment (T), military pyrotechnic materials, military video recording equipment, munitions launching equipment (T), NBC respirators, night vision goggles (T), non-sporting shotgun ammunition, nuclear grade graphite, plutonium-239, production equipment for air to surface missiles, pyrotechnics/fuels and related substances, revolvers (1), semi-automatic pistols (7), shotguns (19), signature suppression fittings for military use, small arms ammunition, small calibre artillery ammunition, sniper rifles (1), software for the development of airborne electronic warfare equipment (T), software for the modelling of military operation scenarios, software for the modelling of military operation scenarios (T), software for the modelling of weapons systems (T), software for the simulation of weapons systems (T), software for the use of equipment for the development of large calibre artillery ammunition (T), software for the use of military acoustic detection equipment, software for the use of military communications equipment, software for the use of military communications equipment (T), software for the use of test equipment for inert surface to air missiles (T), sporting gun ammunition, sporting rifles (5), submachine guns (50), surface to air missile launching equipment (T), surface to air missile launching vehicle (T), surface to air missiles (T), surface to air missiles simulators (T), tear gas/irritant ammunition, technology for the production of air to surface missiles, technology for the production of castings for airborne electronic warfare equipment, technology for the productions of uranium isotope separation equipment, technology for the use of inert surface to air missiles (T), technology for the use of military improvised explosive device disposal equipment, technology for the use of naval radars, technology for the use of software for the modelling of military operation scenarios, test equipment for airborne electronic warfare equipment (T), test equipment for inert surface to air missiles (T), test equipment for laser warning detectors (T), test equipment for military communications equipment (T), test equipment for surface to air missiles (T), test models for the development of air to surface missile launching equipment, test models for the development of military communications equipment (T), towed hydrophone arrays, training anti-armour ammunition, triggered spark gaps, turrets (T), unfinished products for air to air missiles, unfinished products for naval light guns, uranium-233, weapon day and night sights (T), weapon sights, weapon sights (T)

#### STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION

Total value of SIEL (Incorporation) applications for which a licence was issued	£6.5m
---	-------

Number of SIELs issued covering:	
Items on the Military List	23
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>24</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

command communications control and intelligence software, components for airborne navigation equipment, components for laser range finders, components for military aero-engines, components for military communications equipment, components for military infrared/thermal imaging equipment, components for military sonar detection equipment, components for military utility helicopters, components for naval electronic equipment, components for naval navigation equipment, components for optical target surveillance equipment, components for periscopes, components for unmanned air vehicle

France cont.

control equipment, components for unmanned air vehicles, goods treated for signature suppression for military use, inert air to surface missiles, military cameras, military electronic equipment, military infrared/thermal imaging equipment, military video recording equipment, naval navigation equipment, software for the use of naval navigation equipment, software for the use of telemetering/telecontrol equipment, technology for the use of military communications equipment, technology for the use of naval navigation equipment, technology for the use of software for the use of telemetering/telecontrol equipment

<b>Total number of SIELs refused</b>	<b>1</b>

Rating	ML10
No of SIELs covering items with this rating	1

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	vintage military aircraft
2	P	military distress signalling equipment, components for military distress signalling equipment
3	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
4	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment
5	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
6	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for

France cont.

		combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
7	T	aiming devices, bombing computers, fire control equipment, weapon control systems, weapon day and night sights, weapon night sights, weapon sights, aircraft military communications equipment, general military aircraft components, military aircraft head-down displays, military aircraft head-up displays, military aircraft navigation equipment, components for military training aircraft, military aero-engines, airborne electronic warfare equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft flight data recorders, equipment for operation of military aircraft in confined areas, military aircraft ground equipment, aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, military flying helmets, military parachutes, equipment for the use of military training aircraft, helmet mounted display equipment, military distress signalling equipment, military electronic equipment, military navigation equipment, test equipment for military training aircraft, military cameras, military photographic equipment, military image intensifier equipment, night vision goggles, military infrared/thermal imaging equipment, military imaging radar equipment, imaging countermeasures equipment, imaging counter-countermeasures equipment, imaging countermeasure/counter-countermeasures equipment, technology for the use of military training aircraft, software for the use military training aircraft
8	P	weapon sights, components for weapon sights, technology for the use of weapon sights
9	T	military devices for initiating explosives, military improvised explosive device jamming equipment, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, military devices for initiating explosives, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
10	P	components for armoured fighting vehicles, components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military utility helicopters
11	P	test models for the development of military transport aircraft, components for test models specially designed for the development of military transport aircraft, equipment for the use of test models for the development of military transport aircraft, test equipment for the development of military transport aircraft
12	P	chemical agent detection training equipment
13	P	technology for the development of nuclear fuel element fabrication equipment, technology for the development of nuclear fuel reprocessing equipment, technology for the use of nuclear fuel element fabrication equipment, technology for the use of nuclear fuel processing equipment
14	T	military utility vehicles, armoured all wheel drive vehicles
15	P	components for aircraft carriers, equipment for operation of military aircraft in confined areas, components for submarines, technology for the use of components for frigates, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of components for mine sweepers
16	P	components for combat aircraft, components for military aero-engines, test equipment for combat aircraft, components for test equipment for combat aircraft, equipment for the use of combat aircraft, military aircraft ground equipment, components for military training aircraft, test equipment for military training aircraft, components for test equipment for military training aircraft, equipment for the use of military training aircraft, components for military transport aircraft, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, components for combat aircraft, test equipment for combat aircraft, components for test equipment for combat aircraft, equipment for the use of

France cont.

		combat aircraft, components for combat helicopter, test equipment for combat helicopters, components for test equipment for combat helicopters, equipment for the use of combat helicopters, components for military transport aircraft, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, components for military surveillance aircraft, test equipment for military surveillance aircraft, equipment for the use of military surveillance aircraft, components for tanker aircraft, test equipment for tanker aircraft, components for test equipment for tanker aircraft, equipment for the use of tanker aircraft, test equipment for military utility helicopters, components for test equipment for military utility helicopters, equipment for the use of military utility helicopters, components for military utility helicopters
17	P	components for combat helicopters
18	P	components for military electronic equipment
19	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
20	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
21	P	components for combat helicopters, components for military utility helicopters, technology for the production of combat helicopters, technology for the production of military utility helicopters, equipment for the use of combat helicopters, equipment for the use of military utility helicopters
22	P	small calibre artillery ammunition, training small calibre artillery ammunition
23	P	remote ground sensor systems, components for remote ground sensor systems, technology for the use of remote ground sensor systems, test equipment for remote ground sensor systems
24	P	components for military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines
25	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
26	P	software for the development of air to surface missiles, software for the production of air to surface missiles, software for the use of air to surface missiles, components for air to surface missiles, components for air to surface missile handling equipment
27	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
28	P	NBC clothing
29	T	revolvers, small arms ammunition
30	P	components for range-finding equipment
31	P	components for surface to air missiles
32	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, components for military infrared/thermal imaging equipment, technology for the use of components for military infrared/thermal imaging equipment, equipment for the use of components for military infrared/thermal imaging equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology

France cont.

		for the use of military electronic equipment
33	P	components for military improvised explosive device disposal equipment
34	P	components for military aero-engines
35	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
36	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
37	P	components for military electronic equipment
38	P	components for air to surface missiles

France cont.

39	P	components for combat aircraft, technology for the use of components for combat aircraft, components for military utility helicopters, technology for the use of components for military utility helicopters, components for military transport aircraft, technology for the use of components for military transport aircraft, components for military training aircraft, technology for the use of components for military training aircraft, components for combat helicopters, technology for the use of components for combat helicopters
40	P	components for weapon day and night sights, components for military image intensifier equipment, components for military infrared/thermal imaging equipment, production technology for weapon day and night sights, production technology for military image intensifier equipment, production technology for military infrared/thermal imaging equipment, technology for the use of for weapon day and night sights, technology for military image intensifier equipment, infrared/thermal imaging equipment
41	P	devices for initiating explosives
42	P	general military vehicle components, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for artillery towing tractors, components for bridge laying vehicles, components for bridge trailers, components for command and control vehicles, components for gun carriers, components for military ambulances, components for military cargo vehicles, components for military engineer vehicles, components for military motorcycles, components for military trailers, components for military utility vehicles, components for minefield breaching vehicles, components for mine clearance vehicles, components for munitions launching vehicles, components for tanks, components for tank destroyers, components for tank transporters
43	P	general military aircraft components, general military vehicle components
44	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
45	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
46	P	components for aircraft radars, components for naval radars, components for ground based radars, general military vehicle components, general military aircraft components, technology for the production of general military vehicle components, technology for the production of general military aircraft components, technology for the production of components for aircraft radars, technology for the production of components for naval radars, technology for the production of components for ground based radars, technology for the use of general military vehicle components, technology for the use of general military aircraft components, technology for the use of components for aircraft radars, technology for the use of components for naval radars, technology for the use of components for ground based radars
47	P	unmanned air vehicles, components for unmanned air vehicles, military parachutes
48	P	weapon sights
49	P	aircraft military communications equipment, components for aircraft military communications equipment
50	P	components for military improvised explosive device disposal equipment, military improvised explosive device disposal equipment
51	P	improvised explosive device disposal equipment
52	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components

France cont.

		for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted display equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
53	P	military aircraft pressurised breathing equipment, components for ejector seats
54	P	torpedoes decoying equipment, components for torpedoes decoying equipment, military acoustic detection equipment, components for military acoustic detection equipment, military communications equipment, components for military communications equipment, military sonar detection equipment, components for military sonar detection equipment
55	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
56	P	aircraft military communications equipment
57	P	sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, shotguns, components for shotguns, sporting gun ammunition
58	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
59	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
60	P	ground vehicle military communications equipment, test equipment for ground vehicle military communications equipment, technology for the use of ground vehicle military communications equipment, technology for the use of test equipment for ground vehicle military communications equipment, military communications equipment, test equipment for military communications equipment, military electronic equipment, test equipment for military electronic equipment, military navigation equipment, test equipment for military navigation equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military communications equipment, technology for the use of test equipment for military electronic equipment, technology for the use of test equipment for military navigation equipment
61	P	military aero-engines, components for military aero-engines
62	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
63	P	general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for ,military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
64	T	military surveillance aircraft
65	P	general naval vessel components, naval shock mounts
66	P	components for military aero-engines
67	P	naval shock mounts, components for naval shock mounts

France cont.

68	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
69	P	technology for the development of military aero-engines, technology for the use of military aero-engines, military aero-engines, components for military aero-engines, equipment for the use of military aero-engines, military aircraft ground equipment
70	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft, military electronic equipment, components for military electronic equipment, military navigation equipment, components for military navigation equipment, airborne electronic warfare equipment, components for airborne electronic warfare equipment, electronic warfare equipment, components for electronic warfare equipment, naval electronic warfare equipment, components for naval electronic warfare equipment, general military aircraft components
71	P	components for sporting gun ammunition
72	P	components for submarines, devices containing military pyrotechnic materials
73	P	Drawings, specifications and technical reports required to support a nuclear licence application for a proposed civil uranium enrichment facility
74	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
75	P	components for combat aircraft, components for ejector seats, military aircraft ground equipment, components for military aero-engines
76	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
77	P	components for ground based radars
78	P	components for combat aircraft, components for military training aircraft, military aircraft ground equipment, ejector seats, components for ejector seats, military parachutes, equipment for the use of ejector seats, test equipment for ejector seats, military electronic equipment, technology for the use of ejector seats, technology for the use of test equipment for ejector seats, technology for the use of equipment for the use of ejector seats, technology for the use of military aircraft ground equipment, technology for the use of military parachutes
79	P	military aircraft pressurised breathing equipment, equipment for the use of military aircraft pressurised breathing equipment, test equipment for military aircraft pressurised breathing equipment, technology for the use of military aircraft pressurised breathing equipment
80	T	components for military communications equipment, military communications equipment
81	T	imaging cameras
82	P	military communications equipment
83	P	components for military aero-engines, technology for the use of military aero-engines, equipment for the use of military aero-engines
84	P	military firing sets, components for military firing sets, military electronic equipment, equipment for the use of military firing sets, test equipment for military firing sets

France cont.

85	P	components for military infrared/thermal imaging equipment, components for air to air missiles, components for combat aircraft
86	P	military communications equipment, components for military communications equipment, test equipment for military communications equipment, equipment for the use of military communications equipment, software for the use of military communications equipment, technology for the use of military communications equipment, technology for the use of test equipment for military communications equipment
87	P	weapon sights
88	P	sporting rifles, components for sporting rifles, gun mountings, weapon sights, sporting gun ammunition
89	P	general naval vessel components, technology for the use of general naval vessel components, equipment for the use of general naval vessel components
90	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
91	P	components for airborne electronic warfare equipment
92	P	military aircraft ground equipment, components for air to surface missiles
93	P	components for military electronic equipment, components for chemical agent detection equipment
94	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines
95	P	technology for the development of military aero-engines, technology for the use of military aero-engines, technology for the production of military aero-engines, test models for the development of military aero-engines
96	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
97	P	devices for initiating explosives, explosives, linear cutting explosive charges
98	P	small arms ammunition, components for small arms ammunition, blank ammunition, inert ammunition, training small arms ammunition, components for large calibre artillery ammunition, components for small calibre artillery ammunition
99	P	components for military transport aircraft, equipment for the use of military aero-engines, equipment for the use of components for military aero-engines, equipment for the use of components for military transport aircraft, military aero-engines, components for military aero-engines, technology for the use of military aero-engines, technology for the use of components for military aero-engines, technology for the use of components for military transport aircraft
100	P	general naval vessel components, test equipment for general naval vessel components
101	P	general naval vessel components, technology for the use of general naval vessel components
102	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
103	T	assault rifles, pistols, revolvers, semi-automatic pistols, submachine guns, rifles, sniper rifles, sporting rifles, general purpose machine guns, heavy machine guns, shotguns, combat shotguns, mortars, weapon sights
104	P	components for combat aircraft, components for combat helicopters
105	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights

France cont.

106	P	components for military utility vehicles, technology for the use of military utility vehicles
107	P	components for surface to surface missiles, technology for the development/production of surface to surface missiles
108	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
109	P	military utility vehicles, technology for the use of military utility vehicles
110	P	triggered spark gaps
111	P	equipment employing cryptography
112	P	software for the use of military communications equipment
113	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
114	P	components for combat aircraft, technology for the development of components for combat aircraft
115	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars
116	T	components for military training aircraft, technology for the use of military training aircraft
117	P	components for combat aircraft, technology for the use of combat aircraft, components for military utility helicopters, technology for the use of military utility helicopters, components for military surveillance aircraft, technology for the use of military surveillance aircraft, components for military transport aircraft, technology for the use of military transport aircraft, components for combat helicopter, technology for the use of combat helicopter, components for military transport aircraft, technology for the use of military transport aircraft
118	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
119	T	towed hydrophone arrays
120	P	command communications control and intelligence software
121	P	components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military utility aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for transport aircraft components for tanker aircraft, general military aircraft components, components for tanks, components for armoured fighting vehicles, components for armoured personnel carriers, general military vehicle components
122	P	military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
123	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft
124	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the

France cont.

		use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
125	P	remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems, remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems
126	P	military transport aircraft, components for military transport aircraft
127	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
128	P	aircraft military communications equipment, components for aircraft military communications equipment, components for combat aircraft, components for military training aircraft, components for military aero-engines, equipment for operation of military aircraft in confined areas, components for equipment for operation of military aircraft in confined areas, military aircraft ground equipment, components for military aircraft ground equipment, military aircraft pressure refuellers, components for military aircraft pressure refuellers, ejector seats, components for ejector seats, military aircraft pressurised breathing equipment, components for military aircraft pressurised breathing equipment, military parachutes, components for military parachutes, production equipment for combat aircraft, production technology for combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, airborne electronic warfare equipment, components for airborne electronic warfare equipment, airborne targeting equipment, components for airborne targeting equipment, airborne surveillance equipment, components for airborne surveillance equipment, airborne navigation equipment, components for airborne navigation equipment, airborne refuelling equipment, components for airborne refuelling equipment, military aircraft flight data recorders, components for military aircraft flight data recorders, technology for the development/production of combat aircraft, combat aircraft simulators, components for combat aircraft simulators, combat aircraft training equipment, components for combat aircraft training equipment, bombing computers fire control equipment weapon control systems, aircraft radars, optical target designator equipment, optical target tracking equipment, optical target surveillance equipment, optical target acquisition equipment, attack alerting/warning equipment, electronic countermeasures equipment, laser warning detectors, military video recording equipment, sensor data recorders, military cameras, military photographic equipment, military image intensifier equipment, military infrared/thermal imaging equipment, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, software for the modelling of weapon systems, software for the simulation of weapon systems, software for the evaluation of weapon systems, software for the development of weapon system software, software for the monitoring of weapon system software, software for the maintenance of weapon system software, software for the maintenance of weapon system, software command communications control and intelligence software
129	P	software for the simulation of weapon systems
130	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft
131	P	components for military aero-engines, castings for military aero-engines, forgings for military aero-engines, unfinished products for military aero-engines, technology for the

France cont.

		production of military aero-engines, technology for the use of military aero-engines
132	P	body armour, components for body armour, military helmets
133	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
134	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of torpedo handling equipment, technology for the use of components for torpedo handling equipment, torpedo handling equipment, components for torpedo handling equipment, military camouflage nets, components for military camouflage nets, goods treated for signature suppression for military use, components for goods treated for signature suppression for military use, technology for the use of camouflage nets, technology for the use of components for camouflage nets, technology for the use of goods treated for signature suppression for military use, technology for the use of components for goods treated for signature suppression for military use, general military aircraft components, technology for the use of general military aircraft components
135	P	components for military aero-engines, general military aircraft components, components for naval engines
136	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
137	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment

## French Guyana

### STANDARD INDIVIDUAL EXPORT LICENCES

None

### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).

No.	Type	Goods Summary
1	P	towed hydrophone arrays, hydrophones
2	T	magnetometers

# French Overseas Territory

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
Number of SIELs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>1</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

chemical agent detection equipment

# Gabon

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
Number of SIELs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>1</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

naval auxiliary vessels

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	marine position fixing equipment, inertial equipment
2	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
3	T	magnetometers
4	P	devices for initiating explosives, explosives, linear cutting explosive charges
5	P	military transport aircraft, components for military transport aircraft, military aircraft ground equipment, technology for the use of military transport aircraft
6	P	equipment employing cryptography
7	P	towed hydrophone arrays, hydrophones
8	T	towed hydrophone arrays
9	T	inertial equipment
10	T	components for marine position fixing equipment
11	T	magnetometers
12	T	inertial equipment

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£60.5m
Number of SIELs issued covering:	
Items on the Military List	168
Other items	16
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>184</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

additives to explosive chemicals, air guns (1), alpha-emitting radionuclides, anthrax vaccines, anti-armour ammunition, anti-tank weapons, armoured plate, bridge laying vehicles (T), castings for air to surface missile launching equipment, castings for combat helicopters, chaff, combination rifle-shotguns (2), command communications control and intelligence software (T), components for air to air missiles, components for airborne electronic warfare equipment, components for anti-radiation missiles, components for anti-tank weapons, components for armoured fighting vehicles (T), components for combat aircraft, components for combat aircraft (T), components for combat helicopters, components for combat helicopters (T), components for decoy flares, components for electronic warfare equipment (T), components for general purpose machine guns, components for gun mountings, components for large calibre artillery, components for large calibre artillery ammunition, components for military acoustic detection equipment, components for military aero-engines, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for military electronic equipment, components for military electronic equipment, components for military infrared/thermal imaging equipment, components for military navigation equipment (T), components for military training aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters, components for munition fuzes, components for NBC clothing, components for periscopes, components for semi-automatic pistols, components for sniper rifles, components for sniper rifles (T), components for sporting rifles (T), components for submarines, components for test equipment for anti-tank missiles, components for torpedoes, components for unmanned air vehicles, components for weapon sights, components for weapon simulators, deactivated assault rifles (40), deactivated firearms for training simulators, deactivated general purpose machine guns (33), deactivated heavy machine guns (30), deactivated machine pistols (15), deactivated mortars, deactivated submachine guns (35), decoy flares, devices for initiating explosives, energetic material additives, equipment for the development of software for the use of command communications control and intelligence software, equipment for the use of anti-armour missiles (T), equipment for the use of military communications equipment (T), equipment for the use of naval navigation equipment, equipment for the use of sniper rifles, equipment for the use of submarines, equipment for the use of weapon sights, flash suppressors, forgings for air to air missiles, forgings for military aero-engines, forgings for surface to air missiles, general military aircraft components, general purpose machine guns (4), goods treated for signature suppression for military use, grenade launchers, gun mountings, gun mountings (T), gun silencers (T), improvised explosive device detection equipment (T), improvised explosive device disposal equipment, improvised explosive device disposal equipment (T), inert CS hand grenades (T), inert decoy flares, inert exploding simulation devices (T), inert illuminators (T), inert smoke hand grenades (T), inert stun grenades (T), inert training hand grenades (T), inert weapon fire simulation equipment (T), laser range finders (T), military aircraft navigation equipment, military communications equipment, military communications equipment (T), military explosives, military improvised explosive device disposal equipment (T), military pyrotechnic materials, military training aircraft (T), mine field breaching vehicles (T), mortars, naval communications equipment, naval navigation equipment for the use of naval communications equipment, NBC filters, neptunium-237, non-military firing sets, nuclear grade graphite, production equipment for anti-armour missiles (T), production equipment for large calibre artillery ammunition, products containing enriched uranium, pyrotechnics/fuels and related substances, replica vintage guns (2), rocket launching equipment, semi-automatic pistols (10), shotguns (8), signature suppression coatings for military use, signature suppression fittings for military use, small arms ammunition, sniper rifle maintenance equipment, sniper rifles (57), sniper rifles (1) (T), software for

Germany cont.

optimising equipment design, software for the simulation of weapons systems (T), software for the use of aircraft navigation equipment (T), software for the use of combat aircraft, software for the use of military communications equipment (T), software for the use of military navigation equipment, software for the use of naval navigation equipment, software for the use of test equipment for general military aircraft components, software for the use of test equipment for military navigation equipment, sporting rifle equipment maintenance (T), sporting rifles (10), sporting rifles (20) (T), tank transporters (T), tear gas/riot control agents, technology for the development of air to surface rockets, technology for the development of general military aircraft components, technology for the production of combat helicopters, technology for the use of castings for combat helicopters, technology for the use of components for combat aircraft, technology for the use of general military aircraft components, technology for the use of military infrared/thermal imaging equipment, technology for the use of naval communications equipment, technology for the use of naval navigation equipment, technology for the use of sniper rifles, test equipment for anti-armour missile control equipment (T), test equipment for anti-armour missiles (T), test equipment for general military aircraft components, test equipment for laser warning detectors (T), test equipment for military communications equipment (T), test equipment for military electronic warfare equipment (T), test equipment for weapons simulators, thorium, training large calibre artillery ammunition, triggered spark gaps, unfinished products for combat aircraft, unfinished products for surface to air missiles, weapon cleaning equipment, weapon cleaning equipment (T), weapon day and night sights, weapon sight mounts, weapon sight mounts (T), weapon sights (T), weapons sights, weapons simulators

#### STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION

Total value of SIEL (Incorporation) applications for which a licence was issued	£3.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	18
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>19</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

aircraft military communications equipment (T), chemical agent detection equipment, components for armoured repair and recovery vehicles, components for chemical agent detection equipment, components for combat aircraft, components for combat helicopters, components for large calibre artillery, components for large calibre artillery ammunition, components for military infrared/thermal imaging equipment, components for military surveillance aircraft, components for NBC clothing, components for submarines, components for surface to air missiles, components for tanks, forgings for artillery rockets, general military aircraft components, imaging cameras, military communications equipment, naval navigation equipment, software for the use of military communications equipment, technology for the use of large calibre artillery ammunition

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	naval shock mounts, components for naval shock mounts
2	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
3	P	components for ground based radars
4	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test

Germany cont.

		equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
5	P	military aircraft pressurised breathing equipment, equipment for the use of military aircraft pressurised breathing equipment, test equipment for military aircraft pressurised breathing equipment, technology for the use of military aircraft pressurised breathing equipment
6	T	vintage military aircraft
7	T	imaging cameras
8	T	towed hydrophone arrays
9	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines
10	T	military surveillance aircraft
11	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights
12	P	technology for the development of military aero-engines, technology for the use of military aero-engines, military aero-engines, components for military aero-engines, equipment for the use of military aero-engines, military aircraft ground equipment
13	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
14	P	remote ground sensor systems, components for remote ground sensor systems, technology for the use of remote ground sensor systems, test equipment for remote ground sensor systems
15	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
16	P	military aircraft ground equipment, components for unmanned air vehicles, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for military infrared/thermal imaging equipment, components for weapon control systems
17	P	military utility vehicles, technology for the use of military utility vehicles
18	P	NBC clothing
19	P	components for sporting gun ammunition
20	P	devices for initiating explosives, explosives, linear cutting explosive charges
21	P	components for military aero-engines, general military aircraft components, components for naval engines
22	P	components for naval radars, software for the use of naval radars, technology for the use of naval radars, test equipment for naval radars, test equipment for naval radars, equipment for the use of naval radars
23	P	military communications equipment, components for military communications equipment, test equipment for military communications equipment, equipment for the use of military communications equipment, software for the use of military communications equipment, technology for the use of military communications equipment, technology for the use of test equipment for military communications equipment
24	T	military communications equipment, equipment for the use of military communications equipment, technology for the use of military communications equipment, artillery fire location equipment, components for military communications equipment, equipment for the use of military communications equipment

Germany cont.

25	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
26	P	military aircraft pressurised breathing equipment, components for ejector seats
27	P	improvised explosive device disposal equipment
28	P	software for the simulation of weapon systems
29	P	technology for the development of goods specified by ML10d of the EG(C)O 1994 as amended, technology for the use of goods specified by ML10d of the EG(C)O 1994 as amended, technology for the use of military navigation equipment, technology for the use of military communications equipment, technology for the use of military aircraft navigation equipment, technology for the use of aircraft military communications equipment, technology for the use of military cameras, technology for the use of aircraft radars, technology for the use of ground based radars
30	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
31	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
32	P	components for military electronic equipment
33	P	components for military aero-engines
34	P	components for military aero-engines, components for military transport aircraft
35	P	components for ground based radars, software for the use of ground based radars, test equipment for ground based radars, technology for the use of ground based radars
36	P	aircraft military communications equipment
37	P	general naval vessel components, technology for the use of general naval vessel components
38	P	components for combat aircraft, components for military training aircraft, components for military utility helicopters
39	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft,
40	P	components for military utility vehicles, technology for the use of military utility vehicles
41	T	components for military transport aircraft

43	P	components for military infrared/thermal imaging equipment, components for air to air missiles, components for combat aircraft
44	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
45	P	command communications control and intelligence software
46	P	weapon sights

Germany cont.

47	P	equipment for operation of military aircraft in confined areas, general naval vessel components, components for submarines, technology for the use of components for frigates, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of components for mine sweepers
48	P	components for naval electronic warfare equipment, test equipment for naval electronic warfare equipment, software for the use of naval electronic warfare equipment
49	P	components for aircraft radars, components for naval radars, components for ground based radars, general military vehicle components, general military aircraft components, technology for the production of general military aircraft components, technology for the production of components for aircraft radars, technology for the production of components for naval radars, technology for the production of components for ground based radars, technology for the use of general military vehicle components, technology for the use of general military aircraft components, technology for the use of components for aircraft radars, technology for the use of components for naval radars, technology for the use of components for ground based radars
50	P	components for military communications equipment
51	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
52	T	military utility vehicles, armoured all wheel drive vehicles
53	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
54	T	weapon sights
55	P	components for combat aircraft
56	P	components for naval electronic warfare equipment, test equipment for naval electronic warfare equipment, software for the use of naval electronic warfare equipment
57	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
58	P	aircraft military communications equipment, components for aircraft military communications equipment
59	P	military communications equipment, components for military communications equipment, test equipment for military communications equipment, equipment for the use of military communications equipment, software for the use of military communications equipment, technology for the use of military communications equipment, technology for the use of test equipment for military communications equipment
60	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand

Germany cont.

		grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
61	P	components for large calibre artillery ammunition, components for smoke ammunition, components for pyrotechnic ammunition, components for training large calibre artillery ammunition, blank ammunition, aircraft cannon ammunition, training aircraft cannon ammunition
62	P	components for military electronic equipment, components for chemical agent detection equipment
63	P	general naval vessel components, naval shock mounts
64	P	components for military aero-engines, technology for the use of combat aircraft, equipment for the use of combat aircraft, technology for the use of military aero-engines, equipment for the use of military aero-engines
65	P	uranium isotope separation equipment, components for uranium isotope separation equipment
66	P	components for military electronic equipment
67	P	chemical agent detection equipment, components for chemical agent detection equipment, nuclear radiation detection equipment, components for nuclear radiation detection equipment, biological agent detection equipment, components for biological agent detection equipment, chemical agent detection equipment, components for chemical agent detection equipment, biological agent detection equipment, components for biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of nuclear radiation detection equipment, technology for the use of biological agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of biological agent detection equipment
68	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
69	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
70	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
71	P	demolition charges, military explosives, military devices for initiating explosives
72	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, general military aircraft components, technology for the use of general military aircraft components
73	T	tank transporters
74	P	uranium isotope separation equipment
75	P	test models for the development of military transport aircraft, components for test models specially designed for the development of military transport aircraft, equipment for the use of test models for the development of military transport aircraft, test equipment for the development of military transport aircraft
76	P	components for military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines
77	P	military aero-engines, components for military aero-engines

78	P	remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems, remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems
79	P	military communications equipment
80	P	components for military surveillance aircraft, technology for the use of military surveillance aircraft, components for combat aircraft, technology for the use of combat aircraft
81	P	components for military electronic equipment
82	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars
83	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
84	P	components for combat aircraft, components for military training aircraft, components for military utility helicopters, components for military surveillance aircraft, military aircraft ground equipment, components for airborne radars, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility helicopters, test equipment for military surveillance aircraft, components for military sonar detection equipment, components for military communications equipment, components for torpedoes, components for guided missile decoying equipment
85	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft, military electronic equipment, components for military electronic equipment, military navigation equipment, components for military navigation equipment, airborne electronic warfare equipment, components for airborne electronic warfare equipment, electronic warfare equipment, components for electronic warfare equipment, naval electronic warfare equipment, components for naval electronic warfare equipment, general military aircraft components, aircraft military communications equipment
86	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
87	P	body armour, components for body armour, military helmets

Germany cont.

88	T	military devices for initiating explosives, military improvised explosive device jamming equipment, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, military devices for initiating explosives, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
89	P	military transport aircraft, components for military transport aircraft
90	P	components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military utility aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for transport aircraft, components for tanker aircraft, general military aircraft components, components for tanks, components for armoured fighting vehicles, components for armoured personnel carriers, general military vehicle components
91	P	components for armoured fighting vehicles, components for combat helicopters, components for military utility helicopters
92	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted display equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
93	P	weapon sights
94	P	technology for the development of nuclear fuel element fabrication equipment, technology for the development of nuclear fuel reprocessing equipment, technology for the use of nuclear fuel element fabrication equipment, technology for the use of nuclear fuel processing equipment
95	P	deactivated assault rifles, deactivated general purpose machine guns, deactivated heavy machine guns, deactivated pistols, deactivated revolvers, deactivated rifles, deactivated semi-automatic pistols, deactivated sniper rifles, deactivated submachine guns, deactivated combat shotguns, deactivated shotguns
96	P	aircraft cannons, components for aircraft cannons, inert air to air missiles, inert bombs, inert air to surface missiles, components for inert bombs, components for inert air to surface missiles, combat aircraft, components for combat aircraft, military aircraft ground equipment, airborne refuelling equipment, anti-g/pressure suits, military flying helmets, test equipment for combat aircraft, test equipment for components for combat aircraft, software for the use of combat aircraft, technology for the use of combat aircraft, test models for the development of combat aircraft, test models for the development of components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use

Germany cont.

		of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment, combat aircraft simulators, combat aircraft training equipment, ejector seat, components for ejector seats, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft pressurised breathing equipment, parachutes, military aircraft ground equipment
97	P	components for military improvised explosive device disposal equipment, military improvised explosive device disposal equipment
98	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
99	P	general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
100	P	equipment employing cryptography
101	P	aircraft cannons, components for aircraft cannons, inert air to air missiles, inert bombs, inert air to surface missiles, components for inert bombs, components for inert air to surface missiles, combat aircraft, components for combat aircraft, military aircraft ground equipment, airborne refuelling equipment, anti-g/pressure suits, military flying helmets, test equipment for combat aircraft, test equipment for components for combat aircraft, software for the use of combat aircraft, technology for the use of combat aircraft, test models for the development of combat aircraft, test models for the development of components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment, combat aircraft simulators, combat aircraft training equipment, ejector seat, components for ejector seats, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft pressurised breathing equipment, parachutes, military aircraft ground equipment
102	P	military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
103	P	small arms ammunition, components for small arms ammunition, blank ammunition, inert ammunition, training small arms ammunition, small arms ammunition, components for large calibre artillery ammunition, components for small calibre artillery ammunition
104	P	airborne radars, components for airborne radars, software for the use of airborne radars, technology for the use of airborne radars, test equipment for airborne radars, components for test equipment for airborne radars
105	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
106	P	military distress signalling equipment, components for military distress signalling equipment

Germany cont.

107	P	components for NBC filters, components for NBC respirators
108	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
109	P	sporting rifles, components for sporting rifles, gun mountings, weapon sights, sporting gun ammunition
110	P	components for military transport aircraft, military aircraft ground equipment, equipment for the use of military transport aircraft
111	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft
112	P	devices for initiating explosives
113	P	torpedoes decoying equipment, components for torpedoes decoying equipment, military acoustic detection equipment, components for military acoustic detection equipment, military communications equipment, components for military communications equipment, military sonar detection equipment, components for military sonar detection equipment
114	P	components for combat helicopters, components for military utility helicopters, technology for the production of combat helicopters, technology for the production of military utility helicopters, equipment for the use of combat helicopters, equipment for the use of military utility helicopters
115	P	chemical agent detection training equipment
116	P	software for the use of helmet mounted display equipment, software for the use of aircraft radars, aircraft radars, components for aircraft radars, helmet mounted display equipment, components for helmet mounted display equipment, technology for the use of aircraft radars, technology for the use of components for aircraft radars
117	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment,

Germany cont.

		technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
118	P	technology as specified by 0E001 of EC Regulations 1334/2000 as amended
119	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
120	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment
121	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
122	P	components for combat helicopters
123	P	ground vehicle military communications equipment, test equipment for ground vehicle military communications equipment, technology for the use of ground vehicle military communications equipment, technology for the use of test equipment for ground vehicle military communications equipment, military communications equipment, test equipment for military communications equipment, military electronic equipment, test equipment for military electronic equipment, military navigation equipment, test equipment for military navigation equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military communications equipment, technology for the use of test equipment for military electronic equipment, technology for the use of test equipment for military navigation equipment
124	P	components for military aero-engines, castings for military aero-engines, forgings for military aero-engines, unfinished products for military aero-engines, technology for the production of military aero-engines, technology for the use of military aero-engines
125	P	technology as specified by 0E001 of EC Regulations 1334/2000 as amended.
126	P	non-military explosives/propellants
127	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
128	P	sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, shotguns, components for shotguns, sporting gun ammunition
129	P	components for combat helicopters
130	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
131	P	test equipment for military communications equipment, equipment for the use of military communications equipment, military communications equipment, components for military communications equipment, software for the use of military communications

Germany cont.

		equipment, technology for the use of military communications equipment
132	T	components for military communications equipment, military communications equipment
133	P	general military vehicle components, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for artillery towing tractors, components for bridge laying vehicles, components for bridge trailers, components for command and control vehicles, components for gun carriers, components for military ambulances, components for military cargo vehicles, components for military engineer vehicles, components for military motorcycles, components for military trailers, components for military utility vehicles, components for minefield breaching vehicles, components for mine clearance vehicles, components for munitions launching vehicles, components for tanks, components for tank destroyers, components for tank transporters
134	P	components for combat aircraft, components for ejector seats, military aircraft ground equipment, components for military aero-engines
135	P	ground vehicle military communications equipment
136	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, components for military infrared/thermal imaging equipment, technology for the use of components for military infrared/thermal imaging equipment, equipment for the use of components for military infrared/thermal imaging equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
137	P	military firing sets, components for military firing sets, military electronic equipment, equipment for the use of military firing sets, test equipment for military firing sets
138	P	components for military utility helicopters, technology for the use of components for military utility helicopters, components for combat aircraft, technology for the use of components for combat aircraft, components for combat helicopters, technology for the use of components for combat helicopters
139	P	components for combat aircraft, components for military aero-engines, test equipment for combat aircraft, components for test equipment for combat aircraft, equipment for the use of combat aircraft, military aircraft ground equipment, components for combat helicopters, test equipment for combat helicopters, components for test equipment for combat helicopters, equipment for the use of combat helicopters, components for military transport aircraft, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, components for military surveillance aircraft, test equipment for military surveillance aircraft, equipment for the use of military surveillance aircraft, components for military utility helicopters, test equipment for military utility helicopters, components for test equipment for military utility helicopters, equipment for the use of military utility helicopters
140	P	technology for the development of uranium isotope separation equipment, technology for the production of uranium isotope separation equipment, technology for the use of uranium isotope separation equipment
141	P	general naval vessel components, test equipment for general naval vessel components
142	P	constructions for ballistic protection of military systems
143	T	assault rifles, pistols, revolvers, semi-automatic pistols, submachine guns, rifles, sniper rifles, sporting rifles, general purpose machine guns, heavy machine guns, shotguns, combat shotguns, mortars, weapon sights
144	P	military explosives
145*	P	military, security and para-military goods and arms, ammunition and related material as specified by the 'Order' except the following: - goods specified by PL5001; landmines and all related goods; materials or explosive materials containing RDX or HMX; chemicals specified in the Chemical Weapons Convention (Schedule 1) and related technology; complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor; software specially designed or modified for the use of complete rocket systems, some complete subsystems and

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£0.5m
Number of SIELs issued covering:	
Items on the Military List	8
Other items	4
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>12</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for military improvised explosive device disposal equipment, components for military transport aircraft, equipment employing cryptography (T), equipment for the use of military firing sets (T), firing sets, general military aircraft components, improvised explosive device disposal equipment (T), inertial equipment (T), military firing sets (T), military improvised explosive device disposal equipment (T), shotguns (3), software for the use of equipment employing cryptography (T)

### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	components for armoured fighting vehicle, equipment for the use of tanks, test equipment for tanks, technology for the use of tanks, components for military transport aircraft, equipment for the use of military transport aircraft, test equipment for military transport aircraft, technology for the use of military transport aircraft
2	P	military distress signalling equipment, components for military distress signalling equipment
3	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment, software for the use of mine countermeasures equipment, technology for the use of mine countermeasures equipment
4	P	improvised explosive device disposal equipment
5	T	military utility vehicles, armoured all wheel drive vehicles
6	P	equipment employing cryptography, cryptographic software, software for the development of equipment employing cryptography, software for the development of cryptographic software, technology for the use of equipment using cryptography, technology for the production of equipment using cryptography, technology for the development of equipment using cryptography, technology for the use of cryptographic software, technology for the production of cryptographic software, technology for the development of cryptographic software
7	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators

Iceland cont.

8	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
9	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
10	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
11	P	sporting gun ammunition
12	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
13	P	towed hydrophone arrays, hydrophones
14	P	weapon sights
15	T	inertial equipment
16	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
17	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
18	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
19	T	assault rifles, pistols, revolvers, semi-automatic pistols, submachine guns, rifles, sniper rifles, sporting rifles, general purpose machine guns, heavy machine guns, shotguns, combat shotguns, mortars, weapon sights
20	P	components for military electronic equipment, components for chemical agent detection equipment
21	P	equipment employing cryptography
22	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
23	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment
24	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
25	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
26	P	devices for initiating explosives, explosives, linear cutting explosive charges
27	P	command communications control and intelligence software
28	P	military utility vehicles, technology for the use of military utility vehicles
29	P	sporting gun ammunition
30	P	components for military utility vehicles, technology for the use of military utility vehicles
31*	P	military, security and para-military goods and arms, ammunition and related material as specified by the 'Order' except the following: - goods specified by PL5001; landmines

Iceland cont.

		and all related goods; materials or explosive materials containing RDX or HMX; chemicals specified in the Chemical Weapons Convention (Schedule 1) and related technology; complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor; software specially designed or modified for the use of complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor
32	T	magnetometers

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£86.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	651
Other items	301
Military List and other items	1
<b>Total number of SIELs issued</b>	<b>953</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

accelerometers, accessories for cryogenic equipment, accessories for electron microscopes, accessories for optical equipment, accessories for optical fibre communication cables, accessories for photomultiplier tubes, accessories for semiconductor process equipment, aircraft military communications equipment, aircrew protective masks, animal pathogens, anti-friction bearings, ballistic test equipment, beryllium, bismuth, body armour, bomb suits, capacitors, ceramic materials, chaff (T), chaff equipment (T), chemical mixtures, chemicals, cloth treated for signature suppression for military use, components for aiming devices, components for air to air missile launching equipment (T), components for airborne electronic warfare equipment, components for airborne radars, components for airborne refuelling equipment, components for aircraft cannons, components for aircraft head-up displays, components for aircraft military communications equipment, components for aircraft radars, components for anti-armour ammunition, components for anti-ship missiles, components for artillery fire location equipment (T), components for ballistic test equipment, components for body armour, components for bombs, components for civil aero-engines, components for civil aircraft, components for combat aircraft, components for combat helicopters, components for combat helicopters (T), components for computer interconnect equipment, components for corrosion resistant chemical manufacturing equipment, components for digital computers, components for dimensional measuring equipment, components for drying equipment, components for ejector seats, components for electron microscopes, components for electronic test equipment, components for electronic warfare equipment, components for equipment employing cryptography (T), components for film processing equipment, components for fire control equipment, components for frigates, components for general industrial production equipment, components for ground based radars, components for ground vehicle military communications equipment, components for gyroscopes, components for hydraulic systems, components for inertial equipment, components for laser range finders, components for machine tools, components for materials processing equipment, components for mechanical measurement equipment, components for microwave equipment, components for military aero-engines, components for military aircraft flight data recorders, components for military aircraft head-down displays, components for military aircraft navigation equipment, components for military aircraft navigation equipment (T), components for military cameras, components for military communications equipment, components for military communications equipment

(T), components for military distress signalling equipment, components for military distress signalling equipment (T), components for military electronic equipment, components for military image intensifier equipment, components for military improvised explosive device disposal equipment, components for military infrared/thermal imaging equipment, components for military training aircraft, components for military utility helicopters, components for munition fuzes (T), components for munitions handling equipment (T), components for munitions launching equipment, components for naval communications equipment, components for naval electronic equipment, components for naval electronic warfare equipment, components for naval gun mountings, components for naval light guns, components for naval navigation equipment, components for naval radars, components for naval sonar equipment, components for optical target acquisition equipment, components for photomultiplier tubes, components for radar equipment, components for rifles, components for semiconductor process equipment, components for shotguns, components for solid state lasers, components for spacecraft and launch vehicles, components for sporting gun ammunition, components for surface to air missiles (T), components for tanks, components for test equipment for aircraft flight data recorders, components for test equipment for combat aircraft, components for test equipment for general military aircraft components (T), components for torpedo decoying equipment, components for torpedoes, components for transformers, components for unmanned air vehicle control equipment, components for unmanned air vehicles, components for vacuum systems, components for weapon sights, components for welding equipment, composite materials production equipment, computer analogue to digital equipment, constituents of propellants, corrosion resistant chemical manufacturing equipment, cryptographic software, decoy flares, design and manufacturing software, digital computers, digital signal processing equipment, dimensional inspection equipment, direct view imaging equipment, electrical connectors, electrical switching equipment, electron microscopes, electronic components, electronic countermeasures equipment, electronic measurement equipment, electronic test equipment, equipment employing cryptography, equipment employing cryptography (T), equipment for the use of aircraft military communications equipment, equipment for the use of artillery fire location equipment (T), equipment for the use of ballistic test equipment, equipment for the use of electron microscopes, equipment for the use of ground based radars, equipment for the use of materials testing equipment, equipment for the use of military communications equipment, equipment for the use of military communications equipment (T), equipment for the use of military distress signalling equipment, equipment for the use of military improvised explosive device disposal equipment, equipment for the use of naval gun mountings, equipment for the use of naval light guns, extended temperature range integrated circuits, ferrous alloys, ferrous metals, fibre prepreps, forgings for military aero-engines, general industrial production equipment, general laboratory equipment, general military aircraft components, general military aircraft components (T), general military vehicle components, general naval vessel components, general purpose integrated circuits, genetically modified microorganisms, global positioning satellite receivers, ground vehicle military communications equipment, guided missile decoying equipment (T), gyroscopes, hafnium, high energy batteries, human pathogens, imaging cameras, improvised explosive device detection equipment, improvised explosive device detection equipment (T), improvised explosive device disposal equipment, improvised explosive device disposal equipment (T), improvised explosive device jamming equipment (T), inert decoy flares (T), inert guided missile decoy rounds (T), inertial equipment, lubricants, machine tools, magnesium, magnetometers, maraging steels, mass spectrometers, materials testing equipment, metal alloy in cylindrical forms, metal alloy in powder form, metal alloy materials, metal alloy tubes, metallic powders, metalloid materials, microwave components, microwave equipment, military aero-engines, military aircraft flight data recorders, military aircraft ground equipment, military aircraft pressurised breathing equipment, military cameras, military cameras (T), military camouflage nets, military communications equipment, military communications equipment (T), military distress signalling equipment, military electronic equipment (T), military flying helmets, military flying helmets (T), military helmets, military image intensifier equipment (T), military improvised explosive device disposal equipment, military video recording equipment (T), munition fuzes, munitions launching equipment, naval communications equipment, naval gun mountings, naval light gun maintenance equipment, naval light guns, nickel powders, non-ferrous alloys, non-ferrous metals, nuclear radiation detection equipment, optical equipment, optical sensor materials, optical target acquisition equipment, photographic equipment, photographic materials, photomultiplier tubes, piezoelectric materials, polyarylene ether ketones, polymer materials, production equipment for combat aircraft, production equipment for gas turbines, production equipment for military aero-engines, production equipment for military utility helicopters, production equipment for naval engines, radar equipment, radiation hardened integrated circuits, rotary position encoders, semi-automatic pistols (2), semiconductor process equipment, shock mounts, shotguns (1), signal analysers, signal generators, small arms ammunition, software for the development of equipment employing cryptography, software for the development of general purpose integrated circuits, software for the development of radar equipment,

India cont.

software for the evaluation of weapon systems, software for the simulation of military operation scenarios (T), software for the use of artillery fire location equipment (T), software for the use of ballistic test equipment, software for the use of digital computers, software for the use of dimensional measuring equipment, software for the use of electronic measurement equipment, software for the use of equipment employing cryptography, software for the use of spectrophotometers, solid state lasers, spectrometers, spectrophotometers, sporting gun ammunition, submersible equipment, submersible vehicles, target acquisition equipment, technology for the development of frigates, technology for the development of military aero-engines, technology for the production of corrosion resistant manufacturing equipment, technology for the production of forgings for military aero-engines, technology for the production of frigates, technology for the production of military aero-engines, technology for the production of military camouflage nets, technology for the production of naval engines, technology for the use of artillery fire location equipment (T), technology for the use of ballistic test equipment, technology for the use of components for naval radars, technology for the use of decoy flares, technology for the use of equipment employing cryptography (T), technology for the use of general naval vessel components, technology for the use of military aero-engines, technology for the use of military communications equipment, technology for the use of military communications equipment (T), technology for the use of military distress signalling equipment, technology for the use of military improvised explosive device disposal equipment, technology for the use of naval light guns, technology for the use of naval radars, test equipment for combat aircraft, test equipment for electronic warfare equipment, test equipment for electronic warfare equipment (T), test equipment for military aero-engines, towed hydrophone arrays, toxic chemical precursors, toxins, triggered spark gaps, underwater electronic imaging systems, unfinished products for military aero-engines, unfinished products for military utility helicopters, unfinished products for torpedoes, unfinished products for training anti-armour ammunition, vacuum systems, weapon cleaning equipment, workshop tools, zirconium compounds

### Footnote

A UK arms embargo is in place against Iran. The policy was announced by the then Foreign Secretary in his ministerial statement on 1 March 1993 and amended on 28 January 1998. Exceptions to the arms embargo in 2003 were made for the export of equipment, for use as an inspection tool on civil aircraft engines<sup>1</sup>, and for night vision goggles to assist with counter-narcotics operations<sup>2</sup>. (HC 3WS, 7 January 2003 and HL WA90, 21 May 2003).

Iran cont.

<sup>3</sup> Over 90% of the total value of SIEL applications for Iran were for two licences for civil aviation. They are dual-use and licensable by Ministerial Statement (1/3/93). As the Ministerial Statement applies solely to Iran, these goods can be exported to all other destinations (except Iraq) without a licence.

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).

No.	Type	Goods Summary
1	T	civil NBC protection equipment, civil NBC protection clothing

## Footnote

The export to Iraq of any goods, unless under the authority of an export licence, was prohibited by the Export of Goods (Control) (Iraq and Kuwait Sanctions) Order [S.I. 1990/1640] until 14 June 2003. General trade sanctions against Iraq were revoked by UN Security Council resolution 1483 (22 May 2003), implemented in UK legislation on 14 June 2003 by the Iraq (United Nations Sanctions) Order 2003 [S.I. 2003/1519]. The embargo on arms and related materiel was retained, with exemptions. The above licences have been included in this report because the goods concerned are controlled to all destinations under Part I and Part III of Schedule 1 to the Export of Goods (Control) Order 1994, as amended (Annex A) or the Dual Use Items (Export Control) Regulations 2000 (Annex B).

In one case the application was approved by the UN Security Council's Iraq (661) Sanctions Committee, because the items were deemed to be materials and supplies for essential civilian needs, as referred to in UN Security Council resolution 687 (3 April 1991). In two cases the equipment was exported for use by the UNMOVIC, which has the right to free import and use of equipment or materials for inspections in Iraq under the terms of UN Security Council resolution 1441 (8 November 2002). In 27 cases exports fell within the exemption to the arms embargo imposed by UN Security Council resolution 1483 (22 May 2003), because they were required by the Coalition Provisional Authority to serve the purpose of resolution 1483 and other related resolutions.

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
2	P	military communications equipment
3	P	components for military transport aircraft, production equipment for military transport aircraft
4	T	imaging cameras
5	P	command communications control and intelligence software
6	P	components for combat aircraft, components for military training aircraft, military aircraft ground equipment, ejector seats, components for ejector seats, military parachutes, equipment for the use of ejector seats, test equipment for ejector seats, military electronic equipment, technology for the use of ejector seats, technology for the use of test equipment for ejector seats, technology for the use of equipment for the use of ejector seats, technology for the use of military aircraft ground equipment, technology for the use of military parachutes
7	P	components for ground based radars
8	P	airborne radars, components for airborne radars, software for the use of airborne radars, technology for the use of airborne radars, test equipment for airborne radars, components for test equipment for airborne radars
9	P	components for military electronic equipment
10	P	software for the use of helmet mounted display equipment, software for the use of aircraft radars, aircraft radars, components for aircraft radars, helmet mounted display equipment, components for helmet mounted display equipment, technology for the use of aircraft radars, technology for the use of components for aircraft radars
11	P	small arms ammunition, components for small arms ammunition, blank ammunition, inert ammunition, training small arms ammunition, components for large calibre artillery ammunition, components for small calibre artillery ammunition
12	P	components for military aero-engines, general military aircraft components, components for naval engines
13	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
14	P	equipment employing cryptography
15	P	military electronic equipment, components for military electronic equipment
16	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights
17	P	components for military infrared/thermal imaging equipment, components for air to air missiles, components for combat aircraft
18	P	devices for initiating explosives
19	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft, forgings for surface to air missiles, unfinished products for surface to air missiles
20	P	components for military electronic equipment, components for chemical agent detection equipment
21	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars
22	P	military aircraft ground equipment, components for military infrared/thermal imaging equipment

Italy cont.

23	P	military utility vehicles, technology for the use of military utility vehicles
24	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
25	P	remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems, remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems
26	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
27	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
28	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment
29	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
30	P	components for aircraft military communications equipment, components for military communications equipment
31	P	military aircraft pressurised breathing equipment, components for ejector seats
32	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
33	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, software for the use of equipment for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment

Italy cont.

		equipment, technology for the use of test equipment for military electronic equipment
34	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
35	P	naval shock mounts, components for naval shock mounts
36	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
37	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
38	P	components for military training aircraft, components for military aero-engines, test equipment for military training aircraft, components for test equipment for military training aircraft, equipment for the use of military training aircraft, military aircraft ground equipment, components for military transport aircraft, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, components for combat aircraft, test equipment for combat aircraft, components for test equipment for combat aircraft, equipment for the use of combat aircraft, test equipment for military utility helicopters, components for test equipment for military utility helicopters, equipment for the use of military utility helicopters, components for military utility helicopters, components for combat helicopters, test equipment for combat helicopters, components for test equipment for combat helicopters, equipment for the use of combat helicopters, components for military surveillance aircraft, test equipment for military surveillance aircraft, components for test equipment for military surveillance aircraft, equipment for the use of military surveillance aircraft
39	P	military firing sets, components for military firing sets, military electronic equipment, equipment for the use of military firing sets, test equipment for military firing sets
40	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
41	P	weapon sights
42	P	components for military utility helicopters, technology for the use of components for military utility helicopters, components for combat aircraft, technology for the use of components for combat aircraft, components for combat helicopters, technology for the use of components for combat helicopters
43	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
44	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval

Italy cont.

		navigation equipment, technology for the use of test equipment for components for naval navigation equipment
45	P	components for military improvised explosive device disposal equipment
46	P	remote ground sensor systems, components for remote ground sensor systems, technology for the use of remote ground sensor systems, test equipment for remote ground sensor systems
47	P	military distress signalling equipment, components for military distress signalling equipment
48	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment, software for the use of mine countermeasures equipment, technology for the use of mine countermeasures equipment
49	T	towed hydrophone arrays
50	P	equipment employing cryptography, cryptographic software, software for the development of equipment employing cryptography, software for the development of cryptographic software, technology for the use of equipment using cryptography, technology for the production of equipment using cryptography, technology for the development of equipment using cryptography, technology for the use of cryptographic software, technology for the production of cryptographic software, technology for the development of cryptographic software
51	P	components for range-finding equipment
52	P	components for air to surface missiles
53	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, components for military infrared/thermal imaging equipment, technology for the use of components for military infrared/thermal imaging equipment, equipment for the use of components for military infrared/thermal imaging equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
54	P	chemical agent detection training equipment
55	T	military surveillance aircraft
56	P	non-military explosives/propellants
57	P	components for military aero-engines, unfinished products for military aero-engines
58	P	components for sporting gun ammunition
59	P	torpedoes decoying equipment, components for torpedoes decoying equipment, military acoustic detection equipment, components for military acoustic detection equipment, military communications equipment, components for military communications equipment, military sonar detection equipment, components for military sonar detection equipment
60	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
61	P	components for large calibre artillery, components for naval gun mountings
62	P	components for combat aircraft, components for combat helicopters, components for military utility helicopters, components for military utility aircraft, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for transport aircraft components for tanker aircraft, general military aircraft components, components for tanks, components for armoured fighting vehicles, components for armoured personnel carriers, general

Italy cont.

		military vehicle components
63	P	components for military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines
64	P	aircraft cannons, components for aircraft cannons, inert air to air missiles, inert bombs, inert air to surface missiles, components for inert bombs, components for inert air to surface missiles, combat aircraft, components for combat aircraft, military aircraft ground equipment, airborne refuelling equipment, anti-g/pressure suits, military flying helmets, test equipment for combat aircraft, test equipment for components for combat aircraft, software for the use of combat aircraft, technology for the use of combat aircraft, test models for the development of combat aircraft, test models for the development of components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment, combat aircraft simulators, combat aircraft training equipment, ejector seat, components for ejector seats, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft pressurised breathing equipment, parachutes, military aircraft ground equipment
65	P	body armour, components for body armour, military helmets
66	P	improvised explosive device disposal equipment
67	P	components for military transport aircraft
68	T	vintage military aircraft
69	P	aircraft cannons, components for aircraft cannons, inert air to air missiles, inert bombs, inert air to surface missiles, components for inert bombs, components for inert air to surface missiles, combat aircraft, components for combat aircraft, military aircraft ground equipment, airborne refuelling equipment, anti-g/pressure suits, military flying helmets, test equipment for combat aircraft, test equipment for components for combat aircraft, software for the use of combat aircraft, technology for the use of combat aircraft, test models for the development of combat aircraft, test models for the development of components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment, combat aircraft simulators, combat aircraft training equipment, ejector seat, components for ejector seats, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft pressurised breathing equipment, parachutes, military aircraft ground equipment
70	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
71	P	general naval vessel components, technology for the use of general naval vessel components
72	T	military devices for initiating explosives, military improvised explosive device jamming

Italy cont.

		equipment, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, military devices for initiating explosives, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
73	P	military transport aircraft, components for military transport aircraft
74	P	software for the development of naval sonar, technology for the use of software for the development of naval sonar
75	P	test equipment for airborne electronic warfare equipment components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
76	P	aircraft military communications equipment
77	T	military utility vehicles, armoured all wheel drive vehicles
78	P	components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military utility helicopters
79	P	components for military improvised explosive device disposal equipment, military improvised explosive device disposal equipment
80	T	aiming devices, bombing computers, fire control equipment, weapon control systems, weapon day and night sights, weapon night sights, weapon sights, aircraft military communications equipment, general military aircraft components, military aircraft head-down displays, military aircraft head-up displays, military aircraft navigation equipment, components for military training aircraft, military aero-engines, airborne electronic warfare equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft flight data recorders, equipment for operation of military aircraft in confined areas, military aircraft ground equipment, aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, military flying helmets, military parachutes, equipment for the use of military training aircraft, helmet mounted display equipment, military distress signalling equipment, military electronic equipment, military navigation equipment, test equipment for military training aircraft, military cameras, military photographic equipment, military image intensifier equipment, night vision goggles, military infrared/thermal imaging equipment, military imaging radar equipment, imaging countermeasures equipment, imaging counter-countermeasures equipment, imaging countermeasure/counter-countermeasures equipment, technology for the use of military training aircraft, software for the use military training aircraft
81	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
82	P	weapon sights, components for weapon sights, technology for the use of weapon sights
83	P	software for the simulation of military operation scenarios, software for the modelling of military operation scenarios
84	P	military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
85	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
86	P	components for ground based radars, software for the use of ground based radars, test equipment for ground based radars, technology for the use of ground based radars
87	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
88	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command

Italy cont.

		communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
89	P	military aero-engines, components for military aero-engines
90	P	components for combat aircraft, equipment for the use of combat aircraft
91	P	aircraft cannon ammunition, training aircraft cannon ammunition, small calibre artillery ammunition, training small calibre artillery ammunition
92	P	equipment for operation of military aircraft in confined areas, general naval vessel components, components for aircraft carriers, equipment for operation of military aircraft in confined areas, technology for the use of components for frigates, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of components for mine sweepers
93	P	components for military electronic equipment
94	P	components for military utility helicopters, technology for the use of military utility helicopters, components for military training aircraft, technology for the use of military training aircraft, components for combat aircraft, technology for the use of combat aircraft, components for combat helicopter, technology for the use of combat helicopter, components for military surveillance aircraft, technology for the use of military surveillance aircraft
95	P	ground vehicle military communications equipment, test equipment for ground vehicle military communications equipment, technology for the use of ground vehicle military communications equipment, technology for the use of test equipment for ground vehicle military communications equipment, military communications equipment, test equipment for military communications equipment, military electronic equipment, test equipment for military electronic equipment, military navigation equipment, test equipment for military navigation equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military communications equipment, technology for the use of test equipment for military electronic equipment, technology for the use of test equipment for military navigation equipment
96	P	components for military aero-engines, castings for military aero-engines, forgings for military aero-engines, unfinished products for military aero-engines, technology for the production of military aero-engines, technology for the use of military aero-engines
97	P	software for the simulation of weapon systems
98	P	components for surface to air missiles
99	P	components for military aero-engines, technology for the use of military aero-engines
100	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
101	P	ground based radars, components for ground based radars, test equipment for ground based radars, software for the use of ground based radars, technology for the use of ground based radars
102	P	general naval vessel components, naval shock mounts
103	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines
104	P	sporting rifles, components for sporting rifles, gun mountings, weapon sights, sporting gun ammunition
105	P	components for combat aircraft, components for military training aircraft, components for military training aircraft, components for military utility helicopters components for combat aircraft
106	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment,

Italy cont.

		marine object detection systems, gyroscopes, bathymetric survey systems
107	P	software for the use of military communications equipment
108	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
109	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
110	P	sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, shotguns, components for shotguns, sporting gun ammunition
111	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
112	P	components for ground based radars, software for the use of ground based radars, technology for the use of ground based radars, test equipment for ground based radars, equipment for the use of ground based radars
113	P	components for combat aircraft, components for military training aircraft, components

Italy cont.

		for military utility helicopters, components for military surveillance aircraft, military aircraft ground equipment, components for airborne radars, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military utility helicopters, test equipment for military surveillance aircraft, components for military sonar detection equipment, components for military communications equipment, components for torpedoes, components for guided missile decoying equipment
114	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
115	P	components for combat aircraft, components for ejector seats, military aircraft ground equipment, components for military aero-engines
116	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
117	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of torpedo handling equipment, technology for the use of components for torpedo handling equipment, torpedo handling equipment, components for torpedo handling equipment, general military aircraft components, technology for the use of general military aircraft components
118	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted display equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
119	P	components for aircraft radars, components for naval radars, components for ground based radars, general military vehicle components, general military aircraft components, technology for the production of general military vehicle components, technology for the production of general military aircraft components, technology for the production of components for aircraft radars, technology for the production of components for naval radars, technology for the production of components for ground based radars, technology for the use of general military vehicle components, technology for the use of general military aircraft components, technology for the use of components for aircraft radars, technology for the use of components for naval radars, technology for the use of components for ground based radars
120	P	components for military utility vehicles, technology for the use of military utility vehicles
121	P	components for military aero-engines
122	P	military improvised explosive device disposal equipment, components for military

Italy cont.

		improvised explosive device disposal equipment
123	T	components for military communications equipment, military communications equipment
124	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
125	P	demolition charges, equipment for the use of demolition charges, military explosives, military devices for initiating explosives
126	T	assault rifles, pistols, revolvers, semi-automatic pistols, submachine guns, rifles, sniper rifles, sporting rifles, general purpose machine guns, heavy machine guns, shotguns, combat shotguns, mortars, weapon sights
127	P	weapon sights
128	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
129	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft
130	P	general naval vessel components, test equipment for general naval vessel components
131	P	devices for initiating explosives, explosives, linear cutting explosive charges
132	P	technology for the development of military aero-engines, technology for the use of military aero-engines, military aero-engines, components for military aero-engines, equipment for the use of military aero-engines, military aircraft ground equipment
133	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
134	P	general military vehicle components, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for artillery towing tractors, components for bridge laying vehicles, components for bridge trailers, components for command and control vehicles, components for gun carriers, components for military ambulances, components for military cargo vehicles, components for military engineer vehicles, components for military motorcycles, components for military trailers, components for military utility vehicles, components for minefield breaching vehicles, components for mine clearance vehicles, components for munitions launching vehicles, components for tanks, components for tank destroyers, components for tank transporters
135*	P	military, security and para-military goods and arms, ammunition and related material as specified by the 'Order' except the following: - goods specified by PL5001; landmines and all related goods; materials or explosive materials containing RDX or HMX; chemicals specified in the Chemical Weapons Convention (Schedule 1) and related technology; complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor; software specially designed or modified for the use of complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	0
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>1</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

toxic chemical precursors

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment
2	P	equipment employing cryptography
3	P	devices for initiating explosives, explosives, linear cutting explosive charges
4	T	towed hydrophone arrays
5	T	magnetometers

# Jamaica

## STANDARD INDIVIDUAL EXPORT LICENCES

10	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
11	P	naval shock mounts, components for naval shock mounts
12	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
13	P	components for combat aircraft, components for military training aircraft, components for combat helicopters
14	P	components for military aero-engines
15	T	military devices for initiating explosives, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
16	P	cryptographic software
17	P	general naval vessel components, naval electrical equipment, naval navigation equipment
18	P	ground based radars, components for ground based radars, test equipment for ground based radars, software for the use of ground based radars, technology for the use of ground based radars
19	P	components for naval radars, technology for the use of naval radars
20	P	general military aircraft components, general military vehicle components, naval shock mounts.
21	P	components for military electronic equipment
22	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
23	P	components for military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines
24	P	military transport aircraft, components for military transport aircraft, military aircraft ground equipment, technology for the use of military transport aircraft
25	P	military distress signalling equipment, components for military distress signalling equipment
26	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
27	T	inertial equipment
28	P	mine clearing equipment, components for mine clearing equipment, military field engineer equipment, components for military field engineer equipment, technology for the use of mine clearing equipment, technology for the use of military field engineer equipment
29	P	components for assault vessels, technology for the use of components for assault vessels
30	P	equipment employing cryptography
31	P	software for the development of cryptographic software
32	P	equipment employing cryptography
33	P	components for armoured fighting vehicle, equipment for the use of tanks, test

Korea, South cont.

		equipment for tanks, technology for the use of tanks, components for military transport aircraft, equipment for the use of military transport aircraft, test equipment for military transport aircraft, technology for the use of military transport aircraft
34	T	radiation hardened TV cameras, radiation hardened TV camera lenses
35	P	components for combat aircraft, components for military transport aircraft, components for military utility helicopters, components for military transport aircraft, components for air defence systems training equipment, components for anti-aircraft guns, components for naval light guns, components for weapon control systems, components for ground based radars, components for naval radars, components for torpedoes, components for assault vessels, components for submarines, components for naval electronic equipment, components for firearms as specified by ML1a of the EG(C)O 1994, components for firearms as specified by ML2a of the EG(C)O 1994, small arms ammunition, sporting gun ammunition
36	P	sporting gun ammunition
37	P	components for military improvised explosive device disposal equipment, military improvised explosive device disposal equipment
38	P	corrosion resistant chemical manufacturing equipment
39	P	general naval vessel components, technology for the use of general naval vessel components
40	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
41	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
42	P	Goods specified in the EG(C)O 1994 as amended relating to military training aircraft as specified by ML4b; ML5; ML10a,b,c,e,f,g,h,i; ML11; ML14; PL5034; ML15; ML16; PL5020; ML17c,f,h,i,j,k,l,m,n; PL5017; ML21a, b1; ML22
43	P	components for mine sweeping equipment, components for mine sweeping equipment training equipment, equipment for the use of mine sweeping equipment, equipment for the use of mine sweeping equipment training equipment, software for the use of mine sweeping equipment, software for the use of mine sweeping equipment training equipment, technology for the use of mine sweeping equipment, technology for the use of mine sweeping equipment training equipment
44	P	general naval vessel components, technology for the use of general naval vessel components, equipment for the use of general naval vessel components
45	P	missile control equipment, missile handling equipment, missile launching equipment, munitions launching equipment, weapon decoying equipment, bomb handling equipment, chaff, chaff equipment, decoy flares, guided missile decoy rounds, guided missile decoying equipment, inert decoys, missile jamming equipment, aiming devices, bombing computers, fire control equipment, weapon control systems, weapon day and night sights, weapon night sights, weapon sights, aircraft military communications equipment, general military aircraft components, military aircraft head-down displays, military aircraft head-up displays, military aircraft navigation equipment, components for combat aircraft, components for military training aircraft, military aero-engines, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft flight data recorders, equipment for operation of military aircraft in confined areas, military aircraft ground equipment, aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, military flying helmets, military parachutes, equipment for the use of military training aircraft, equipment for the use of combat aircraft, helmet mounted display equipment, military distress signalling equipment, military electronic equipment, military navigation equipment, test equipment for military training aircraft, test equipment for combat aircraft, military training aircraft training equipment, military combat aircraft training equipment, military cameras, military photographic equipment, military image intensifier equipment, night vision goggles, military infrared/thermal imaging equipment, military imaging radar equipment, imaging countermeasures equipment, imaging

		counter-countermeasures equipment, imaging countermeasure/counter-countermeasures equipment, castings for military training aircraft, castings for combat aircraft, forgings for military training aircraft, forgings for combat aircraft, unfinished products for military training aircraft, unfinished products for combat aircraft, signature suppression fittings for military use, signature suppression coatings for military use, signature suppression treatments for military use, military parametric technical databases, clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use, materials for reduced electromagnetic reflectivity for military use, military camouflage nets, military mobile repair shops and related equipment, military field generators, military containers, production equipment for military training aircraft, test equipment for military training aircraft, environmental test facilities for military training aircraft, production equipment for combat aircraft, test equipment for combat aircraft, environmental test facilities for combat aircraft, equipment for the use of military training aircraft, test equipment for military training aircraft, test models for military training aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, test models for combat aircraft, weapon sight mounts, technology for the production of military training aircraft, technology for the use of military training aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, software for the use of military training aircraft, software for the use of combat aircraft
46	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
47	P	components for submarines, devices containing military pyrotechnic materials
48	P	components for military training aircraft, technology for the use of military training aircraft, equipment for the use of military training aircraft, equipment for the use of military training aircraft
49	P	components for military training aircraft, technology for the use of military training aircraft
50	P	components for anti-ship missiles, anti-ship missile launching equipment, components for anti-ship missile launching equipment
51	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
52	P	command communications control and intelligence software
53	P	components for military transport aircraft, components for military aero-engines
54	P	fire control equipment, components for fire control equipment, software for the development of fire control equipment, technology for the development of fire control equipment, components for fire control equipment, software for the development of fire control equipment, software for the use of fire control equipment, technology for the use of fire control equipment, technology for the development of software for the use of fire control equipment, equipment for the use of fire control equipment, test equipment for fire control equipment, technology for the use of surface to air missile control/launching equipment, technology for the development of software for the use of surface to air missile control/launching equipment, components for surface to air missile control/launching equipment, software for the use of surface to air missile control/launching equipment, software for the development of surface to air missile control/launching equipment, test equipment for surface to air missile control/launching equipment, equipment for the use of surface to air missile control/launching equipment
55	T	components for military communications equipment, military communications equipment
56	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
57	P	components for air to surface missiles
58	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour

Korea, South cont.

59	P	components for military infrared/thermal imaging equipment, components for air to air missiles, components for combat aircraft
60	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
61	P	equipment employing cryptography
62	P	components for weapon control systems, software for the use of weapon control systems, technology for the use of weapon control systems, test equipment for weapon control systems, equipment for the use of weapon control systems
63	P	compound semiconductor precursor chemicals
64	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£20.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	45
Other items	4
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>49</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

anti-armour missile fire simulation equipment, anti-armour missile training equipment, anti-friction bearings, armoured all wheel drive vehicles, armoured all wheel drive vehicles (T), armoured fighting vehicle fire simulation equipment, armoured fighting vehicle training equipment, assault rifle training equipment, assault rifles (3), balancing machine equipment, balancing machines, ballistic shields, body armour, components for anti-armour missile fire simulation equipment, components for armoured fighting vehicle fire simulation equipment, components for assault rifle training equipment, components for assault rifles, components for body armour, components for chemical agent dissemination simulators, components for crowd control ammunition, components for general purpose machine gun training equipment, components for ground vehicle military communications equipment, components for military aircraft pressurised breathing equipment, components for military improvised explosive device disposal equipment (T), components for military infrared/thermal imaging equipment, components for military training aircraft, components for munitions launching equipment, components for naval navigation equipment, components for naval radars, components for semi-automatic pistols, components for smoke ammunition, components for submachine guns, components for test equipment for military aero-engines, components for turrets, corrosion resistant chemical manufacturing equipment, deuterium solutions, equipment for the production of components for combat aircraft, equipment for the use of anti-ship missiles (T), equipment for the use of combat aircraft, equipment for the use of military devices for initiating explosives (T), equipment for the use of turrets, explosive ordnance disposal equipment (T), explosives, general military vehicle components, general naval vessel components, general purpose machine gun training equipment, ground vehicle military communications equipment, illuminators, improvised explosive device detection equipment (T), military aircraft flight data recorders, military communications equipment, military containers, military devices for initiating explosives, military electronic equipment, military firing sets (T), military helmets, military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment (T), military small arms training equipment, night vision goggles (T), replica anti-armour missiles, small arms ammunition, smoke hand grenades, software for the use of military infrared/thermal imaging equipment (T), submachine gun training equipment, submachine guns (40), technology for the use of anti-armour missile fire simulation equipment, technology for the use of anti-armour missile training equipment, technology for the use of assault rifles, technology for the use of military small arms training equipment, technology for the use of naval radars, technology for the use of submachine guns, technology for the use of turrets, test equipment for military infrared/thermal imaging equipment (T), test equipment for turrets, thunderflashes, turrets, weapon cleaning equipment, weapon night sights (T), weapon sights

**OPEN INDIVIDUAL EXPORT LICENCES**

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	chemical agent detection training equipment
2	T	military devices for initiating explosives, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
3	P	improvised explosive device disposal equipment
4	P	civil body armour, components for civil body armour
5	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
6	P	military utility vehicles, technology for the use of military utility vehicles
7	P	Goods specified in the EG(C)O 1994 as amended relating to military training aircraft as specified by ML4b; ML5; ML10a,b,c,e,f,g,h,i; ML11; ML14; PL5034; ML15; ML16; PL5020; ML17c,f,h,i,j,k,l,m,n; PL5017; ML21a, b1; ML22
8	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
9	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators,

Kuwait cont.

		technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
10	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
11	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, general military aircraft components, technology for the use of general military aircraft components
12	P	inertial equipment
13	T	NBC respirators, NBC decontamination equipment, NBC clothing
14	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
15	P	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
16	T	NBC respirators, NBC filters, NBC clothing, components for NBC respirators
17	P	components for military improvised explosive device disposal equipment
18	P	components for naval radars, technology for the use of naval radars
19	P	components for military communications equipment, equipment for the use of military communications equipment, components for equipment for the use of military communications equipment, technology for the use of military communications equipment
20	P	components for military electronic equipment, components for chemical agent detection equipment
21	P	naval radars, components for naval radars, test equipment for naval radars, test equipment for components for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
22	P	command communications control and intelligence software
23	P	equipment employing cryptography
24	P	fibrous/filamentary materials
25	P	components for aircraft cannons, test equipment for aircraft cannons, software for the use of aircraft cannons, software for the use of test equipment for aircraft cannons, software for the use of aircraft cannons maintenance equipment, software for the use of equipment for the use of aircraft cannons, technology for the use of aircraft cannons, technology for the use of test equipment for aircraft cannons, technology for the use of aircraft cannons maintenance equipment, technology for the use of equipment for the use of aircraft cannons, equipment for the use of aircraft cannons, aircraft cannons maintenance equipment
26	P	ground vehicle military communications equipment
27	T	civil NBC protection equipment, civil NBC protection clothing
28	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
29	P	components for military utility vehicles, technology for the use of military utility vehicles
30	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment

Kuwait cont.

31	P	components for military communications equipment
32	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
33	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
34	P	military transport aircraft, components for military transport aircraft, military aircraft ground equipment, technology for the use of military transport aircraft
35	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
36	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
37	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
38	P	components for military transport aircraft, technology for the use of military transport aircraft, components for combat aircraft, technology for the use of combat aircraft
39	P	components for military training aircraft, technology for the use of components for military training aircraft
40	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
41	P	air guns, components for air guns, weapon sights
42	P	components for military training aircraft
43	T	military utility vehicles, armoured all wheel drive vehicles
44	T	civil NBC protection clothing, NBC respirators, NBC clothing, NBC filters
45	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, software for the use of equipment for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment
46	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
47	P	missile control equipment, missile handling equipment, missile launching equipment, munitions launching equipment, weapon decoying equipment, bomb handling equipment, chaff, chaff equipment, decoy flares, guided missile decoy rounds, guided missile decoying equipment, inert decoys, missile jamming equipment, aiming devices, bombing computers, fire control equipment, weapon control systems, weapon day and night sights, weapon night sights, weapon sights, aircraft military communications equipment, general military aircraft components, military aircraft head-down displays, military aircraft head-up displays, military aircraft navigation equipment, components for combat aircraft, components for military training aircraft, military aero-engines, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft flight data recorders, equipment for operation of military aircraft in confined areas, military aircraft ground equipment, aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing

		equipment, military flying helmets, military parachutes, equipment for the use of military training aircraft, equipment for the use of combat aircraft, helmet mounted display equipment, military distress signalling equipment, military electronic equipment, military navigation equipment, test equipment for military training aircraft, test equipment for combat aircraft, military training aircraft training equipment, military combat aircraft training equipment, military cameras, military photographic equipment, military image intensifier equipment, night vision goggles, military infrared/thermal imaging equipment, military imaging radar equipment, imaging countermeasures equipment, imaging counter-countermeasures equipment, imaging countermeasure/counter-countermeasures equipment, castings for military training aircraft, castings for combat aircraft, forgings for military training aircraft, forgings for combat aircraft, unfinished products for military training aircraft, unfinished products for combat aircraft, signature suppression fittings for military use, signature suppression coatings for military use, signature suppression treatments for military use, military parametric technical databases, clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use, materials for reduced electromagnetic reflectivity for military use, military camouflage nets, military mobile repair shops and related equipment, military field generators, military containers, production equipment for military training aircraft, test equipment for military training aircraft, environmental test facilities for military training aircraft, production equipment for combat aircraft, test equipment for combat aircraft, environmental test facilities for combat aircraft, equipment for the use of military training aircraft, test equipment for military training aircraft, test models for military training aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, test models for combat aircraft, weapon sight mounts, technology for the production of military training aircraft, technology for the use of military training aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, software for the use of military training aircraft, software for the use of combat aircraft
48	P	body armour, components for body armour, military helmets
49	P	components for air to surface missile control equipment, components for air to surface missile handling equipment, components for air to surface missile launching equipment, test equipment for air to surface missile control equipment, test equipment for air to surface missile handling equipment, test equipment for air to surface missile launching equipment, test equipment for air to surface missile
50	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
51	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, software for the use of command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
52	P	components for military aero-engines
53	P	general naval vessel components, technology for the use of general naval vessel components
54	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
55	P	general naval vessel components, naval electrical equipment, naval navigation equipment

Kuwait cont.

56	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
57	P	components for military improvised explosive device disposal equipment, military improvised explosive device disposal equipment
58	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
59	P	components for military aero-engines
60	P	components for combat aircraft, components for military training aircraft, components for armoured fighting vehicles
61	P	components for military training aircraft
62	P	tear gas/irritant ammunition, crowd control ammunition, cs hand grenades, stun grenades
63	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
64	P	military distress signalling equipment, components for military distress signalling equipment
65	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
66*	P	military, security and para-military goods and arms, ammunition and related material as specified by the 'Order' except the following: - goods specified by PL5001; landmines and all related goods; materials or explosive materials containing RDX or HMX; chemicals specified in the Chemical Weapons Convention (Schedule 1) and related technology; complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor; software specially designed or modified for the use of complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor
67	T	magnetometers

ammunition, smoke canisters, smoke hand grenades, sniper rifle maintenance equipment, sniper rifles (15), software for the development of cryptographic software, software for the development of equipment employing cryptography, software for the modelling of military operation scenarios (T), software for the use of equipment employing cryptography, software for the use of military communications equipment (T), software for the use of remote ground sensor systems (T), software for the use of test equipment for airborne electronic warfare equipment, sporting pistols (6), stun grenades, submachine guns (15), surface to air missile control equipment, surface to air missile handling equipment, technology for the development of equipment employing cryptography, technology for the use of anti-ship missiles, technology for the use of combat helicopters, technology for the use of command communications control and intelligence software, technology for the use of components for test equipment for airborne electronic warfare equipment, technology for the use of equipment employing cryptography, technology for the use of military communications equipment, technology for the use of sniper rifles, technology for the use of software for the development of cryptographic software, technology for the use of torpedo simulators, test equipment for explosive ordnance disposal equipment, thunderflashes, torpedo simulators, toxic chemical precursors, training small arms ammunition, turrets, weapon night sights, weapon sight mounts, weapon sights

#### STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION

Total value of SIEL (Incorporation) applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>2</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for patrol craft, inertial equipment

Number of SIELs revoked covering:	
Items on the Military List	0
Other items	1
Military List and other items	0
<b>Total number of SIELs revoked</b>	<b>1</b>

Rating	3A226
No of SIELS covering items with this rating	1

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	components for military communications equipment, military communications equipment
2	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights
3	P	fibrous/filamentary materials
4	P	components for combat aircraft, components for military training aircraft, components

Malaysia cont.

		for military transport aircraft, components for tanks, components for ground based radars, components for large calibre artillery.
5	P	devices for initiating explosives, explosives, linear cutting explosive charges
6	P	naval engines, components for naval engines, equipment for the use of naval engines
7	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
8	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
9	P	components for large calibre artillery, components for naval gun mountings
10	P	components for military training aircraft, unfinished products for military training aircraft, production equipment for military training aircraft, test equipment for military training aircraft, technology for the production of military training aircraft
11	P	components for military training aircraft, technology for the use of military training aircraft, components for military transport aircraft, technology for the use of military transport aircraft, components for combat aircraft, technology for the use of combat aircraft
12	P	munitions launching equipment, components for munitions launching equipment, equipment for the use of munitions launching equipment, technology for the use of munitions launching equipment, technology for the use of equipment for the use of munitions launching equipment
13	P	military distress signalling equipment, components for military distress signalling equipment
14	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
15	P	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
16	T	radiation hardened TV cameras
17	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, equipment for the use of combat aircraft, equipment for the use of military transport aircraft, equipment for the use of military training aircraft, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, equipment for the use of combat aircraft, equipment for the use of military transport aircraft, equipment for the use of military training aircraft
18	P	components for military transport aircraft, components for military aero-engines, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, military aircraft ground equipment, components for combat helicopters, test equipment for combat helicopters, components for test equipment for combat helicopters, equipment for the use of combat helicopters, test equipment for military utility helicopters, components for test equipment for military utility helicopters, equipment for the use of military utility helicopters, components for military utility helicopters, components for military training aircraft, test equipment for military training aircraft, components for test equipment for military training aircraft, equipment for the use of military training aircraft
19	P	components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military search and rescue aircraft, components for military aero-engines
20	P	munition fuzes, exploding simulation devices, training hand grenades, demolition devices, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
21	P	chemical agent detection training equipment
22	P	components for combat aircraft, components for combat helicopters, components for

Malaysia cont.

		military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
23	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
24	P	components for military improvised explosive device disposal equipment
25	P	components for military electronic equipment, components for chemical agent detection equipment
26	P	components for military aero-engines
27	P	command communications control and intelligence software
28	T	inertial equipment, technology for the use of inertial equipment
29	P	general naval vessel components, naval electrical equipment, naval navigation equipment,
30	P	military utility vehicles, technology for the use of military utility vehicles
31	P	components for large calibre artillery
32	P	components for aircraft cannons, test equipment for aircraft cannons, software for the use of aircraft cannons, software for the use of test equipment for aircraft cannons, software for the use of aircraft cannons maintenance equipment, software for the use of equipment for the use of aircraft cannons, technology for the use of aircraft cannons, technology for the use of test equipment for aircraft cannons, technology for the use of aircraft cannons maintenance equipment, technology for the use of equipment for the use of aircraft cannons, equipment for the use of aircraft cannons, aircraft cannons maintenance equipment
33	P	equipment employing cryptography
34	P	components for naval electronic warfare equipment, test equipment for naval electronic warfare equipment, software for the use of naval electronic warfare equipment
35	P	general naval vessel components, technology for the use of general naval vessel components
36	P	equipment for the use of military communications equipment, components for military communications equipment, technology for the use of military communications equipment
37	P	missile control equipment, missile handling equipment, missile launching equipment, munitions launching equipment, weapon decoying equipment, bomb handling equipment, chaff, chaff equipment, decoy flares, guided missile decoy rounds, guided missile decoying equipment, inert decoys, missile jamming equipment, aiming devices, bombing computers, fire control equipment, weapon control systems, weapon day and night sights, weapon night sights, weapon sights, aircraft military communications equipment, general military aircraft components, military aircraft head-down displays, military aircraft head-up displays, military aircraft navigation equipment, components for combat aircraft, components for military training aircraft, military aero-engines, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft flight data recorders, equipment for operation of military aircraft in confined areas, military aircraft ground equipment, aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, military flying helmets, military parachutes, equipment for the use of military training aircraft, equipment for the use of combat aircraft, helmet mounted display equipment, military distress signalling equipment, military electronic equipment, military navigation equipment, test equipment for military training aircraft, test equipment for combat aircraft, military training aircraft training equipment, military combat aircraft training equipment, military cameras, military photographic equipment, military image

		intensifier equipment, night vision goggles, military infrared/thermal imaging equipment, military imaging radar equipment, imaging countermeasures equipment, imaging counter-countermeasures equipment, imaging countermeasure/counter-countermeasures equipment, castings for military training aircraft, castings for combat aircraft, forgings for military training aircraft, forgings for combat aircraft, unfinished products for military training aircraft, unfinished products for combat aircraft, signature suppression fittings for military use, signature suppression coatings for military use, signature suppression treatments for military use, military parametric technical databases, clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use, materials for reduced electromagnetic reflectivity for military use, military camouflage nets, military mobile repair shops and related equipment, military field generators, military containers, production equipment for military training aircraft, test equipment for military training aircraft, environmental test facilities for military training aircraft, production equipment for combat aircraft, test equipment for combat aircraft, environmental test facilities for combat aircraft, equipment for the use of military training aircraft, test equipment for military training aircraft, test models for military training aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, test models for combat aircraft, weapon sight mounts, technology for the production of military training aircraft, technology for the use of military training aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, software for the use of military training aircraft, software for the use of combat aircraft
38	P	general naval vessel components, technology for the use of general naval vessel components, equipment for the use of general naval vessel components
39	P	components for combat aircraft simulators
40	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components

Malaysia cont.

		for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
41	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
42	P	naval shock mounts, components for naval shock mounts
43	P	weapon sights, components for weapon sights, technology for the use of weapon sights
44	P	equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
45	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
46	P	general military aircraft components, components for military aircraft, head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
47	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
48	P	equipment employing cryptography
49	P	body armour, components for body armour
50	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
51	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
52	P	equipment for operation of military aircraft in confined areas, general naval vessel components, technology for the use of components for frigates, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of components for mine sweepers
53	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
54	P	general naval vessel components, test equipment for general naval vessel components
55	P	marine position fixing equipment, submersible vehicles
56	P	general naval vessel components, naval shock mounts
57	P	NBC protective equipment, components for NBC protective equipment
58	P	Goods specified in the EG(C)O 1994 as amended relating to military training aircraft as specified by ML4b; ML5; ML10a,b,c,e,f,g,h,i; ML11; ML14; PL5034; ML15; ML16; PL5020; ML17c,f,h,i,j,k,l,m,n; PL5017; ML21a, b1; ML22
59	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment,

Malaysia cont.

		equipment for the use of artillery fire location equipment
60	P	technology for the use of radar equipment, technology for the production of radar equipment, technology for the development of radar equipment
61	T	military utility vehicles, armoured all wheel drive vehicles
62	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines
63	P	general military vehicle components, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for artillery towing tractors, components for bridge laying vehicles, components for bridge trailers, components for command and control vehicles, components for gun carriers, components for military ambulances, components for military cargo vehicles, components for military engineer vehicles, components for military motorcycles, components for military trailers, components for military utility vehicles, components for minefield breaching vehicles, components for mine clearance vehicles, components for munitions launching vehicles, components for tanks, components for tank destroyers, components for tank transporters
64	P	components for submarines, devices containing military pyrotechnic materials
65	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
66	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft
67	P	military firing sets, components for military firing sets, military electronic equipment, equipment for the use of military firing sets, test equipment for military firing sets
68	T	magnetometers
69	P	surface to air missile launching equipment, components for surface to air missile launching equipment, test equipment for surface to air missile launching equipment, surface to air missile launching equipment training equipment, technology for the use of surface to air missile launching equipment, technology for the use of test equipment for surface to air missile launching equipment, technology for the use of surface to air missile launching training equipment
70	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
71	P	military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, components for ejectors seats, military parachutes, chemical agent detection equipment simulators
72	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
73	T	towed hydrophone arrays
74	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval

Malaysia cont.

		navigation equipment, technology for the use of test equipment for components for naval navigation equipment
75	P	military parachutes, military airborne cargo handling equipment
76	P	aerial target equipment, components for aerial target equipment, technology for the use of aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment
77	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
78	P	components for naval radars, technology for the use of naval radars
79	P	components for combat aircraft, components for military training aircraft
80	P	components for military utility vehicles, technology for the use of military utility vehicles
81	P	components for tanks, equipment for the use of tanks
82	P	training anti-aircraft ammunition, illuminators, components for pyrotechnic signalling devices, pyrotechnic signalling devices, smoke hand grenades, smoke canisters, smoke ammunition, thunderflashes, exploding simulation devices, training equipment for improvised explosive device disposal, training hand grenades, training tear gas/irritant ammunition, tear gas/irritant ammunition, crowd control ammunition, CS hand grenades, stun grenades, demolition charges.
83	P	small arms ammunition, components for small arms ammunition, blank ammunition, inert ammunition, training small arms ammunition, small arms ammunition, components for large calibre artillery ammunition, components for small calibre artillery ammunition
84	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
85	P	components for military training aircraft, components for combat helicopters
86	P	technology for the use of radar equipment, technology for the production of radar equipment, technology for the development of radar equipment
87	T	magnetometers
88	P	devices for initiating explosives, explosives, linear cutting explosive charge

## Maldives

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	2
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>3</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

bomb suits, exploding simulation devices, firing sets, illuminators, military improvised explosive device disposal equipment, smoke canisters, smoke hand grenades, thunderflashes

Maldives cont.

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
2	P	components for military communications equipment

## Mali

#### STANDARD INDIVIDUAL EXPORT LICENCES

None

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	technology for the production of toxins

## Malta

#### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£0.5m
Number of SIELs issued covering:	
Items on the Military List	10
Other items	14
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>24</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

body armour, components for body armour, components for military improvised explosive device disposal equipment, computer analogue to digital equipment, cryptographic software, CS hand grenades, demolition charges, equipment for the use of military improvised explosive device disposal equipment, explosives, general purpose integrated circuits, illuminators, improvised explosive device detection equipment, inert ammunition, lubricants, military improvised explosive device disposal equipment, mixtures containing toxic chemical precursors, NBC filters, NBC respirators, nuclear grade graphite, rebreathing swimming apparatus, signal flares, smoke hand grenades, stun grenades, tear gas/irritant ammunition, technology for the use of military improvised explosive device disposal equipment, thunderflashes, toxic chemical precursors, training hand grenades, training tear gas/irritant ammunition, weapon sights

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£9.5m
---	-------

Number of SIELs issued covering:	
Items on the Military List	58
Other items	8
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>66</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

aircraft military communications equipment, armoured personnel carriers, assault rifles (2), body armour, chaff, chaff equipment, combination rifle-shotguns (1), command communications control and intelligence software, components for aiming devices (T), components for anti-ship missiles, components for armoured personnel carriers, components for assault rifles, components for body armour, components for chaff equipment, components for combat aircraft, components for combat helicopters, components for combination rifle-shotguns, components for general purpose machine guns, components for laser range finders, components for military communications equipment, components for military infrared/thermal imaging equipment, components for naval radars, components for night vision goggles, components for nuclear reactors, components for pistols, components for revolvers, components for rifles, components for semi-automatic pistols, components for shotguns, components for sporting rifles, components for vintage guns, CS hand grenades (T), deactivated submachine guns (1), decoy flares, equipment employing cryptography, equipment for the use of laser range finders, equipment for the use of military transport aircraft, forgings for torpedoes, improvised explosive device detection equipment (T), improvised explosive device disposal equipment, inertial equipment, linear cutting explosive charges (T), material for reduced electromagnetic reflectivity for military use, military electronic equipment, military image intensifier equipment, military improvised explosive device disposal equipment, military infrared/thermal imaging equipment, NBC respirators, night vision goggles (T), non-sporting shotgun ammunition, pistols (9), production equipment for anti-ship missiles, replica vintage guns (1), revolvers (33), rifles (6), semi-automatic pistols (9), shotguns (16), smoke canisters (T), smoke hand grenades (T), software for the development of developmental warheads, software for the development of torpedo decoying equipment, software for the modelling of weapons systems, sporting gun ammunition, sporting rifles (38), stun grenades (T), technology for the development of anti-ship missiles, technology for the production of anti-ship missiles, technology for the use of command communications control and intelligence software, technology for the use of software for the development of torpedo decoying equipment, technology for the use of software for the modelling of weapon systems, test equipment for armoured personnel carriers, test equipment for weapon day and night sights, towed hydrophone arrays, training hand grenades (T), vintage guns (3), weapon night sights (T), weapon sight mounts (T), weapon sights

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
2	P	body armour, components for body armour, military helmets
3	P	air guns, components for air guns, gun mountings, equipment for the use of air guns, gun silencers
4	P	components for military utility vehicles, technology for the use of military utility vehicles
5	P	general military aircraft components, components for military aircraft, head-down displays, components for military aircraft head-up displays, components for combat

Norway cont.

		aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
6	P	sporting rifles, shotguns, combination rifle-shotguns, components for sporting rifles, sporting gun ammunition, weapon sights
7	P	components for military electronic equipment
8	P	components for combat helicopters
9	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
10	P	equipment employing cryptography, cryptographic software, software for the development of equipment employing cryptography, software for the development of cryptographic software, technology for the use of equipment using cryptography, technology for the production of equipment using cryptography, technology for the development of equipment using cryptography, technology for the use of cryptographic software, technology for the production of cryptographic software, technology for the development of cryptographic software
11	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
12	P	non-military explosives/propellants
13	P	military transport aircraft, components for military transport aircraft
14	P	components for military training aircraft, components for military aero-engines, test equipment for military training aircraft, components for test equipment for military training aircraft, equipment for the use of military training aircraft, military aircraft ground equipment, components for military utility aircraft, test equipment for military utility aircraft, components for test equipment for military utility aircraft, equipment for the use of military utility aircraft, components for military transport aircraft, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, components for combat helicopters, test equipment for combat helicopters, components for test equipment for combat helicopters, equipment for the use of combat helicopters, components for military surveillance aircraft, test equipment for military surveillance aircraft, components for test equipment for military surveillance aircraft, equipment for the use of military surveillance aircraft
15	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of

Norway cont.

		general military aircraft components, technology for the use of general military vehicle components
16	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
17	P	military firing sets, components for military firing sets, military electronic equipment, equipment for the use of military firing sets, test equipment for military firing sets
18	P	software for the simulation of weapon systems
19	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
20	P	components for combat aircraft, technology for the use of components for combat aircraft, components for combat helicopters, technology for the use of components for combat helicopters
21	P	air guns, weapon sights, components for air guns
22	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
23	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment
24	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
25	P	torpedoes decoying equipment, components for torpedoes decoying equipment, military acoustic detection equipment, components for military acoustic detection equipment, military communications equipment, components for military communications equipment, military sonar detection equipment, components for military sonar detection equipment
26	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
27	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications

Norway cont.

		equipment, test equipment for components for aircraft military communications equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
28	P	chemical agent detection training equipment
29	P	sporting rifles, shotguns, sporting gun ammunition
30	T	components for military communications equipment, military communications equipment
31	P	sporting gun ammunition
32	P	components for military aero-engines
33	T	military devices for initiating explosives, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
34	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
35	P	components for military electronic equipment, components for chemical agent detection equipment
36	P	sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, shotguns, components for shotguns, sporting gun ammunition
37	P	ground vehicle military communications equipment, test equipment for ground vehicle military communications equipment, technology for the use of ground vehicle military communications equipment, technology for the use of test equipment for ground vehicle military communications equipment, military communications equipment, test equipment for military communications equipment, military electronic equipment, test equipment for military electronic equipment, military navigation equipment, test equipment for military navigation equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military communications equipment, technology for the use of test equipment for military electronic equipment, technology for the use of test equipment for military navigation equipment
38	P	components for military transport aircraft, technology for the use of military transport aircraft, components for combat aircraft, technology for the use of combat aircraft
39	P	general naval vessel components, naval shock mounts
40	T	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
41	P	equipment employing cryptography
42	P	ground vehicle military communications equipment
43	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
44	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
45	P	general naval vessel components, test equipment for general naval vessel components
46	P	weapon sights, components for weapon sights, technology for the use of weapon sights
47	P	demolition charges, equipment for the use of demolition charges, military explosives, military devices for initiating explosives.
48	P	components for combat aircraft, components for ejector seats, military aircraft ground equipment, components for military aero-engines

Norway cont.

49	P	components for ground based radars, software for the use of ground based radars, test equipment for ground based radars, technology for the use of ground based radars
50	T	assault rifles, pistols, revolvers, semi-automatic pistols, submachine guns, rifles, sniper rifles, sporting rifles, general purpose machine guns, heavy machine guns, shotguns, combat shotguns, mortars, weapon sights
51	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
52	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
53	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the

		development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
54	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
55	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted display equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
56	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
57	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
58	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, general military aircraft components, technology for the use of general military aircraft components
59	P	military electronic equipment, components for military electronic equipment
60	P	equipment employing cryptography
61	P	components for weapon sights, components for optical target designator equipment, components for laser range finders, components for laser warning detectors, components for equipment for the use of laser range finders, components for test equipment for laser range finders, components for test equipment for image intensifier equipment, components for night vision goggles, components for military image intensifier equipment
62	P	shotguns, sporting gun ammunition, small arms ammunition
63	P	devices for initiating explosives
64	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment
65	P	military distress signalling equipment, components for military distress signalling equipment
66	P	command communications control and intelligence software
67	P	air guns, components for air guns, weapon sights
68	P	air guns
69	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars
70	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
71	P	sporting rifles, components for sporting rifles, gun mountings, weapon sights, sporting

Norway cont.

		gun ammunition
72	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft
73	P	military utility vehicles, technology for the use of military utility vehicles
74	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
75	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
76	P	components for submarines, devices containing military pyrotechnic materials
77	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
78	P	NBC protective equipment, components for NBC protective equipment
79	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, components for military infrared/thermal imaging equipment, technology for the use of components for military infrared/thermal imaging equipment, equipment for the use of components for military infrared/thermal imaging equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
80	P	remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems, remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems
81	P	components for armoured fighting vehicle, equipment for the use of tanks, test equipment for tanks, technology for the use of tanks, components for combat aircraft, components for military transport aircraft, equipment for the use of combat aircraft, equipment for the use of military transport aircraft, test equipment for combat aircraft, test equipment for military transport aircraft, technology for the use of combat aircraft, technology for the use of military transport aircraft
82	P	military communications equipment
83	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
84	P	weapon sights
85	P	components for ground based radars
86	P	equipment for operation of military aircraft in confined areas, general naval vessel components, technology for the use of components for frigates, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of components for mine sweepers
87	T	towed hydrophone arrays
88	P	military aircraft ground equipment, components for military infrared/thermal imaging equipment, components for air to surface missiles
89	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment,

Norway cont.

		components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
90	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
91	P	improvised explosive device disposal equipment
92	P	devices for initiating explosives, explosives, linear cutting explosive charges
93	P	components for military electronic equipment
94	P	general naval vessel components, technology for the use of general naval vessel components
95	T	military surveillance aircraft
96	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
97	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
98	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
99	P	components for air guns
100	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
101	P	naval shock mounts, components for naval shock mounts
102	P	aircraft military communications equipment
103	P	components for aircraft radars, components for naval radars, components for ground based radars, general military vehicle components, general military aircraft components, technology for the production of general military vehicle components, technology for the production of general military aircraft components, technology for the production of components for aircraft radars, technology for the production of components for naval radars, technology for the production of components for ground based radars, technology for the use of general military vehicle components, technology for the use of general military aircraft components, technology for the use of components for aircraft radars, technology for the use of components for naval radars, technology for the use of components for ground based radars

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£4.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	9
Other items	6
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>15</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

armoured all wheel drive vehicles, ballistic test equipment, bomb suits, components for ballistic test equipment, components for bomb suits, components for heavy machine guns, components for large calibre artillery, components for weapon sights, cryptographic software, equipment employing cryptography, equipment for the use of large calibre artillery, heavy machine guns (3), human pathogens, improvised explosive device disposal equipment, inertial equipment, large calibre artillery, military helmets, software for the use of ballistic test equipment, sporting gun ammunition, technology for the production of military aero-engines, technology for the production of unmanned air vehicles, technology for the use of ballistic test equipment, weapon cleaning equipment, weapon sights

### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	equipment employing cryptography
2	P	military aero-engines, components for military aero-engines, military aircraft ground

Philippines cont.

		equipment, components for military aircraft ground equipment, components for ejectors seats, military parachutes, chemical agent detection equipment simulators
3	T	inertial equipment
4	P	naval radars, components for naval radars, test equipment for naval radars, test equipment for components for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
5	P	components for military aero-engines
6	P	military utility vehicles, technology for the use of military utility vehicles
7	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
8	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
9	P	air guns, components for air guns, weapon sights
10	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
11	T	components for military communications equipment, military communications equipment
12	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
13	P	devices for initiating explosives, explosives, linear cutting explosive charges
14	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
15	T	military utility vehicles, armoured all wheel drive vehicles
16	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
17	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
18	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
19	T	components for combat aircraft, components for military training aircraft, combat aircraft simulators, military training aircraft simulators, training equipment for military navigation equipment, training equipment for military communications equipment, training equipment for electronic warfare equipment, replica air to air missiles, replica air to surface missiles, replica bombs, software for the use of combat aircraft simulators, software for the use of military training aircraft simulators, software for the use of training equipment for military navigation equipment, software for the use of training equipment for military communications equipment, software for the use of training equipment for electronic warfare equipment, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of combat aircraft simulators, technology for the use of military training aircraft simulators, technology for the use of training equipment for military navigation equipment, technology for the use of military communications equipment, technology for the use of electronic warfare equipment, technology for the use of replica bombs, technology for the use of replica air to air missiles, technology for the use of replica air to surface missiles

Philippines cont.

20	P	equipment employing cryptography
21	T	combat aircraft simulators, military training aircraft simulators, military electronic equipment, combat aircraft training equipment, military training aircraft training equipment, military surveillance aircraft training equipment, components for combat aircraft, components for military surveillance aircraft, components for military training aircraft, software for the modelling of military operation scenarios, software for the use of combat aircraft training equipment, software for the use of military training aircraft training equipment, software for the use of combat aircraft simulators, software for the use of military training aircraft simulators, technology for the use of combat aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for use of military electronic equipment, technology for the use of combat aircraft simulators, technology for the use of military training aircraft simulators, technology for the use of combat aircraft training equipment, technology for the use of military training aircraft training equipment, technology for the use of military surveillance aircraft training equipment, technology for the use of software for the modelling of military operation scenarios, technology for the use of software for the use of combat aircraft training equipment, technology for the use of software for the use of military training aircraft training equipment, technology for the use of software for the use of combat aircraft simulators, technology for the use of software for the use of military training aircraft simulators
22	P	military aircraft pressurised breathing equipment, components for ejector seats
23	P	military transport aircraft, components for military transport aircraft, military aircraft ground equipment, technology for the use of military transport aircraft
24	P	equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
25	T	weapon day & night sight, laser warning detector, laser rangefinder, aiming device, general naval vessel component, general military aircraft component, components for armoured fighting vehicle, military infrared/thermal imaging equipment, equipment for the use of weapon day & night sight, equipment for the use of laser warning detector, software for the use of weapon day & night sight, software for the use of laser warning detector, software for the use of laser rangefinder, software for the use of aiming device, software for the use of military navigation equipment, software for the use of military infrared/thermal imaging equipment
26	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
27	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
28	P	components for military utility vehicles, technology for the use of military utility vehicles
29	T	magnetometers

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£5.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	37
Other items	5
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>42</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

Poland cont.

air guns (206), chaff, chemical agent detection equipment, chemical agent detection equipment (T), components for air to surface rockets, components for ballistic test equipment, components for chemical agent detection equipment (T), components for electronic warfare equipment, components for inert ammunition, components for large calibre ammunition, components for large calibre artillery, components for military communications equipment, components for military electronic equipment, components for military improvised explosive device disposal equipment (T), components for military training aircraft (T), components for naval radars, components for projectile launchers, components for sniper rifles, components for training large calibre ammunition, components for turrets, demolition charges, equipment for the use of military communications equipment, equipment for the use of optical target acquisition equipment (T), general military aircraft components (T), general purpose integrated circuits, goods treated for signature suppression for military use (T), gun mountings, imaging cameras (T), improvised explosive device detection equipment (T), laser range finders (T), military communications equipment, military electronic equipment, military firing sets (T), military image intensifier equipment (T), military improvised explosive device disposal equipment (T), military sonar detection equipment, NBC respirators, night vision goggles (T), optical target acquisition equipment (T), production equipment for large calibre artillery, production technology for large calibre artillery, projectile launchers, signal analysers, small arms ammunition, sniper rifle maintenance equipment, sniper rifles (1), software for the use of airborne surveillance equipment (T), software for the use of ballistic test equipment, software for the use of military communications equipment, technology for the use of naval radars, technology for the use of sniper rifles, technology for the use of test equipment for weapon sights (T), test equipment for weapon sights (T), weapon night sights (T), weapon sight mounts, weapon sights (T)

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	components for military communications equipment, military communications equipment
2	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
3	P	components for combat aircraft, technology for the use of combat aircraft, equipment for the use of combat aircraft
4	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
5	P	vintage military aircraft
6	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
7	P	naval radars, components for naval radars, test equipment for naval radars, test equipment for components for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval

Poland cont.

		navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
8	P	military distress signalling equipment, components for military distress signalling equipment
9	P	components for military training aircraft, technology for the use of military training aircraft, equipment for the use of military training aircraft, equipment for the use of military training aircraft
10	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
11	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
12	P	radiation hardened integrated circuits, extended temperature range integrated circuits, general purpose integrated circuits
13	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
14	P	air guns, components for air guns, weapon sights
15	P	components for armoured fighting vehicle, equipment for the use of tanks, test equipment for tanks, technology for the use of tanks, components for military transport aircraft, equipment for the use of military transport aircraft, test equipment for military transport aircraft, technology for the use of military transport aircraft
16	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
17	P	software for the use of military communications equipment, software for the use of military electronic equipment
18	T	towed hydrophone arrays
19	P	components for military electronic equipment
20	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
21	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
22	T	military utility vehicles, armoured all wheel drive vehicles
23	P	components for naval radars, technology for the use of naval radars
24	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
25	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
26	P	towed hydrophone arrays, hydrophones
27	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators

Poland cont.

28	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
29	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
30	P	sporting gun ammunition
31	P	general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
32	P	military utility vehicles, technology for the use of military utility vehicles
33	P	components for combat aircraft, components for combat helicopters, components for military surveillance aircraft, components for military transport aircraft, components for military training aircraft, components for military utility helicopters, components for unmanned air vehicles, general military aircraft components, software for the use of general military aircraft components, software for the use of components for combat aircraft, software for the use of components for combat helicopters, software for the use of components for military surveillance aircraft, software for the use of components for military transport aircraft, software for the use of components for military training aircraft, software for the use of components for military utility helicopters, software for the use of components for unmanned air vehicles, technology for the use of general military aircraft components, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military surveillance aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military training aircraft, technology for the use of components for military utility helicopters, technology for the use of components for unmanned air vehicles
34	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
35	P	components for combat aircraft, technology for the use of components for combat aircraft
36	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
37	P	components for military transport aircraft, technology for the use of military transport aircraft
38	P	general naval vessel components, technology for the use of general naval vessel components
39	P	improvised explosive device disposal equipment
40	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
41	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols,

Poland cont.

		components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
42	P	equipment employing cryptography
43	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
44	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment

46	T	imaging cameras
47	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
48	P	equipment employing cryptography
49	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment

## Portugal

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	14
Other items	3
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>17</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

air guns (5), anti-riot shields, components for military utility helicopters, components for shotguns, improvised explosive device disposal equipment, improvised explosive device disposal equipment (T), NBC decontamination equipment, NBC filters, shotguns (11), sporting rifles (1), technology for the use of military communications equipment, towed hydrophone arrays

### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	devices for initiating explosives
2	T	assault rifles, pistols, revolvers, semi-automatic pistols, submachine guns, rifles, sniper

Portugal cont.

		rifles, sporting rifles, general purpose machine guns, heavy machine guns, shotguns, combat shotguns, mortars, weapon sights
3	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, general military aircraft components, technology for the use of general military aircraft components
4	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
5	P	sporting rifles, components for sporting rifles, weapon sights, sporting gun ammunition, shotguns, components for shotguns, sporting gun ammunition
6	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
7	P	components for military utility helicopters, technology for the use of military utility helicopters, components for combat aircraft, technology for the use of combat aircraft, components for military surveillance aircraft, technology for the use of military surveillance aircraft, components for military transport aircraft, technology for the use of military transport aircraft components for combat aircraft, technology for the use of combat aircraft
8	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
9	P	components for military utility helicopters
10	T	towed hydrophone arrays
11	P	military distress signalling equipment, components for military distress signalling equipment
12	P	military communications equipment
13	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, general military aircraft components, technology for the use of general military aircraft components
14	P	software for the simulation of weapon systems
15	P	general naval vessel components, naval shock mounts
16	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
17	P	components for military electronic equipment, components for chemical agent detection equipment
18	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command

Portugal cont.

		communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
19	P	demolition charges, equipment for the use of demolition charges, military explosives, military devices for initiating explosives
20	P	components for ground based radars, software for the use of ground based radars, technology for the use of ground based radars, test equipment for ground based radars, test equipment for ground based radars, equipment for the use of ground based radars
21	P	components for aircraft radars, components for naval radars, components for ground based radars, general military vehicle components, general military aircraft components, technology for the production of general military aircraft components, technology for the production of components for aircraft radars, technology for the production of components for naval radars, technology for the production of components for ground based radars, technology for the use of general military vehicle components, technology for the use of general military aircraft components, technology for the use of components for aircraft radars, technology for the use of components for naval radars, technology for the use of components for ground based radars
22	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of

Portugal cont.

		training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
23	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
24	T	military surveillance aircraft
25	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
26	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
27	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
28	P	components for ground based radars
29	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
30	P	components for military utility helicopters, components for military training aircraft, components for military transport aircraft, components for command communications control and intelligence equipment, components for naval navigation equipment
31	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
32	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted, display equipment, test equipment for military video recording equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
33	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, software for the use of deactivated weapon simulation equipment, deactivated weapons for training simulators, laser range finders,

Portugal cont.

		training mortar bombs, deactivated firearms for training simulators
34	P	equipment for operation of military aircraft in confined areas, general naval vessel components, components for submarines, technology for the use of components for frigates, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of components for mine sweepers
35	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars
36	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
37	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
38	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
39	P	components for military utility helicopters, technology for the use of components for military utility helicopters, components for combat aircraft, technology for the use of components for combat aircraft, components for combat helicopters, technology for the use of components for combat helicopters, components for military training aircraft, technology for the use of components for military training aircraft
40	P	components for large calibre artillery ammunition, components for smoke ammunition, mortar bomb, smoke ammunition, pyrotechnic ammunition, components for pyrotechnic ammunition, components for training large calibre artillery ammunition, blank ammunition
41	P	weapon sights
42	P	weapon sights, components for weapon sights, technology for the use of weapon sights
43	P	military aircraft pressurised breathing equipment, components for ejector seats
44	T	vintage military aircraft
45	P	weapon sights
46	P	devices for initiating explosives, explosives, linear cutting explosive charges
47	P	non-military explosives/propellants

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£3.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	35
Other items	6
Military List and other items	2
<b>Total number of SIELs issued</b>	<b>43</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

artillery computers, blank ammunition, body armour, chemical agent detection equipment, chemical agent detection equipment training equipment (T), components for artillery computers, components for assault rifles, components for combat helicopters, components for ejector seats, components for explosive ordnance disposal equipment (T), components for general purpose machine guns, components for military aero-engines, components for military airborne cargo strops, components for military communications equipment, components for military distress signalling equipment, components for military electronic equipment, components for military improvised explosive device disposal equipment, components for naval light guns, components for revolvers, components for semi-automatic pistols, components for shotguns, components for submachine guns, components for test equipment for artillery computers, corrosion resistant chemical manufacturing equipment, cryptographic software (T), equipment employing cryptography (T), equipment for the use of artillery computers, explosive ordnance disposal equipment (T), gun silencers, illuminators, imaging cameras (T), improvised explosive device detection equipment (T), military airborne cargo nets, military airborne cargo strops, military cameras, military image intensifier equipment, military improvised explosive device disposal equipment, military infrared/thermal imaging equipment (T), NBC clothing, NBC filters, NBC respirators, propellants, remote ground sensor systems (T), shotguns (2), software for the use of artillery computers, sporting rifles (1), test equipment for artillery computers, weapon cleaning equipment, weapon fire simulation equipment, weapon sight mounts, weapon sight mounts, weapon sights

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	military utility vehicles, armoured all wheel drive vehicles
2	T	artillery computers, mortar training equipment, small calibre artillery training equipment,

Qatar cont.

		large calibre artillery training equipment
3	P	components for military electronic equipment, components for chemical agent detection equipment
4	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
5	T	components for marine position fixing equipment

44	P	components for military communications equipment
45	P	chemical agent detection equipment, components for chemical agent detection equipment, technology for the use of chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, software for the use of equipment for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment
46	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
47	P	military aircraft ground equipment
48	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
49	P	military aircraft pressurised breathing equipment, components for ejector seats

Singapore cont.

50	P	devices for initiating explosives, explosives, linear cutting explosive charges
51	P	components for naval radars, technology for the use of naval radars
52	P	general military vehicle components, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for artillery towing tractors, components for bridge laying vehicles, components for bridge trailers, components for command and control vehicles, components for gun carriers, components for military ambulances, components for military cargo vehicles, components for military engineer vehicles, components for military motorcycles, components for military trailers, components for military utility vehicles, components for minefield breaching vehicles, components for mine clearance vehicles, components for munitions launching vehicles, components for tanks, components for tank destroyers, components for tank transporters
53	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
54	T	military utility vehicles, armoured all wheel drive vehicles
55	P	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
56	P	military devices for initiating explosives, illuminators, components for pyrotechnic signalling devices, pyrotechnic signalling devices, smoke hand grenades, smoke canisters, smoke ammunition, thunderflashes, exploding simulation devices, training equipment for improvised explosive device disposal, training hand grenades, training tear gas/irritant ammunition, tear gas/irritant ammunition, crowd control ammunition, CS hand grenades, stun grenades
57	P	equipment employing cryptography, cryptographic software
58	P	general naval vessel components, naval electrical equipment, naval navigation equipment
59	T	components for military communications equipment, military communications equipment
60	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
61	P	devices for initiating explosives
62	T	inertial equipment, technology for the use of inertial equipment
63	P	military transport aircraft, components for military transport aircraft, military aircraft ground equipment, technology for the use of military transport aircraft
64	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic

		countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
65	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
66	P	munitions launching equipment, components for munitions launching equipment, equipment for the use of munitions launching equipment, technology for the use of munitions launching equipment, technology for the use of equipment for the use of munitions launching equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment
67	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
68	P	components for ground based radars, technology for the use of ground based radars, software for the use of ground based radars, equipment for the use of ground based radars, test equipment for ground based radars
69	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
70	P	components for combat aircraft, test equipment for components for combat aircraft, equipment for the use of components for combat aircraft, technology for the use of components for combat aircraft, technology for the use of test equipment for the use of components for combat aircraft, technology for the use of equipment for the use of components for combat aircraft
71	P	unfinished products for military aircraft head-up displays, components for weapon night sights, components for military infrared/thermal imaging equipment, components for military image intensifier equipment, unfinished products for unmanned air vehicles
72	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of torpedo handling equipment, technology for the use of components for torpedo handling equipment, torpedo handling equipment, components for torpedo handling equipment, military camouflage nets, components for military camouflage nets, goods treated for signature suppression for military use, components for goods treated for signature suppression for military use, technology for the use of camouflage nets, technology for the use of components for camouflage nets, technology for the use of goods treated for signature suppression for military use, technology for the use of

Singapore cont.

		components for goods treated for signature suppression for military use, general military aircraft components, technology for the use of general military aircraft components
73	P	body armour, components for body armour, military helmets
74	T	towed hydrophone arrays
75	P	components for air defence systems, military utility vehicles, test equipment for air defence systems, air defence systems training equipment, equipment for "military goods"
76	P	military distress signalling equipment, components for military distress signalling equipment
77	P	chemical agent detection training equipment
78	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment
79	P	equipment employing cryptography
80	P	components for air defence systems
81	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
82	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
83	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
84	P	equipment employing cryptography
85	P	equipment employing cryptography
86	P	components for military transport aircraft, military aircraft ground equipment, equipment for the use of military transport aircraft
87	P	components for military utility vehicles, technology for the use of military utility vehicles
88	P	components for ground based radars, test equipment for ground based radars, equipment for the use of ground based radars, software for the use of ground based radars, technology for the use of ground based radars
89	P	equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
90	P	software for the development of cryptographic software
91	P	general military aircraft components, components for military aircraft, head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
92	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
93	P	components for aircraft cannons, test equipment for aircraft cannons, software for the use of aircraft cannons, software for the use of test equipment for aircraft cannons, software for the use of aircraft cannons maintenance equipment, software for the use of equipment for the use of aircraft cannons, technology for the use of aircraft cannons, technology for the use of test equipment for aircraft cannons, technology for the use of aircraft cannons maintenance equipment, technology for the use of equipment for the use of aircraft cannons, equipment for the use of aircraft cannons, aircraft cannons maintenance equipment
94	P	military improvised explosive device disposal equipment, components for military improvised explosive device disposal equipment

Singapore cont.

95	T	military devices for initiating explosives, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
96	P	components for combat aircraft, technology for the use of components for combat aircraft
97	P	general naval vessel components, technology for the use of general naval vessel components, equipment for the use of general naval vessel components
98	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
99	P	weapon sights, components for weapon sights, technology for the use of weapon sights
100	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
101	P	civil body armour, components for civil body armour
102	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
103	P	components for military engineer vehicles
104	T	magnetometers

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£1.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	12
Other items	8
Military List and other items	2
<b>Total number of SIELs issued</b>	<b>22</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

civil NBC protection clothing (T), clothing treated for signature suppression for military use (T), components for chemical agent detection equipment, components for large calibre artillery, components for NBC clothing (T), components for sniper rifles, components for weapon sights, direct view imaging equipment (T), equipment for the use of weapon sights, imaging cameras (T), military improvised explosive device disposal equipment (T), military navigation equipment, NBC clothing (T), NBC protective equipment (T), NBC respirators (T), night vision goggles (T), production equipment for large calibre

Slovakia cont.

artillery, radiation hardened TV cameras, sniper rifles (16), weapon cleaning equipment, weapon night sights (T), weapon sight mounts, weapon sights

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	command communications control and intelligence software
2	P	equipment employing cryptography
3	P	components for military utility vehicles, technology for the use of military utility vehicles
4	P	sporting gun ammunition
5	P	components for military communications equipment, equipment for the use of military communications equipment, components for equipment for the use of military communications equipment, technology for the use of military communications equipment
6	P	military utility vehicles, technology for the use of military utility vehicles
7	P	equipment for the use of military communications equipment, components for military communications equipment, technology for the use of military communications equipment
8	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
9	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
10	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
11	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapon sights
12	P	components for military communications equipment
13	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
14	P	military distress signalling equipment, components for military distress signalling equipment

## Somalia

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	3
Other items	0
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>3</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

anti-riot shields, armoured plate, body armour

#### Footnote

Somalia is subject to a UN arms embargo (UNSCR 733 (1992) amended by UNSCRs 1356 (2001) and (2002)). All the above licences were exceptions to the embargo, two for de-mining equipment and one for humanitarian/protective use. The UN raised no objection to the exports, which were in line with paragraphs 2 and 3 of UNSCR 1356 (2001).

## South Africa

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£31.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	106
Other items	40
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>146</b>

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	inertial equipment, technology for the use of inertial equipment
2	P	components for military training aircraft, components for combat aircraft, components for combat helicopters
3	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
4	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
5	P	equipment employing cryptography
6	P	components for aircraft radars, components for naval radars, components for ground based radars, general military vehicle components, general military aircraft components, technology for the production of general military vehicle components, technology for the production of general military aircraft components, technology for the production of components for aircraft radars, technology for the production of components for naval radars, technology for the production of components for ground based radars, technology for the use of general military vehicle components, technology for the use of general military aircraft components, technology for the use of components for aircraft radars, technology for the use of components for naval radars, technology for the use of components for ground based radars
7	P	components for military utility vehicles, technology for the use of military utility vehicles
8	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
9	P	components for military aero-engines
10	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
11	P	weapon sights
12	P	components for armoured personnel carriers

South Africa cont.

13	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
14	P	command communications control and intelligence software
15	P	Goods specified in the EG(C)O 1994 as amended relating to military training aircraft as specified by ML4b; ML5; ML10a,b,c,e,f,g,h,i; ML11; ML14; PL5034; ML15; ML16; PL5020; ML17c,f,h,i,j,k,l,m,n; PL5017; ML21a, b1; ML22
16	P	components for ground based radars, software for the use of ground based radars, test equipment for ground based radars, technology for the use of ground based radars, equipment for the use of ground based radars
17	P	devices for initiating explosives, explosives, linear cutting explosive charges
18	P	components for combat aircraft, production equipment for combat aircraft
19	P	components for military transport aircraft, components for military aero-engines, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, military aircraft ground equipment, components for combat aircraft, test equipment for combat helicopters, components for test equipment for combat helicopters, equipment for the use of combat helicopters, components for military surveillance aircraft, test equipment for military surveillance aircraft, components for test equipment for military surveillance aircraft, equipment for the use of military surveillance aircraft, test equipment for military utility helicopters, components for test equipment for military utility helicopters, equipment for the use of military utility helicopters, components for military utility helicopters
20	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
21	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
22	P	components for military training aircraft, technology for the use of military training aircraft, components for combat aircraft, technology for the use of combat aircraft, components for military transport aircraft, technology for the use of military transport aircraft
23	P	equipment employing cryptography
24	P	towed hydrophone arrays, hydrophones
25	P	components for combat aircraft, components for military training aircraft, equipment for the use of combat aircraft, equipment for the use of military training aircraft, technology for the use of combat aircraft, technology for the use of military training aircraft, equipment for the use of combat aircraft, equipment for the use of military training aircraft
26	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility

South Africa cont.

		helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
27	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
28	P	equipment for operation of military aircraft in confined areas, general naval vessel components, components for submarines, technology for the use of components for frigates, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of components for mine sweepers
29	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
30	P	components for military electronic equipment
31	P	components for military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines
32	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
33	P	components for military training aircraft, technology for the use of components for military training aircraft
34	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
35	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights
36	P	components for combat aircraft, technology for the use of combat aircraft, equipment for the use of combat aircraft
37	P	components for military training aircraft, unfinished products for components for military training aircraft, production equipment for components for military training aircraft, production technology for components for military training aircraft
38	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
39	P	components for military electronic equipment
40	P	naval radars, components for naval radars, test equipment for naval radars, test equipment for components for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
41	P	components for naval radars, technology for the use of naval radars

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£6.5m
---	-------

Number of SIELs issued covering:	
Items on the Military List	73
Other items	2
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>75</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

armoured all wheel drive vehicles (T), chaff equipment, chemical agent detection equipment, components for ballistic test equipment, components for chemical agent detection equipment, components for combat aircraft, components for gun mountings, components for large calibre artillery, components for military aero-engines, components for military communications equipment, components for military infrared/thermal imaging equipment (T), components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for shotguns, components for small arms ammunition, components for sniper rifles, components for unmanned air vehicles, equipment for the use of military communications equipment (T), equipment for the use of sniper rifles, equipment for the use of weapon sights, flash suppressors, forgings for combat aircraft, general military aircraft components, guided missile decoy rounds, gun mountings, gun silencers, imaging cameras (T), military communications equipment, military communications equipment (T), military electronic equipment, military image intensifier equipment (T), military infrared/thermal imaging equipment, naval communications equipment, NBC filters, NBC protective equipment, night vision goggles (T), non-sporting shotgun ammunition, nuclear radiation detection equipment, nuclear reactor fuel element fabrication equipment, semi-automatic pistols (1), shotguns (13), shotguns (5) (T), small arms ammunition, sniper rifles (43), software for the use of military communications equipment (T), software for the use of military electronic equipment, sporting gun ammunition, sporting rifles (10), technology for the development of products containing enriched uranium, technology for the production of military transport aircraft, technology for the use of guided missile decoy rounds, technology for the use of military electronic equipment, technology for the use of military infrared/thermal imaging equipment (T), technology for the use of nuclear reactor fuel element fabrication equipment, technology for the use of sniper rifles, test equipment for military communications equipment (T), test equipment for naval gun installations, weapon cleaning equipment, weapon day and night sights (T), weapon night sights (T), weapon sight mounts, weapon sights

## STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION

Total value of SIEL (Incorporation) applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	5
Other items	0
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>5</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for military training aircraft, components for military transport aircraft, components for surface to air missiles, technology for the production of military transport aircraft

**OPEN INDIVIDUAL EXPORT LICENCES**

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	general military vehicle components, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for artillery towing tractors, components for bridge laying vehicles, components for bridge trailers, components for command and control vehicles, components for gun carriers, components for military ambulances, components for military cargo vehicles, components for military engineer vehicles, components for military motorcycles, components for military trailers, components for military utility vehicles, components for minefield breaching vehicles, components for mine clearance vehicles, components for munitions launching vehicles, components for tanks, components for tank destroyers, components for tank transporters
2	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
3	P	components for combat aircraft
4	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
5	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
6	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted display equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
7	P	body armour, components for body armour, military helmets
8	P	naval shock mounts, components for naval shock mounts
9	P	military explosives
10	P	marine position fixing equipment, submersible vehicles, underwater still cameras, inertial equipment, underwater telecommunications systems, sonar log equipment, marine object detection systems, gyroscopes, bathymetric survey systems
11	P	ground vehicle military communications equipment, test equipment for ground vehicle military communications equipment, technology for the use of ground vehicle military communications equipment, technology for the use of test equipment for ground vehicle military communications equipment, military communications equipment, test equipment for military communications equipment, military electronic equipment, test

Spain cont.

49	P	military firing sets, components for military firing sets, military electronic equipment, equipment for the use of military firing sets, test equipment for military firing sets
50	P	components for military utility vehicles, technology for the use of military utility vehicles
51	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights
52	P	components for military utility helicopters, technology for the use of components for military utility helicopters, components for military training aircraft, technology for the use of components for military training aircraft, components for combat aircraft, technology for the use of components for combat aircraft, components for military transport aircraft, technology for the use of components for military transport aircraft
53	P	weapon sights
54	P	components for military training aircraft, components for combat aircraft
55	P	components for military electronic equipment
56	P	military aircraft pressurised breathing equipment, equipment for the use of military aircraft pressurised breathing equipment, test equipment for military aircraft pressurised breathing equipment, technology for the use of military aircraft pressurised breathing equipment
57	P	components for anti-armour missiles
58	P	components for aircraft cannons, test equipment for aircraft cannons, software for the use of aircraft cannons, software for the use of test equipment for aircraft cannons, software for the use of aircraft cannons maintenance equipment, software for the use of equipment for the use of aircraft cannons, technology for the use of aircraft cannons, technology for the use of test equipment for aircraft cannons, technology for the use of aircraft cannons maintenance equipment, technology for the use of equipment for the use of aircraft cannons, equipment for the use of aircraft cannons, aircraft cannons maintenance equipment
59	P	towed hydrophone arrays, hydrophones
60	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
61	P	software for the simulation of weapon systems
62	P	ground vehicle military communications equipment
63	P	components for military training aircraft, technology for the use of military training aircraft, components for military surveillance aircraft, technology for the use of military surveillance aircraft, components for military transport aircraft, technology for the use of military transport aircraft
64	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
65	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars
66	P	remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems, remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment,

Sweden cont.

		technology for the use of software for the use of remote ground sensor systems
67	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft
68	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
69	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
70	P	military electronic equipment, components for military electronic equipment
71	P	components for air to air missiles, components for air to surface missiles, surface to air missiles, components for surface to surface missiles, components for airborne radars, components for aircraft radars, components for naval radars, components for ground based radars, components for electronic countermeasures equipment, components for electronic warfare equipment, components for military communications equipment
72	T	military devices for initiating explosives, military improvised explosive device jamming equipment, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, military devices for initiating explosives, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
73	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
74	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
75	P	components for military infrared/thermal imaging equipment, components for air to air missiles, components for combat aircraft
76	P	components for military communications equipment
77	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
78	P	NBC protective equipment, components for NBC protective equipment
79	P	equipment employing cryptography
80	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment, software for the use of mine countermeasures equipment, technology for the use of mine countermeasures equipment
81	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of torpedo handling equipment, technology for the use of components for torpedo handling equipment, torpedo handling equipment, components for torpedo handling equipment, general military aircraft components, technology for the use of general military aircraft components
82	P	general naval vessel components, test equipment for general naval vessel components
83	T	imaging cameras
84	P	military aircraft ground equipment, components for military infrared/thermal imaging equipment, components for air to air missiles launching equipment

Sweden cont.

85	P	combat aircraft
86	P	components for combat aircraft
87	P	components for sporting gun ammunition
88	T	military utility vehicles, armoured all wheel drive vehicles
89	P	chemical agent detection training equipment
90	P	components for ground based radars, components for aircraft radars
91	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted display equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
92	P	general military vehicle components, components for armoured fighting vehicles, components for armoured personnel carriers, components for armoured repair and recovery vehicles, components for artillery towing tractors, components for bridge laying vehicles, components for bridge trailers, components for command and control vehicles, components for gun carriers, components for military ambulances, components for military cargo vehicles, components for military engineer vehicles, components for military motorcycles, components for military trailers, components for military utility vehicles, components for minefield breaching vehicles, components for mine clearance vehicles, components for munitions launching vehicles, components for tanks, components for tank destroyers, components for tank transporters
93	P	components for military transport aircraft, components for military aero-engines, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, military aircraft ground equipment
94	P	devices for initiating explosives, explosives, linear cutting explosive charges
95	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
96	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
97	P	constructions for ballistic protection of military systems
98	P	military distress signalling equipment, components for military distress signalling equipment
99	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, components for military infrared/thermal imaging equipment, technology for the use of components for military infrared/thermal imaging equipment, equipment for the use of components for military infrared/thermal imaging equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£4.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	66
Other items	10
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>76</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

air guns (2), animal pathogens, anthrax vaccines, anti-armour ammunition, anti-g/pressure suits, anti-riot shields, armoured plate, castings for surface to air missiles, chemical agent detection equipment, components for aircraft cannons, components for anti-aircraft ammunition, components for anti-armour ammunition, components for ballistic test equipment, components for chemical agent detection equipment, components for combat aircraft, components for general purpose machine guns, components for large calibre artillery, components for military aero-engines, components for military training aircraft, components for munition fuzes, components for nuclear reactors, components for small arms ammunition, components for small calibre artillery ammunition, components for sniper rifles, components for sporting rifles, components for submachine guns, components for turrets, components for weapon sights, deactivated firearms for training simulators (T), deactivated weapons for training simulators (T), equipment employing cryptography, equipment for the use of air guns, equipment for the use of sporting rifles, equipment for the use of weapon sights (T), firearm training simulators (T), forgings for combat aircraft, general military aircraft components, grenade launchers, gun mountings, gun silencers, materials containing enriched uranium, military electronic equipment, military flying helmets, military parachutes, mortar training equipment (T), production equipment for combat aircraft (T), radiation hardened TV cameras, rifles (3), semi-automatic pistols (2), shotguns (15), small arms ammunition, small calibre artillery ammunition, software for the simulation of surface to air missiles, software for the use of combat aircraft, software for the use of military communications equipment, software for the use of military electronic equipment, sporting gun ammunition, sporting rifles (11), technology for the development of nuclear reactor fuel element fabrication equipment, technology for the development of products containing enriched uranium, technology for the use of military electronic equipment, technology for the use of nuclear reactor fuel element fabrication equipment, technology for the use of software for the use of combat aircraft, technology for the use of software for the use of military communications equipment, technology for the use of sporting rifles, test equipment for attack/warning equipment, training anti-aircraft ammunition, training small arms ammunition, training small calibre artillery ammunition, training tear gas/irritant ammunition, triggered spark gaps, weapon cleaning equipment, weapon day and night sight training equipment (T), weapon sight mounts, weapon sights, weapon sights (T)

## STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION

Total value of SIEL (Incorporation) applications for which a licence was issued	£1.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	6
Other items	1
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>7</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

Switzerland cont.

components for constructions for ballistic protection of military systems, components for military image intensifier equipment, components for naval light guns, components for naval radars, filtration equipment, military image intensifier equipment, technology for the use of military intensifier equipment

# **OPEN INDIVIDUAL EXPORT LICENCES**

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
2	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
3	P	components for combat aircraft, components for military training aircraft, components for military utility helicopters, components for military utility aircraft, equipment for the use of military training aircraft, equipment for the use of military utility helicopters, equipment for the use of military utility aircraft, equipment for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military utility helicopters, technology for the use of military utility aircraft, technology for the use of combat aircraft, equipment for the use of military training aircraft, equipment for the use of military utility helicopters, equipment for the use of military utility aircraft, equipment for the use of combat aircraft
4	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, components for military infrared/thermal imaging equipment, technology for the use of components for military infrared/thermal imaging equipment, equipment for the use of components for military infrared/thermal imaging equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
5	P	military aircraft ground equipment
6	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
7	P	military communications equipment
8	P	components for combat aircraft, components for ejector seats, military aircraft ground equipment, components for military aero-engines
9	P	military distress signalling equipment, components for military distress signalling equipment
10	P	components for armoured fighting vehicle, equipment for the use of tanks, test equipment for tanks, technology for the use of tanks, components for combat aircraft, components for military training aircraft, components for military transport aircraft, equipment for the use of combat aircraft, equipment for the use of military training

Switzerland cont.

		aircraft, equipment for the use of military transport aircraft, test equipment for combat aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft
11	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
12	P	general military aircraft components, military aircraft navigation equipment, military electronic equipment, components for airborne radars, components for ground based radars, components for naval radars, components for aircraft radars, general military vehicle components, general naval vessel components, components for military aero-engines, technology for the development of general military aircraft components, technology for the development of military aircraft navigation equipment, technology for the development of components for military aero-engines, technology for the development of military electronic equipment, technology for the development of general military vehicle components, technology for the development of general naval vessel components, technology for the development of airborne radars, technology for the development of naval radars, technology for the development of aircraft radars, technology for the development of ground based radars
13	P	military aircraft pressurised breathing equipment, equipment for the use of military aircraft pressurised breathing equipment, test equipment for military aircraft pressurised breathing equipment, technology for the use of military aircraft pressurised breathing equipment
14	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines
15	P	sporting rifles, sporting pistols, revolvers, components for sporting rifles, components for sporting pistols, components for revolvers, weapon sights, shotguns, components for shotguns, weapon sight mounts
16	T	vintage military aircraft
17	P	components for military utility vehicles, technology for the use of military utility vehicles
18	P	Goods specified in the EG(C)O 1994 as amended relating to military training aircraft as specified by ML4b; ML5; ML10a,b,c,e,f,g,h,i; ML11; ML14; PL5034; ML15; ML16; PL5020; ML17c,f,h,i,j,k,l,m,n; PL5017; ML21a, b1; ML22
19	P	components for military transport aircraft, technology for the use of military transport aircraft, components for military training aircraft, technology for the use of military training aircraft
20	P	components for military electronic equipment, components for chemical agent detection equipment
21	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft
22	P	components for combat helicopters, technology for the use of components for combat helicopters
23	T	components for military communications equipment, military communications equipment
24	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment

Switzerland cont.

25	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
26	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
27	P	chemical agent detection training equipment
28	P	shotguns, sporting gun ammunition, small arms ammunition
29	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
30	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
31	P	weapon sights, components for weapon sights, technology for the use of weapon sights
32	P	components for aircraft cannons, test equipment for aircraft cannons, software for the use of aircraft cannons, software for the use of test equipment for aircraft cannons, software for the use of aircraft cannons maintenance equipment, software for the use of equipment for the use of aircraft cannons, technology for the use of aircraft cannons, technology for the use of test equipment for aircraft cannons, technology for the use of aircraft cannons maintenance equipment, technology for the use of equipment for the use of aircraft cannons, equipment for the use of aircraft cannons, aircraft cannons maintenance equipment
33	P	components for range-finding equipment
34	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, component/components for military communications equipment, military electronic equipment, components for military electronic equipment
35	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
36	P	military aircraft pressurised breathing equipment, components for ejector seats
37	P	improvised explosive device disposal equipment
38	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
39	P	equipment employing cryptography
40	P	components for aircraft radars, components for naval radars, components for ground based radars, general military vehicle components, general military aircraft

Switzerland cont.

		components, technology for the production of general military vehicle components, technology for the production of general military aircraft components, technology for the production of components for aircraft radars, technology for the production of components for naval radars, technology for the production of components for ground based radars, technology for the use of general military vehicle components, technology for the use of general military aircraft components, technology for the use of components for aircraft radars, technology for the use of components for naval radars, technology for the use of components for ground based radars
41	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
42	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
43	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
44	P	aircraft cannons, components for aircraft cannons, components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment
45	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
46	P	military aero-engines, components for military aero-engines, military aircraft ground equipment, components for military aircraft ground equipment, components for ejectors seats, military parachutes, chemical agent detection equipment simulators
47	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
48	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
49	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
50	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
51	P	test equipment for military communications equipment, equipment for the use of military communications equipment, military communications equipment, components for military communications equipment, software for the use of military communications equipment, technology for the use of military communications equipment
52	P	technology for the production of chemical agent detection equipment, test equipment for chemical agent detection equipment, equipment for the use of chemical.
53	P	ground vehicle military communications equipment, test equipment for ground vehicle military communications equipment, technology for the use of ground vehicle military communications equipment, technology for the use of test equipment for ground

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£0.5m
Number of SIELs issued covering:	
Items on the Military List	3
Other items	2
Military List and other items	1
<b>Total number of SIELs issued</b>	<b>6</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

Syria cont.

ballistic test equipment, bomb suits, components for ballistic test equipment, general laboratory equipment, improvised explosive device detection equipment, small arms ammunition, small calibre artillery ammunition, technology for the use of military communications equipment

## OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
2	T	towed hydrophone arrays
3	T	civil NBC protection equipment, civil NBC protection clothing
4	T	NBC respirators, NBC decontamination equipment, NBC clothing

# Taiwan

## STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£24.0m
Number of SIELs issued covering:	
Items on the Military List	46
Other items	65
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>111</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

anti-armour missile training equipment, components for airborne radars, components for armoured personnel carriers, components for assault rifles, components for combat aircraft, components for ejector seats, components for electronic warfare equipment, components for ground vehicle military communications equipment (T), components for military aero-engines, components for military distress signalling equipment, components for military infrared/thermal imaging equipment, components for military navigation equipment, components for naval electronic equipment, components for naval radars, components for semi-automatic pistols, components for semiconductor process equipment, components for solid rocket propulsion systems, components for submachine guns, components for submarines, components for unmanned air vehicles, compound semiconductor precursor chemicals, computer analogue to digital equipment, corrosion resistant chemical manufacturing equipment, cryptographic software, decoy flares, electronic warfare equipment training equipment, forgings for military aero-engines, general naval vessel components, ground vehicle military communications equipment (T), guided missile decoying equipment, imaging cameras, inertial equipment, military aero-engines, military aircraft ground equipment, military parachutes, military sonar detection equipment, naval electronic equipment, nickel powders, pressure transducers, production technology for military airborne cargo handling equipment, pyrotechnics/fuels and related substances, radar equipment (T), radiation hardened TV cameras, semi-conductor process equipment, small arms ammunition, software for the development of cryptographic software, software for the development of equipment employing cryptography, software for the production of equipment employing cryptography, software for the use of equipment employing cryptography, submachine guns (51), technology for the development of equipment employing cryptography, technology for the production of ground vehicle military communications equipment, technology for the use of combat aircraft, technology for the use of ground vehicle military communications equipment, technology for the use of military aero-engines, technology for the use of software for the development of cryptographic software, technology for the use of submachine guns, test equipment for frigates, test equipment for ground vehicle military communications equipment (T), toxic

Taiwan cont.

components for surface to air missiles

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	components for naval electronic warfare equipment, software for the use of naval electronic warfare equipment, test equipment for naval electronic warfare equipment, equipment for the use of naval electronic warfare equipment
2	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for

Turkey cont.

		aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
3	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
4	P	components for military electronic equipment
5	T	towed hydrophone arrays
6	P	devices for initiating explosives, explosives, linear cutting explosive charges
7	P	components for armoured personnel carriers
8	P	optical target acquisition equipment, accessories for optical target acquisition equipment
9	P	air guns, weapon sights, components for air guns
10	P	command communications control and intelligence software
11	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapon sights
12	T	combat aircraft simulators, military training aircraft simulators, military electronic equipment, combat aircraft training equipment, military training aircraft training equipment, military surveillance aircraft training equipment, components for combat aircraft, components for military surveillance aircraft, components for military training aircraft, software for the modelling of military operation scenarios, software for the use of combat aircraft training equipment, software for the use of military training aircraft training equipment, software for the use of combat aircraft simulators, software for the use of military training aircraft simulators, technology for the use of combat aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for use of military electronic equipment, technology for the use of combat aircraft simulators, technology for the use of military training aircraft simulators, technology for the use of combat aircraft training equipment, technology for the use of military training aircraft training equipment, technology for the use of military surveillance aircraft training equipment, technology for the use of software for the modelling of military operation scenarios, technology for the use of software for the use of combat aircraft training equipment, technology for the use of software for the use of

Turkey cont.

		military training aircraft training equipment, technology for the use of software for the use of combat aircraft simulators, technology for the use of software for the use of military training aircraft simulators
13	P	military transport aircraft, components for military transport aircraft, military aircraft ground equipment, technology for the use of military transport aircraft
14	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
15	P	civil body armour, components for civil body armour
16	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
17	P	software for the use of military communications equipment, software for the use of military electronic equipment
18	P	components for naval electronic warfare equipment, test equipment for naval electronic warfare equipment, software for the use of naval electronic warfare equipment
19	P	components for ground based radars, technology for the use of ground based radars, software for the use of ground based radars, equipment for the use of ground based radars, test equipment for ground based radars
20	P	general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
21	P	components for military electronic equipment
22	P	sporting gun ammunition, components for sporting gun ammunition
23	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
24	P	components for air defence systems, components for air to surface missile control equipment, components for air to surface missile handling equipment, components for air to surface missile launching equipment
25	P	NBC protective equipment, components for NBC protective equipment
26	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
27	P	air guns, components for air guns, weapon sights
28	P	military utility vehicles, technology for the use of military utility vehicles
29	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
30	P	smoke hand grenades, smoke canisters, smoke ammunition, thunderflashes, exploding simulation devices, training equipment for improvised explosive device disposal, training hand grenades, training hand grenades, training tear gas/irritant ammunition, tear gas/irritant ammunition, crowd control ammunition, cs hand grenades, stun grenades, demolition charges
31	P	components for ground based radars

Turkey cont.

32	P	components specified in the military list as ML1, ML2, ML4, ML5, ML6, ML9, ML10, ML11, ML14, ML15 (excluding 3rd generation image intensifier tubes) and PL5033
33	P	components for air defence systems, military utility vehicles, test equipment for air defence systems, air defence systems training equipment, equipment for "military goods"
34	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
35	P	naval shock mounts, components for naval shock mounts
36	P	components for submarines, devices containing military pyrotechnic materials.
37	T	NBC respirators, NBC filters, NBC clothing, components for NBC respirators
38	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
39	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
40	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
41	P	components for ground based radars, test equipment for ground based radars, equipment for the use of ground based radars, software for the use of ground based radars, technology for the use of ground based radars
42	P	components for military aero-engines, castings for military aero-engines, forgings for military aero-engines, unfinished products for military aero-engines, technology for the production of military aero-engines, technology for the use of military aero-engines
43	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
44	P	equipment employing cryptography
45	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
46	P	equipment employing cryptography
47	P	components for combat aircraft, technology for the use of combat aircraft
48	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
49	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft,

Turkey cont.

		components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted, display equipment, test equipment for military video recording equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment
50	P	general naval vessel components, technology for the use of general naval vessel components
51	P	components for ground based radars, software for the use of ground based radars, test equipment for ground based radars, technology for the use of ground based radars
52	P	components for naval radars, software for the use of naval radars, technology for the use of naval radars, test equipment for naval radars, test equipment for naval radars, equipment for the use of naval radars
53	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
54	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, military camouflage nets, components for military camouflage nets, goods treated for signature suppression for military use, components for goods treated for signature suppression for military use, technology for the use of camouflage nets, technology for the use of components for camouflage nets, technology for the use of goods treated for signature suppression for military use, technology for the use of components for goods treated for signature suppression for military use, general military aircraft components, technology for the use of general military aircraft components
55	P	general naval vessel components, naval electrical equipment, naval navigation equipment
56	T	military utility vehicles, armoured all wheel drive vehicles
57	P	military communications equipment, components for military communications equipment, software for the use of military communications equipment, technology for the use of military communications equipment
58	T	civil NBC protection clothing, NBC respirators, NBC clothing, NBC filters
59	P	ground vehicle military communications equipment, test equipment for ground vehicle military communications equipment, technology for the use of ground vehicle military communications equipment, technology for the use of test equipment for ground vehicle military communications equipment, military communications equipment, test equipment for military communications equipment, military electronic equipment, test equipment for military electronic equipment, military navigation equipment, test equipment for military navigation equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military navigation equipment, technology for the use of test equipment for military communications equipment, technology for the use of test equipment for military electronic equipment, technology for the use of test equipment for military navigation equipment
60	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for

Turkey cont.

		military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines, "combat aircraft simulators, military training aircraft simulators, military electronic equipment, combat aircraft training equipment, military training aircraft training equipment, military surveillance aircraft training equipment, components for combat aircraft, components for military surveillance aircraft, components for military training aircraft, software for the modelling of military operation scenarios, software for the use of combat aircraft training equipment, software for the use of military training aircraft training equipment, software for the use of combat aircraft simulators, software for the use of military training aircraft simulators, technology for the use of combat aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for use of military electronic equipment, technology for the use of combat aircraft simulators, technology for the use of military training aircraft simulators, technology for the use of combat aircraft training equipment, technology for the use of military training aircraft training equipment, technology for the use of military surveillance aircraft training equipment, technology for the use of software for the modelling of military operation scenarios, technology for the use of software for the use of combat aircraft training equipment, technology for the use of software for the use of military training aircraft training equipment, technology for the use of software for the use of combat aircraft simulators, technology for the use of software for the use of military training aircraft simulators
61	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
62	T	components for combat aircraft, components for military training aircraft, combat aircraft simulators, military training aircraft simulators, training equipment for military navigation equipment, training equipment for military communications equipment, training equipment for electronic warfare equipment, replica air to air missiles, replica air to surface missiles, replica bombs, software for the use of combat aircraft simulators, software for the use of military training aircraft simulators, software for the use of training equipment for military navigation equipment, software for the use of training equipment for military communications equipment, software for the use of training equipment for electronic warfare equipment, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of combat aircraft simulators, technology for the use of military training aircraft simulators, technology for the use of training equipment for military navigation equipment, technology for the use of military communications equipment, technology for the use of electronic warfare equipment, technology for the use of replica bombs, technology for the use of replica air to air missiles, technology for the use of replica air to surface missiles
63	P	chemical agent detection equipment, components for chemical agent detection equipment, technology for the use of chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, software for the use of equipment for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment
64	P	components for military utility vehicles, technology for the use of military utility vehicles
65	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft

Turkey cont.

		components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
66	T	weapon day & night sight, laser warning detector, laser rangefinder, aiming device, general naval vessel component, general military aircraft component, components for armoured fighting vehicle, military infrared/thermal imaging equipment, equipment for the use of weapon day & night sight, equipment for the use of laser warning detector, software for the use of weapon day & night sight, software for the use of laser warning detector, software for the use of laser rangefinder, software for the use of aiming device, software for the use of military navigation equipment, software for the use of military infrared/thermal imaging equipment
67	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
68	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
69	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
70	P	components for military transport aircraft, equipment for the use of military transport aircraft, technology for the use of military transport aircraft, equipment for the use of military transport aircraft
71	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
72	T	military devices for initiating explosives, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
73	P	components for military training aircraft, technology for the use of components for military training aircraft
74*	P	military, security and para-military goods and arms, ammunition and related material as specified by the 'Order' except the following: - goods specified by PL5001; landmines and all related goods; materials or explosive materials containing RDX or HMX; chemicals specified in the Chemical Weapons Convention (Schedule 1) and related technology; complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor; software specially designed or modified for the use of complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor
75	P	components for air guns
76	T	magnetometers

equipment, inert surface to air missiles (T), inertial equipment, inertial equipment (T), laser warning detectors (T), machine pistols (40), mechanical measurement equipment, microwave components, military aero-engines, military aero-engines (T), military airborne cargo nets, military aircraft ground equipment, military communications equipment, military communications equipment training equipment, military devices for initiating explosives, military diving apparatus, military firing sets, military firing sets (T), military helmets, military image intensifier equipment (T), military improvised explosive device disposal equipment, military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment, military infrared/thermal imaging equipment (T), military navigation equipment, military small arms training equipment, military small arms training equipment (T), military training aircraft, military utility vehicles, NBC clothing (T), NBC filters (T), NBC protective equipment (T), NBC respirators, NBC respirators (T), night vision goggles, night vision goggles (T), non-ferrous alloys, nuclear grade graphite, optical target designator equipment (T), pistols (20), projectile launchers (T), range finding equipment (T), rebreathing swimming apparatus, remote ground sensor systems (T), revolvers (19), rifles (50), semi-automatic pistols (72), semiconductor device CAD software, shotguns (38), small arms ammunition, smoke ammunition (T), smoke canisters, sniper rifle maintenance equipment, sniper rifles (155), software for the development of equipment employing cryptography, software for the use of airborne electronic warfare training equipment, software for the use of airborne surveillance equipment (T), software for the use of combat helicopters (T), software for the use of military firing sets, software for the use of military navigation equipment, software for the use of military small arms training equipment (T), spectrometers, sporting gun ammunition, sporting rifles (84), submachine guns (576), technology for the development of equipment employing cryptography, technology for the development of software for the development of air to surface missiles, technology for the development of software for the use of air to surface missiles,

technology for the development of surface to air missiles, technology for the use of airborne electronic warfare training equipment, technology for the use of assault rifles, technology for the use of components for armoured personnel carriers, technology for the use of gun laying equipment, technology for the use of military diving apparatus, technology for the use of military improvised explosive device disposal equipment, technology for the use of semi-automatic pistols, technology for the use of sniper rifles, technology for the use of submachine guns, technology for the use of training equipment for military communications equipment, test equipment for frigates (T), thunderflashes, toxic chemical precursors, training anti-aircraft ammunition, training small arms ammunition, weapon cleaning equipment, weapon cleaning equipment (T), weapon night sights, weapon sight mounts, weapon sights, weapon sights (T)

#### STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION

Total value of SIEL (Incorporation) applications for which a licence was issued	Less than £250,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	3
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>4</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

corrosion resistant chemical manufacturing equipment, equipment for the use of military communications equipment, inertial equipment, military communications equipment

Number of SIELs refused covering:	
Items on the Military List	2
Other items	3
Military List and other items	0
<b>Total number of SIELs refused</b>	<b>5</b>

Rating	END USE	ML13	ML17
No of SIELS covering items with this rating	4	1	1

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	missile control equipment, missile handling equipment, missile launching equipment, munitions launching equipment, weapon decoying equipment, bomb handling equipment, chaff, chaff equipment, decoy flares, guided missile decoy rounds, guided missile decoying equipment, inert decoys, missile jamming equipment, aiming devices, bombing computers, fire control equipment, weapon control systems, weapon day and night sights, weapon night sights, weapon sights, aircraft military communications equipment, general military aircraft components, military aircraft head-down displays, military aircraft head-up displays, military aircraft navigation equipment, components for combat aircraft, components for military training aircraft, military aero-engines, airborne electronic warfare equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft flight data recorders, equipment for operation of military aircraft in confined areas, military aircraft ground equipment, aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, military flying helmets, military parachutes, equipment for the use of military training aircraft, equipment for the

United Arab Emirates cont.

		use of combat aircraft, helmet mounted display equipment, military distress signalling equipment, military electronic equipment, military navigation equipment, test equipment for military training aircraft, test equipment for combat aircraft, military training aircraft simulators, military combat aircraft simulators, military training aircraft training equipment, military combat aircraft training equipment, military cameras, military photographic equipment, military image intensifier equipment, night vision goggles, military infrared/thermal imaging equipment, military imaging radar equipment, imaging countermeasures equipment, imaging counter-countermeasures equipment, imaging countermeasure/counter-countermeasures equipment, castings for military training aircraft, castings for combat aircraft, forgings for military training aircraft, forgings for combat aircraft, unfinished products for military training aircraft, unfinished products for combat aircraft, signature suppression fittings for military use, signature suppression coatings for military use, signature suppression treatments for military use, military parametric technical databases, clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use, materials for reduced electromagnetic reflectivity for military use, military camouflage nets, military nuclear reactor simulators, military mobile repair shops and related equipment, military field generators, military containers, military bridges, military pontoons, military ferries, technology for the use of military training aircraft, technology for the use of combat aircraft, software for the use of military training aircraft, software for the use of combat aircraft
2	P	components for military aero-engines
3	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
4	P	air guns
5	P	components for combat aircraft, technology for the use of components for combat aircraft, components for combat helicopters, technology for the use of components for combat helicopters
6	P	command communications control and intelligence software
7	P	components for military training aircraft, technology for the use of military training aircraft, components for military surveillance aircraft, technology for the use of military surveillance aircraft, components for military transport aircraft, technology for the use of military transport aircraft, components for combat aircraft, technology for the use of combat aircraft
8	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, test equipment for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft
9	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
10	P	equipment employing cryptography
11	P	components for military utility vehicles, technology for the use of military utility vehicles
12	P	military utility vehicles, technology for the use of military utility vehicles
13	T	magnetometers

United Arab Emirates cont.

14	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
15	P	fibrous/filamentary materials
16	T	bathymetric survey systems, marine position fixing equipment, magnetometers, inertial equipment
17	P	components for combat aircraft, components for military training aircraft, components for military transport aircraft, equipment for the use of combat aircraft, equipment for the use of military transport aircraft, equipment for the use of military training aircraft, technology for the use of combat aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, equipment for the use of combat aircraft, equipment for the use of military transport aircraft, equipment for the use of military training aircraft
18	T	components for military communications equipment, military communications equipment
19	P	components for military improvised explosive device disposal equipment
20	P	improvised explosive device disposal equipment
21	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
22	T	inertial equipment
23	P	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
24	T	inertial equipment
25	P	military parachutes, military airborne cargo handling equipment
26	P	components for weapon night sights, equipment for the use of weapon night sights, technology for the use of weapon night sights
27	P	air guns, components for air guns, weapon sights
28	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
29	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
30	P	air guns, weapon sights, components for air guns
31	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, software for the use of deactivated weapon simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
32	P	components for electronic warfare equipment, test equipment for electronic warfare equipment, software for the use of electronic warfare equipment
33	P	components for air guns
34	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
35	P	military helmets
36	P	software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography
37	T	inertial equipment
38	T	test equipment for test equipment for weapons sights, test equipment for weapons sights, goods treated for signature suppression for military use, technology for the use of test equipment for weapons sights
39	P	towed hydrophone arrays, hydrophones

United Arab Emirates cont.

40	P	military aircraft pressurised breathing equipment, components for ejector seats
41	P	components for military training aircraft
42	P	shotguns, components for shotguns, sporting rifles, components for sporting rifles, sporting pistols, components for sporting pistols, sporting gun ammunition, gun silencers, weapon sights, weapon cleaning equipment
43	P	components for missile scoring equipment
44	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
45	P	inertial equipment
46	P	equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, military camouflage nets, components for military camouflage nets, goods treated for signature suppression for military use, components for goods treated for signature suppression for military use, equipment for operation of military aircraft in confined areas, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of camouflage nets, technology for the use of components for camouflage nets, technology for the use of goods treated for signature suppression for military use, technology for the use of components for goods treated for signature suppression for military use, general military aircraft components, technology for the use of general military aircraft components
47	P	illuminators, components for pyrotechnic signalling devices, pyrotechnic signalling devices, smoke hand grenades, smoke canisters, smoke ammunition, thunderflashes, exploding simulation devices, training equipment for improvised explosive device disposal, training hand grenades, training hand grenades, training tear gas/irritant ammunition, tear gas/irritant ammunition, crowd control ammunition, cs hand grenades, stun grenades
48	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft
49	P	general naval vessel components, test equipment for general naval vessel components
50	P	chemical agent detection training equipment
51	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
52	T	towed hydrophone arrays
53	P	military distress signalling equipment, components for military distress signalling equipment
54	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
55	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
56	P	weapon night sights, components for weapon night sights, weapon sights, components for weapon sights, technology for the use of weapon night sights, technology for the use of weapon sights, gun laying equipment, components for gun laying equipment, technology for the use of gun laying equipment, military image intensifier equipment, components for military image intensifier equipment, technology for the use of military image intensifier equipment
57	P	components for combat aircraft, components for military training aircraft
58	T	military training aircraft, technology for the use of military training aircraft, aerial target equipment, components for aerial target equipment, training equipment for aerial target equipment, components for training equipment for aerial target equipment, technology

		for the use of aerial target equipment, technology for the use of components for aerial target equipment, technology for the use of equipment for the use of aerial target equipment, technology for the use of test equipment for aerial target equipment, technology for the use of training equipment for aerial target equipment, technology for the use of components for training equipment for aerial target equipment, technology for the use of equipment for the use of training equipment for aerial target equipment, technology for the use of test equipment for training equipment for aerial target equipment, equipment for the use of aerial target equipment, test equipment for aerial target equipment, components for equipment for the use of aerial target equipment, components for test equipment for aerial target equipment, equipment for the use of training equipment for aerial target equipment, test equipment for training equipment for aerial target equipment, components for equipment for the use of training equipment for aerial target equipment, components for test equipment for training equipment for aerial target equipment, weapons simulators, components for weapons simulators, training equipment for weapons simulators, components for training equipment for weapons simulators, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, components for electronic countermeasures equipment, training equipment for electronic countermeasures equipment, components for training equipment for electronic countermeasures equipment, equipment for the use of weapons simulators, test equipment for weapons simulators, components for equipment for the use of weapons simulators, components for test equipment for weapons simulators, equipment for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment, components for equipment for the use of electronic countermeasures equipment, components for test equipment for electronic countermeasures equipment, training equipment for equipment for the use of weapons simulators, components for training equipment for equipment for the use of weapons simulators, training equipment for equipment for the use of electronic countermeasures equipment, components for training equipment for equipment for the use of electronic countermeasures equipment, technology for the use of weapons simulators, technology for the use of components for weapons simulators, technology for the use of electronic countermeasures equipment, technology for the use of components for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of training equipment for weapons simulators, technology for the use of components for training equipment for weapons simulators, technology for the use of training equipment for electronic countermeasures equipment, technology for the use of equipment for the use of weapons simulators, technology for the use of test equipment for weapons simulators, technology for the use of equipment for the use of electronic countermeasures equipment, technology for the use of test equipment for electronic countermeasures equipment
59	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
60	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
61	P	weapon sights, components for weapon sights, technology for the use of weapon sights
62	P	components for military training aircraft, components for military aero-engines, test equipment for military training aircraft, components for test equipment for military training aircraft, equipment for the use of military training aircraft, military aircraft ground equipment, components for military transport aircraft, components for military aero-engines, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, components for combat aircraft, components for military aero-engines, test equipment for combat aircraft, components for test equipment for combat aircraft, equipment for the use of combat aircraft, components for military utility helicopters, equipment for the use of military utility helicopters, test equipment for military utility helicopters, components for test equipment for military utility helicopters, components for military utility aircraft, equipment for the use of military utility aircraft, test equipment

United Arab Emirates cont.

		for military utility aircraft, components for test equipment for military utility aircraft
63	T	inertial equipment, technology for the use of inertial equipment
64	P	components for military communications equipment
65	P	components for military electronic equipment, components for chemical agent detection equipment
66	P	NBC protective equipment, components for NBC protective equipment
67	P	components for armoured personnel carriers
68	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
69	P	components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military utility helicopters, components for military utility aircraft, components for military aero-engines
70	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines
71	P	munitions launching equipment, components for munitions launching equipment, equipment for the use of munitions launching equipment, technology for the use of munitions launching equipment, technology for the use of equipment for the use of munitions launching equipment
72	P	components for air to surface missile handling equipment, components for air to surface missiles
73	P	technology for the production of toxins
74	P	military flying helmets, military aircraft pressurised breathing equipment, aircrew protective masks, military communications equipment, components for military communications equipment, military electronic equipment, components for military electronic equipment
75	T	military devices for initiating explosives, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
76	P	components for aircraft cannons, test equipment for aircraft cannons, software for the use of aircraft cannons, software for the use of test equipment for aircraft cannons, software for the use of aircraft cannons maintenance equipment, software for the use of equipment for the use of aircraft cannons, technology for the use of aircraft cannons, technology for the use of test equipment for aircraft cannons, technology for the use of aircraft cannons maintenance equipment, technology for the use of equipment for the use of aircraft cannons, equipment for the use of aircraft cannons, aircraft cannons maintenance equipment
77	P	components for military improvised explosive device disposal equipment, military improvised explosive device disposal equipment
78	P	equipment employing cryptography
79	T	NBC respirators, NBC filters, NBC clothing, components for NBC respirators
80	P	software for the use of equipment employing cryptography, equipment employing

United Arab Emirates cont.

		cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
81	P	components for combat aircraft, components for combat helicopters, components for ejector seats, components for military aero-engines, components for military aircraft head-up displays, components for aircraft radars, components for ground based radars, components for combat aircraft simulators, components for combat helicopters simulators, components for military training aircraft, simulators, components for military transport aircraft simulators, components for military utility helicopters simulators, components for military cameras, components for military training aircraft, components for military transport aircraft, components for military utility helicopters, military aircraft ground, equipment, military parachutes, chaff equipment, components for chaff equipment, aircrew protective masks, anti-g/pressure suits, military flying helmets
82	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
83*	P	military, security and para-military goods and arms, ammunition and related material as specified by the 'Order' except the following: - goods specified by PL5001; landmines and all related goods; materials or explosive materials containing RDX or HMX; chemicals specified in the Chemical Weapons Convention (Schedule 1) and related technology; complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefor; software specially designed or modified for the use of complete rocket systems, some complete subsystems and Unmanned Airborne Vehicle systems, capable of at least a 300km range, and specially designed production facilities or production equipment therefore
84	P	missile control equipment, missile handling equipment, missile launching equipment, munitions launching equipment, weapon decoying equipment, bomb handling equipment, chaff, chaff equipment, decoy flares, guided missile decoy rounds, guided missile decoying equipment, inert decoys, missile jamming equipment, aiming devices, bombing computers, fire control equipment, weapon control systems, weapon day and night sights, weapon night sights, weapon sights, aircraft military communications equipment, general military aircraft components, military aircraft head-down displays, military aircraft head-up displays, military aircraft navigation equipment, components for combat aircraft, components for military training aircraft, military aero-engines, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft flight data recorders, equipment for operation of military aircraft in confined areas, military aircraft ground equipment, aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, military flying helmets, military parachutes, equipment for the use of military training aircraft, equipment for the use of combat aircraft, helmet mounted display equipment, military distress signalling equipment, military electronic equipment, military navigation equipment, test equipment for military training aircraft, test equipment for combat aircraft, military training aircraft training equipment, military combat aircraft training equipment, military cameras, military photographic equipment, military image intensifier equipment, night vision goggles, military infrared/thermal imaging equipment, military imaging radar equipment, imaging countermeasures equipment, imaging counter-countermeasures equipment, imaging countermeasure/counter-countermeasures equipment, castings for military training aircraft, castings for combat aircraft, forgings for military training aircraft, forgings for combat aircraft, unfinished products for military training aircraft, unfinished products for combat aircraft, signature suppression fittings for military use, signature suppression coatings for military use, signature suppression treatments for military use, military parametric technical databases, clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use, materials for reduced electromagnetic reflectivity for military use, military camouflage nets, military mobile repair shops and related equipment, military field generators, military containers, production equipment for military training aircraft, test equipment for military training aircraft, environmental test facilities for military training

United Arab Emirates cont.

		aircraft, production equipment for combat aircraft, test equipment for combat aircraft, environmental test facilities for combat aircraft, equipment for the use of military training aircraft, test equipment for military training aircraft, test models for military training aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, test models for combat aircraft, weapon sight mounts, technology for the production of military training aircraft, technology for the use of military training aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, software for the use of military training aircraft, software for the use of combat aircraft
85	T	military utility vehicles, armoured all wheel drive vehicles

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£296.5m
---	---------

Number of SIELs issued covering:	
Items on the Military List	725
Other items	59
Military List and other items	0
<b>Total number of SIELs issued</b>	<b>784</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

additives to explosive chemicals, aerial target equipment, air guns (2491), airborne electronic warfare equipment (T), aircraft military communications equipment (T), anthrax vaccines, anti-aircraft guns, anti-armour rocket launching equipment, anti-armour rockets, anti-riot shields, armoured fighting vehicles, armoured personnel carriers, armoured plate, assault rifles (12), automatic piloting systems for parachuted loads (T), body armour, castings for airborne targeting equipment, castings for military aero-engines, castings for military aircraft head-up displays, CBW munitions disposal equipment, chemical agent detection equipment, chemical agent detection equipment (T), chemical agent detection equipment training equipment, chemical agent detection equipment training equipment (T), combat aircraft, combat helicopters (T), combat shotguns (1) (T), combination rifle-shotguns (2), command communications control and intelligence software (T), components for aerial target equipment, components for air guns, components for air to surface missiles, components for airborne electronic warfare equipment (T), components for airborne radars, components for airborne radars (T), components for airborne surveillance equipment, components for airborne targeting equipment, components for aircraft carriers, components for aircraft head-up displays, components for aircraft machine guns, components for aircraft radars, components for anti-aircraft guns, components for anti-armour ammunition, components for anti-armour missiles, components for anti-ship missile launching equipment, components for anti-ship missiles, components for anti-tank weapons, components for armoured fighting vehicles, components for armoured personnel carriers, components for artillery rocket launching equipment, components for assault rifles, components for body armour, components for bomb simulators, components for bombs, components for CBW munitions disposal equipment, components for chaff equipment, components for chemical agent detection, components for chemical agent detection equipment (T), components for combat aircraft, components for combat aircraft (T), components for combat aircraft simulators, components for combat helicopters, components for combat helicopters (T), components for ejector seats, components for electronic warfare equipment, components for electronic warfare equipment simulators, components for equipment for the use of chemical agent detection equipment, components for fire control equipment, components for general purpose machine guns, components for ground based radars, components for ground based radars (T), components for guided missile decoy rounds, components for guided missile decoying equipment, components for gun mountings, components for

gyroscopes, components for heavy machine guns, components for helmet mounted display equipment, components for helmet mounted display equipment (T), components for improvised explosive device detection equipment, components for instrumentation cameras, components for large calibre artillery, components for large calibre artillery ammunition (T), components for laser range finders, components for machine pistols, components for military aero-engines, components for military aero-engines (T), components for military aircraft (T), components for military aircraft head-up displays, components for military aircraft head-up displays (T), components for military aircraft pressurised breathing equipment, components for military cameras, components for military cargo vehicles, components for military combat helicopters, components for military communications equipment, components for military communications equipment (T), components for military electronic equipment, components for military infrared/thermal imaging equipment, components for military infrared/thermal imaging equipment (T), components for military navigation equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military surveillance aircraft simulators, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for mine countermeasures equipment, components for mortars, components for munition fuzes, components for munitions launching equipment, components for naval engines, components for naval sonar equipment, components for NBC clothing, components for NBC filters, components for NBC respirators, components for optical target designator equipment (T), components for optical target surveillance equipment, components for periscopes, components for revolvers, components for rifles, components for semi-automatic pistols, components for shotguns, components for small arms ammunition, components for small calibre artillery, components for sporting gun ammunition, components for sporting rifles, components for sporting rifles (T), components for submachine guns, components for submarines, components for surface to air missile launching equipment, components for surface to surface missile launching equipment, components for surface to surface missiles, components for tanks, components for test equipment for airborne electronic warfare equipment, components for test equipment for anti-tank missiles, components for test equipment for military aero-engines, components for test models for the development of combat aircraft, components for torpedo launching equipment, components for training small arms ammunition, components for unmanned air vehicles, components for unmanned air vehicles (T), components for vintage guns, components for vintage military aircraft, components for weapon night sights, components for weapon simulators, computer analogue to digital equipment, constituents of propellants, constructions for ballistic protection of military systems, controlled atmosphere furnaces, deactivated firearms for training simulators, deactivated small calibre artillery, depleted uranium, devices for initiating explosives, digital computers, ejector seats, equipment employing cryptography, equipment for the development of laser range finders, equipment for the use of aircraft machine guns, equipment for the use of anti-aircraft guns, equipment for the use of CBW munitions disposal equipment, equipment for the use of combat helicopters (T), equipment for the use of general purpose machine guns, equipment for the use of heavy machine guns, equipment for the use of helmet mounted display equipment (T), equipment for the use of military communications equipment, equipment for the use of military improvised explosive device disposal equipment (T), equipment for the use of military navigation equipment, equipment for the use of mortars, equipment for the use of test equipment for components for airborne electronic warfare equipment (T), equipment for the use of test models for the development of combat aircraft, equipment for the use of weapon sights, explosives, extended temperature range integrated circuits, fire control equipment, flash suppressors, forgings for aircraft carriers, forgings for military aero-engines, forgings for naval engines, forgings for submarines, forgings for surface to surface missiles, general military aircraft components, general military aircraft components (T), general naval vessel components, general purpose machine guns (44), goods treated for signature suppression for military use, grenade launchers, grenade launching equipment, ground based radars (T), guided missile decoying equipment, gun mountings, helmet mounted display equipment (T), high speed pulse generators, human pathogens, imaging cameras (T), improvised explosive device detection equipment, improvised explosive device disposal equipment (T), improvised explosive device jamming equipment, inert ammunition, inert anti-personnel land mines, inert surface to air missiles (T), instrumentation cameras, large calibre artillery, laser range finders (T), machine pistols (1), mass spectrometers, materials containing natural uranium, materials containing thorium, military aero-engines, military aero-engines (T), military aircraft head-up displays (T), military aircraft navigation equipment, military cameras, military cargo vehicles, military communication military electronic equipment (T), military communications equipment, military communications equipment (T), military devices for initiating explosives, military electronic equipment, military electronic equipment (T), military firing sets (T), military flying helmets (T), military improvised explosive device disposal equipment (T), military infrared/thermal imaging equipment, military navigation equipment, military navigation equipment (T), military parachutes, military utility vehicles, military utility vehicles (T), mixtures

containing toxic chemical precursors, mortars, natural uranium, naval sonar equipment, NBC clothing, NBC filters, NBC protective equipment, NBC respirators, photomultiplier tubes, pistols (4), production equipment for large calibre artillery, products containing enriched uranium, products containing thorium, pyrotechnics/fuels and related substances, replica vintage guns (1), revolvers (3) (T), revolvers (21), rifles (30), rifles (1) (T), rocket launching equipment, semi-automatic pistols (84), semi-automatic pistols (1) (T), semiconductor wafers with epitaxial layers, shotguns (191), shotguns (42) (T), small arms ammunition, sniper rifles (2951), software for optimising equipment design, software for the development of decoy flares, software for the development of electronic warfare equipment, software for the development of guided missile decoying rounds, software for the development of military navigation equipment, software for the evaluation of weapon systems, software for the modelling of military operation scenarios, software for the modelling of military operation scenarios (T), software for the modelling of weapons systems, software for the simulation of military operation scenarios, software for the simulation of military operation scenarios (T), software for the simulation of weapons systems, software for the simulation of weapons systems (T), software for the use of air to air missiles, software for the use of airborne surveillance equipment (T), software for the use of chemical agent detection equipment, software for the use of components for airborne electronic warfare equipment (T), software for the use of electronic warfare equipment, software for the use of ground based radars, software for the use of helmet mounted display equipment (T), software for the use of military communications equipment (T), software for the use of military electronic equipment, software for the use of military navigation equipment, software for the use of naval auxiliary vessels, software for the use of naval communications equipment (T), software for the use of naval sonar equipment, software for the use of unmanned air vehicles (T), software to simulate the function of combat aircraft simulators, software to simulate the function of military training aircraft simulators, software to simulate the function of optical target surveillance equipment, sporting ammunition, sporting gun ammunition, sporting pistols (2), sporting rifles (298), sporting rifles (14) (T), submachine guns (74), surface to air missile control equipment (T), surface to air missile launching equipment (T), surface to air missile training equipment (T), tanks, tear gas/irritant ammunition, technology for the development of air to surface missiles (T), technology for the development of biological agent detection equipment, technology for the development of chemical agent detection equipment, technology for the development of decoy flares, technology for the development of electronic warfare equipment, technology for the development of littoral combat vessels, technology for the development of military electronic equipment, technology for the development of unmanned air vehicles, technology for the production of large calibre artillery, technology for the use of CBW munitions disposal equipment, technology for the use of chemical agent detection equipment, technology for the use of combat helicopters (T), technology for the use of electronic warfare equipment, technology for the use of military communications equipment, technology for the use of military pyrotechnic materials, technology for the use of sniper rifles, technology for the use of software for optimising equipment design, technology for the use of software for the development of electronic warfare equipment, technology for the use of software for the development of guided missile decoying rounds, technology for the use of software for the evaluation of weapon systems, technology for the use of software for the modelling of weapon systems, technology for the use of software for the simulation of weapon systems, technology for the use of software for the use of electronic warfare equipment, technology for the use of software to simulate the function of combat aircraft simulators, technology for the use of software to simulate the function of military training aircraft simulators, test equipment for airborne electronic warfare equipment (T), test equipment for airborne radars, test equipment for bomb launching equipment, test equipment for combat helicopters (T), test equipment for global positioning satellite receivers, test equipment for helmet mounted display equipment (T), test equipment for laser warning detectors (T), test equipment for military communications equipment, test equipment for military utility helicopters (T), test equipment for NBC respirators, test equipment for the development of components for combat aircraft (T), test models for the development of aircrew protective masks (T), test models for the development of combat aircraft, test models for the development of combat aircraft (T), test models for the development of military aero-engines, test models for the development of military aircraft pressurised breathing equipment (T), test models for the development of military flying helmets (T), test models for the development of military training aircraft, test models for the development of military training aircraft (T), toxins, training tear gas/irritant ammunition, triggered spark gaps, turrets, unfinished products for laser range finders, unfinished products for military aero-engines, unfinished products for revolvers, unfinished products for weapon day and night sights, unmanned air vehicle control equipment (T), unmanned air vehicle control/handling/launching equipment (T), unmanned air vehicle handling equipment (T), unmanned air vehicle launching equipment (T), unmanned air vehicles (T), vintage guns (5), vintage guns (1) (T), vintage military aircraft, vintage military vehicles, weapon cleaning equipment, weapon night sights, weapon sights, weapon sights (T)

**STANDARD INDIVIDUAL EXPORT LICENCES – INCORPORATION**

Total value of SIEL (Incorporation) applications for which a licence was issued	£8.0m
---	-------

Number of SIELs issued covering:	
Items on the Military List	42
Other items	2
Military List and other items	1
<b>Total number of SIELs issued</b>	<b>45</b>

The SIELs issued were granted for the following items (for permanent export except where the entry is followed by a (T), which indicates a Temporary Export):

components for airborne electronic warfare equipment, components for airborne surveillance equipment, components for combat aircraft, components for combat helicopters, components for fire control equipment, components for ground based radars, components for helmet mounted display equipment, components for military aircraft head-up displays, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for naval radars, components for naval sonar equipment, electronic components, equipment employing cryptography, equipment for the use of military aircraft ground equipment, general military aircraft components, laser range finders, military aircraft ground equipment, military aircraft head-up displays, military aircraft navigation equipment, sensor data recorders, software for the use of military aircraft navigation equipment, software for the use of naval sonar equipment, software for the use of sensor data recorders, technology for the production of military aircraft, technology for the use of military training aircraft, technology for the use of naval sonar equipment, technology for the use of sensor data recorders, test equipment for combat aircraft, weapon sights

Number of SITLs issued covering:	
Items on the Military List	8
Other items	0
Military List and other items	0
<b>Total number of SITLs issued</b>	<b>8</b>

sporting gun ammunition, vintage military aircraft

Number of SIELs refused involving Incorporation covering:	
Items on the Military List	2
Other items	0
Military List and other items	0
<b>Total number of SIELs refused</b>	<b>2</b>

Rating	ML6	ML13
No of SIELS covering items with this rating	1	1

**OPEN INDIVIDUAL EXPORT LICENCES**

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination (this also includes additional goods authorised during 2003 through the amendment of a pre 2003 licence).		
No.	Type	Goods Summary
1	P	components for military aero-engines, aircraft military communications equipment, general military aircraft components, components for combat aircraft, components for combat helicopters, components for military training aircraft, components for military transport aircraft, components for military utility helicopters, components for airborne navigation equipment, components for military aircraft flight data recorders

United States of America cont.

2	P	equipment employing cryptography, cryptographic software, software for the development of equipment employing cryptography, software for the development of cryptographic software, technology for the use of equipment using cryptography, technology for the production of equipment using cryptography, technology for the development of equipment using cryptography, technology for the use of cryptographic software, technology for the production of cryptographic software, technology for the development of cryptographic software
3	P	aircraft military communications equipment, components for aircraft military communications equipment, military communications equipment, components for military communications equipment, components for test equipment for military communications equipment, ground vehicle military communications equipment, components for ground vehicle military communications equipment, military aircraft navigation equipment, components for military aircraft navigation equipment, naval navigation equipment, components for naval navigation equipment, test equipment for military aircraft navigation equipment, components for test equipment for military aircraft navigation equipment, test equipment for naval navigation equipment, components for test equipment for naval navigation equipment, components for military transport aircraft, military electronic equipment, components for military electronic equipment, military navigation equipment, components for military navigation equipment, airborne electronic warfare equipment, components for airborne electronic warfare equipment, electronic warfare equipment, components for electronic warfare equipment, naval electronic warfare equipment, components for naval electronic warfare equipment, general military aircraft components, aircraft military communications equipment
4	P	sporting rifles, shotguns, sporting gun ammunition
5	P	components for military utility helicopters
6	P	components for combat aircraft, components for military training aircraft, components for combat helicopters
7	P	optical target tracking equipment, components for optical target tracking equipment
8	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment, software for the use of mine countermeasures equipment, technology for the use of mine countermeasures equipment
9	P	components for military aero-engines, unfinished products for military aero-engines
10	P	components for combat aircraft, technology for the use of components for combat aircraft, components for military training aircraft, technology for the use of components for military training aircraft
11	P	NBC respirators, components for NBC respirators, NBC filters
12	P	air guns, weapon sights, components for air guns
13	P	software for the simulation of military operation scenarios, software for the modelling of military operation scenarios
14	P	military aircraft pressurised breathing equipment, components for ejector seats
15	T	military aircraft navigation equipment, military aircraft head-down displays, general military aircraft components, software for the use of military aircraft navigation equipment, software for the use of military aircraft head-down displays, software for the use of general military aircraft components, technology for the use of military aircraft navigation equipment, technology for the use of military aircraft head-down displays, technology for the use of general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for military aircraft head-down displays, test equipment for general military aircraft components
16	P	military firing sets, components for military firing sets, military electronic equipment, equipment for the use of military firing sets, test equipment for military firing sets
17	P	military sonar detection equipment, mine hunting equipment, military communications equipment
18	T	components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, military aircraft ground equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for

United States of America cont.

		military transport aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft
19	P	components for military aero-engines, equipment for the use of military aero-engines, technology for the use of military aero-engines
20	P	components for unmanned air vehicles, chemical agent detection equipment, components for chemical agent detection equipment, software for the use of unmanned air vehicles, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, technology for the use of unmanned air vehicles, technology for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, test equipment for unmanned air vehicles, test equipment for chemical agent detection equipment, test equipment for test equipment for chemical agent detection equipment, equipment for the use of unmanned air vehicles, equipment for the use of chemical agent detection equipment, equipment for the use of test equipment for chemical agent detection equipment
21	P	constructions for ballistic protection of military systems
22	P	naval radars, components for naval radars, test equipment for naval radars, technology for the use of naval radars, technology for the use of components for naval radars, technology for the use of test equipment for naval radars, naval navigation equipment, components for naval navigation equipment, test equipment for naval navigation equipment, test equipment for components for naval navigation equipment, technology for the use of naval navigation equipment, technology for the use of components for naval navigation equipment, technology for the use of test equipment for naval navigation equipment, technology for the use of test equipment for components for naval navigation equipment
23	P	components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for airborne radars, components for aircraft radars, components for ground based radars, components for naval radars, components for ground vehicle military communications equipment, components for naval communications equipment, components for naval electronic warfare equipment, components for aircraft military communications equipment, components for airborne electronic warfare equipment, components for electronic warfare equipment, components for military communications equipment
24	T	towed hydrophone arrays
25	P	torpedoes decoying equipment, components for torpedoes decoying equipment, military acoustic detection equipment, components for military acoustic detection equipment, military communications equipment, components for military communications equipment, military sonar detection equipment, components for military sonar detection equipment
26	P	military electronic equipment, general military aircraft components, general military vehicle components, test equipment for military electronic equipment, test equipment for general military vehicle components, test equipment for general military aircraft components, technology for military electronic equipment, technology for the use of general military aircraft components, technology for the use of general military vehicle components
27	P	components for combat aircraft, equipment for the use of components for combat aircraft, components for equipment for the use of components for combat aircraft, software for the use of components for combat aircraft, software for the use of equipment for the use of components for combat aircraft, technology for the use of components for combat aircraft, technology for the use of equipment for the use of components for combat aircraft
28	P	command communications control and intelligence software, software for the use of command communications control and intelligence equipment, test equipment for command communications control and intelligence equipment, command communications control and intelligence equipment, software for the simulation of military operation scenarios, command communications control and intelligence equipment simulators, software for the use of command communications control and intelligence equipment simulators
29	P	components for combat aircraft, components for military training aircraft, technology for

United States of America cont.

		the use of components for combat aircraft, technology for the use of components for military training aircraft
30	P	components for surface to air missile control/launching equipment, equipment for the use of surface to air missile control/launching equipment, test equipment for surface to air missile control/launching equipment, software for the use of surface to air missile control/launching equipment, software for the development of surface to air missile control/launching equipment, technology for the use of surface to air missile control/launching equipment
31	P	chemical agent detection training equipment
32	P	sporting rifles, shotguns, combination rifle-shotguns, components for sporting rifles, sporting gun ammunition, weapon sights
33	P	technology for the production of uranium isotope separation equipment
34	T	imaging cameras
35	P	military transport aircraft, components for military transport aircraft, military aircraft ground equipment, technology for the use of military transport aircraft
36	P	air guns, components for air guns, gun mountings, equipment for the use of air guns
37	P	components for ground based radars
38	P	software for the development of equipment employing cryptography, technology for the use of equipment employing cryptography
39	P	body armour, components for body armour, bomb suits, armoured plate, ballistic shields, components for ballistic shields, military helmets
40	P	military aircraft pressurised breathing equipment, equipment for the use of military aircraft pressurised breathing equipment, test equipment for military aircraft pressurised breathing equipment, technology for the use of military aircraft pressurised breathing equipment
41	P	components for aircraft cannons, test equipment for aircraft cannons, software for the use of aircraft cannons, software for the use of test equipment for aircraft cannons, software for the use of aircraft cannons maintenance equipment, software for the use of equipment for the use of aircraft cannons, technology for the use of aircraft cannons, technology for the use of test equipment for aircraft cannons, technology for the use of aircraft cannons maintenance equipment, technology for the use of equipment for the use of aircraft cannons, equipment for the use of aircraft cannons, aircraft cannons maintenance equipment
42	P	military aircraft ground equipment, components for air to air missiles, components for anti-armour missiles, components for weapon control systems
43	P	components for anti-armour missiles, technology for the production of anti-armour missiles
44	T	artillery computers, mortar training equipment, small calibre artillery training equipment, large calibre artillery training equipment
45	T	military devices for initiating explosives, military improvised explosive device jamming equipment, components for military improvised explosive device jamming equipment, components for military devices for initiating explosives, equipment for the use of military devices for initiating explosives, equipment for the use of military improvised explosive device jamming equipment
46	P	components for sporting rifles
47	P	components for combat aircraft, components for combat helicopters, components for military search & rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search & rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of components for military aero-engines

United States of America cont.

48	P	shotguns, sporting rifles, sniper rifles, rifles, unfinished products for shotguns, unfinished products for rifles, unfinished products for sniper rifles, unfinished products for sporting rifles, components for shotguns
49	P	air to air missiles handling equipment, test equipment for air to air missiles, components for test equipment for air to air missiles, air to air missiles training equipment, technology for the use of air to air missiles, technology for the use of inert air to air missiles, technology for the use of air to air missiles handling equipment, technology for the use of air to air missiles test equipment, technology for the use of air to air missiles training equipment, software for the use of air to air missiles, software for the modelling of weapon systems, software for the development of weapon system software, air to air missiles, components for air to air missiles, inert air to air missiles, components for inert air to air missiles
50	P	chemical agent detection equipment, components for chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment, software for the use of chemical agent detection equipment, software for the use of test equipment for chemical agent detection equipment, software for the use of equipment for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment, technology for the use of equipment for the use of chemical agent detection equipment, technology for the use of test equipment for chemical agent detection equipment, military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment, test equipment for military electronic equipment, software for the use of military electronic equipment, software for the use of equipment for the use of military electronic equipment, software for the use of test equipment for military electronic equipment, technology for the use of military electronic equipment, technology for the use of equipment for the use of military electronic equipment, technology for the use of test equipment for military electronic equipment
51	P	components for military transport aircraft, components for military aero-engines, test equipment for military transport aircraft, components for test equipment for military transport aircraft, equipment for the use of military transport aircraft, military aircraft ground equipment, components for combat helicopters, test equipment for combat helicopters, components for test equipment for combat helicopters, equipment for the use of combat helicopters, components for combat aircraft, test equipment for combat aircraft, components for test equipment for combat aircraft, equipment for the use of combat aircraft, components for military surveillance aircraft, test equipment for military surveillance aircraft, components for test equipment for military surveillance aircraft, equipment for the use of military surveillance aircraft, components for tanker aircraft, test equipment for tanker aircraft, components for test equipment for tanker aircraft, equipment for the use of tanker aircraft, test equipment for military utility helicopters, components for test equipment for military utility helicopters, equipment for the use of military utility helicopters, components for military utility helicopters
52	P	military aircraft head-up displays, general military aircraft components, military aircraft navigation equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for combat helicopters, helmet mounted display equipment, components for helmet mounted display equipment, military video recording equipment, components for military video recording equipment, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, night vision goggles, components for night vision goggles, test equipment for military aircraft head-up displays, test equipment for general military aircraft components, test equipment for military aircraft navigation equipment, test equipment for combat aircraft, test equipment for combat helicopters, test equipment for helmet mounted display equipment, test equipment for military video recording equipment, test equipment for military search and rescue aircraft, test equipment for military surveillance aircraft, test equipment for military training aircraft, test equipment for military transport aircraft, test equipment for military utility aircraft, test equipment for military utility helicopters, test equipment for tanker aircraft, test equipment for night vision goggles, test equipment for military aircraft ground equipment

United States of America cont.

53	P	components for large calibre artillery
54	P	components for military aero-engines
55	P	goods as specified by ML1a, ML2a and PL5018 of the EG(C)O 1994 as amended, components for goods as specified by ML1a, ML2a and PL5018 of the EG(C)O 1994 as amended, goods as specified by ML3 and PL5021 of the EG(C)O 1994 as amended, weapon sights, components for weapon sights, telescopic sights
56	P	naval communications equipment, components for naval communications equipment, technology for the use of naval communications equipment, test equipment for naval communications equipment
57	P	weapon fire simulation equipment, components for weapon fire simulation equipment, software for the use of weapon fire simulation equipment, equipment for the use of weapon fire simulation equipment, software for the use of deactivated weapon simulation equipment, deactivated weapons for training simulators, laser range finders, training mortar bombs, deactivated firearms for training simulators
58	P	air guns, components for air guns, weapon sights
59	P	components for military infrared/thermal imaging equipment
60	T	assault rifles, pistols, revolvers, semi-automatic pistols, submachine guns, rifles, sniper rifles, sporting rifles, general purpose machine guns, heavy machine guns, shotguns, combat shotguns, mortars, weapon sights
61	P	components for missile scoring equipment
62	P	production equipment for components for military aero-engines, technology for the production of components for military aero-engines
63	T	military parachutes
64	P	equipment employing cryptography
65	P	ground vehicle military communications equipment
66	P	devices for initiating explosives, explosives, linear cutting explosive charges
67	P	components for military infrared/thermal imaging equipment, components for air to air missiles, components for combat aircraft
68	P	training small arms ammunition, components for assault rifles, components for general purpose machine guns, components for machine pistols, components for pistols, components for rifles, components for semi-automatic pistols, components for submachine guns, assault rifles, general purpose machine guns, machine pistols, pistols, rifles, semi-automatic pistols, submachine guns
69	P	components for combat aircraft, technology for the use of combat aircraft, components for military training aircraft, technology for the use of military training aircraft, components for military transport aircraft, technology for the use of military transport aircraft
70	P	naval radars, components for naval radars, technology for the use of naval radars, technology for the use of test equipment for naval radars, test equipment for naval radars
71	P	software for the use of helmet mounted display equipment, software for the use of aircraft radars, aircraft radars, components for aircraft radars, helmet mounted display equipment, components for helmet mounted display equipment, technology for the use of aircraft radars, technology for the use of components for aircraft radars
72	P	remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems, remote ground sensor systems, components for remote ground sensor systems, equipment for the use of remote ground sensor systems, military electronic equipment, components for military electronic equipment, software for the use of remote ground sensor systems, technology for the use of remote ground sensor systems, technology for the use of equipment for the use of remote ground sensor systems, technology for the use of military electronic equipment, technology for the use of software for the use of remote ground sensor systems
73	P	forgings for military aero-engines, forgings for combat aircraft, unfinished products for military aero-engines, unfinished products for combat aircraft

United States of America cont.

74	P	components for "rocket" launching equipment, production equipment for components for rocket launching equipment
75	P	military electronic equipment, components for military electronic equipment
76	P	air guns
77	P	weapon sights
78	P	sporting gun ammunition
79	P	air to air missiles handling equipment, test equipment for air to air missiles, components for test equipment for air to air missiles, air to air missiles training equipment, technology for the use of air to air missiles, technology for the use of inert air to air missiles, technology for the use of air to air missiles handling equipment, technology for the use of air to air missiles test equipment, technology for the use of air to air missiles training equipment, software for the use of air to air missiles, software for the modelling of weapon systems, software for the development of weapon system software, air to air missiles, components for air to air missiles, inert air to air missiles, components for inert air to air missiles
80	P	components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, general military aircraft components, technology for the use of components for combat aircraft, technology for the use of components for combat helicopters, technology for the use of components for military search and rescue aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military training aircraft, technology for the use of components for military transport aircraft, technology for the use of components for military utility aircraft, technology for the use of components for military utility helicopters, technology for the use of components for tanker aircraft, technology for the use of general military aircraft components
81	P	sporting rifles, components for sporting rifles, shotguns, components for shotguns
82	P	components for military aero-engines, general military aircraft components, components for naval engines
83	T	components for military infrared/thermal imaging equipment
84	P	command communications control and intelligence software
85	P	components for military aero-engines
86	P	weapon sights, components for weapon sights, telescopic sights, equipment for the use of weapon sights, technology for the production of weapon sights, technology for the use of weapon sights, technology for the production of telescopic sights, technology for the use of telescopic sights, technology for the production of equipment for the use of weapon sights, technology for the use of equipment for the use of weapon sights
87	P	components for military electronic equipment, components for military communications equipment, components for air to air missiles, components for air to surface missiles, components for anti-armour missiles, components for anti-radiation missiles, components for anti-ship missiles, components for surface to air missiles, components for surface to surface missiles, components for aircraft military communications equipment, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for naval communications equipment, components for naval electronic equipment, components for naval navigation equipment, components for optical target tracking equipment, components for optical target surveillance equipment, components for optical target acquisition equipment, components for optical target designator equipment
88	P	military utility vehicles, technology for the use of military utility vehicles
89	P	components for military utility vehicles, technology for the use of military utility vehicles
90	P	general military aircraft components, general military vehicle components
91	P	components for military training aircraft, components for combat aircraft
92	P	sporting gun ammunition
93	P	aircraft military communications equipment, components for aircraft military communications equipment, test equipment for aircraft military communications equipment, test equipment for components for aircraft military communications

United States of America cont.

		equipment, technology for the use of aircraft military communications equipment, technology for the use of components for aircraft military communications equipment, technology for the use of test equipment for aircraft military communications equipment, technology for the use of test equipment for components for aircraft military communications equipment
94	P	software for the simulation of weapon systems
95	P	components for military aero-engines, components for military transport aircraft
96	P	sporting rifles, shotguns, sporting gun ammunition
97	P	components for military aero-engines
98	P	components for military electronic equipment
99	P	technology for the development of goods specified by ML10d of the EG(C)O 1994 as amended, technology for the use of goods specified by ML10d of the EG(C)O 1994 as amended, technology for the use of military navigation equipment, technology for the use of military communications equipment, technology for the use of military aircraft navigation equipment, technology for the use of aircraft military communications equipment, technology for the use of military cameras, technology for the use of aircraft radars, technology for the use of ground based radars
100	P	components for air guns
101	P	shotguns
102	P	general military aircraft components, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military surveillance aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military aero-engines
103	P	armoured all wheel drive vehicles, technology for the use of armoured all wheel drive vehicles
104	P	non-military explosives/propellants
105	P	military distress signalling equipment, components for military distress signalling equipment
106	P	components for combat helicopters, components for military utility helicopters, technology for the production of combat helicopters, technology for the production of military utility helicopters, equipment for the use of combat helicopters, equipment for the use of military utility helicopters
107	P	technology for the use of bombs launching equipment, equipment for the use of bombs launching equipment, bombs launching equipment, components for bombs launching equipment, components for military infrared/thermal imaging equipment, technology for the use of components for military infrared/thermal imaging equipment, equipment for the use of components for military infrared/thermal imaging equipment, general military aircraft components, technology for the use of general military aircraft components, military electronic equipment, components for military electronic equipment, technology for the use of military electronic equipment
108	P	technology for the development of military aero-engines, technology for the use of military aero-engines, military aero-engines, components for military aero-engines, equipment for the use of military aero-engines, military aircraft ground equipment
109	P	shotguns, vintage guns
110	P	remote ground sensor systems, components for remote ground sensor systems, technology for the use of remote ground sensor systems, test equipment for remote ground sensor systems
111	P	NBC clothing
112	P	test equipment for airborne electronic warfare equipment, components for test equipment for airborne electronic warfare equipment, software for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for airborne electronic warfare equipment
113	P	unmanned air vehicles, components for unmanned air vehicles, unmanned air vehicle control/handling/launching equipment
114	P	flaps and passenger doors, specially designed or modified for military use, for use on the U-125A search and rescue aircraft
115	P	military communications equipment, components for military communications equipment, technology for the use of military communications equipment

United States of America cont.

116	P	components for military utility helicopters, equipment for the use of components for military surveillance aircraft, equipment for the use of components for military utility helicopters, equipment for the use of components for armoured fighting vehicles equipment for the use of components for combat aircraft, technology for the use of components for military surveillance aircraft, technology for the use of components for military utility helicopters, technology for the use of components for armoured fighting vehicles, technology for the use of components for combat aircraft, technology for the use of equipment for the use of components for military surveillance aircraft, technology for the use of equipment for the use of components for military utility helicopters, technology for the use of equipment for the use of components for armoured fighting vehicles, technology for the use of equipment for the use of components for combat aircraft
117	T	military communications equipment, software for the use of military communications equipment
118	P	shotguns, sporting rifles, revolvers, semi-automatic pistols, air guns
119	T	components for military transport aircraft
120	P	technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of tanker aircraft, technology for the use of airborne refuelling equipment
121	P	military improvised explosive device disposal equipment, explosive ordnance disposal equipment, linear cutting explosive charges, demolition charges
122	P	military infrared/thermal imaging equipment
123	T	military utility vehicles, armoured all wheel drive vehicles
124	P	missile control equipment, missile handling equipment, missile launching equipment, munitions launching equipment, weapon decoying equipment, bomb handling equipment, chaff, chaff equipment, decoy flares, guided missile decoy rounds, guided missile decoying equipment, inert decoys, missile jamming equipment, aiming devices, bombing computers, fire control equipment, weapon control systems, weapon day and night sights, weapon night sights, weapon sights, aircraft military communications equipment, general military aircraft components, military aircraft head-down displays, military aircraft head-up displays, military aircraft navigation equipment, components for combat aircraft, components for military training aircraft, military aero-engines, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft flight data recorders, equipment for operation of military aircraft in confined areas, military aircraft ground equipment, aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, military flying helmets, military parachutes, equipment for the use of military training aircraft, equipment for the use of combat aircraft, helmet mounted display equipment, military distress signalling equipment, military electronic equipment, military navigation equipment, test equipment for military training aircraft, test equipment for combat aircraft, military training aircraft training equipment, military combat aircraft training equipment, military cameras, military photographic equipment, military image intensifier equipment, night vision goggles, military infrared/thermal imaging equipment, military imaging radar equipment, imaging countermeasures equipment, imaging counter-countermeasures equipment, imaging countermeasure/counter-countermeasures equipment, castings for military training aircraft, castings for combat aircraft, forgings for military training aircraft, forgings for combat aircraft, unfinished products for military training aircraft, unfinished products for combat aircraft, signature suppression fittings for military use, signature suppression coatings for military use, signature suppression treatments for military use, military parametric technical databases, clothing treated for signature suppression for military use, cloth treated for signature suppression for military use, goods treated for signature suppression for military use, materials for reduced electromagnetic reflectivity for military use, military camouflage nets, military mobile repair shops and related equipment, military field generators, military containers, production equipment for military training aircraft, test equipment for military training aircraft, environmental test facilities for military training

United States of America cont.

		aircraft, production equipment for combat aircraft, test equipment for combat aircraft, environmental test facilities for combat aircraft, equipment for the use of military training aircraft, test equipment for military training aircraft, test models for military training aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, test models for combat aircraft, weapon sight mounts, technology for the production of military training aircraft, technology for the use of military training aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, software for the use of military training aircraft, software for the use of combat aircraft
125	P	general military aircraft components, components for exploding grenade ammunition, components for crowd control ammunition, components for tear gas/irritant ammunition, components for smoke ammunition, components for training exploding grenade ammunition, components for smoke canisters, components for signal flares, components for air to surface missiles, components for decoy flares
126	P	components for submarines, devices containing military pyrotechnic materials
127	P	components for military electronic equipment, components for chemical agent detection equipment
128	P	sporting rifles, sporting pistols, revolvers, components for sporting rifles, components for sporting pistols, components for revolvers, weapon sights, shotguns, components for shotguns, weapon sight mounts
129	P	shotguns, sporting rifles, revolvers, components for sporting rifles, components for revolvers, revolvers, replica vintage guns, sporting gun ammunition, components for shotguns
130	P	munition fuzes, exploding simulation devices, anti-riot guns, crowd control ammunition, tear gas/irritant ammunition, CS hand grenades, stun grenades, training hand grenades, demolition charges, depth charges, explosive ordnance disposal equipment, illuminators, signal flares, devices containing military pyrotechnic materials, signal hand grenades, smoke ammunition, smoke hand grenades, smoke canisters, exploding simulation devices, tear gas/riot control agents, thunderflashes
131	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography
132	P	components for combat aircraft, components for military training aircraft, components for military utility helicopters, components for patrol craft
133	T	components for military communications equipment, military communications equipment
134	P	military communications equipment, components for military communications equipment, equipment for the use of military communications equipment, technology for the use of military communications equipment
135	P	components for submarines, technology for the use of components for frigates, technology for the use of general naval vessel components, technology for the use of components for aircraft carriers, technology for the use of components for submarines, technology for the use of equipment for operation of military aircraft in confined areas, technology for the use of components for mine sweepers
136	P	military communications equipment, components for military communications equipment, test equipment for military communications equipment, equipment for the use of military communications equipment, software for the use of military communications equipment, technology for the use of military communications equipment, technology for the use of test equipment for military communications equipment
137	P	software for the use of equipment employing cryptography, equipment employing cryptography, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
138	P	devices for initiating explosives
139	P	sniper rifles, sporting rifles, components for sporting rifles
140	P	chemical agent detection equipment, test equipment for chemical agent detection equipment
141	P	test equipment for test equipment for weapon sights, test equipment for weapon sights, goods treated for signature suppression for military use, technology for the use of weapon sights
142	P	sporting rifles, shotguns, components for sporting rifles, weapon sights, air guns

United States of America cont.

143	T	technology for the use of artillery fire location equipment, technology for the use of military communications equipment, equipment for the use of artillery fire location equipment, military communications equipment, artillery fire location equipment, equipment for the use of artillery fire location equipment
144	P	improvised explosive device disposal equipment
145	P	components for combat aircraft, components for ejector seats, military aircraft ground equipment, components for military aero-engines
146	P	components for NBC respirators, production equipment for components for NBC respirators
147	P	sporting rifles, components for sporting rifles, gun mountings, weapon sights, sporting gun ammunition
148	P	components for military aero-engines, technology for the use of combat aircraft, equipment for the use of combat aircraft, technology for the use of military aero-engines, equipment for the use of military aero-engines
149	P	military helmets, ballistic shields, bomb suits, body armour, components for body armour
150	P	animal pathogens
151	P	components for military electronic equipment
152	P	components for military transport aircraft, military aircraft ground equipment, equipment for the use of military transport aircraft
153	P	general military aircraft components, components for military aircraft, head-down displays, components for military aircraft head-up displays, components for combat aircraft, components for combat helicopters, components for military search and rescue aircraft, components for military training aircraft, components for military transport aircraft, components for military utility aircraft, components for military utility helicopters, components for tanker aircraft, components for military surveillance aircraft
154	P	components for military surveillance aircraft, test equipment for military surveillance aircraft, equipment for the use of military surveillance aircraft
155	P	components for air defence systems, military utility vehicles, test equipment for air defence systems, air defence systems training equipment, equipment for "military goods"
156	P	air guns, components for air guns, weapon sights
157	P	test models for the development of combat aircraft, components for test models for the development of combat aircraft, equipment for the use of test models for the development of combat aircraft, test equipment for the development of combat aircraft
158	P	gun mountings, components for gun mountings
159	P	military electronic equipment, components for military electronic equipment, components for fire control equipment, components for naval navigation equipment
160	P	body armour, components for body armour, military helmets
161	P	software for the use of naval sonar equipment, technology for the use of naval sonar equipment
162	P	aircraft cannons, components for aircraft cannons, inert air to air missiles, inert bombs, inert air to surface missiles, components for inert bombs, components for inert air to surface missiles, combat aircraft, components for combat aircraft, military aircraft ground equipment, airborne refuelling equipment, anti-g/pressure suits, military flying helmets, test equipment for combat aircraft, test equipment for components for combat aircraft, software for the use of combat aircraft, technology for the use of combat aircraft, test models for the development of combat aircraft, test models for the development of components for combat aircraft, military aero-engines, components for military aero-engines, fire control equipment, weapon control systems, airborne radars, aircraft radars, range-finding equipment, attack alerting/warning equipment, electronic countermeasures equipment, production equipment for combat aircraft, test equipment for combat aircraft, software for the development of combat aircraft, software for the production of combat aircraft, software for the use of combat aircraft, production technology for combat aircraft, technology for the development of combat aircraft, technology for the production of combat aircraft, technology for the use of combat aircraft, equipment for the development of combat aircraft, equipment for the use of combat aircraft, test equipment for combat aircraft, castings for combat aircraft, forgings for combat aircraft, unfinished products for combat aircraft, imaging countermeasures equipment, military infrared/thermal imaging equipment, aircraft military communications equipment, combat aircraft simulators, combat aircraft training

United States of America cont.

		equipment, ejector seat, components for ejector seats, airborne electronic warfare equipment, airborne refuelling equipment, airborne targeting equipment, airborne surveillance equipment, airborne navigation equipment, military aircraft pressurised breathing equipment, parachutes, military aircraft ground equipment

# Annex A

## Part I and Part III (the Military List) of Schedule 1 to the Export of Goods (Control) Order 1994

---

### PART I

#### GROUP 2 EXPLOSIVE RELATED GOODS

1. Equipment or devices, other than those specified in Part III of this Schedule or in entry 1A005, 3A229 or 3A232 in Annex I to Council Decision 94/942/CFSP, for detection of or use with explosives or for dealing with or protecting against improvised explosive devices (as defined in Part III of this Schedule), as follows, and specially designed components therefor:
  - (a) electronic equipment capable of detecting concealed explosives  
except:  
television or X-ray inspection equipment;
  - (b) electronic jamming equipment specially designed to prevent the detonation by radio remote control of improvised explosive devices;
  - (c) equipment and devices specially designed to initiate explosions by electrical or non-electrical means, including firing sets, detonators, igniters and detonating cord;  
except:  
equipment and devices specially designed for a specific commercial use consisting of the actuation or operation by explosive means of other equipment or devices the function of which is not the initiation or creation of explosions;  
and:  
pressure controlled equipment specially designed for down-hole oilfield equipment applications and which are incapable of use at atmospheric pressure.
  - (d) equipment and devices, including shields and helmets, specially designed for the disposal of improvised explosive devices;  
except:  
bomb blankets and containers designed for holding improvised explosive devices or objects suspected of being such devices.
2. Linear cutting explosive charges.
3. Technology required for the use of the above (the words "technology", "required" and "use" being as defined in Part III of this Schedule).

Note: This is the text of Part III of schedule 1 to the Export of Goods (Control) Order 1994 as at 1 January 2003. It was subsequently amended by the Export of Goods (Control) (Amendment) Order 2003 (S.I. 2003/1938) which changed the text of ML1, ML2, ML6, PL5031, ML7, ML8, ML9, ML10, ML14, ML17, ML18, and ML22. In addition, national controls under entries PL5002, PL5018, PL5021, PL5033 and PL5034 were deleted and the items controlled under those entries incorporated elsewhere within the Military List.

### **PART III**

#### **MILITARY, SECURITY AND PARA-MILITARY GOODS AND ARMS, AMMUNITION AND RELATED MATERIAL**

##### **General Technology Note**

1. Subject to paragraph 2 below, the export of "technology" specified in this Part of this Schedule is prohibited by Article 2 of this Order if it is capable of being "required" for the "development", "production" or "use" of "goods" specified in this Part of this Schedule, whether or not the "technology" being exported in the particular case is intended to be applied in respect of such goods.
2. The prohibition in Article 2 does not apply to that "technology" which is the minimum necessary for the installation, operation, maintenance (checking) and repair of "goods" not specified in this Part of this Schedule, to "technology" "in the public domain", to "basic scientific research" or to the minimum necessary information for patent applications.

##### **Definitions**

In this Part:

"adapted for use in war" means any modification or selection (such as altering purity, shelf life, virulence, dissemination characteristics, or resistance to ultra violet (UV) radiation) designed to increase the effectiveness in producing casualties in humans or animals, degrading equipment or damaging crops or the environment;

"additives" means substances used in explosive formulations to improve their properties;

"anti-idiotypic antibodies" means antibodies which bind to the specific antigen binding sites of other antibodies;

"basic scientific research" means experimental or theoretical work undertaken principally to acquire new knowledge of the fundamental principles of phenomena or observable facts, not primarily directed towards a specific practical aim or objective;

"biocatalyst" means enzymes for special chemical or biochemical reactions and other biological compounds which bind to and accelerate the degradation of chemical warfare (CW) agents;

"biopolymer" means the following biological macromolecules:

- a. enzymes for specific chemical or biochemical reactions;
- b. antibodies, monoclonal, polyclonal or "anti-idiotypic";
- c. specially designed or specially processed "receptors";

"critical temperature" (sometimes referred to as the transition temperature) of a specific superconductive material means the temperature at which the specific material loses all resistance to the flow of direct electrical current;

"development" is related to all stages prior to serial production, such as: design, design research, design analyses, design concepts, assembly and testing of prototypes, pilot production schemes, design data, process of transforming design data into a product, configuration design, integration design, layouts;

"end-effectors" means grippers, active tooling units (that is, devices for applying motive power,

process energy or sensing to the workpiece) and any other tooling that is attached to the baseplate on the end of a "robot" manipulator arm;

"energetic materials" means substances or mixtures that react chemically to release energy required for their intended application; "explosives", "pyrotechnics" and "propellants" are subclasses of energetic materials";

"explosives" means solid, liquid or gaseous substances or mixtures of substances which, in their application as primary, booster, or main charges in warheads, demolition and other applications, are required to detonate;

"expression vectors" means carriers (e.g., plasmid or virus) used to introduce genetic material into host cells;

"first generation image intensifier tubes" mean electrostatically focused tubes, employing input and output fibre optic or glass face plates, multi-alkali photocathodes (S-20 or S-25), but not microchannel plate amplifiers;

"improvised explosive devices" means devices fabricated or intended to be placed in an improvised manner incorporating destructive, lethal, noxious, pyrotechnic or incendiary chemicals, designed to destroy, disfigure or harass; they may incorporate military stores, but are normally devised from non-military components;

"in the public domain" means available without restriction upon further dissemination (no account being taken of restrictions arising solely from copyright);

"laser" means an assembly of components which produce both spatially and temporally coherent light which is amplified by stimulated emission of radiation;

"microprogramme" means a sequence of elementary instructions, maintained in a special storage, the execution of which is initiated by the introduction of a reference instruction into an instruction register;

"monoclonal antibodies" means proteins which bind to one antigenic site and are produced by a single clone of cells;

"nuclear reactor" means the items within or attached directly to the reactor vessel, the equipment which controls the level of power in the core, and the components which normally contain, come into direct contact with or control the primary coolant of the reactor core;

"polyclonal antibodies" means a mixture of proteins which bind to the specific antigen and are produced by more than one clone of cells;

"precursors" means speciality chemicals used in the manufacture of "explosives";

"production" means all production stages, such as: product engineering, manufacture, integration, assembly (mounting), inspection, testing, quality assurance;

"programme" means a sequence of instructions to carry out a process in, or convertible into, a form executable by an electronic computer;

"propellants" means substances or mixtures that react chemically to produce large volumes of hot gases at controlled rates to perform mechanical work;

"pyrotechnic(s)" means mixtures of solid or liquid fuels or oxidizers which, when ignited, undergo an energetic chemical reaction at a controlled rate intended to produce specific time

delays, or quantities of heat, noise, smoke, visible light or infrared radiation; pyrophorics are a subclass of pyrotechnics, which contain no oxidizers but ignite spontaneously on contact with air;

"receptors" means biological macromolecular structure capable of binding ligands, the binding of which affects physiological functions;

"required" as applied to "technology", refers to only that portion of "technology" which is peculiarly responsible for achieving or exceeding the controlled performance levels, characteristics or functions. Such "required" "technology" may be shared by different "goods";

"riot control agents" means substances which produce temporary, irritating or disabling physical effects which disappear within minutes of removal from exposure. There is no significant risk of permanent injury and medical treatment is rarely required;

"robot" means a manipulation mechanism, which may be of the continuous path or of the point-to-point variety, may use sensors, and which:

- a. Is multifunctional;
- b. Is capable of positioning or orienting material, parts, tools or special devices through variable movements in three dimensional space;
- c. Incorporates three or more closed or open loop servo-devices which may include stepping motors; and
- d. Has "user-accessible programmability" by means of the teach/playback method or by means of an electronic computer which may be a programmable logic controller, i.e., without mechanical intervention;

except:

- a. Manipulation mechanisms which are only manually/teleoperator controllable;
- b. Fixed sequence manipulation mechanisms, which are automated moving devices, operating according to programmes where the motions are limited by fixed stops, such as pins or cams and the sequence of motions and the selection of paths or angles are not variable or changeable by mechanical, electronic or electrical means;
- c. Mechanically controlled variable sequence manipulation mechanisms, which are automated moving devices, operating according to programmes where the motions are limited by fixed, but adjustable stops, such as pins or cams and the sequence of motions and the selection of paths or angles are variable within the fixed programme pattern; variations or modifications of the programme pattern (e.g., changes of pins or exchanges of cams) in one or more motion axes are accomplished only through mechanical operations;
- d. Non-servo-controlled variable sequence manipulation mechanisms, which are automated moving devices, operating according to mechanically fixed programmed motions; the programme is variable but the sequence proceeds only by the binary signal from mechanically fixed electrical binary devices or adjustable stops;
- e. Stacker cranes defined as Cartesian coordinate manipulator systems manufactured as an integral part of a vertical array of storage bins and designed to access the contents of those bins for storage or retrieval;

"software" means one or more "programmes" or "microprogrammes" fixed in any tangible medium of expression;

"special gun-mounting" means any fixture designed to mount a gun;

"superconductive" in relation to materials (i.e., metals, alloys or compounds) means those which can lose all electrical resistance (i.e., which can attain infinite electrical conductivity and carry very large electrical currents without Joule heating); the superconductive state of a material is individually characterized by a "critical temperature", a critical magnetic field, which is a function of temperature, and a critical current density which is a function of both magnetic field and temperature;

"tear gases" means gases which produce temporary irritating or disabling effects which disappear within minutes of removal of exposure;

"technology" means specific information necessary for the "development", "production" or "use" of a product. The information may take forms such as blueprints, plans, diagrams, models, formulae, tables, engineering designs and specifications, manuals and instructions written or recorded on other media or devices such as disk, tape, read-only memories;

"use" means operation, installation (which includes on-site installation), maintenance, checking, repair, overhaul and refurbishing;

"user-accessible programmability" means the facility allowing a user to insert, modify or replace "programmes" by means other than:

- a. A physical change in wiring or interconnections; or
- b. The setting of function controls including entry of parameters.

#### **ML1**

Arms and automatic weapons with a calibre of 12.7 mm (calibre 0.50 inches) or less and accessories, as follows, and specially designed components therefor:

- a. Rifles, carbines, revolvers, pistols, machine pistols and machine guns;
- b. Smooth-bore weapons specially designed for military use;
- c. Weapons using caseless ammunition;
- d. Silencers, "special gun-mountings", weapons sights, clips and flash suppressers for arms specified in ML1.a., ML1.b. or ML1.c.

except:

- a. Air weapons (other than those declared by the Firearms (Dangerous Air Weapons) Rules 1969 to be specially dangerous);
- b. Firearms specially designed for dummy ammunition and which are incapable of firing any ammunition specified in this Part;
- d. Firearms certified by a registered UK Proof House as having been rendered incapable of firing any ammunition specified in this Part;
- e. Bayonets.

#### *Technical Note:*

*Smooth-bore weapons specially designed for military use as specified in ML1.b. are those which:*

- a. *Are proof tested at pressures above 1,300 bars;*
- b. *Operate normally and safely at pressures above 1,000 bars; and*
- c. *Are capable of accepting ammunition above 76.2 mm in length (e.g., commercial 12-gauge magnum shot gun shells).*

*The parameters in this Technical Note are to be measured according to the standards of the Commission Internationale Permanente.*

- PL5002** Telescopic sights for goods specified in PL5018, other than those specified in entries ML1, ML2 and ML5.
- PL5018** Smooth-bore weapons, other than those specified in ML1.b. or ML2, and specially designed components therefor;  
except:
- a. Air weapons (other than those declared by the Firearms (Dangerous Air Weapons) Rules 1969 to be specially dangerous);
  - b. Air (pneumatic) or cartridge (explosive) powered guns or pistols designed as:
    1. Industrial tools; or
    2. Humane stunning devices employed specifically for animal slaughter;
  - c. Signal pistols.
- PL5021** Ammunition or cartridges, including projectiles, and specially designed components therefor, for the "goods" specified in entry PL5018;  
except:
- a. Lead or lead alloy pellet ammunition specially designed for air weapons;
  - b. Ammunition crimped without a projectile (blank star) and dummy ammunition with a pierced powder chamber.
  - c. Cartridges specially designed for signalling, bird scaring or lighting of gas flares at oil wells.
- ML2** Armament or weapons with a calibre greater than 12.7 mm (calibre 0.50 inches), projectors and accessories, as follows, and specially designed components therefor:
- a. Guns, howitzers, cannon, mortars, anti-tank weapons, projectile launchers, military flame throwers, recoilless rifles and signature reduction devices therefor;
  - b. Military smoke, gas and pyrotechnic projectors or generators;  
except:  
Signal pistols.
  - c. Weapons sights for arms specified in entry ML2.a. or ML2.b.
- ML3** Ammunition, and specially designed components therefor, for the weapons specified in ML1, ML2 or ML12.  
except:
- a. Ammunition crimped without a projectile (blank star) and dummy ammunition with a pierced powder chamber;
  - b. Lead or lead alloy pellet ammunition specially designed for air weapons.
  - c. Cartridges specially designed for signalling, bird scaring or lighting of gas flares at oil wells.
- ML4** Bombs, torpedoes, rockets, missiles, other explosive devices and charges, and related equipment and accessories, as follows, specially designed for military use, and specially designed components therefor:
- a. Bombs, torpedoes, grenades, smoke canisters, rockets, mines, missiles, depth charges, demolition-charges, demolition-devices and demolition-kits, devices that contain "military pyrotechnics", cartridges and simulators (i.e. equipment simulating the characteristics of any of these items);

- b. Equipment specially designed for the handling, control, activation, powering with one-time operational output, launching, laying, sweeping, discharging, decoying, jamming, detonation, disruption or detection of items specified in ML4.a.

*Technical Note*

*Hand held devices, limited by design solely to the detection of metal objects and incapable of distinguishing between mines and other metal objects, are not considered to be specially designed for the detection of items specified by ML4.a.*

**PL5006** Apparatus or devices specially designed for military use, used for the handling, control, discharging, decoying, jamming, detonation, disruption or detection of improvised explosive devices or other explosive devices not specified in ML4.a., and specially designed components therefor.

except:

Inspection devices not employing electronic management.

**PL5030** Bombs and grenades, other than those specified in ML4 and specially designed components therefor.

**ML5** Fire control equipment and related alerting and warning equipment, related systems, test and alignment and countermeasure equipment, as follows, specially designed for military use, and specially designed components and accessories therefor:

- a. Weapon sights, bombing computers, gun laying equipment and weapon control systems;
- b. Target acquisition, designation, range-finding, surveillance or tracking systems; detection, data fusion, recognition or identification equipment; and sensor integration equipment;
- c. Countermeasure equipment for items specified in ML5.a. or ML5.b.
- d. Field test or alignment equipment, specially designed for items specified in entry ML5.a. or ML5.b.

**ML6** Ground vehicles and components therefor specially designed or modified for military use.

*Technical Note:*

*For the purposes of ML6 the term ground vehicles includes trailers.*

*Note: Modification of a ground vehicle for military use entails a structural, electrical or mechanical change involving one or more specially designed military components.*

**PL5031** Ground vehicles and related equipment, other than those specified elsewhere in this Part, as follows:

- a. All wheel drive vehicles capable of off road use which have been manufactured or fitted with metallic or non-metallic materials to provide ballistic protection;
 

except:

  - 1. vehicles designed or fitted out for the transportation of valuables or funds;
  - 2. vehicles fitted with, or designed or modified to be fitted with, a plough or flail for the purpose of land mine clearance.
- b. Containers for mounting on vehicles, specially designed or modified for military use and components therefor specially designed or modified for military use.

**ML7** In this entry, references in square brackets to [Chemical Abstract Service] [CAS] numbers are included for convenience only. Goods of which the description in this entry includes a CAS reference are specified in this entry whether or not they fall within that reference.

Chemical or biological toxic agents, toxic chemicals and mixtures containing such agents or chemicals, "tear gases", radioactive materials, related equipment, components, materials and "technology" as follows:

- a. Chemical or biological toxic agents, toxic chemicals and radioactive materials, as follows:
  1. Biological agents and radioactive materials "adapted for use in war" to produce casualties in humans or animals, degrade equipment or damage crops or the environment, and chemical warfare (CW) agents;
  2. Chemicals listed in items (1) to (6) of the Schedule to the Chemical Weapons Act 1996, read with notes 2 and 3 of that Schedule, whether or not they are CW agents within entry ML7.a and chemical mixtures containing one or more of these chemicals;
  3. 3-Quinuclidinyl benzilate (BZ) [CAS 6581-06-02] and chemical mixtures containing more than 1% by weight thereof;
- b. CW binary precursors and key precursors, as follows, and chemical mixtures containing one or more of these precursors:
  1. Alkyl (Methyl, Ethyl, n-Propyl or Isopropyl) Phosphonyl Difluorides, such as: DF: Methyl Phosphonyldifluoride [CAS 676-99-3];
  2. O-Alkyl (H or equal to or less than C10, including cycloalkyl) O-2-dialkyl (Methyl, Ethyl, n-Propyl or Isopropyl) aminoethyl alkyl (Methyl, Ethyl, n-Propyl or Isopropyl) phosphonite and corresponding alkylated and protonated salts, such as:  
QL: O-Ethyl-2-di-isopropylaminoethyl methylphosphonite  
[CAS 57856-11-8];
  3. Chlorosarin: O-Isopropyl methylphosphonochloridate [CAS 1445-76-7];
  4. Chlorosoman: O-Pinakolyl methylphosphonochloridate [CAS 7040-57-5];
- c. "Tear gases" and "riot control agents" including:
  1. Bromobenzyl cyanide (CA) [CAS 5798-79-8];
  2. o-Chlorobenzylidenemalononitrile (o-Chlorobenzalmalononitrile) (CS) [CAS 2698-41-1];
  3. Phenylacetyl chloride (w-chloroacetophenone) (CN) [CAS 532-27-4];
  4. Dibenz-(b,f)-1,4-oxazephine (CR) [CAS 257-07-8];  
except:  
Tear gases or riot control agents individually packaged for personal self defence purposes.
- d. Equipment specially designed or modified for the dissemination of any of the following and specially designed components therefor:
  1. Materials or agents specified in entry ML7.a. or entry ML7.c.;
  2. CW agents made up of precursors specified in entry ML7.b.;

*Note:* ML7.d. does not control equipment not specially designed or modified for military purposes.

- e. "Goods" specially designed for defence against materials specified in entry ML7.a. or entry ML7.c. and specially designed components therefor;

*Note: 1* ML7.e. does not control equipment not specially designed or modified for military purposes.

- f. Goods specially designed for the detection or identification of materials specified in entry ML7.a. or entry ML7.c. and specially designed components therefor;  
except:  
Personal radiation monitoring dosimeters.

*Note:* ML7.f. does not control equipment not specially designed or modified for military purposes.

- g. "Biopolymers" specially designed or processed for the detection or identification of CW agents specified in entry ML7.a., and the cultures of specific cells used to produce them;
- h. "Biocatalysts" for the decontamination or degradation of CW agents, and biological systems therefor, as follows:
  - 1. "Biocatalysts" specially designed for the decontamination or degradation of CW agents specified in ML7.a. resulting from directed laboratory selection or genetic manipulation of biological systems;
  - 2. Biological systems, as follows: "expression vectors", viruses or cultures of cells containing the genetic information specific to the production of "biocatalysts" specified in ML7.h.1.;
- i. "Technology" as follows:
  - 1. "Technology" for the "development", "production" or "use" of toxicological agents, related equipment or components specified in ML7.a. to ML7.f.;
  - 2. "Technology" for the "development", "production" or "use" of "biopolymers" or cultures of specific cells specified in ML7.g.;
  - 3. "Technology" exclusively for the incorporation of "biocatalysts", specified in ML7.h.1., into military carrier substances or military material.

*Note 1: ML7.a. and ML7.c. do not control:*

- a. Cyanogen chloride [CAS 506-77-4];
- b. Hydrocyanic acid [CAS 74-90-8];
- c. Chlorine [CAS 7782-50-5];
- d. Carbonyl chloride (phosgene) [CAS 75-44-5];
- e. Diphosgene (trichloromethyl-chloroformate) [CAS 503-38-8];
- f. Ethyl bromoacetate [CAS 105-36-2];
- g. Xylyl bromide, ortho: [CAS 89-92-9], meta: [CAS 620-13-3], para: [CAS 104-81-4];
- h. Benzyl bromide [CAS 100-39-0];
- i. Benzyl iodide [CAS 620-05-3];
- j. Bromo acetone [CAS 598-31-2];
- k. Cyanogen bromide [CAS 506-68-3];
- l. Bromo methylethylketone [CAS 816-40-0];
- m. Chloro acetone [CAS 78-95-5];
- n. Ethyl iodoacetate [CAS 623-48-3];
- o. Iodo acetone [CAS 3019-04-3];
- p. Chloropicrin [CAS 76-06-2].

*Note 2: The "technology", cultures of cells and biological systems listed in ML7.g., ML7.h.2, and ML7.i.3. are exclusive and do not control "technology", cells or biological systems for civil purposes, such as agricultural, pharmaceutical, medical, veterinary, environmental, waste management, or in the food industry.*

**ML 8**

In this entry, references in square brackets to Chemical Abstract Service [CAS] numbers are included for convenience only. Goods of which the description in this entry includes a CAS reference are specified in this entry whether or not they fall within that reference.

"Energetic materials", and related substances, as follows:

- a. "Explosives", as follows, and mixtures thereof:
  1. ADNBF (aminodinitrobenzofuroxan or 7-amino-4,6-dinitrobenzofurazane-1-oxide) (CAS 97096-78-1);
  2. BNCP (cis-bis (5-nitrotetrazolato) tetra amine-cobalt (III) perchlorate) (CAS 117412-28-9);
  3. CL-14 (diamino dinitrobenzofuroxan or 5,7-diamino-4,6-dinitrobenzofurazane-1-oxide) (CAS 117907-74-1);
  4. CL-20 (HNIW or Hexanitrohexaazaisowurtzitane) (CAS 135285-90-4); clathrates of CL-20;
  5. CP (2-(5-cyanotetrazolato) penta amine-cobalt (III) perchlorate) (CAS 70247-32-4);
  6. DADE (1,1-diamino-2,2-dinitroethylene, FOX7);
  7. DATB (diaminotrinitrobenzene) (CAS 1630-08-6);
  8. DDFP (1,4-dinitrodifurazanopiperazine);
  9. DDPO (2,6-diamino-3,5-dinitropyrazine-1-oxide, PZO) (CAS 194486-77-6);
  10. DIPAM (3,3 $\phi$ -diamino-2,2 $\phi$ ,4,4 $\phi$ ,6,6 $\phi$ -hexanitrobiphenyl or dipicramide) (CAS 17215-44-0);
  11. DNGU (DINGU or dinitroglycoluril) (CAS 55510-04-8);
  12. Furazans, as follows:
    - a. DAAOF (diaminoazoxyfuran);
    - b. DAAzF (diaminoazofuran) (CAS 78644-90-3);
  13. HMX and derivatives, as follows:
    - a. HMX (Cyclotetramethylenetetranitramine, octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazine, 1,3,5,7-tetranitro-1,3,5,7-tetraza-cyclooctane, octogen or octogene) (CAS 2691-41-0);
    - b. difluoroaminated analogs of HMX;
    - c. K-55 (2,4,6,8-tetranitro-2,4,6,8-tetraazabicyclo-[3,3,0]-octanone-3, tetranitrosemiglycouril or keto-bicyclic HMX) (CAS 130256-72-3);
  14. HNAD (hexanitroadamantane) (CAS 143850-71-9);
  15. HNS (hexanitrostilbene) (CAS 20062-22-0);
  16. Imidazoles, as follows:
    - a. BNNII (Octahydro-2,5-bis(nitroimino)imidazo [4,5-d]imidazole);
    - b. DNI (2,4-dinitroimidazole) (CAS 5213-49-0);
    - c. FDIA (1-fluoro-2,4-dinitroimidazole);
    - d. NTDNIA (N-(2-nitrotriazolo)-2,4-dinitroimidazole);
    - e. PTIA (1-picryl-2,4,5-trinitroimidazole);
  17. NTNMH (1-(2-nitrotriazolo)-2-dinitromethylene hydrazine);
  18. NTO (ONTA or 3-nitro-1,2,4-triazol-5-one) (CAS 932-64-9);
  19. Polynitrocubanes with more than four nitro groups;
  20. PYX (2,6-bis(picrylamino)-3,5-dinitropyridine) (CAS 38082-89-2);

21. RDX and derivatives, as follows:
    - a. RDX (cyclotrimethylenetrinitramine, cyclonite, T4, hexahydro-1,3,5-trinitro-1,3,5-triazine, 1,3,5-trinitro-1,3,5-triaza-cyclohexane, hexogen or hexogene) (CAS 121-82-4);
    - b. Keto-RDX (K-6 or 2,4,6-trinitro-2,4,6-triazacyclohexanone) (CAS 115029-35-1);
  22. TAGN (triaminoguanidinenitrate) (CAS 4000-16-2);
  23. TATB (triaminotrinitrobenzene) (CAS 3058-38-6);
  24. TEDDZ (3,3,7,7-tetrakis(difluoroamine) octahydro-1,5-dinitro-1,5-diazocine);
  25. Tetrazoles, as follows:
    - a. NTAT (nitrotriazol aminotetrazole);
    - b. NTNT (1-N-(2-nitrotriazolo)-4-nitrotetrazole);
  26. Tetryl (trinitrophenylmethylnitramine) (CAS 479-45-8);
  27. TNAD (1,4,5,8-tetranitro-1,4,5,8-tetraazadecalin) (CAS 135877-16-6);
  28. TNAZ (1,3,3-trinitroazetidine) (CAS 97645-24-4);
  29. TNGU (SORGUYL or tetranitroglycoluril) (CAS 55510-03-7);
  30. TNP (1,4,5,8-tetranitro-pyridazino[4,5-d]pyridazine) (CAS 229176-04-9);
  31. Triazines, as follows:
    - a. DNAM (2-oxy-4,6-dinitroamino-s-triazine) (CAS 19899-80-0);
    - b. NNHT (2-nitroimino-5-nitro-hexahydro-1,3,5-triazine) (CAS 130400-13-4);
  32. Triazoles, as follows:
    - a. 5-azido-2-nitrotriazole;
    - b. ADHTDN (4-amino-3,5-dihydrazino-1,2,4-triazole dinitramide) (CAS 1614-08-0);
    - c. ADNT (1-amino-3,5-dinitro-1,2,4-triazole);
    - d. BDNTA ([bis-dinitrotriazole]amine);
    - e. DBT (3,3'-dinitro-5,5'-bi-1,2,4-triazole) (CAS 30003-46-4);
    - f. DNBT (dinitrobistriazole) (CAS 70890-46-9);
    - g. NTDNA (2-nitrotriazole-5-dinitramide) (CAS 75393-84-9);
    - h. NTDNT (1-N-(2-nitrotriazolo)-3,5-dinitrotriazole);
    - i. PDNT (1-picryl-3,5-dinitrotriazole);
    - j. TACOT (tetranitrobenzotriazolobenzotriazole) (CAS 25243-36-1);
  33. Any explosive not listed elsewhere in ML8.a. with a detonation velocity exceeding 8,700 m/s at maximum density or a detonation pressure exceeding 34 GPa (340 kbar);
  34. Other organic explosives not listed elsewhere in ML8.a. yielding detonation pressures of 25 GPa (250 kbar) or more that will remain stable at temperatures of 523K (250°C) or higher for periods of 5 minutes or longer.
- b. "Propellants", as follows:
1. Any United Nations (UN) Class 1.1 solid "propellant" with a theoretical specific impulse (under standard conditions) of more than 250 seconds for non-metallized, or more than 270 seconds for aluminized compositions;
  2. Any UN Class 1.3 solid "propellant" with a theoretical specific impulse (under standard conditions) of more than 230 seconds for non-halogenized, 250 seconds for non-metallized compositions and 266 seconds for metallized compositions;

3. Propellants having a force constant of more than 1,200 kJ/kg;
  4. "Propellants" that can sustain a steady-state linear burning rate of more than 38 mm/s under standard conditions (as measured in the form of an inhibited single strand) of 6.89 MPa (68.9 bar) pressure and 294K (21°C);
  5. Elastomer modified cast double base (EMCDB) "propellants" with extensibility at maximum stress of more than 5% at 233K (-40°C);
  6. Any "propellant" containing substances listed in ML8.a.
- c. "Pyrotechnics", fuels and related substances, as follows, and mixtures thereof:
1. Aircraft fuels specially formulated for military purposes;
  2. Alane (aluminum hydride) (CAS 7784-21-6);
  3. Carboranes; decaborane (CAS 17702-41-9); pentaboranes (CAS 19624-22-7 and 18433-84-6) and their derivatives;
  4. Hydrazine and derivatives, as follows (see also ML8.d.8. and d.9. for oxidising hydrazine derivatives):
    - a. Hydrazine (CAS 302-01-2) in concentrations of 70% or more;
    - b. Monomethyl hydrazine (CAS 60-34-4);
    - c. Symmetrical dimethyl hydrazine (CAS 540-73-8);
    - d. Unsymmetrical dimethyl hydrazine (CAS 57-14-7);
  5. Metal fuels in particle form whether spherical, atomized, spheroidal, flaked or ground, manufactured from material consisting of 99 % or more of any of the following:
    - a. Metals and mixtures thereof, as follows:
      1. Beryllium (CAS 7440-41-7) in particle sizes of less than 60  $\mu$ m;
      2. Iron powder (CAS 7439-89-6) with particle size of 3  $\mu$ m or less produced by reduction of iron oxide with hydrogen;
    - b. Mixtures, which contain any of the following:
      1. Zirconium (CAS 7440-67-7), magnesium (CAS 7439-95-4) or alloys of these in particle sizes of less than 60  $\mu$ m;
      2. Boron (CAS 7440-42-8) or boron carbide (CAS 12069-32-8) fuels of 85% purity or higher and particle sizes of less than 60  $\mu$ m;  
except:  
boron and boron carbide enriched with boron-10 (20% or more of total boron-10 content);
  6. Military materials containing thickeners for hydrocarbon fuels specially formulated for use in flame throwers or incendiary munitions, such as metal stearates or palmates (e.g. octal (CAS 637-12-7)) and M1, M2, and M3 thickeners;
  7. Perchlorates, chlorates and chromates composited with powdered metal or other high energy fuel components;
  8. Spherical aluminum powder (CAS 7429-90-5) with a particle size of 60  $\mu$ m or less, manufactured from material with an aluminum content of 99% or more;
  9. Titanium subhydride (TiH<sub>n</sub>) of stoichiometry equivalent to n= 0.65-1.68.
- d. Oxidizers, as follows, and mixtures thereof:
1. ADN (ammonium dinitramide or SR 12) (CAS 140456-78-6);
  2. AP (ammonium perchlorate) (CAS 7790-98-9);
  3. Compounds composed of fluorine and any of the following:

- a. Other halogens;
  - b. Oxygen; or
  - c. Nitrogen;
- except: chlorine trifluoride;
- 4. DNAD (1,3-dinitro-1,3-diazetidene) (CAS 78246-06-7);
  - 5. HAN (hydroxylammonium nitrate) (CAS 13465-08-2);
  - 6. HAP (hydroxylammonium perchlorate) (CAS 15588-62-2);
  - 7. HNF (hydrazinium nitroformate) (CAS 20773-28-8);
  - 8. Hydrazine nitrate (CAS 37836-27-4);
  - 9. Hydrazine perchlorate (CAS 27978-54-7);
  - 10. Liquid oxidisers comprised of or containing inhibited red fuming nitric acid (IRFNA) (CAS 8007-58-7);
- e. Binders, plasticizers, monomers, polymers, as follows:
- 1. AMMO (azidomethylmethyloxetane and its polymers) (CAS 90683-29-7);
  - 2. BAMO (bisazidomethyloxetane and its polymers) (CAS 17607-20-4);
  - 3. BDNPA (bis (2,2-dinitropropyl)acetal) (CAS 5108-69-0);
  - 4. BDNPF (bis (2,2-dinitropropyl)formal) (CAS 5917-61-3);
  - 5. BTTN (butanetrioltrinitrate) (CAS 6659-60-5);
  - 6. Energetic monomers, plasticizers and polymers containing nitro, azido, nitrate, nitraza or difluoroamino groups specially formulated for military use;
  - 7. FAMAO (3-difluoroaminomethyl-3-azidomethyl oxetane) and its polymers;
  - 8. FEFO (bis-(2-fluoro-2,2-dinitroethyl) formal) (CAS 17003-79-1);
  - 9. FPF-1 (poly-2,2,3,3,4,4-hexafluoropentane-1,5-diol formal) (CAS 376-90-9);
  - 10. FPF-3 (poly-2,4,4,5,5,6,6-heptafluoro-2-tri-fluoromethyl-3-oxaheptane-1,7-diol formal);
  - 11. GAP (glycidylazide polymer) (CAS 143178-24-9) and its derivatives;
  - 12. HTPB (hydroxyl terminated polybutadiene) with a hydroxyl functionality equal to or greater than 2.2 and less than or equal to 2.4, a hydroxyl value of less than 0.77 meq/g, and a viscosity at 30°C of less than 47 poise (CAS 69102-90-5);
  - 13. Low (less than 10,000) molecular weight, alcohol functionalised, poly(epichlorohydrin); poly(epichlorohydrindiol) and triol;
  - 14. NENAs (nitrateethylnitramine compounds) (CAS 17096-47-8, 85068-73-1, 82486-83-7, 82486-82-6 and 85954-06-9);
  - 15. PGN (poly-GLYN, polyglycidyl nitrate or poly(nitratomethyl oxirane) (CAS 27814-48-8);
  - 16. Poly-NIMMO (poly nitratomethylmethyloxetane) or poly-NMMO (poly[3-Nitratomethyl-3-methyloxetane]) (CAS 84051-81-0);
  - 17. Polynitroorthocarbonates;
  - 18. TVOPA (1,2,3-tris[1,2-bis(difluoroamino)ethoxy] propane or tris vinox propane adduct) (CAS 53159-39-0).
- f. "Additives", as follows:
- 1. Basic copper salicylate (CAS 62320-94-9);
  - 2. BHEGA (bis-(2-hydroxyethyl) glycolamide) (CAS 17409-41-5);
  - 3. BNO (butadienenitrileoxide) (CAS 9003-18-3);

4. Ferrocene derivatives, as follows:
  - a. Butacene (CAS 125856-62-4);
  - b. Catocene (2,2-bis-ethylferrocenyl propane) (CAS 37206-42-1);
  - c. Ferrocene carboxylic acids;
  - d. n-butyl-ferrocene (CAS 319904-29-7);
  - e. Other adducted polymer ferrocene derivatives;
5. Lead beta-resorcyate (CAS 20936-32-7);
6. Lead citrate (CAS 14450-60-3);
7. Lead-copper chelates of beta-resorcyate or salicylates (CAS 68411-07-4);
8. Lead maleate (CAS 19136-34-6);
9. Lead salicylate (CAS 15748-73-9);
10. Lead stannate (CAS 12036-31-6);
11. MAPO (tris-1-(2-methyl)aziridiny phosphine oxide) (CAS 57-39-6), and BOBBA 8 (bis(2-methyl aziridiny)-2-(2-hydroxypropanoxy) propylamino phosphine oxide); and other MAPO derivatives;
12. Methyl BAPO (bis(2-methyl aziridiny) methylamino phosphine oxide) (CAS 85068-72-0);
13. N-methyl-p-nitroaniline (CAS 100-15-2);
14. 3-Nitrazo-1,5-pentane diisocyanate (CAS 7406-61-9);
15. Organo-metallic coupling agents, as follows:
  - a. Neopentyl[diallyl]oxy, tri[diethyl]phosphato-titanate (CAS 103850-22-2); also known as titanium IV, 2,2-[bis 2-propenolato-methyl, butanolato, tris (diethyl) phosphato] (CAS 110438-25-0); or LICA 12 (CAS 103850-22-2);
  - b. Titanium IV, [(2-propenolato-1) methyl, n-propanolatomethyl] butanolato-1, tris[diethyl] pyrophosphate or KR3538;
  - c. Titanium IV, [(2-propenolato-1)methyl, n-propanolatomethyl] butanolato-1, tris(diethyl)phosphate;
16. Polycyanodifluoroaminoethyleneoxide;
17. Polyfunctional aziridine amides with isophthalic, trimesic (BITA or butyleneimine trimesamide), isocyanuric or trimethyladipic backbone structures and 2-methyl or 2-ethyl substitutions on the aziridine ring;
18. Propyleneimine (2-methylaziridine) (CAS 75-55-8);
19. Superfine iron oxide (Fe<sub>2</sub>O<sub>3</sub>) with a specific surface area more than 250 m<sup>2</sup>/g and an average particle size of 3.0 nm or less;
20. TEPAN (tetraethylenepentaamineacrylonitrile) (CAS 68412-45-3); cyanoethylated polyamines and their salts;
21. TEPANOL (tetraethylenepentaamineacrylonitrileglycidol) (CAS 68412-46-4); cyanoethylated polyamines adducted with glycidol and their salts;
22. TPB (triphenyl bismuth) (CAS 603-33-8).
- g. "Precursors", as follows:
  1. BCMO (bischloromethyloxetane) (CAS 142173-26-0);
  2. Dinitroazetidine-t-butyl salt (CAS 125735-38-8);
  3. HBIW (hexabenzylhexaazaisowurtzitane) (CAS 124782-15-6);
  4. TAIW (tetraacetyldibenzylhexaazaisowurtzitane);

5. TAT (1,3,5,7-tetraacetyl-1,3,5,7-tetraaza cyclo-octane) (CAS 41378-98-7);
6. 1,4,5,8-tetraazadecalin (CAS 5409-42-7);
7. 1,3,5-trichlorobenzene (CAS 108-70-3);
8. 1,2,4-trihydroxybutane (1,2,4-butanetriol) (CAS 3068-00-6).

**ML9** Combatant vessels and vessels (surface or underwater) specially designed or modified for offensive or defensive action, whether or not converted to non-military use, regardless of current state of repair or operating condition, and whether or not they contain weapon delivery systems or armour, and components therefor specially designed or modified for military use.

**ML10** "Aircraft", unmanned airborne vehicles, aero-engines and "aircraft" equipment, related goods and components, specially designed or modified for military use, as follows:

- a. Combat "aircraft" and components therefor specially designed or modified for military use;
- b. Other "aircraft" specially designed or modified for military use, including military reconnaissance, assault, military training, transporting and airdropping troops or military equipment, logistics support, and components therefor specially designed or modified for military use;
- c. Aero-engines specially designed or modified for military use, and components therefor specially designed or modified for military use;
- d. Unmanned airborne vehicles, including remotely piloted air vehicles (RPVs), and autonomous, programmable vehicles specially designed or modified for military use and their launchers, ground support and related equipment for command and control and components therefor specially designed or modified for military use;
- e. Airborne equipment, including airborne refuelling equipment, specially designed for use with the "aircraft" specified in ML10.a. or ML10.b. or the aero-engines specified in ML10.c., and components therefor specially designed or modified for military use;
- f. Pressure refuellers, pressure refuelling equipment, equipment specially designed to facilitate operations in confined areas and ground equipment, developed specially for "aircraft" specified in ML10.a. or ML10.b., or for aero-engines specified in ML10.c.;
- g. Pressurised breathing equipment and partial pressure suits for use in "aircraft", anti-g suits, military crash helmets and protective masks, liquid oxygen converters used for "aircraft" or missiles, and catapults and cartridge actuated devices for emergency escape of personnel from "aircraft";
- h. Parachutes and related equipment used for combat personnel, cargo dropping or "aircraft" deceleration, as follows:
  1. Parachutes for:
    - a. Pin point dropping of military personnel;
    - b. Dropping of paratroopers;
  2. Cargo parachutes;
  3. Paragliders, drag parachutes, drogue parachutes for stabilisation and attitude control of dropping bodies, (e.g. recovery capsules, ejection seats, bombs);
  4. Drogue parachutes for use with ejection seat systems for deployment and inflation sequence regulation of emergency parachutes;
  5. Recovery parachutes for guided missiles, drones or space vehicles;
  6. Approach parachutes and landing deceleration parachutes;
  7. Other military parachutes;

- 8. Equipment specially designed for high altitude parachutists (e.g., suits, special helmets, breathing systems, navigation equipment);
  - i. Automatic piloting systems for parachuted loads; equipment specially designed or modified for military use for controlled opening jumps at any height, including oxygen equipment.
- ML11** Electronic equipment, not controlled elsewhere in this Part, specially designed for military use and specially designed components therefor.
- ML12** High velocity kinetic energy weapon systems and related equipment, as follows, and specially designed components therefor:
  - a. Kinetic energy weapon systems specially designed for destruction or effecting mission-abort of a target;
  - b. Specially designed test and evaluation facilities and test models, including diagnostic instrumentation and targets, for dynamic testing of kinetic energy projectiles and systems.
- N.B.: For weapon systems using sub-calibre ammunition or employing solely chemical propulsion, and ammunition therefor, see ML1 to ML4.*
- ML13** Armoured or protective equipment and constructions and components, as follows:
  - a. Armoured plate as follows:
    - 1. Manufactured to comply with a military standard or specification; or
    - 2. Suitable for military use;
  - b. Constructions of metallic or non-metallic materials or combinations thereof specially designed to provide ballistic protection for military systems, and specially designed components therefor;
  - c. Military helmets;
    - except:
      - a. Conventional steel helmets, neither modified or designed to accept, nor equipped with any type of accessory device;
      - b. Helmets manufactured before 1945.
  - d. Body armour and flak suits manufactured according to military standards or specifications, or equivalent, and specially designed components therefor.
    - except:
      - Individual suits of body armour for personal protection and accessories therefor when accompanying their users .
- PL5014** Specially designed components for the "goods" specified in ML13.a. or ML13.c.
- ML14** Specialised equipment for military training or for simulating military scenarios and specially designed components and accessories therefor.
- PL5034** Simulators, other than those specified in entry ML14, for training in the use of any firearm or weapon specified in entry ML1, PL5018 or ML2, and specially designed or modified components and accessories therefor.
- ML15** Imaging or countermeasure equipment, as follows, specially designed for military use, and specially designed components and accessories therefor:

- a. Recorders and image processing equipment;
- b. Cameras, photographic equipment and film processing equipment;
- c. Image intensifier equipment;
- d. Infrared or thermal imaging equipment;
- e. Imaging radar sensor equipment;
- f. Countermeasure or counter-countermeasure equipment for the equipment specified in ML15.a. to ML15.e.  
except:  
"First generation image intensifier tubes" or equipment specially designed so that only "first generation image intensifier tubes" are or can be incorporated in it.

*N.B.: For weapons sights incorporating "first generation image intensifier tubes", see entries ML1, ML2 and ML5.*

**ML16** Forgings, castings and other unfinished products the use of which in a controlled product is identifiable by material composition, geometry or function, and which are specially designed for any products specified in ML1 to ML4, ML6, ML9, ML10, ML12 or ML19.

**PL5020** Forgings, castings and semi-finished products specially designed for "goods" specified in entries PL5006 or PL5018.

**ML17** Miscellaneous "goods", materials and libraries, as follows, and specially designed components therefor:

- a. Self-contained diving and underwater swimming apparatus, as follows:
  - 1. Closed or semi-closed circuit (rebreathing) apparatus specially designed for military use (i.e., specially designed to be non magnetic);
  - 2. Specially designed components for use in the conversion of open-circuit apparatus to military use;
  - 3. Articles designed exclusively for military use with self-contained diving and underwater swimming apparatus;
- b. Construction equipment specially designed for military use;
- c. Fittings, coatings and treatments for signature suppression, specially designed for military use;
- d. Field engineer equipment specially designed for use in a combat zone;
- e. "Robots", "robot" controllers and "robot" "end-effectors", having any of the following characteristics:
  - 1. Specially designed for military use;
  - 2. Incorporating means of protecting hydraulic lines against externally induced punctures caused by ballistic fragments (e.g., incorporating self-sealing lines) and designed to use hydraulic fluids with flash points higher than 839 K (566°C); or
  - 3. Specially designed or rated for operating in an electro-magnetic pulse (EMP) environment;
- f. 'Libraries' (parametric technical databases) specially designed for military use with equipment specified in this Part;
- g. Nuclear power generating equipment or propulsion equipment, including "nuclear reactors", specially designed for military use and components therefor specially designed or modified for military use;

- h. "Goods" and material, coated or treated for signature suppression, specially designed for military use, other than those controlled elsewhere in this Part;
- i. Simulators specially designed for military "nuclear reactors";
- j. Mobile repair shops specially designed to service military equipment;
- k. Field generators specially designed for military use;
- l. Containers specially designed for military use; and
- m. Bridges specially designed for military use.
- n. Test models specially designed for the "development " of "goods" specified in ML4, ML6, ML9 or ML10.

*Technical Note:*

*For the purpose of ML17, the term 'library' (parametric technical database) means a collection of technical information of a military nature, reference to which may enhance the performance of military equipment or systems.*

- PL5033** Ferries and rafts specially designed or modified for military use and components therefor specially designed or modified for military use.
- ML18** Equipment and "technology" for the "production" (including design, examination, manufacture, testing and checking) of "goods" referred to in this Part of this Schedule, as follows:
- a. Specially designed or modified "production" equipment for the "production" of products specified in this Part, and specially designed components therefor;
  - b. Specially designed environmental test facilities and specially designed equipment therefor, for the certification, qualification or testing of products specified in this Part;
  - c. Specific "production" "technology", even if the equipment with which such "technology" is to be used is not controlled;
  - d. "Technology" specific to the design of, the assembly of components into, and the operation, maintenance and repair of complete production installations even if the components themselves are not controlled.
- PL5017** Equipment and test models, other than those specified by ML11 or by ML 17.n., specially designed or modified for the "development" or "use" of military "goods" specified in this Part.
- ML19** Directed energy weapon systems (DEW), related or countermeasure equipment and test models, as follows, and specially designed components therefor:
- a. "Laser" systems specially designed for destruction or effecting mission-abort of a target;
  - b. Particle beam systems capable of destruction or effecting mission-abort of a target;
  - c. High power radio-frequency (RF) systems capable of destruction or effecting mission-abort of a target;
  - d. Equipment specially designed for the detection or identification of, or defence against, systems specified in ML19.a. to ML19.c.;
  - e. Physical test models and related test results for the systems, equipment and components specified in this Item.
  - f. Continuous wave or pulsed "laser" systems specially designed to cause permanent blindness to unenhanced vision (i.e. to the naked eye or to the eye with corrective eyesight devices).

- ML20** Cryogenic and "superconductive" equipment, as follows, and specially designed components and accessories therefor:
- a. Equipment specially designed or configured to be installed in a vehicle for military ground, marine, airborne or space applications, capable of operating while in motion and of producing or maintaining temperatures below 103 K (- 170 °C);
  - b. "Superconductive" electrical equipment (rotating machinery and transformers) specially designed or configured to be installed in a vehicle for military ground, marine, airborne or space applications, capable of operating while in motion.  
except:  
Direct-current hybrid homopolar generators that have single-pole normal metal armatures which rotate in a magnetic field produced by superconducting windings, provided those windings are the only superconducting component in the generator.
- ML21** "Software", as follows:
- a. "Software" specially designed or modified for the "development", "production" or "use" of equipment or materials specified in this Part;
  - b. Specific "software", as follows:
    1. "Software" specially designed for:
      - a. Modelling, simulation or evaluation of military weapon systems;
      - b. "Development", monitoring, maintenance or up-dating of "software" embedded in military weapon systems;
      - c. Modelling or simulating military operation scenarios, not specified in ML14;
      - d. Command, Communications, Control and Intelligence (C3I) applications or Command, Communications, Control, Computer and Intelligence (C4I) applications;
    2. "Software" for determining the effects of conventional, nuclear, chemical or biological warfare weapons.
    3. "Software" not controlled under entry ML21.a or ML21.b.1 or ML21.b.2, specially designed or modified to enable equipment not specified in this part of this Schedule to perform military functions of equipment specified in any of the following entries: ML5, ML7.f., ML9, ML10.e., ML11, ML14, ML15, ML17.i. and ML18.
- PL5001** Other security and para-military police "goods", as follows:
- a. Acoustic devices represented by the manufacturers or suppliers thereof as suitable for riot control purposes, and specialised components therefor;
  - b. Anti-riot and ballistic shields and specially designed components therefor;
  - c. Restraints specially designed for restraining human beings, as follows:
    1. Leg-irons;
    2. Gangchains;
    3. Electric shock belts;
    4. Shackles having a maximum locked dimension exceeding 240mm overall (i.e., including cuffs and connecting chain);
    5. Individual cuffs having an internal perimeter dimension when fully locked exceeding 165mm and shackles made therewith.
  - d. Portable anti-riot devices for administering an incapacitating substance, and specialised components therefor;

- e. Water cannon and components therefor;
- f. Riot control vehicles which have been specially designed or modified to be electrified to repel boarders and components therefor specially designed or modified for that purpose;
- g. Portable devices designed or modified for the purpose of riot control or self-protection by the administration of an electric shock (including electric-shock batons, electric shock shields, stun guns and electric shock dart guns (tasers) and components therefor specially designed or modified for such a purpose.

**ML22** "Technology" according to the General Technology Note for the "development", "production" or "use" of "goods" specified in this Part, other than that "technology" controlled in ML7 and ML18.

#### **LEGAL DISCLAIMER**

The information in this Annex is for information purposes only and has no force in law.

## Annex B

### Summary of Dual-Use List Categories and Sub-Categories

Descriptions of the categories and sub-categories covering entries in Annex 1 to Council Regulation (EC) No.1334/2000 [1] and Schedule 2 of the Dual-Use Items (Export Control) Regulations 2000 (S.I.2000/2620) as at 1 January 2003

Category	Sub-category
0 : Nuclear Materials, Facilities and Equipment	0A : Systems, Equipment and Components
	0B : Test, Inspection and Production Equipment
	0C : Materials
	0D : Software

## Annex C

### Summary of HM Customs Tariff Codes

Part I — Tariff Codes used to compile data on the numbers of small arms and weapons exported.

Customs Tariff Code	Goods Description
9301 1100 <sup>1</sup>	Artillery weapons (eg guns, howitzers, mortars) — self propelled
9301 1900 <sup>1</sup>	Artillery weapons (eg guns, howitzers, mortars) — other than self propelled
9301 2000 <sup>1</sup>	Rocket launchers; flame throwers; grenade launchers; torpedo tubes and similar projectors
9301 9000 <sup>1</sup>	Other military weapons (exc. Revolvers, pistols and the arms of heading 9307)
9302 0010	Revolvers and pistols: 9mm calibre and higher
9302 0090	Revolvers and pistols below 9mm calibre

Part II — Additional tariff codes used to compile data on the value of defence exports.

Customs Tariff Code	Goods Description
8710 0000	Tanks and other armoured fighting vehicles and parts thereof.
8802 1190	Helicopters, other than civil, of an unladen weight not exceeding 2,000 kg.
8802 1290	Helicopters, other than civil, of an unladen weight exceeding 2,000kg.
8802 2090	Aircraft, other than civil, of an unladen weight not exceeding 2,000kg.
8802 3090	Aircraft, other than civil of an unladen weight between 2,000 and 15,000kg.
8802 4090	Aircraft, other than civil, of unladen weight exceeding 15,000kg.
8803 1090 <sup>2</sup>	Aircraft propellers and parts thereof, other than civil.
8803 2090 <sup>2</sup>	Aircraft under-carriage and parts thereof, other than civil.
8803 3090 <sup>2</sup>	Other parts for use in aircraft/helicopters, other than civil.
8805 1010 <sup>2</sup>	Aircraft launching gear and parts thereof.
8805 1090 <sup>2</sup>	Deck arrestors or similar gear.
8805 2100	Air combat simulators and parts thereof
8805 2990	Other ground flying trainers and parts thereof, other than civil.
8906 1000	Warships.
9305 1000	Parts and accessories for revolvers and pistols.
9305 9100	Parts and accessories for military weapons within heading 9301.
9306 3010	Cartridges and parts thereof for revolvers and pistols within heading 9302 and for sub machine guns within heading 9301.
9306 3030	Cartridges and parts thereof for military weapons.
9306 9010	Munitions for military purposes and parts thereof — including bombs, grenades, torpedoes, mines and similar.
9307 0000	Swords, cutlasses, bayonets, lances and similar arms and parts thereof.

1: Information only available for extra EC destinations.

2: Dual military/civil use codes, information from Custom Procedure Codes, and knowledge of the trader, used to split military and civil trade.

---

Further information on classification is available in the Integrated Tariff and the Intrastat Classification Nomenclature (ICN) available on line at [www.uktradeinfo.com](http://www.uktradeinfo.com)

Details on the compilation of overseas trade in goods statistics are available in GSS (Government Statistical Service) Series No. 10: Statistics on Trade in Goods , available online from the Office for National Statistics ([www.statistics.gov.uk](http://www.statistics.gov.uk)).

## Annex D

### The United Kingdom's International Commitments on Export Controls in 2003

We have summarised in the following tables the arms embargoes and other defence export restrictions in place for all or part of the reporting period, to enable readers better to cross-reference licensing decisions against export restrictions in force at the time the licensing decisions were made.

Except where otherwise stated, the UK interprets the scope of UN (United Nations), EU (European Union), OSCE (Organisation for Security and Co-operation in Europe) and national arms embargoes as covering all goods and technology on the Military List (see Annex A).

The up-to-date version of the List of Sanctions Regimes and Arms Embargoes implemented by the UK to which is annexed the Summary of Additional UK Restrictions on the Export of Strategic Goods is available on the Internet at [www.fco.gov.uk/sanctions](http://www.fco.gov.uk/sanctions)

**TABLE A: Arms embargoes in force in 2003**

Country	Details of Embargo	Dates in Force	Reference
Armenia	OSCE arms embargo	Throughout 2003	OSCE decision (28/2/1992)
Azerbaijan	OSCE arms embargo	Throughout 2003	OSCE decision (28/2/1992)
Bosnia & Herzegovina	EU arms embargo <sup>(1)</sup>  (Transfers of small arms to the police forces in Bosnia & Herzegovina not covered by the embargo.)	Throughout 2003	EU Declaration (5/7/1991); Common Position 96/184/CFSP (26/2/1996); Council Decision 99/481/CFSP (19/7/1999)
Burma	EU arms embargo. Ban on the supply of equipment that might be used for internal repression or terrorism.	Throughout 2003	Declaration by General Affairs Council (29/7/1991); Common Position 96/635/CFSP (28/10/1996); Common Position 2000/346/CFSP (26/4/2000)
Burundi	See Rwanda entry in Table A.		
China (Excluding Hong Kong and Macau Special Administrative Region)	UK interprets this embargo as covering: – Lethal weapons such as machine guns, large calibre weapons, bombs, torpedoes, rockets and missiles; – Specially designed components of the above and ammunition; – Military aircraft and helicopters, vessels of war, armoured fighting vehicles and other such weapons platforms; – Any equipment which might be used for internal repression.)	Throughout 2003	Declaration by Madrid European Council (27/6/1989)

Country	Details of Embargo	Dates in Force	Reference
Democratic Republic of Congo	<p>EU arms embargo (with specified exemptions from 29 September 2003) (Also see Rwandan entry)</p> <p>UN arms embargo on North Kivu, South Kivu and Ituri (with specified exemptions)</p>	<p>Throughout 2003</p> <p>From 28 July 2003</p>	<p>EU Declaration (7/4/1993); Common Position 2003/680/CFSP (29/9/2003)</p> <p>UNSCR 1493 (28/7/2003)</p>
Iran	<p>UK arms embargo – covers all goods and technology on the Military List as well as items entered in category O in Annex 1 of the European Decision 94/942/CFSP on the export of dual-use goods. This was replaced by EC Regulation 1334 on 28 September 2000. The embargo now covers items entered in category O (Nuclear List) in Annex 1 of that regulation. Exceptions:</p> <p>a) Goods essential for the safety of civil aircraft and air traffic control systems;</p> <p>b) Radioactive material in the form of sources for medical equipment and deuterium labelled compounds for medical use. Licences are not approved for any equipment where there is knowledge or reason to suspect that it would go to a military end-user or be used for military purposes. The exception is equipment which would normally require an export licence but is deemed licensable under the WMD end-use control (Articles 4.1 and 4.2 of the EC Dual Use Goods Regulation and Articles 4<sup>(2)</sup>(b)(i)(ii)(iii) and (c) and (d)(ii)(bb) of the Dual Use and Related Goods (Export Control) Regulations 1996 as amended) (3) and where WMD concerns are not subsequently substantiated.</p>	Throughout 2003	<p>Ministerial Statement (1/3/1993); Official report, column 273-274 (28/1/1998)</p>
Iraq	UN arms embargo (with specified exemptions)	Throughout 2003	<p>UNSCR 661 (6/8/1990) and subsequent resolutions, including UNSCR 1441 (8/11/2002) and UNSCR 1483 (22/5/2003)</p>

Country	Details of Embargo	Dates in Force	Reference
Liberia	UN arms embargo (with specified exemptions)	Throughout 2003	UNSCR 1343 (7/3/2001); renewed by UNSCR 1408 (6/5/2002); renewed by UNSCR 1478 (6/5/2003); revised by UNSCR 1521 (22/12/2003);
Libya	EU arms embargo	Throughout 2003	EU Declaration (27/1/1986)
Rwanda	UN arms embargo, except to Government of Rwanda through named entry points.  Exception for UN peacekeeping forces.  Embargo applies to sale or supply to neighbouring states (Burundi, Tanzania & DRC) if the arms and related material are for use in Rwanda.	Throughout 2003	UNSCR 918 (17/5/1994)  UNSCR 997 (9/6/1995)  UNSCR 1011 (16/8/1995)
Sierra Leone	UN arms embargo, except to the Government of Sierra Leone through named-entry points, and to UN Member States co-operating with the UN Mission in Sierra Leone (UNAMSIL)	Throughout 2003	UNSCR 1171 (5/5/1998); and UNSCR 1299 (19/05/2000)
Somalia	UN arms embargo, with specified exemptions. Original UNSCR 733(1992), amended several times, but UNSCR 1425(2002) widened the scope of the arms embargo to prohibit direct or indirect supply to Somalia of technical advice, financial and other assistance, and training related to military activities.	Throughout 2003	UNSCR 733 (23/01/1992), UNSCR 1356 (19/05/2001) and UNSCR 1425 (22/07/2002)
Sudan	EU arms embargo (does not apply to contracts entered into force prior to the date of entry into force of the embargo)	Throughout 2003	Common Position 1994/165/CFSP (15/3/1994)
Tanzania	See Rwanda entry		
Uganda	See Rwanda entry in Table A		
Zimbabwe	EU embargo on arms, and related technical training and assistance (both with specified exemptions), and on items that could be used for internal repression	Throughout 2003 <sup>(3)</sup>	Common Position 2002/145/CFSP (18/2/2002) (and amendments); Council Regulation 310/2002 (18/2/2002) (and amendments);

---

Country	Details of Embargo	Dates in Force	Reference
			Common Position 2003/145/CFSP (18/2/2003); Council Regulation 310/2002 (18/2/2003)
All Destinations	Arms embargo applying to Usama Bin Laden, the Taliban and Al-Qa'ida as defined by the UN list maintained on its website <sup>(4)</sup>	Throughout 2003	UNSCR 1390 (2002) & UNSCR 1455(2003) <u>Common Position 2002/402/CFSP</u> [Official Journal (OJ) L 139, May 29, 2002]; <u>Council Regulation (EC) No 881/2002</u> (OJ L 139, May 29, 2002)

Notes:

(1) Exempts transfers of equipment needed for demining

(2) From 28 September 2000 these Articles were superseded by Article 4.1, 4.4 and 4.5 of Council Regulation (EC) 1334 and Regulation 4 (3)(b), (c) and (d)(iii) of the Dual Use Items (Export Control) Regulations 2000 and Article 2 (2) of the Export of Goods (Control) Order 1994.

(3) The Foreign Secretary announced on 3 May 2000 (HC150) that all new export licence applications for arms and military equipment for Zimbabwe would be refused. The embargo was confirmed on 12 May when extant licences for military goods were revoked.

(4) See [http://www.un.org/Docs/sc/committees/Afghanistan/Afg\\_list\\_eng.htm](http://www.un.org/Docs/sc/committees/Afghanistan/Afg_list_eng.htm)

This list contains a summary only: It does not constitute legal advice, which should be sought if required.

**TABLE B — Other defence export policies and restrictions applying to all destinations in force in 2003**

Country	Embargo/Prohibited Goods	Date in Force	Reference
All destinations	All applications to export arms and other goods controlled for strategic reasons are considered on a case-by-case basis against the Consolidated EU and national arms export licensing criteria	Throughout 2003	Ministerial Statement HC 199-203W 20/10/00
All destinations	<p>The UK Government is a party to three sets of internationally agreed criteria governing the export of arms and military equipment. These are:</p> <ul style="list-style-type: none"> <li>- The guidelines for conventional arms transfers agreed by the permanent five members of the UN Security Council;</li> <li>- The principles governing arms transfers agreed by the Forum for Security Cooperation of the OSCE;</li> <li>- EU Code of Conduct on Arms Exports.</li> </ul> <p>All licence applications are considered case-by-case against these criteria.</p>	<p>Throughout 2003</p> <p>October 1991</p> <p>November 1993</p> <p>June 1998</p>	See website*
All destinations	Portable devices designed or modified for riot control purposes or self-protection to administer an electric shock, including electric-shock batons, electric shock shields, stun guns and tasers, and specially designed components for such devices, leg irons, gang-chains, shackles (excluding normal handcuffs) and electric-shock belts designed for the restraint of a human being.	Throughout 2003	Ministerial Statement HC 65 28/7/97
All destinations	As part of its policy to further strengthen the barriers against nuclear proliferation, the British Government has adopted a policy of full-scope safeguards as a condition of supply. This means that Britain does not allow the export of any significant new nuclear supplies or materials to any country, other than recognised nuclear weapons states, where there are any unsafeguarded nuclear installations.	Throughout 2003	FCO Statement 24/9/91

\*See export controls pages on FCO website [www.fco.gov.uk](http://www.fco.gov.uk)

Country	Embargo/Prohibited Goods	Date in Force	Reference
All destinations	All anti-personnel landmines and their component parts	Throughout 2003	Ministerial Statement HC 72&135 21/5/97
All destinations	Blinding Laser Weapons	Throughout 2003	Ministerial Statement HC 360 11/2/99
All destinations	There is a ban on the transfer of MANPADS to non-state end users. MANPADS will only be exported to foreign governments or to agents authorised by a government.	18 November 2003	Ministerial Statement HC 29-30 18/11/03

**TABLE C — Restrictions for the maintenance of regional peace and stability in force in 2003**

Country	Embargo/prohibited goods	Date in force	Reference
Angola	The Government will not grant export licences for new military or dual use equipment for those countries intervening in the Democratic Republic of Congo (Angola, Burundi, Namibia, Rwanda, Uganda and Zimbabwe) where there is a clear risk that it would be used in the Democratic Republic of Congo. Applications for Standard Individual Export Licences to provide spares for UK equipment already supplied under pre-existing contracts will be examined on a case by case basis against our national criteria and the EU Code of Conduct on Arms Exports. In reaching decisions on such applications the Government will take into account the wider implications of forcing UK companies to break existing obligations. Taiwan	Exports of licensable defence-related equipment and technology to Taiwan are restricted and are considered on a case-by-case basis. In scrutinising licence applications, particular weight is given to the implications for regional stability.	Throughout 2003	Ministerial Statement HC 981 4/4/95 HC 349 4/6/98 HC WA66 8/6/98
Togo	See entry under "ECOWAS Member States"		
Uganda	See Angola entry		
Zimbabwe	The Government will not grant export licences for dual-use equipment where there is a clear risk that the equipment would be used in the Democratic Republic of Congo (see Angola entry above). (Also see Zimbabwe entry in Table A).	Throughout 2003	Ministerial Statement HC 184 & 185 9/2/00

This list contains a summary only: It does not constitute legal advice, which should be sought if required.

**TABLE D — Restrictions on non-conventional and dual-use items in force in 2003**

Country	Embargo/prohibited goods	Date in force	Reference
India	Licences for items listed on the Nuclear Suppliers Group Dual-Use List will be denied to nuclear and nuclear-related end-users in India, as will all other goods to these end-users which could contribute to the India nuclear programme.	Throughout 2003	Ministerial Statement HC 688 10/7/98
	The exception is equipment which would not normally require an export licence but is deemed licensable under the WMD end-use controls and where the initial concerns about WMD end-use are not subsequently substantiated.	Throughout 2003	Ministerial Statement HC 3W 3/7/00
Iran	The UK prohibits the export, without a licence, of certain dual-use goods to Iran, Iraq and Libya. Details of the goods covered are listed in the Dual –Use items (Export Control) Regulations 2000, as amended.		
Iraq	See Iran entry		
Libya	See Iran entry		
Pakistan	Licences for items listed on the Nuclear Suppliers Group Dual-Use List will be denied to nuclear and nuclear-related end-users in Pakistan, as will all other goods to these end-users which could contribute to the Pakistani nuclear programme.	Throughout 2003	Ministerial Statement HC 688 10/7/98
	The exception is equipment which would not normally require an export licence but is deemed licensable under the WMD end-use controls and where the initial concerns about WMD end-use are not subsequently substantiated.	Throughout 2003	Ministerial Statement HC 3W 3/7/00

This list contains a summary only: It does not constitute legal advice, which should be sought if required.

**Table E — Other restrictions and policies in force in 2003**

<b>Country</b>	<b>Embargo/prohibited goods</b>	<b>Date in force</b>	<b>Reference</b>
Argentina	Licences are only granted for exports that would not, at the time of application or in the foreseeable future, put at risk the security of UK Overseas Territories in the South Atlantic or UK forces operating there.	Throughout 2003	Ministerial Statement HC 721 17/12/98
Hong Kong Special Administrative Region	The Hong Kong Special Administrative Region (SAR) is a separate customs entity from the rest of China and implements its own independent trade controls, including for strategic goods. Licence applications are considered on a case by case basis but goods which would not be approved for export to the Chinese armed forces in mainland China (See Table A) will not be permitted for export for military end use in the Hong Kong SAR.	Throughout 2003	Ministerial Statement HC 225 14/1/98
Macau	Exports considered on a case by case basis but licences not issued for goods which would not be issued to mainland China (see Table A).	Throughout 2003	Ministerial Statement HC 73W 2/5/00

This list contains a summary only: It does not constitute legal advice, which should be sought if required.

## Annex E

### Fifth Annual Report according to Operative Provision 8 of the European Code of Conduct on Arms Exports

---

**Official Journal No. C320, 2003, Item 1 (2003/C320/01, 31 December 2003)**

#### *Introduction*

The European Union Code of Conduct on Arms Exports provides for a mechanism of information exchange and consultation among Member States in order to ensure the convergence of national export control policies.

Decisions by Member States on practices relating to the Code of Conduct and its application by Member States are recorded in subsequent annual reports. In the interest of transparency this year's report, following the precedent set in 2002, has a Compendium of Agreed Practices attached to it, listing all decisions made by the Working Party in a systematic way. Together with the Code itself the Compendium gives a comprehensive view of the Code and the way it is applied by Member States.

#### *I. Review of the Fifth Year of implementation of the Code*

The European Union Code of Conduct on Arms Exports can rightly be considered as the most comprehensive international arms export control regime. The high number of notified denials and consultations demonstrates the intense dialogue between Member States, contributing to the convergence of the policies and procedures on arms exports applicable in the Member States of the European Union.

The dialogue does not only have an internal dimension between Member States; it also takes place with non-member states, through troika meetings organized in the framework of the political dialogue of the Common Foreign and Security Policy of the European Union.

In this respect dialogue with the Acceding Countries and Associated Countries has been intensified, aiming at improving the implementation of the Code of Conduct which these countries have all accepted in principle. Changes and adaptations are required at the legislative level and in the training of the officials concerned. The contribution which Member States may offer in this respect is crucial.

On 28 May 2003 the Czech Republic hosted in Prague the Fourth Informal Experts Meeting on Arms Exports Policies where issues relating to arms brokering, the implementation of the Code of Conduct and enforcement issues were discussed. National policies were described and the ways of implementing the European arms export controls were confronted. Personal contacts among experts were fostered.

The debate about the possible reinforcement of status of the Code of Conduct by transformation into Common Position has intensified following the adoption by the Council of Common Position 2003/468/CFSP of 23 June 2003 on arms brokering. This issue was echoed in the explanatory statement of the Committee on Foreign Affairs, Human Rights and CSFP of the European Parliament, concerning the Council Fourth Annual Report of the Code of Conduct, which reiterated the call for the Code to be legally binding, and considered the possibility of it being transposed into national law. The Working Party examined the legal implications of the possible transformation of the Code into a Common Position, and is continuing its debate of the issue.

---

## *II. State of play concerning the implementation of priority measures identified in the Fourth Annual Report*

### **Harmonisation of national reports**

The process of harmonisation of reporting procedures has been continued, and further steps towards fully comparable statistical data have been made. It would appear that changes to national systems concerning the reporting of arms exports can only be made on the basis of a gradual approach. Progress has been achieved concerning the list of recipient countries, which now provides a more comprehensive coverage of the different destinations.

Concerning the statistical data, the Working Party has examined the situation arising from the inability by some States to provide data on both licences granted and actual exports.

### **Standardisation of end user certificates**

Having defined the core elements which should appear on an end-user certificate when it is required by a Member State, in connection with the export of items included in the "Common list of military equipment", Member States continued to examine ways to further standardise such certificates.

In this respect, the set of compulsory details has been enlarged and additional elements to be included have been discussed.

### **Arms brokering**

In June 2003, following final approval by the COARM Working Party, the Council adopted a Common Position on the control of arms brokering. The joint commitment is a formal confirmation of some of the agreed practices listed in the appendix of the Fourth Annual Report. It also contains some criteria and definitions which Member States are to include in their national brokering legislation.

For brokering activities, a licence or written authorisation should be obtained from the authorities where activities take place, and, where required by national legislation, where the broker is resident or established. Member States will assess applications for a licence or written authorisation for specific brokering transactions against the provisions of the European Union Code of Conduct on Arms Exports.

Member States may also require brokers to obtain a written authorisation to act as brokers; they may also establish a register of arms brokers. Registration or authorisation to act as a broker would in any case not replace the requirement to obtain the necessary licence or written authorisation for each transaction.

The Working Party has further agreed that the Common Position should be implemented via the mechanism laid down in the Code of Conduct. However, not all Member States have a legislation on brokering already in place; it has therefore been suggested that a notification and consultation system should operate on a mandatory basis only for those Member States that have the required laws.

### **Improving the denial circulation system**

The circulation of denials is one of the most important ways through which the aims of Member States' export control policies, and the convergence of those policies, can be achieved. To this end, a "User's guide", intended to clarify Member States' responsibilities in this area, and lead to enhanced exchange of information, has been agreed by the Working Party. The Guide will not replace the Code of Conduct, but gives guidance on interpreting its operative provisions with regard to the definition of a denial, the notification procedure and the information it should contain, the revocation of a denial notification, and procedures for consultations. It is intended for use primarily by licensing officials.

---

The creation of a central denial database for export licence denials has been decided, setting up a resource for all Member States to use, in order to search for specific denials.

### **Promoting the principles and criteria of the Code among non-member countries and international organizations**

The Code of Conduct, its aims and procedures are constantly presented and proposed in the framework of political dialogue with non-member states and international organizations.

In this respect, the COARM Working Party has agreed in principle to share information on denials on an aggregate basis with selected non-member countries. Each decision in this respect will be taken on a case-by-case basis, inter alia any mutual obligations with the country or countries involved which might arise are currently under examination.

### *III. Further questions addressed by the COARM working party in connection with the implementation of the Code of Conduct*

#### **EU common list of military equipment**

A new and updated version of the EU Common military list has been approved (the last one dating back to June 2000). In the new version the same numbering system is used as in the Wassenaar Arrangement Munitions List. This new version of the EU list takes into account the Wassenaar Arrangement list. Member States have agreed that future amendment of the Wassenaar Arrangement Munitions List will not automatically entail amendment of the EU Common List. The list has been submitted to the Council and will be published in the "C" Series of the Official Journal.

#### **Implementation of criterion 8 of the Code of Conduct**

A survey was initiated focusing on specific guidelines to assist Member States in applying the criterion, and which Ministries or Government Agencies are involved in this work. Other points that are currently being debated concern the indicators used to carry out the assessment required under criterion 8, which should take account of both the conditions prevailing in the importing country and the potential impact of the export, and the sources of information.

#### **Priority guidelines for the near future**

Five years of application of the Code of Conduct have shown that the fundamental elements of a common approach to the control of conventional arms exports by the Member States may be considered to be in place. However, there is still work to be done in certain areas that have not been addressed in the past, or where further work is necessary to consolidate and build on the results achieved.

The Member States have identified the following priority guidelines for the near future:

1. Continuation of the process of harmonisation of national reports in order to produce clearer, more transparent summary tables;
2. Follow up of the implementation of the Common Position on arms brokering, taking into account the different situations of the national legislation;
3. Consideration of ways to control the electronic transfer of software and technology associated with equipment on the Common List;
4. Continuation of the policy of promoting the principles and criteria of the Code of Conduct among third countries;

- 
5. Provision of practical and technical assistance, when requested, for the Acceding Countries, in order to ensure the harmonisation of policies on arms export control and the full implementation of the Code of Conduct principles and criteria;
  6. Full implementation of the simplified rules contained in the "User's Guide" and ensuring its full implementation, including the central denials data base;
  7. Development of dialogue with the European Parliament;
  8. Development of relations with third countries which have aligned themselves with the Code of Conduct;
  9. Review of the Code of Conduct.

## **COMPENDIUM OF MEMBER STATES AGREED PRACTICES WITHIN THE FRAMEWORK OF THE CODE OF CONDUCT**

### *I. Introduction*

Since the adoption of the Code of Conduct in 1998, the Member States of the European Union have agreed on a number of practices relating to the Code and its operative provisions with a view to clarifying, detailing and sometimes broadening the scope of the Code's principles and operative provisions.

Agreed practices have been reported in the annual reports on the operation of the Code of Conduct by Member States.

This compendium gathers them in a systematic way and will be updated and published on a yearly basis as an annex to the annual report. Together with the Code itself the compendium provides a transparent and comprehensive view of the Code of Conduct and its application by Member States. The compendium contains two parts. The first concerns general practices related to the operation of the Code and the second, practices linked to specific operative provisions of the Code. The year of publication in the annual reports is indicated in brackets. The Compendium does not cover issues under discussion or identified as priorities for future discussions.

### *II. General practices related to the operation of the Code of Conduct*

#### **1. Export of equipment for humanitarian purposes**

The issue of the desirability of allowing exports of controlled equipment for humanitarian purposes in circumstances that might otherwise lead to a denial on the basis of the Code of Conduct has been addressed by the COARM Working Party. In post-conflict areas, certain types of controlled equipment can make important contributions to the safety of the civilian population and to economic reconstruction. Member States have come to the conclusion that such exports are not inconsistent with the EU Code of Conduct. These exports, like all others, must be dealt with on a case-by-case basis, taking full account of the criteria set out in the Code. Member States will require adequate safeguards against misuse of such exports and, where appropriate, provisions for repatriation of the equipment (2001).

#### **2. Control of arms brokering activities**

In the context of the implementation of the Code of Conduct, the issue of arms brokering was raised and was discussed on several occasions by COARM. In accordance with the intention expressed in the second annual report, Member States have continued and deepened their discussions on the procedures for

---

monitoring arms brokering activities. To this end, they have reached agreement on a set of guidelines for controlling brokering that could be a basis for national legislation.

Residents and entities within the EU must be prevented from engaging in arms transfer activities circumventing national, European Union, United Nations or OSCE embargoes or export criteria of the EU Code of Conduct on arms exports; it is also desirable to establish the necessary tools for information exchange on both licit and illicit brokering activities, thereby enhancing cooperation within the EU with a view to preventing and combating arms trafficking. The controls should cover the activities of persons and entities that act as agents, traders or brokers in negotiating or arranging transactions that involve the transfer of arms and military equipment from one foreign country to another. These measures will also establish a clear framework for legitimate brokering activities.

In order to prevent loopholes stemming from different national approaches and to facilitate the work of Member States wishing to develop or further elaborate national regulations, some suggestions for controls on arms brokers were evaluated and the following conclusions were drawn.

For transactions involving the activities of buying and selling (where the arms or military equipment enter into the legal possession of the arms-brokering agent) or mediating (without direct acquisition of property), a licence or written authorisation should be obtained from the competent authorities in the Member State where the brokering activities take place or where the brokers are resident or legally established. Such licence applications should be assessed on a case-by-case basis against the criteria of the EU Code of Conduct on arms exports.

Additionally, Member States should seriously consider registering brokers or requiring them to obtain a written authorisation from the competent authorities of the Member State where they are resident or established. In the assessment of an application for authorisation to act as a broker, records of involvement in illicit activities should be taken into account. Such a system of registration or authorisation should not be construed as implying any form of official approval of brokering activities, a fact that is made clear also by the maintenance of a system of individual or global licences authorising transactions.

Legal controls in this important area should be supported by effective penalties. Member States could exchange information on legislation, registered brokers and brokers who have a history of proven involvement in illicit activities and could continue discussions in the COARM Working Party to further define, inter alia, possible criteria for the assessment of applications to register as a broker or obtain authorisation to act as a broker (2001).

In the framework of COARM, Member States have collected and discussed relevant data concerning the control of brokering in their respective national legislation. Member States have discussed ways of strengthening the political commitment to control arms brokering both among Member States and in a wider context (2002).

COARM agreed on a draft Common Position on the control of arms brokering, which was adopted by Council on 23 June 2003 (Common Position 2003/468/CFSP on the control of arms brokering) (2003).

### **3. Intangible transfers of technology**

COARM endorsed the importance of considering effective legal controls on electronic transfers of the software and technology associated with items on the common list, which is already done in certain Member States. It agreed to pursue its deliberations on this issue, taking into consideration the work done in the dual-use area (2001).

---

#### **4. Transit**

In those cases where Member States require a licence for transit or transshipment of any of the goods on the European Union Common List, the criteria of the European Union Code of Conduct on arms exports should be duly taken into consideration by Member States when deciding on applications for such licences (2002).

#### **5. Production of military goods under licence**

Concerned by the consequences of uncontrolled flows and destabilising accumulations of arms and other military equipment, and the proliferation of the technology and means to produce such equipment, the EU has adopted measures to consolidate and strengthen controls on arms exports, to promote international cooperation in this area and as a contribution to the prevention of conflicts. In this respect the EU recognises the special responsibility of arms exporting States. Recalling the EU Code of Conduct on arms exports of 8 June 1998, Member States have agreed that, when considering licence application for the exports of controlled technology or goods for the purposes of production overseas of equipment on the Common List of military equipment, account will be taken of the potential use of the finished product in the country of production and of the risk that the finished product might be diverted or exported to an undesirable end-user (2002).

### *III. Practices related to the operative provisions of the Code of Conduct*

#### **Operative provision 3**

EU Member States will circulate, through diplomatic channels, details of licences refused in accordance with the Code of Conduct for military equipment together with an explanation of why the licence has been refused. The details to be notified are set out in the form of a draft proforma at Annex A. Before any Member State grants a licence which has been denied by another Member State or States for an essentially identical transaction within the last three years, it will first consult the Member State or States which issued the denial(s). If following consultations, the Member State nevertheless decides to grant a licence, it will notify the Member State or States issuing the denial(s), giving a detailed explanation of its reasoning. The decision to transfer or deny the transfer of any item of military equipment will remain at the national discretion of each Member State. A "denial of a licence" is understood to take place when the Member State has refused to authorise the actual sale or physical export of the item of military equipment concerned, where a sale would otherwise have come about, or the conclusion of the relevant contract. For these purposes, a notifiable denial may, in accordance with national procedures, include denial of permission to start negotiations or a negative response to a formal initial enquiry about a specific order.

#### **1. Denial notifications and consultations**

A serial number indicating the country of origin and the number of the denial will be introduced for denial notifications (accompanied by the Community acronym of the Member State concerned and indication of the year).

Denials still subject to appeal under national procedures will be notified under the Code of Conduct with an indication to that effect.

Decisions to revoke extant licences will be dealt with in the same way as refusals of licence applications.

Denial notifications that have been circulated in the international export control regimes will also be circulated as Code of Conduct denial notifications if relevant to the scope of the Code.

---

A period of two to four weeks, from the date the request for consultations has been received is established for the consultation procedure envisaged in operative paragraph 3 of the Code, unless a different time period is agreed upon between the parties concerned.

When an arms embargo is lifted, denials solely based on the embargo will expire unless they are renewed by the denying country within a period of one month on the basis of other criteria of the Code.

Denial notifications should include the following particulars:

- country of destination;
- full description of the goods concerned (with their matching common list number);
- buyer (specifying whether the buyer is a government agency, police, army, navy, air force, or paramilitary force, or whether it concerns a private natural or legal person and, if denial is based on criterion 7, the name of the natural or legal person);
- description of the end-use;
- reasons for denial (these should include not only the number(s) of the criteria, but also the elements on which the assessment is based);
- date of the denial (or information on the date when it takes effect unless it is already in force).

A denial of a licence for a transaction deemed essentially identical to a transaction already subject to a denial notified by another Member State should also be notified.

The consulting State should always provide feedback on its final decision to the notifying State, irrespective of whether that decision is to grant or deny a licence.

On denials issued more than three years previously, even though the obligation to consult ends after three years, as laid down in the Code of Conduct, such a denial does not expire but could be the subject of exchanges of information (2000).

## **2. Dialogue on undercuts**

Licensing cases in which denial consultations lead to a positive decision could be of particular use in enhancing the dialogue on the interpretation of the criteria of the Code and thus in promoting convergence in the field of conventional arms exports.

Such cases might be based on developments concerning the destination in question and/or highlight different interpretations of the criteria. Member States deciding an undercut therefore agree to share, to the extent compatible with national considerations and on a confidential basis, information on the undercut decision not only (as specified in the operative provisions) with the State responsible for the relevant denial, but, in the context of COARM deliberations, with all Member States (2001).

## **3. The concept of "Essentially identical transactions"**

Discussion within COARM has led to the following common approach:

Daily operation of the Code's denial mechanism will result in an accumulation of experience that will provide the basis for a clear understanding of what is meant by an "essentially identical transaction".

---

This process will be facilitated by the adoption of a comprehensive approach to assessing transactions, and by initially using a broad interpretation of the concept of "essentially identical". The resulting consultation will provide the experience needed to gradually evolve a more precise definition of the term.

In order to accelerate the process further, the consulting Member State will, to the extent compatible with national considerations and on a confidential basis, endeavour to share with other EU Member States, in the context of COARM deliberations, information on the occasions in which consultations result in the conclusion that two transactions are not essentially identical. According to the logic of the consultation mechanism, these cases are not considered as undercuts (2000).

#### **Operative provision 4**

EU Member States will keep such denials and consultations confidential and not to use them for commercial advantage.

##### **1. Confidentiality in consultations**

Member States have looked at the arrangements for the consultation procedures and, in particular, problems relating to the necessary confidentiality of such contacts, which should not, however, thwart the objective of transparency underlying the Code of Conduct (2000).

#### **Operative provision 5**

EU Member States will work for the early adoption of a common list of military equipment covered by the Code, based on similar national and international lists. Until then, the Code will operate on the basis of national control lists incorporating, where appropriate, elements from relevant international lists.

##### **1. The Common List**

The common list of military equipment was adopted by the Council on 13 June 2000 and published in the Official Journal of 8 July 2000. The Council decided to publicise the list in accordance with the principle of wide-ranging transparency underlying the Code.

Member States will now use the common list's references in denial notifications (with retroactive effect for earlier denial notifications), thereby clarifying and simplifying their information exchanges on these matters.

Denials on items subject to national controls by Member States, but not included in the above-mentioned list, will continue to be notified to all Member States. Member States that do not control these items will inform others.

The common list of military equipment has the status of a political commitment in the framework of the Common Foreign and Security Policy. In this sense, all Member States have made a political commitment to ensure that their national legislation enables them to control the export of all the goods on the list. The common list of military equipment will act as reference point for Member States' national military equipment lists, but will not directly replace them.

Since the list has an evolutionary character, Member States will continue updating it on a regular basis within the COARM Working Party.

Member States have made it known that they would endorse efforts for any items from the common list of military equipment which are not contained in the Wassenaar list, to be put forward for consideration within the Wassenaar Arrangement (2000).

---

COARM agreed that Presidencies should periodically convene special meetings (at technical expert level) with a view to deciding on the possible update of the EU common list in order to take account of modifications of the Wassenaar list and coordinating Member States' positions and agreeing on possible common proposals for modifications of the Wassenaar list (2002).

COARM agreed on an updated version of the common list to be published in the "C" series of the Official Journal, which takes into account changes agreed within the Wassenaar Arrangement since publication of the EU Common List in July 2000 (2003).

## **2. Controlling exports of non-military and police equipment**

COARM undertook to draw up a common list of non-military security and police equipment, the export of which should be monitored in accordance with criterion two of the code "Respect for human rights in the country of final destination". The Commission has now announced a proposal for a Community mechanism for controlling exports of non-military equipment that may be used for internal repression (2001).

The Commission presented a proposal for a Council Regulation concerning trade in equipment and products which could be used for capital punishment, torture or other cruel, inhuman or degrading treatment or punishment (COM(2002) 770 final of 30 December 2002). The proposal is presently being examined by the Trade Questions Working Party (2003).

### **Operative provision 7**

In order to maximise the efficiency of this Code, EU Member States will work within the framework of the CFSP to reinforce their cooperation and to promote their convergence in the field of conventional arms exports.

## **1. Appeal procedures**

The COARM Working Party discussed possible appeal procedures relating to exports of military equipment (2001).

## **2. End-user certificates**

Member States agreed on a common core of elements that should be found in an end user certificate when it is required by a Member State, concerning the export of goods included in the Common List of military equipment. They also identified an additional set of elements, which might also be required in accordance with their national legislation.

The following are the minimal details to be set out in an end-user certificate:

- exporter's details, at least name, address and business name,
- end-user's details, at least name, address and business name. In the case of an export to a firm which resells the goods on the local market, the firm will be regarded as the end-user,
- final destination country,
- a description of the goods being exported (type, characteristics), or reference to the contract concluded with the authorities of the final destination country,
- quantity and/or value of the exported goods,
- signature, name and position of the end-user,

- 
- the date of the end-user certificate,
  - end-use and/or non re-export clause (2002),
  - indication of the end-use of the goods (2003).

Moreover, in accordance with their national legislation, Member States can require, inter alia:

- a clause prohibiting re-export of the goods covered in the end-user certificate. Such a clause could, among other things:
- contain a pure and simple ban on re-export;
- provide that re-export will be subject to agreement in writing of the authorities of the original exporting country;
- allow for re-export without the prior authorisation of the authorities of the exporting country, to certain countries identified in the end-user certificate;
- an undertaking, where appropriate, that the goods being exported will not be used for purposes other than the declared use,
- an undertaking, where appropriate, that the goods will not be used in the development, production or use of chemical, biological or nuclear weapons or for missiles capable of delivering such weapons,
- full details, where appropriate, of the intermediary,
- if the end-user certificate comes from the government of the destination country of the goods, the certificate will be authenticated by the authorities of the exporting country in order to check the authenticity of the signature and the capacity of the signatory to make commitments on behalf of their government (2002).

### **3. Member States' Coordination**

Coordination within the European Union was exemplary at the United Nations Conference on the Illicit Trade in Small Arms and Light Weapons held in New York from 9 to 20 July 2001, where the European Union was the only group of States to submit an overall plan of action.

The EU also established a high profile at the Conference's preparatory committee meetings where it showed no hesitation in clearly articulating its ambitions in this area with one voice (that of the Presidency) (2001).

#### **Operative provision 8**

Each EU Member State will circulate to other EU Partners, in confidence, an annual report on its defence exports and on its implementation of the Code. These reports will be discussed at an annual meeting held within the framework of the CFSP. The meeting will also review the operation of the Code, identify any improvements which need to be made and submit to the Council a consolidated report, based on contributions from Member States.

#### **1. Harmonisation of national reports**

Member States agreed that the public report will provide data, broken down by recipient country, on the number and value of licences granted and the value of actual exports (if available). It will also provide the

---

total number of denials issued by each Member State and the total number of denials by all Member States for each recipient country and indicate the criteria invoked for denials and the number of times these criteria were invoked (2002).

#### **Operative provision 9**

EU Member States will, as appropriate, assess jointly through the CFSP framework the situation of potential or actual recipients of arms exports from EU Member States, in the light of the principles and criteria of the Code of Conduct.

##### **1. Consultations within COARM**

Any individual case of arms exports can be raised for discussion by delegations in the COARM Working Group, if it is considered to be useful for national licensing deliberations (1999).

Member States continue to exchange information on national interpretations of embargoes imposed by the United Nations, the European Union and the Organisation for Security and Cooperation in Europe.

Member States also concert on national policies to control arms exports to certain embargo-free countries or regions that are being closely monitored (existence of an internal or external conflict, human rights situation, etc.) (2000).

##### **2. The development of exchanges of information on national control policies for the export of arms to certain countries or regions regarded as requiring special vigilance**

A substantial body of denials, notified in the framework of the mechanism of the Code, is the concrete basis for such exchanges. The exchanges have also been supplemented by exchanges of views and information amongst all Member States undertaken on a regular and systematic basis within COARM, focusing on specific countries and regions (2001).

#### **Operative provision 11**

EU Member States will use their best endeavours to encourage other arms exporting States to subscribe to the principles of this Code of Conduct.

##### **1. Third countries**

Non-EU countries which have declared their adherence to the principles and criteria of the Code, and which have become involved in the restructuring of the European defence industry, shall be allowed to gain access to the evolving interpretation of the Code's principles and criteria. This shall not entail access to information made available in the course of the procedures referred to in the operative provisions of the Code.

The European Union and the Member States continue to encourage other arms-exporting countries to subscribe to the principles of the Code (2001).

The Code of Conduct was a primary subject of all political dialogue consultations with non-member States.

Consultations are ongoing with the United States of America on ways to follow-up on the December 2000 Declaration by the European Union and the United States of America on the responsibility of States and on transparency regarding arms exports (2002).

---

## **2. Involvement of third countries**

Member States agreed to share information on denials on an aggregate basis with Associated Countries and encourage these countries to similarly inform Member States about their denials. This information will be shared through the Presidency and contain the following details: country of destination, short description of equipment and military list rating of items, classification of end-user as government agency or private entity, and reasons for refusal (criteria of the EU Code of Conduct) (2002).

Note: For the complete report, please see

## Annex F

### The Consolidated EU and National Arms Export Licensing Criteria

(26 October 2000 — HC 199-203W)

An export licence will not be issued if the arguments for doing so are outweighed by the need to comply with the UK's international obligations and commitments, by concern that the goods might be used for internal repression or international aggression, by the risks to regional stability or by other considerations as described in these criteria.

#### *Criterion one*

##### **Respect for the UK's international commitments, in particular sanctions decreed by the UN Security Council and those decreed by the European Community, agreements on non-proliferation and other subjects, as well as other international obligations**

The Government will not issue an export licence if approval would be inconsistent with, inter alia:

- a) the UK's international obligations and its commitments to enforce UN, OSCE and EU arms embargoes, as well as national embargoes observed by the UK and other commitments regarding the application of strategic export controls;
- b) the UK's international obligations under the Nuclear Non-Proliferation Treaty, the Biological and Toxin Weapons Convention and the Chemical Weapons Convention;
- c) the UK's commitments in the frameworks of the Australia Group, the Missile Technology Control Regime, the Nuclear Suppliers Group and the Wassenaar Arrangement;
- d) the Guidelines for Conventional Arms Transfers agreed by the Permanent Five members of the UN Security Council, the OSCE Principles Governing Conventional Arms Transfers and the EU Code of Conduct on Arms Exports;
- e) the UK's obligations under the Ottawa Convention and the 1998 Land Mines Act.
- f) the UN Convention on Certain Conventional Weapons.

#### *Criterion two*

##### **The respect of human rights and fundamental freedoms in the country of final destination**

Having assessed the recipient country's attitude towards relevant principles established by international human rights instruments, the Government will:

- a) not issue an export licence if there is a clear risk that the proposed export might be used for internal repression;
- b) exercise special caution and vigilance in issuing licences, on a case-by-case basis and taking account of the nature of the equipment, to countries where serious violations of human rights have been established by the competent bodies of the UN, the Council of Europe or by the EU.

For these purposes, equipment which might be used for internal repression will include, inter alia, equipment where there is evidence of the use of this or similar equipment for internal repression by the proposed end-user, or where there is reason to believe that the equipment will be diverted from its stated end-use or end-user and used for internal repression.

The nature of the equipment will be considered carefully, particularly if it is intended for internal security purposes. Internal repression includes, inter alia, torture and other cruel, inhuman and degrading treatment or punishment; summary, arbitrary or extra-judicial executions; disappearances; arbitrary detentions; and other major suppression or violations of human rights and fundamental freedoms as set out in relevant international human rights instruments, including the Universal Declaration on Human Rights and the International Covenant on Civil and Political Rights.

---

The Government considers that in some cases the use of force by a Government within its own borders, for example to preserve law and order against terrorists or other criminals, is legitimate and does not constitute internal repression, as long as force is used in accordance with the international human rights standards described above.

*Criterion three*

**The internal situation in the country of final destination, as a function of the existence of tensions or armed conflicts**

The Government will not issue licences for exports which would provoke or prolong armed conflicts or aggravate existing tensions or conflicts in the country of final destination.

*Criterion four*

**Preservation of regional peace, security and stability**

The Government will not issue an export licence if there is a clear risk that the intended recipient would use the proposed export aggressively against another country or to assert by force a territorial claim. However a purely theoretical possibility that the items concerned might be used in the future against another state will not of itself lead to a licence being refused.

When considering these risks, the Government will take into account inter alia:

- a) the existence or likelihood of armed conflict between the recipient and another country;
- b) a claim against the territory of a neighbouring country which the recipient has in the past tried or threatened to pursue by means of force;
- c) whether the equipment would be likely to be used other than for the legitimate national security and defence of the recipient;
- d) the need not to affect adversely regional stability in any significant way, taking into account the balance of forces between the states of the region concerned, their relative expenditure on defence, the potential for the equipment significantly to enhance the effectiveness of existing capabilities or to improve force projection, and the need not to introduce into the region new capabilities which would be likely to lead to increased tension.

*Criterion Five*

**The national security of the UK, of territories whose external relations are the UK's responsibility, and of allies, EU Member States and other friendly countries**

The Government will take into account:

- a) the potential effect of the proposed export on the UK's defence and security interests or on those of other territories and countries as described above, while recognising that this factor cannot affect consideration of the criteria on respect of human rights and on regional peace, security and stability
- b) the risk of the goods concerned being used against UK forces or on those of other territories and countries as described above;
- c) the risk of reverse engineering or unintended technology transfer;
- d) the need to protect UK military classified information and capabilities.

---

*Criterion Six*

**The behaviour of the buyer country with regard to the international community, as regards in particular to its attitude to terrorism, the nature of its alliances and respect for international law**

The Government will take into account inter alia the record of the buyer country with regard to:

- a) its support or encouragement of terrorism and international organised crime;
- b) its compliance with its international commitments, in particular on the non-use of force, including under international humanitarian law applicable to international and non-international conflicts;
- c) its commitment to non-proliferation and other areas of arms control and disarmament, in particular the signature, ratification and implementation of relevant arms control and disarmament conventions referred to in sub-para b) of Criterion One.

*Criterion Seven*

**The existence of a risk that the equipment will be diverted within the buyer country or re-exported under undesirable conditions**

In assessing the impact of the proposed export on the importing country and the risk that exported goods might be diverted to an undesirable end-user, the following will be considered:

- a) the legitimate defence and domestic security interests of the recipient country, including any involvement in UN or other peace-keeping activity;
- b) the technical capability of the recipient country to use the equipment;
- c) the capability of the recipient country to exert effective export controls.

The Government will pay particular attention to the need to avoid diversion of UK exports to terrorist organisations. Proposed exports of anti-terrorist equipment will be given particularly careful consideration in this context.

*Criterion Eight*

**The compatibility of the arms exports with the technical and economic capacity of the recipient country, taking into account the desirability that states should achieve their legitimate needs of security and defence with the least diversion for armaments of human and economic resources**

The Government will take into account, in the light of information from relevant sources such as United Nations Development Programme, World Bank, IMF and Organisation for Economic Cooperation and Development reports, whether the proposed export would seriously undermine the economy or seriously hamper the sustainable development of the recipient country.

The Government will consider in this context the recipient country's relative levels of military and social expenditure, taking into account also any EU or bilateral aid, and its public finances, balance of payments, external debt, economic and social development and any IMF- or World Bank-sponsored economic reform programme.

---

**Other factors**

Operative Provision 10 of the EU Code of Conduct specifies that Member States may where appropriate also take into account the effect of proposed exports on their economic, social, commercial and industrial interests, but that these factors will not affect the application of the criteria in the Code.

The Government will thus continue when considering export licence applications to give full weight to the UK's national interest, including:

- a) the potential effect on the UK's economic, financial and commercial interests, including our long-term interests in having stable, democratic trading partners;
- b) the potential effect on the UK's relations with the recipient country;
- c) the potential effect on any collaborative defence production or procurement project with allies or EU partners;
- d) the protection of the UK's essential strategic industrial base. In the application of the above criteria, account will be taken of reliable evidence, including, for example, reporting from diplomatic posts, relevant reports by international bodies, intelligence and information from open sources and non-governmental organisations.

## Annex G

### Ministerial Statement on Man-portable Air Defence Systems (MANPADS) given by the Minister for Europe, Dr Denis MacShane on 18 November 2003

---

The Minister for Europe (Dr. Denis MacShane): Man-Portable Air Defence Systems (MANPADS) are surface to air missiles, usually shoulder-launched and fired by an individual or more than one individual, acting as a crew. The Government are committed to preventing them from falling into the wrong hands. They are designed for military air defence use, but, in the hands of terrorists, they have been, and could again be, used against civil aviation. The House will recall that in November 2002 in Mombasa terrorists only narrowly missed downing a commercial aircraft using such a weapon.

The international community is responding to this threat by a range of actions including strengthening export controls on MANPADS. The Prime Minister and other G8 Leaders, meeting at Evian in June 2003, expressed their deep concern about the threat posed to civil aviation by MANPADS, especially in the hands of terrorists or countries that harbour them. The G8 meeting agreed an Action Plan to Enhance Transport Security and Control of MANPADS. The Action Plan contains five measures, including an agreement to: "ban the transfer of MANPADS to non-state end users, MANPADS should only be exported to foreign governments or to agents authorised by a Government"

The Government assess export licence applications on a case-by-case basis against the Consolidated EU and National Arms Export Licensing Criteria. This involves considering amongst other factors, the risk of diversion or re-export under undesirable conditions, including to terrorists. The Consolidated Criteria also provide that the Government will not issue an export licence if approval would be inconsistent with the UK's international commitments regarding the application of strategic export controls.

Taking the criterion of UK adherence to international commitments into account, the Government will therefore consider any licence applications for the export of MANPADS to any non-government body in the light of the G8 Action Plan commitment mentioned above. This is consistent with our current export control practice.

In the case of any licence application for the export of MANPADS to Governments or to any agents authorised by governments, the Government's assessment under the Consolidated Criteria will also be informed by consideration of the proposed export

against the *"Elements for Export Controls of Man-Portable Air Defence Systems (MANPADS)"* agreed in the Wassenaar Arrangement on Conventional Arms and Dual-Use Goods and Technologies. These provide that exports of MANPADS may only take place if a range of strict conditions to prevent diversion or leakage of these weapons to unauthorised end-users are met. This document is available at <http://www.wassenaar.org/>. The Government are playing an active role in discussions to update and strengthen the Wassenaar document.

The Action Plan also commits G8 countries to "ensure strong national regulation of production, transfer and brokering" (of MANPADS). The Government's secondary legislation under the Export Control Act 2002, laid before Parliament on 31 October 2003, implements this commitment. This legislation introduces controls on the brokering of all equipment on the UK's military list, including MANPADS, where any part of the transaction is carried out in the United Kingdom. It represents a very significant step in preventing the involvement of UK persons in undesirable arms transfers. To counter the terrorist threat from MANPADS the Government will decide over the next few months whether anything further needs to be done to control brokering of these weapons.

## *Annex H*

### Ministerial Statement made by Participating States of the Wassenaar Arrangement, December 12, 2003

---

Ministers of the thirty-three Participating States in the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies are pleased that the quadrennial assessment of the functioning of the Arrangement has concluded with several important agreements to advance further the Wassenaar Arrangement's non-proliferation and international security and stability goals.

We wish to reaffirm the importance of the Wassenaar Arrangement as one of the pillars of multilateral efforts towards peace and stability. We believe agreements reached in the context of the Wassenaar Arrangement can play a critical role in preventing the diversion of legal arms transfers and in promoting responsible national export control policies for conventional arms and dual-use goods and technologies. In this context, we strongly endorse multilateral efforts to develop strict controls on the transfer of Man-Portable Air Defense Systems (MANPADS) that continue to pose one of the most serious threats to the safety of international civil aviation.

As we look ahead and consider future threats to international security and stability, we are convinced that countries committed to a stable international order must work together closely to prevent conventional weapons and sensitive dual-use technologies from being used to perpetrate terrorist acts. Terrorists must be stopped from diverting weapons from legitimate channels. Building upon the momentum developed during the 2003 Assessment, we believe that continued collaboration between the Participating States of the Wassenaar Arrangement will make a significant contribution to global security.
